THE PLANT BEHIND OUR PRODUCTS

Since 1835 John Chatillon & Sons have been making Scales. These scales have acquired a wide reputation because of their superiority of workmanship and construction.

The Universal Sale of CHATILLON SCALES

is constantly increasing. Our products stay sold. They have a number of imitators, but no superiors. All our scales are warranted to be accurate and perfect in workmanship. Our policy is quality products and fair prices.

Our complete line of BUTCHERS' CUTLERY

knives, cleavers, steels and cutlery for hotel, restaurant and kitchen use, has acquired a reputation for excellence. The users of our line of cutlery are universally satisfied.

For twenty-five years our skilled workmen have been producing this cutlery. The steel is especially adapted for the purpose—tempered by our own process. The high standard of quality that has made John Chatillon & Sons' products world-famous is maintained throughout this line.

Interesting illustrated catalogue upon request.

JOHN CHATILLON & SONS
85 Cliff St. - New York City

Quality is absolutely guaranteed.

When writing advertisers please mention Hardware and Metal.

UNIVERSAL

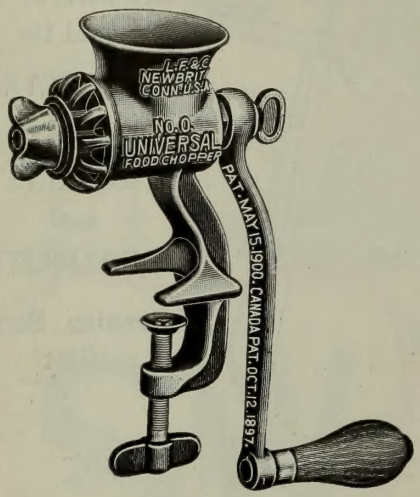
Food Choppers

Are profitable to handle and easy to sell. The constantly increasing demand for the UNIVERSAL is due to its well-known points of superiority—its self-sharpening, self-cutting beveled cutters — its strength and superior construction.

Fifteen years of consistent advertising has made UNIVERSAL Food Choppers known to housekeepers everywhere. It has become the standard chopper.

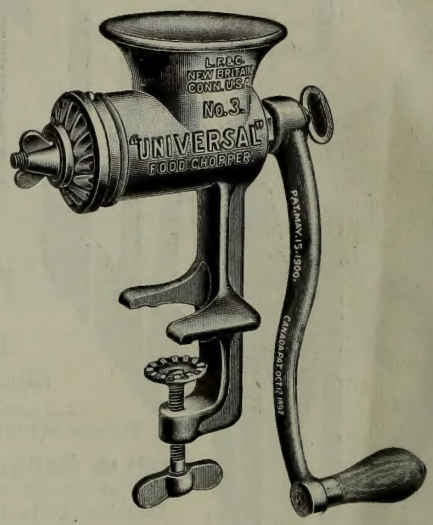
UNIVERSAL Food Choppers are made in four sizes, which allows a choice accommodating any style of housework, from the small family kitchen to the large hotel.

Each chopper is of the highest quality material and is heavily tinned, giving it a bright, clean appearance, which appeals to any purchaser.



No. 0

Smaller than, but capacity equal to, any imitations of No. 1. Tinned. All Parts Interchangeable Coarse, medium and fine cutters. Capacity, 1½ lbs. per minute. Height over all, 8 in. Diameter of Hopper, 2⅝ x 2¾ in. Diameter of Barrel, 1¾ in.



No. 3

Especially adapted for hotel and market use. Tinned. All Parts Interchangeable. Four cutters, very coarse to very fine. Capacity, 3 lbs. per minute. Height over all, 11 in. Diameter of Hopper, 4 x 4⅞ in. Diameter of Barrel, 2½ in. (Stuffing attachment will fit this chopper.)

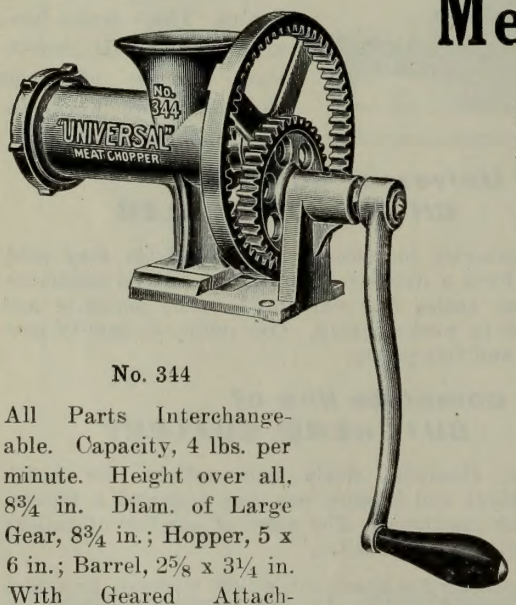
UNIVERSAL

Meat Choppers

Like UNIVERSAL Food Choppers the quality of the castings, knives and plates as well as the machinery and trimming is the best.

Each chopper is made with thumb screw or clamp, making it easily removable from bench or block. The cranks are larger than in other makes, giving greater leverage and requiring less work.

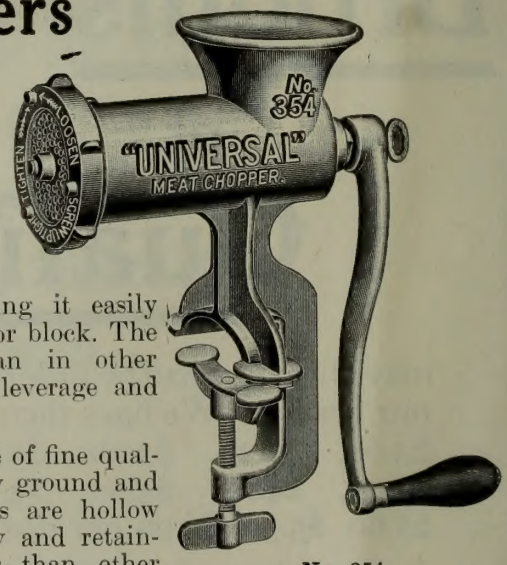
Knives and plates are of fine quality cast steel, uniformly ground and machined. The knives are hollow ground, cutting cleanly and retaining their edge longer than other makes.



No. 344

All Parts Interchangeable. Capacity, 4 lbs. per minute. Height over all, 8¾ in. Diam. of Large Gear, 8¾ in.; Hopper, 5 x 6 in.; Barrel, 2⅝ x 3¼ in. With Geared Attachment.

We strongly recommend the geared patterns as being the most easily operated Meat Choppers on the market.



No. 354

Largest of the clamp Meat Choppers. All Parts Interchangeable. Capacity, 4 lbs. per minute. Height over all, 15½ in. Diameter of Hopper, 5 x 6 in.; Barrel, 2⅝ x 3¼ in.

Wishing You All
A Prosperous
New Year

Your Prosperity as well as our own depends to a great extent on the buyer.

OUR OPINION IS

That Merchants with a little spare money will do well to place their orders early and take deliveries at once.

The comparatively high prices in force to-day will look very cheap two or three months from now.

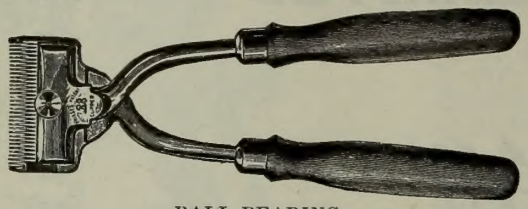
LEWIS BROS., LIMITED, MONTREAL

PRIEST'S HORSE and TOILET CLIPPERS

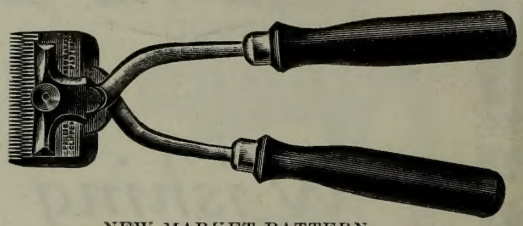
Made by American Shearer Mfg. Co.

present a complete line at a range of prices covering all requirements of the trade. They are all quality goods, and represent best designs and highest standards of workmanship, regardless of price.

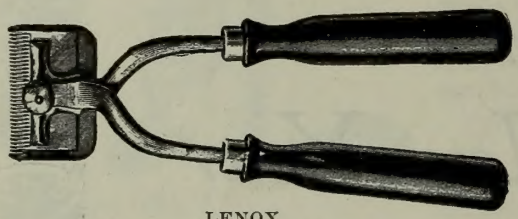
Some styles of hand Horse Clippers are illustrated below. All handles are heavy malleables, with threaded shanks, to keep the wood handles from pulling off. Spring tension on the adjusting nuts insures perfect contact at both ends of the cutting plates. Plates are perfectly ground and designed to cut hair, not break it off by main force.



BALL BEARING
Retailing at about $2.50.



NEW MARKET PATTERN
Retailing at about $1.75



LENOX

The Story of Plymouth Rope

Ninety-one years ago this spring the first Plymouth Rope was turned out, on the site where now stands the world's largest cordage factory, and by the company whose success has built that factory and kept it steadily busy making the same high grade of rope.

The story of this substantial business growth, in which Plymouth Rope has come to be recognized as the world's standard of quality, is an interesting narrative. And the story of the rope itself is still more interesting.

The series of advertisements, of which this is the first, will describe the things which make Plymouth the standard, will illustrate how that standard works out in actual practice, and will show what it means to you as a merchant.

Do All "Safety Devices" Really Safeguard?

The mere mention of the word "safety" ofttimes gives the impression of absolute infallibility. But, does *safety* always mean just that?

As you know, a pistol is cocked when the *hammer* is held back by the *sear*. To fire a pistol, the sear must be moved to release the hammer and allow it to fall. In some pistols this may be unintentionally caused by a jar.

Unless the "safety" positively blocks the sear, it is not a real "safety," but a dangerous substitute.

Cal. .32 and .380

A COLT is POSITIVELY SAFE in the fullest sense of the word. It means that the COLT GRIP SAFETY blocks the sear and locks the trigger, thus positively preventing the hammer from falling unless this grip safety is pressed in and the trigger pulled.

The Colt, therefore, is *positively locked against* accidental discharge.

Sell Colt's and Safeguard Your Customers!

Send for a supply of folders more fully explaining this important point.

Make Your New Year More Prosperous

— BY —

Selling Preston Metal Building Goods

Preston Safe Lock Shingles are already well known to your roofing customers, and by explaining to them personally, the lock-all-around construction, you can readily secure their orders and make a very handsome profit.

Preston Steel Ceilings and Sidewalls should be used in every new or reconstructed building in your town. They make a beautiful and everlasting finish, and are specially suited for churches, schools, theatres, stores and other public buildings. Every time you sell a Preston Ceiling you make three profits: (1) on the material; (2) on the erection; (3) on the paint that is used to decorate it.

Preston Eavetroughing and Conductor Pipe will please your tinners, because it is so easy to put up. Being made on steel dies, the fit is perfect and only a small amount of solder is required. If you are not already booked for Preston Trough and Pipe, let us quote you our contract prices now.

Preston No. 872 Ridge, supplied in 10-ft. lengths, sells at a price to compete with wood ridging, and still leaves a nice margin for you. Push this line in 1916.

Preston Plasterer's Corner Bead is what every houseowner wants, because it permanently protects the plastered corners throughout the house. Get our prices on this line.

Preston Wall Ties and Wall Plugs should be used on every brick or stone building. You can easily show contractors how they can save money and make a better job by using these goods. This line opens up a new and profitable field for you.

Preston Steel Sidings are good sellers in these days when repair work is so much in evidence.

We carry big stocks at all times and can ship promptly either by G.T.R. or C.P.R. Try us on your next order for metal building goods and find out what satisfactory service means.

Business Outlook: *By Manufacturers*

Expressions of Opinion on Business Conditions in Canada During the Past Year and the Outlook for the Year 1916—By Well-Known Canadian Manufacturers

IN accordance with past custom, Hardware and Metal is presenting to its readers in this issue, the views of a number of hardware manufacturers regarding business conditions during the year which has just closed, and the outlook for business during the New Year.

Owing to the many unprecedented conditions which developed during 1915, as a result of the war, there has been considerable speculation as to what the effect would be on Canadian industries. It is generally known that there has been a steady improvement in business during the past few months. There is a feeling in the wholesale and retail trade that the outlook for 1916 is exceedingly bright. The views of the manufacturers will prove interesting to all branches of the trade, at the present time.

During the past week many letters have been received by Hardware and Metal from Canadian manufacturers. The writers are representative of all branches of the trade. Extracts from a number of the letters are here appended:

The Sherwin-Williams Co. of Canada, Ltd., Montreal, Que.

"Like all manufacturers in Canada, aside from those that were working on munition orders, we did not find the year just closing to quite equal former years' volume of business. When we take into consideration the many difficulties that Canada had to surmount during 1915, we cannot say that we were disappointed with our net results, which we consider most satisfactory, under the circumstances.

We certainly feel very optimistic about 1916. There is no disguising the fact that there is a feeling of optimism prevailing from one end of the country to the other, to an extent that did not exist this time last year. Canada was blessed with good crops throughout the entire country this year, and especially in the three Prairie Provinces, where the crop was the best in the history of the country. This condition, together with the millions that are being spent in Canada for the manufacture of munitions, is, in our opinion, going to make the coming year a very good one indeed.

We are pleased to inform you for the first four months of our new fiscal year we show very handsome gains, compared with last year, and this is not only true as far as our Canadian business is concerned, but also as regards our London House. Their trade, both for home consumption and export, very much exceeds last year's business.

In conclusion we can only say that unless something unforeseen occurs, Canada, at the close of 1916, will be able to show a very substantial gain in trade and commerce over 1915."

Thanking you for the Compliments of the Season which we most heartily reciprocate, we remain,

THE SHERWIN-WILLIAMS CO. of Canada, Ltd.,
C. C. Ballantyne,
Vice-President, Managing Director.

The R. McDougall Co., Ltd., Galt, Ont.

"Regarding business of 1915, we are pleased to say that there was an increase over 1913 and 1914. We would not like to give an opinion for business for 1916, owing to the War, as 1916 business will depend greatly upon when the War will close. At the present time the outlook is favorable. We believe that the great quantity of grain that is moving in the West, cannot help but be a great advantage to Ontario manufacturers." We are,

Yours very truly,
THE R. McDOUGALL CO., LIMITED.

Channell Chemical Co., Ltd., Toronto, Ont.

"Answering yours of the 23rd instant, regarding our business views for the year just closing and our prospects for the year 1916.

The year closing has certainly been a very successful one for O-Cedar. The last few months greatly increasing, until at the present time, we are away ahead of any month in which we have done business previously in Canada. And looking on the prospects that we have in view for future business, we feel that it is going to be the largest we have ever experienced here.

There is no Pessimism anywhere about this building, and our Optimism for the success of O-Cedar is only balanced by the Optimism we have for the success of the Allies."

Yours sincerely,
CHANNELL CHEMICAL CO., LIMITED
A. T. Channell, President.

* * *

The Thos. Davidson Mfg. Co., Ltd., Montreal

"Yours of the 23rd to hand, and answer to your request for an expression of opinion regarding the business of the year just drawing to a close: we would say, it has been quite an improvement over 1914. The improvement from Winnipeg west has not been so marked as in the older parts of the country, but for about two months this part of Canada has also shown a considerable improvement. The trade for 1916 is somewhat problematic. We do not

see that there will be a very great increase in the North-West until immigration starts again, nevertheless we believe that business will be on a sounder basis owing to the very fine crops this year."

Yours truly,

THE THOS. DAVIDSON Mfg. Co., Limited.

J. Davidson, President.

* * *

Meakins & Sons, Ltd., Hamilton, Ont.

"Your letter of December 23rd received, asking us for an expression of opinion regarding business in the year 1915, and what we expect for 1916.

The year 1915 has been a good year as far as our firm is concerned in the brush business. In the fall of 1914, resulting from the war, the price of bristles advanced about 40 per cent. average, and our prices made up for 1915, had to be governed by this advance. This advance has been maintained all through the year 1915. The price of bristles, after advancing so heavily in the fall of 1914, stayed practically stationary in price during 1915. We expected, on account of the heavy advance, that the brush business would be restricted, but shortly after the start of 1915 the British, French and Canadian governments began placing large contracts for brushes for the troops. We had, in consequence, to greatly increase our output in certain departments, which departments could produce shoe brushes, cloth brushes, hair brushes and shaving brushes, as well as other brushes of this nature for the use of the troops. In consequence the output of all the brush factories in Canada must have increased during 1915. Our own output increased very largely.

The business of the paint brush department also improved as each month of 1915 went by.

The Export Business also improved largely. This was not for goods of a military character, and we hope that some of this export business will stay permanently in Canada.

Taken as a whole the year 1915 has been a very successful one.

Regarding the outlook for 1916, we think prices of all brushes will again advance during 1916, unless the war comes to a sudden satisfactory solution.

Bristles come principally from two countries, Russia and China. Bristles were dressed in Russia principally in Poland and in the portion of Russia now occupied by the Germans. During 1915 bristles came out of Russia spasmodically in quite large quantities, but not anything like, in the aggregate, the usual shipments, but as the painting brush industry was poor all over the world, prices did not advance, but the quantities of bristles that will be shipped from Russia during 1916 will be, in our opinion, very small, while it looks as though the paint brush trade of the world is going to increase. In consequence we are looking for a serious shortage within the next few months.

The low exchange of Russian currency has been one great factor in keeping down prices.

Chinese bristles have been advancing slowly on account of the higher price ruling for silver, they having advanced during December, 5 per cent. in this regard. The shortage of shipping is also going to be a very serious matter in the Chinese bristles. It is impossible at the present time to get a delivered price from China on these goods. Formerly they were quoted cost, insurance and freight paid delivered at New York. To-day they will only quote delivered at Chinese port, and the bristle merchant cannot very well quote on his goods until they are delivered in American, nor can the brush maker, buying direct from China, tell what his goods are going to cost him, and as freight rates are at present five times their normal rate, and still advancing rapidly, we are looking for a considerable advance in black or Chinese bristles during the coming spring, especially if the price of silver continues to advance.

Regarding the outlook for trade we think it will be exceptionally good in Canda during 1916, while we can see no reason why the export business in brushes should not increase.

Collections throughout 1915 have been good, and we think during 1916 we will collect in many accounts, especially in the Prairie Provinces, that have been outstanding from former recent years.

We can see no reason, for our part, for not looking forward to 1916 with a great deal of confidence." We remain

Yours truly,

MEAKINS & SONS, LTD.,

W. G. Meakins,

* * *

J. H. Still Manufacturing Co., St. Thomas, Ont

"Your favor of the 23rd inst. to hand, and in reply, business with us during the past year was considerably better than in 1914, and we have been able to keep our factory running full time throughout the year.

"With reference to the business outlook for 1916; we believe, on account of the big crops this year and the amount of money which is coming into Canada through the manufacturing of munitions, that Canada is going to have a very prosperous year. In fact, we believe it will be one of the biggest in the history of Canada. On account of the big crops in the West and the price which the farmer is receiving for his crops, it is putting the farmer in the West in a position to pay off his debts. This is going to bring the business in the West back to its normal condition and we believe that you will see a big boom out there this year. At the rate which we are now booking orders for future delivery, we expect to have one of the biggest years in the history of our business. We are,

Yours truly,

J. H. STILL MANUFACTURING CO.,

J. H. Still."

* * *

The Barton-Netting Co., Ltd., Windsor, Ont.

"Yours of the 23rd received, requesting our usual expression concerning business as the year draws to a close. We regret to inform you that the first part of the year did not come up to what we wished that it might, but the latter half shows a steady improvement, each month surpassing that of the corresponding one of last year, and the only reason that we can attribute to the lax in the first months of the year, is the hesitance or fear of the investor.

"They seem to have the wrong idea of commercial affairs, for as soon as prices advance, they seem to hold up and many of them stop business entirely. The builder says he will wait until prices go down. This is all wrong from any standpoint from which you may view it. No good business man will buy on a declining market, as it shows a declining demand, and when commodities are low, those who would buy or build have no money to buy or build with now.

"Now we still maintain that there are just as many people in our good Dominion as there ever was. They must all live just the same as in previous years. Our farmers were never in better conditions than at the present time, and if each one of us throughout this glorious country would make the same grand extra effort to contribute to the welfare of business in general as has been demonstrated in the cause of the Patriotic Fund, the prosperity of the problem would be solved.

"It is the honest duty of every good Canadian citizen to contribute to this fund, not only by circulating his

money, be it little or great, but to also contribute optimistic ideas in nothing but large quantities and to by no means tolerate or listen to any of an opposite nature.

"Touching for a brief moment on business in our city during the holiday season, the writer is highly gratified in stating that it has far surpassed any previous season, especially the sale of luxuries, such as musical instruments, jewelry, etc., which has jumped to an enormous increase of from 300 to 500%. With the above statement does it not look as if 1916 would be a record-breaker if we all loosen up and get busy?

Yours very truly,
THE BARTON-NETTING CO., LIMITED,
L. B. West, Treas. and Manager."

* * *

A. C. Leslie & Co , Ltd., Montreal, Que.

"The metal business on the whole during the past year has been exceedingly active, owing to the demands for war equipment, and also unusual demand from European Countries for materials which they required to draw from this Continent on account of the German and Belgian supplies being cut off, and mills in Britain and France being unable to produce very much for commercial purposes, owing to their shortage of labor, and the demands of the respective Governments. Prices of the metals, notably of spelter, antimony and aluminum, rose rapidly and at times price of spelter became unduly inflated, but even after the natural reactions all these metals stand at greatly increased prices, and in most cases are difficult to obtain promptly. Iron and steel responded more slowly, but during the latter part of the year advanced rapidly under exceptionally heavy demand, and all grades, especially those used directly or indirectly for munitions, are becoming very scarce. The usual channels of trade have been very largely altered, as the scarcity of labor and high cost of raw materials in Britain has made it impossible to supply Canada with most of the materials usually exported here and buyers have been obliged for the time being to turn to the American market. While the slackness in building and the high cost of metals has largely checked the demand for sheet metals, what has been lost in this way has been more than offset by the exceptional demand for everything entering into munitions, and the constant advance in prices has naturally profited those holding stocks.

"The outlook for 1916, so far as can be judged, is for continued activity in these lines and probably increasing scarcity of supplies. Buyers will be wise to secure materials well in advance, even at the present high level of prices.

A. C. LESLIE & CO., LIMITED.
W. S. Leslie,
President."

* * *

Richards-Wilcox Canadian Co., Ltd., London, Ont.

"In our opinion the outstanding feature of 1915 was the splendid response throughout Canada to the needs of the Empire. Canada stands to-day higher than ever before in the estimation of the world for her prompt and wholehearted rally to the duty of the hour and for her unexpected efficiency in getting results.

"So far as business is concerned, the present condition is good and the spring prospect better, which is particularly gratifying at this time, because Canada is thereby assured of the means to hold her end up throughout the remaining months of the war.

Yours very truly,
RICHARDS-WILCOX CANADIAN CO., LTD.,
Wm. R. Yendall,
Manager."

The Metallic Roofing Co. of Canada, Ltd.

"Replying to your favor of the 23rd inst., there has been a very heavy falling off in building operations in the various cities and towns throughout the Dominion, consequently less building material of all kinds has been used as compared with the previous year, which also showed a heavy falling off as compared with 1913.

"Unhealthy, speculative building has been practically stopped, which is a good thing for the community generally.

"So far as our particular line is concerned, the business done during the past year will compare favorably with that of 1914, mainly because we were not dependent upon city and town trade.

"In our opinion, there will be comparatively little building done in the cities and towns of the Dominion during the coming year, but in the country districts we are looking for a good trade, as the farmers are exceptionally prosperous, and not only require many new buildings, for which they are well able to pay, but there are also considerable repairs that will have to be made to old buildings.

"We manufacture a variety of specialties, for which there is a good demand, regardless entirely of building conditions.

"Owing to the high prices of raw material and the impossibility of advancing selling prices, and a more limited output, it is, we think, likely that manufacturers of roofing materials will have to be satisfied with very small profit during the coming year.

"In view of the prosperous condition of the farming community throughout the Dominion, business ought to show a substantial improvement in many lines.

Yours truly,
THE METALLIC ROOFING CO. OF CANADA, LTD.,
J. O. Thorn,
Managing Director."

* * *

The Consolidated Plate Glass Co., Toronto

"We have your letter of the 23rd regarding an expression of business conditions.

"The year 1915 has been one of quietness in the glass industry. Such a condition, however, had been anticipated. The glass jobbing trade reduced their stocks and conserved their resources to meet the diminished business. The depression was naturally severest in the provinces west of the Great Lakes, the cities there being already overbuilt prior to the commencement of the war. In the fall of 1915, the general improved condition of Canadian trade was reflected in the glass trade.

"The year 1916 should witness an increase in building construction. Canada, however, will continue to rely upon the United States for practically all of the glass required. The enormous increase in building in the latter country has brought a very sharp advance in prices and with the American factories already oversold, there will necessarily be high prices ruling in Canada in the coming year. With the returning prosperity to Canada and mortgage funds available at reasonable rates of interest, the trade anticipates with confidence a substantial increase in business for the new year.

Yours truly,
THE CONSOLIDATED PLATE GLASS CO.
of Canada, Limited,
Wm. R. Hobbs, President."

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVIII. TORONTO, JANUARY 1, 1916 No. 1

EDITORIAL BRIEFS

A HAPPY and Prosperous New Year.

* * *

RESOLVE NOW to attend the Hardwaremen's Convention at Toronto next month.

* * *

ACCORDING to the views of manufacturers, trade conditions in Canada are in a normal and a healthy state.

* * *

ONE OF the chief essentials in stock-taking is accuracy. This applies to measuring, weighing and counting. This process should be done as carefully as though the goods were being prepared for a customer.

MANUFACTURERS ARE OPTIMISTIC

ELSEWHERE in this issue we have published a number of letters from Canadian hardware manufacturers. The letters express the thoughts of well-known business men regarding business conditions of the past year, and the outlook for the future. The consensus of opinion is that the future outlook is bright and that the improvement shown during the past few months should continue during the New Year.

There has been an encouraging improvement in all branches of the trade during the past few months. The bountiful crops throughout Canada, especially in the West, have stimulated business to a remarkable extent, and a feeling of optimism prevails throughout the Dominion from coast to coast. This condition, together with the millions of dollars being expended on war orders, and the fact that there is little or no unemployment in the country, creates a feeling of confidence that will not be easily shaken.

Business throughout Western Canada will be on a sounder basis this year. Farmers are better able to meet their obligations, and the speculators have vanished. Retailers stocks are admittedly low, and there should be a heavy buying movement during the spring. A great many retailers have already booked heavily on many lines for spring delivery. Anticipating a continued improvement in business, and higher prices on many lines, the retailers have been attempting to cover themselves as much as possible. There has been no evidence of overbuying however, and during 1916, as during the past year, a large number of lines will be bought often, and in small quantities.

During the year just closed a great many new lines were taken on by retail hardware firms. Auto accessories, sporting goods, and household goods, were added to the stocks of many retail hardware firms. Other retailers who had previously carried these lines, but had not pushed them extensively, put new life into the departments, and by pushing sales of these lines greatly offset losses which would otherwise have occurred as a result of the slackness in the building trades.

Travelers handling specialty or side lines state that it is much easier now to interest the trade in new fast selling specialties, than it has ever been in the past. Not that retailers are buying indiscriminately. They are in fact, paying more attention to their buying than they ever have in the past. They are watching for all new lines which are good sellers and carry a fair profit. The demand for some of the heavy staples has been light for some time, and many retailers have learned that there is big money in selling many of the lines which in former years were not pushed to any great extent.

METALS STILL ACTIVE

ACTIVITY in ingot metals continues. There is a good and improving demand for all metals, and stocks are light. All metals are showing considerable strength and copper has made some sensational advances.

Manufacturers who use larger quanities of copper have closely followed the situation from to time to time past.

High prices for copper mean high prices on a great many hardware lines. Whether or not the present high prices will be maintained is problematical. A report from the New York office of *The American Metal Market* states that the market is in a very nervous state.

Producers are in complete control of the situation, and evidently feel safe in rapidly advancing the market. At the rate at which they have done so in

the past few days, it is not surprising that some of the trade are wondering whether they will not overdo the advance, and that we will wake up and find some day that in the excitement of the big British purchases, and the buying that has followed from consumers on the fear of having to pay higher prices if they did not act promptly, the situation has been overdone. If this proves to be so in the future we all know what to expect, and the reaction will be very disturbing. Whether there is an actual scarcity of copper, no one outside the producers knows. Copper is known to be scarce abroad, but if a scarcity really exists in the United States, then the consumption has been so much greater than realized that it is quite impossible to understand it.

Of course it is to the interest of producers to report a scarcity, and if their stocks are not small it is to their interest to make them appear so, and their enormous profits makes their road a very easy one.

There is good demand for antimony and quotations are firm. Spelter is firm and scarce for early delivery. Lead is strong and the tendency continues in favor of higher prices. The tin market is firm with an upward tendency.

A NEW SERIES

ELSEWHERE in this issue appears the first lesson of a series on pen lettering. The lesson is the thirteenth of a series prepared especially for HARDWARE AND METAL by R. T. D. Edwards. Commencing with this issue an entirely new phase of showcard writing is dealt with. It is very important that all who are following the series should pay particular attention to the lesson in this issue. The Edwards course has been followed closely by hundreds of hardware clerks and window trimmers in all parts of Canada. All branches of the trade, especially the retail trade, realize to-day more than ever before, the value and importance of good show cards. Their use in window displays, or in connection with interior displays, adds greatly to the attractiveness of the displays, and in addition, has tremendous sales creative power.

The series on pen-lettering, including the lesson in this issue, and a number of others which will follow in succeeding issues, covers one of the most important branches of modern show card writing. It is not absolutely necessary that the beginner should know anything about brush lettering, which was treated in previous lessons, but a student who has mastered brush lettering, will have less trouble in mastering the details in connection with pen-letterin.

One of the most important features in connection with pen lettering, is that this style of lettering is used very extensively in making small show or price tickets, such as are used in many of the largest hardware and department stores.

WHY EXEMPT CIVIL SERVANTS?

THE following was clipped from the question and answer column of a Canadian newspaper:

"There is no garnisheeing of wages of employees of the Dominion Government railways, but the Minister of Railways will not tolerate the non-payment of debts by employes, and on any such complaint being made to him the employe is warned and informed that he must either pay up or resign. It sometimes happens, of course, that a bill may be disputed, and the department does not undertake to settle disputes, but where there is no dispute or where judgment has been given no employe of a Government railway is permitted to evade his obligations by reason of the fact that the Garnishee Act does not apply to Government employes."

While it is very encouraging to know that the Minister of Railways will not countenance employes in his department shirking their just debts, nevertheless, it is difficult to understand why Government civil servants cannot be held responsible for their debts the same as other human beings in Canada. This is a bit of class legislation which should be worked off the Statute books. Are Government civil servants so constituted that they should have a different code of morals from other people? Is it right and proper that they can contract a debt and not have their wages subject to garnishee as other people?

This is a change for which retail associations all over the country should keep pounding away until a reformation is affected. The principle of the thing is entirely wrong and there should be no place in a free country like Canada for such legislation.

STOPPING THE PEDDLER

IT will be interesting to the trade to know that the county of York, Ontario, is putting through legislation to compel peddlers of coal oil, etc., to pay a $300 annual license. Already the second reading of the by-law has been passed and it is only a matter of time until every peddler in York County will have to pay $300 a year to peddle his wares in competition with local trade.

It is believed this will put an end to the small army of peddlers who frequent the roads of York. Naturally peddlers coming into a county can sell goods cheaper than the retail trade because they have little or no taxes to pay and very few of the overhead operating expenses which are included in the list of every retailer. Such expenses too, go to the maintenance of the community in which the retailer is located. At the same time the peddler does not give the service of the merchant who is ready and willing at all times to supply his customers with all their requirements.

It is to be hoped that the various counties of the country who have not already done so, will follow along similar lines to that of York.

Cardwriting Made Easy

by R.T.D. Edwards

THIRTEENTH OF A SERIES

ROUND WRITING PEN-LETTERING

THIS being the first lesson of this series in pen-lettering, it is advisable, for all who are following the course or who wish to begin it, to get busy immediately as this is an entirely new phase of the work. It is one of the most important branches of modern cardwriting. It is not necessary to know anything about brush work in order to learn pen lettering but the person who has gone through the brush-stroke Roman lettering should learn the pen work more quickly than one who has not. This is because the manipulation of the pen and the chisel-pointed brush for this class of letter, is similar and the letter formation is imbedded in the writer's mind. However, be you beginner or one who has been practising these lessons since their commencement, let us demonstrate how quickly you can master this form of work.

The pen lettering can be used on cards in any class of store—grocery, hardware, dry goods or stationery—all can use small price tickets or neatly lettered show cards and it is this class of work for which the pen is mostly used.

The round writing pens were first invented and made for the system of round writing, but their use for show cards purposes did not come into effect generally until a few years ago. Now they are being used so extensively that it is absolutely impossible for a cardwriter to come to a high state of efficiency without their use. The fact is that these pens have been a boon to the cardwriter. By their use we have a better formed and neater letter made in much less time than can be executed with the brush. This sums up in a few words their main points.

Pens in Various Sizes

These pens are to be had in eleven different sizes—one to six including half sizes—but the ones mostly used for cardwriting are one, one and a half, two, two and a half and three. Unless you are called upon to make some exceedingly small cards such as are frequently used in jewelry stores it is not necessary to get the smaller sizes. These pens are all blunt pointed, No. 1 being the broadest and No. 6 the narrowest. They are made from very thin steel and are tempered ready for use. Do not, as has been recommended by some cardwriters, burn with a match. This often weakens them, the points spread which renders the nib useless. It is absolutely necessary to use an ink retainer on these pens; if not the ink will feed down all at once and cause a blot. The ink retainer is a small brass arrangement which slips over the pen. See Fig. 1. These can be gotten from the same place where the pens are sold.

The ink for pen work is entirely different from that used for brush work. Use a heavy black carbon ink, not necessarily waterproof. You might think this expensive but a small bottle if kept corked while not in use will make a good many hundred cards.

The Chart Described

The principle of the manipulation of the pen is very similar to that of the chisel-pointed brush; the difference being that the brush is flexible while the pen is rigid. The heavy strokes are made with the broad side of the pen and the thin strokes are made with the narrow side. Take for instance, the making of the first letter "A." By turning the pen sideways with the handle pointing toward the right, starting at the top and drawing the pen downwards, you make the narrow line. To make stroke two you keep the pen in almost the same position but draw it down with its full width. Stroke three is made with the narrow side of the pen. The second "A" shows the curved cross bar. This is made by holding the pen rigid in the hand and drawing a wavy line. (See practice exercises).

The "B" is composed of three strokes. The pen must be held at the same angle for all three. No. 1 is drawn down with the full width of the pen. Keep the pen at the same position and start at the top of stroke one to make the loop (stroke two). If the pen is held tightly and not allowed to roll you will have no trouble in making the wide and narrow parts of either strokes two or three. Note that the end of stroke two meets stroke one nearer the top than the bottom.

The "C" is made entirely of two strokes. These must be practised to be made quickly in order to get them free and easy.

The "D" is another two stroke letter. It is made similar to the "B" with the exception that it has one large loop instead of the two smaller ones. The pen must be held as shown in Fig. I. This position holds good in practically all curved line strokes in this lesson.

"E" is a four-stroke letter. Stroke one is made with the full width of the pen while two and four are made with the narrow side. The centre stroke three is made by making a small narrow line and to get the spur, draw the pen downwards and turn handle to the left. This takes much practice and should be made many times. Stroke three on the second "E" is made similar to that of stroke three of the second "A."

The "F" is the same formation as the first "E" without stroke four.

The "G" is made up entirely of three strokes. Make sure to get the finish of stroke one curved upwards from the lower guide line. The "H" is a three stroke letter. Strokes one and two must be made equal distance apart and must also be kept at right angles with the guide lines. Care must be also taken to get the "I" at right angles with the guide lines. The straight part of stroke one of "J" does not touch the lower guide line but curves to the left to meet stroke two. The letter rests on the lower guide line where the two strokes join.

"K" is formed with three distinct strokes. Stroke

two join stroke one above the centre. Stroke three projects further to the right than does No. 2. Note the angle at which stroke three joins stroke two.

The "L" is composed of one thick and one thin stroke.

The "M" is one of the most difficult letters to make with the pen; stroke one being a narrow one must be made with the narrow side of the pen therefore in order to get this the pen handle must be pointing directly to the right and parallel with the guide lines. Stroke two is made with the broad side of the pen. The finish of this stroke is the most difficult part. This is accomplished by turning the handle of the pen more to the right so as to get the side of the nib to touch the lower guide line and not overlap when stroke three is to finish. The latter is made with the side and stroke four with the full width of the pen. Strokes two and three should touch the lower guide line midway between the strokes one and four.

"N" is another letter that needs much practice. Make the two outside strokes first, then join them up with stroke three. The end of the latter stroke must be manipulated the same as the end of stroke two of "M."

The "O" is composed of two strokes. Hold the pen tightly for this letter and join the strokes at the top and bottom.

The "P" is a repetition of the "B" without the lower stroke and except that stroke two joins stroke one in the centre instead of nearer the top.

The "Q" is the same as the letter "O" with stroke three added. This latter is made with one sweep of the pen. Much practice is required to make this successfully.

The "R" is the same as the "P" with stroke three added. Note where stroke three joins stroke two.

The "S" is a three stroke letter. The top part of this letter is smaller than the bottom. This letter needs much practice before it can be formed well enough for use on the show card.

The main thing to watch about the "T" is to see that stroke two meets stroke one squarely in the centre.

Practise this letter often. Stroke one and two must not come to the lower guide line but stop about one-eighth of an inch above it so as to allow stroke three room enough to curve upwards and still rest upon the lower guide line.

Stroke one of the "V" is similar to stroke two of the letter "M." In fact strokes two and three of "M" form a "V." Pay attention to the join.

The "W" like the "M" is very difficult to master. Pay attention to the joining up of these strokes. The

Round Writing Pen One Stroke Alphabet & Numerals

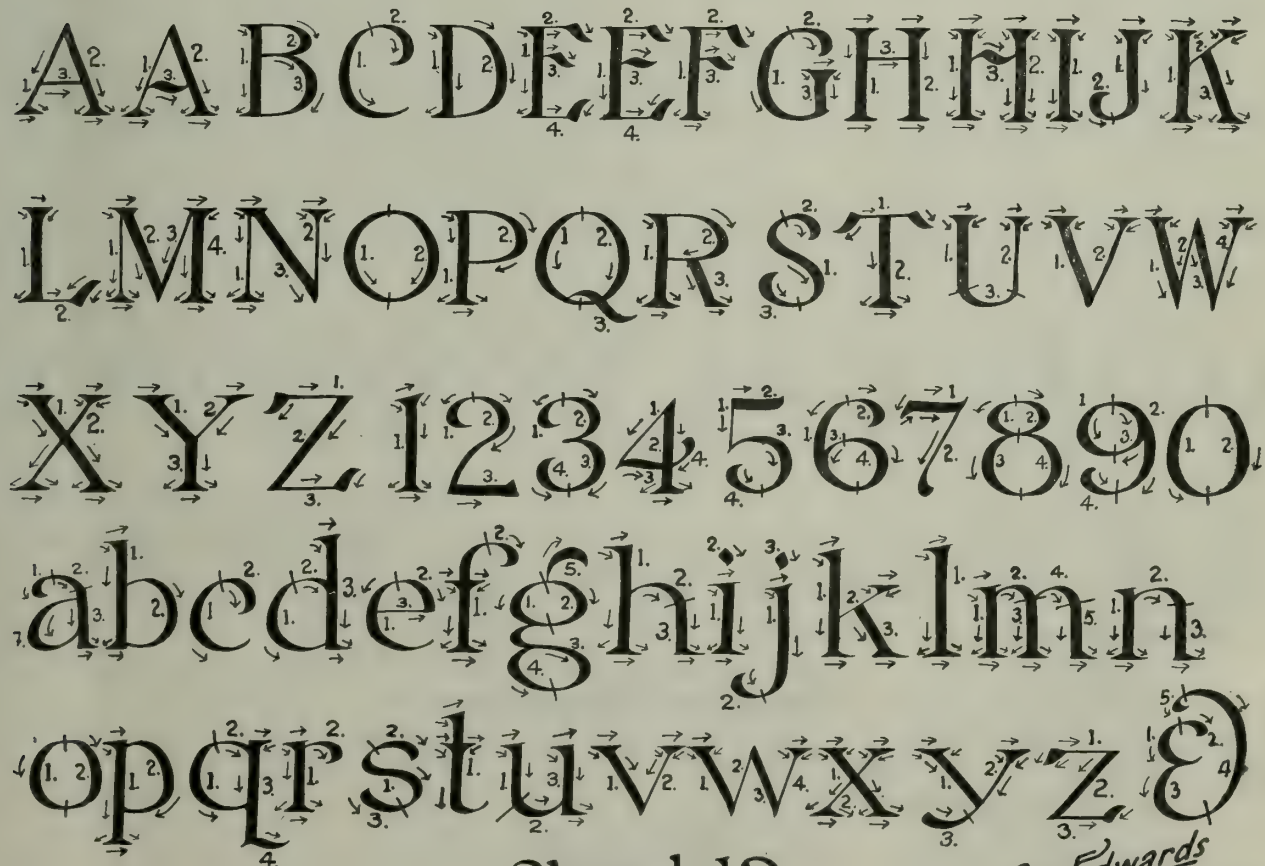

Chart 12

P.T.O. Edwards

centre point at the top must come midway between strokes one and four.

The two strokes of the "X" should cross slightly above half way between the guide lines. This means that the lower part of the letter is a little larger than the upper section.

The "Z" requires special attention. It is not used as often as other letters and for that reason needs much practice. It is just as necessary to form it correctly as any other letter, when it is required.

Making the Numerals

It is absolutely necessary to spend many hours in the practice of pen stroke numerals. A cardwriter is using these figures continually in his daily work, so if you wish to make a success of the work these must be accomplished.

The "1" is quite simple just one straight broad stroke with the spurs to finish it. The "2" is formed with three strokes. The second stroke needs much practice as the lower part is accomplished by turning the handle of the pen to the right. Stroke three is made with the pen in the same position. The "3" is made with four complete strokes. The bottom part of the figure is slightly larger than the top. Practice it often.

The "4" also needs to be practised many times. Pay special attention to the joining of strokes one and two.

The "5" is the most frequently made figure and must be formed properly at all times. The joining of strokes one and two needs much practice.

The "6" is made with four strokes of the pen. The loop of the bottom must not come above half way between the guide lines. Stroke two must not project beyond stroke four.

Stroke two of "7" is found by many to be quite difficult. This is made with the thin side of the pen, making use of the broad side at the end of the stroke. Much practice is needed.

The "8" is a letter that cannot be learned quickly. It is made entirely of four strokes. The lower section of the letter is much larger than the upper.

The "9" is just the same as the "6" only reversed.

The "0" is of two stroke formation.

The Lower Case Letters

The lower case pen lettering is used much oftener than the upper, therefore special attention must be paid to its formation, but when it is accomplished it can be made with much greater speed than the upper case.

As stroke four of "a" is a long one it needs lots of practice as does stroke two of the letter "b." The "c" is of two strokes and the same formation as the upper case letter. The "d" is made with three strokes. It requires special attention.

The "e" is a three stroke letter. Care must be taken to make stroke three parallel with the guide lines.

Strokes one and two of "f" must be joined up in such a manner to give the top of the letter a graceful appearance.

The "g" is the all curve letter, but is not as hard to form as it may at first seem. Both loops are about the same size. Stroke five is often varied as suits the writer's fancy.

The "h" is a three stroke letter. Note that stroke three starts about one-eighth of an inch below the upper guide lines so as to join up with stroke two.

You will have no difficulty with the "I" providing you keep it at right angles with the guide lines.

If stroke one and two are joined up properly the tail of the "j" will appear graceful. Practise this letter many times.

The "k" is similar formation to the upper case letter with the exception that stroke one is higher. You should have no difficulty with the "l".

The "m's" main down strokes should be equal distance apart. Practise strokes two and four of "m" and two of "n" often.

The "o" is the same as in the upper case alphabet.

Stroke two of "p" needs to be made many times before the beginner can get it graceful.

Stroke four of "q" is a similar one to stroke three of the second upper case "A."

The "r" is a simple letter to form. Pay special attention to stroke two. It must be made so as not to appear top heavy.

"s" is a duplicate of the upper case. The main part of the "t" is one complete stroke. The bottom part should be curved before touching the guide line.

Strokes one and two of "u" combined are similar to the lower part of the "t" only that stroke two extends further than does the t's tail.

The "v," "w," "x" and "z" are all duplicates of the upper case. Don't neglect to practise them. The

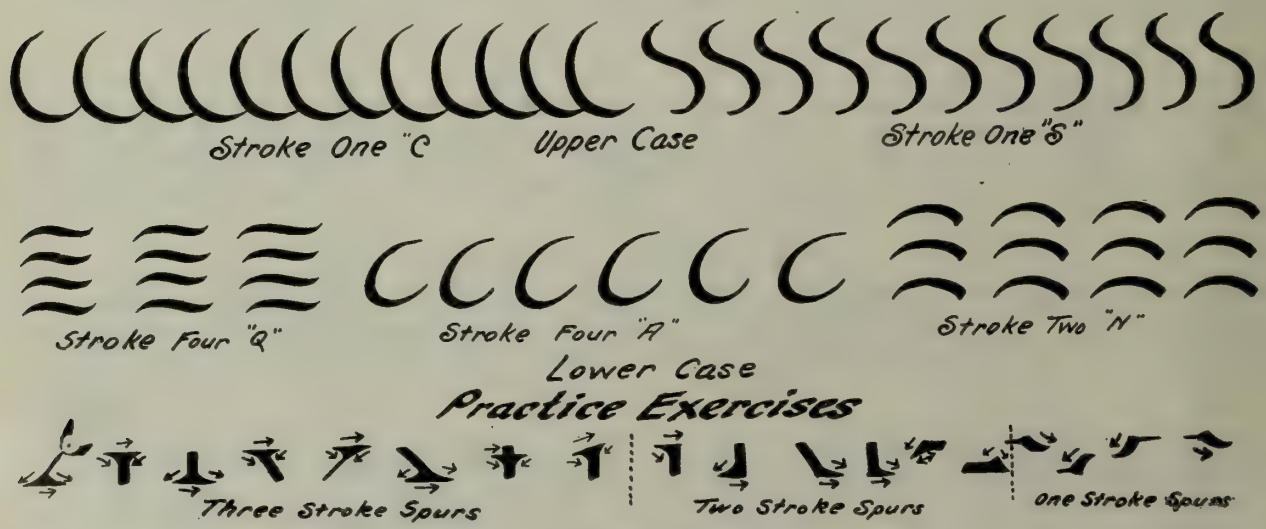

Fig. 2

lower case "y" is made up of three separate strokes. Strokes one and two join up about an eighth of an inch above the lower guids line and stroke three extends below the guide line.

This figure "&" is only one formation of dozens which are equally as good as this one that can be made with the single stroke round writing pen.

Study Spurs Collectively

You will have noticed that I scarcely mentioned anything about the spurs on the letters and figures. These were left out for a purpose, because I wanted them studied collectively. The lower section of Fig. 2 shows all kinds of spurs on plate 12 divided into three classes, one, two and three-stroke formation. Each spur represents one or more spurs used on figures or letters and should be practiced with great care. They must be made small and neat with sharp points. Don't try to make them with the pen ladened with ink, for you cannot. Best results are obtainable when the ink is low in the pen. The manipulation of the corners of the pen nib has a great bearing on this part of the work. However, practice is the best teacher. It is up to you. Watch the little arrows and make the strokes in the direction they are pointing.

Suggestion for showcard for window display of kitchen wares. The style of lettering used in preparing this card is described in the accompanying lesson.

SCARCITY OF BROOM CORN

Reasons for Advances in Price of Brooms—A Missouri View

A prominent Ontario broom man who recently spent several weeks in the broom corn districts in the United States has given Hardware and Metal some valuable information on the market:

"The causes of the advance in prices on brooms," he says, "are numerous. Last spring was cold and wet. The seed had to be replanted several times in many cases and the farmers got tired of taking any more chances and gave up planting broom corn, so that the acreage was cut 50 per cent. below normal. Then the summer was wet and cool; this retarded the growth. The rainy weather continued on into the harvest so that 70 per cent. of the crop is damaged. The yield of the 1914 crop was much below normal and had manufacturers had to depend on the crop of that year for their supplies, prices would have been high last year, but the broom corn that was carried over from the former year kept the price of brooms about normal. This past year the manufacturers' warehouses were cleaned up and they have been compelled to pay high prices for broom corn on account of short crop. Consequently they have advanced prices 50 to 75c per dozen on brooms."

It is predicted that there will be further advances before the next crop is harvested. Not only broom corn has advanced, but wire and twine — in fact everything that goes to make up a broom. Then the war tax of 7½ per cent. amounts to 15 cents per dozen on brooms, so the manufacturer must add this amount to the cost of the brooms manufactured.

It is said that the crop of broom corn is lighter than it was in the year 1909 when brooms advanced one dollar per dozen.

A Missouri View

The following article is from the Kansas City, Mo., Times:—

"The broom manufacturing industry in America is facing a complete shutdown in four to six months. There isn't any more broom corn. The warehouses are empty, the manufacturers have only the slenderest of stocks and for the second successive year the crop is a complete failure. Everywhere is was rained out. Corn that sold for $85 a ton last January is quoted at $200 now, and cannot be bought at any price.

"Stocks on hand and what little new crop is available will last the factories not longer than May 1. From then until the 1916 crop is harvested the plants have no alternative but to close their doors.

"Twenty-eight of the largest broom manufacturers in the country met in special session at the Savoy Hotel yesterday to decide what to do. They compared notes all day and reached but one decision. That is to advance the price of brooms at once.

"This is the season of year when the broom manufacturer buys a season's supply and the speculator stocks up the warehouses. Last year, because of a crop failure, the manufacturers bought only from week to week and the speculator found no corn to speculate on. The second crop failure, this year, came with warehouses empty and no large factory stocks on hand. One broom corn warehouse in St. Louis with a rent of $500 a month has but one carload of corn in it. The United States imports but little corn normally — twenty-two tons last year. This year the war will prevent any importations.

"Aniline dyes, used to give the brooms a uniform color and to dye the red and green twine bindings, have advanced from $1 to $7 a pound. The grade of velvet used for banding cannot be bought and even the wire has jumped."

INSPECTION OF FERTILIZERS

The Inland Revenue Department recently completed an inspection of fertilizers offered for sale through the retail trade in Canada.

Four hundred and twenty samples have been analyzed, of which number three hundred and eighty-two are found to meet their guarantee, and sixteen others approximate closely to the guaranty, or contain compensating values in certain ingredients.

Eleven samples were offered for sale without the registration number appearing on the package, thereby violating the provisions of section 7 of the Act. It is certain that, in some cases at least, this omission is not the fault of the manufacturer; and the vendor must be held to be responsible.

Eleven samples fail to meet their guarantee. In three of these cases the deficiency is in the potash content. This component is particularly difficult to obtain, from the fact that imports from Germany, whose mines practically supply the world's potash are inhibited through war conditions. It may be proper to bear this fact in mind; and it is noteworthy that manufacturers have, for the most part, reduced the guaranteed content of potash in mixed fertilizers.

Personal

J. Walker, who handles the hardware end of the general business run by Messrs. Webster, Walker & Shearer Co., of Chaplin, Sask., went east last week to spend a holiday at his old home in Western Ontario.

T. Durgan, of Mason & Durgan, Nokomis, Sask., has been in Winnipeg on a buying trip.

What Other Papers Say

Items of Interest From Other Papers—In Each Instance Credit is Given to the Paper From Which the Item is Taken—Department Store Efficiency—Civil vs. Military Employment—Buying for the Army—The Bread Comes Home.

DEPARTMENT STORE EFFICIENCY

The Wall Street Journal

That this is the age of commercialism is even shown by visitors to New York city. Formerly they hastened to see Eden Musee, Grant's Tomb, and other notable landmarks. Now their first stop is at the department stores, and these seem to be an ever increasing source of astonishment. It is hard for the visitors to realize that under one roof everything one needs from the cradle to the coffin can be obtained, with no more difficulty or delay than the small-town merchant takes to wrap up a paper or pins. Few realize what constant supervision must be exercised over every department to see that losses are cut to the minimum, and that not only every article must be kept in its place, but also that warehouses must be well stocked to take care of any early calls for renewing stock.

An example of the high efficiency under which this class of stores is run can be seen in the fur storage department of one of the local stores. During the past summer they stored over 8,000 articles valued at nearly $1,000,000, and their total losses on the same were $26.

CIVIL vs. MILITARY EMPLOYMENT

British Trade Journal

How important it is that our export trade should not be unduly restricted by the enlistment of men for the Army has been fully admitted by Ministers on several occasions; and now we find that an advisory committee has been at work at the Board of Trade for some time past in preparing lists of occupations from which enlistment in view of the vital necessity of maintaining the trade of the country as far as possible in present circumstances. Already a large number of trades have been examined, and lists of the occupations which should be protected have been communicated to and accepted by the War Office. These lists are being sent to the representatives of the exempted trades concerned. Any man of military age following one of these occupations who desires to enlist will not be attested by the recruiting officer except under the condition that he continues in civil employment until called up. This arrangement has been made on the ground that the man can do better service to the nation in civil than in military employment.

* * *

BUYING FOR THE ARMY

From The Ironmonger (England)

Some light on the methods adopted in the buying departments of the War Office is afforded in the current issue of the English Review by a contributor who calls himself "A Salesman." The article is rather discursive; which detracts from its effectiveness. The writer covers a fairly wide field, but the transactions considered are of a comparatively trivial character, and are chiefly interesting as showing which way the wind blows. There is a rather good story of a deal in 20,000 articles which were submitted to the War Office buyers at 5s. 3d. per dozen. The War Office bought half the quantity at the price asked. Afterwards the same manufacturer offered the balance to the Department at a reduction of 4d. per dozen, and was informed that the War Office did not wish to take the 4s. 11d. quality, but would buy another 10,000 at the same rate as before. As the writer puts it, possibly the War Office did not think it "gentlemanly" to drive bargains. Several of the purchases discussed deal with clothing, but there are some references to Sheffield products. The writer is probably correct in thinking that no attempt at all was made to organize the cutlery trade in Sheffield, where he has discovered the most diverse and contradictory conditions, some firms being so full of Government work that their ordinary customers cannot get anything from them, while others, being without any Government orders, are drawing their competitors' customers to their own works. "Salesman" claims that this want of organization has led to unwarranted advances in prices, and he declares that, in spite of the scarcity of labor and the shortage of material, there has been no justification for advancing 7s. 6d. Army razors to 13s. per dozen. He quotes one specific case of a manufacturer who, being desirous of retaining at least some of his regular custom, doubled his profits against the War Office, in the expectation that the order would be given to firms more anxious to get the work than he was. The ruse failed, and the manufacturer has since had to curtail his business with his regular customers still further because the War Office has filled him up with contracts for some months.

THE BREAD COMES HOME

Advertising and Selling

Is the price-cutter, who has cast so much bread upon waters, getting it all back?

We have all believed that somehow the big chain stores were wonderful successes and great Goliaths of merchandising ability. A very grave question presents itself, to my mind, when I am reading constantly of the amalgamation of one chain of drug stores after another, and then, just to-day, of the Government's suit against one of the biggest combinations, for restraint of trade.

The connecting link of logic may be a bit shadowy, because it is not possible to get the real confidential figures, but one may make some very sharp-pointed inferences. Does price-cutting really pay, and do the strenuous efforts of chain store price-cutters to grab at the legitimately paid-for reputations of trademark advertisers really fool as many women as of yore? Do the price-cutters really get back the money loss and other loss attending the cutting of prices on standard goods, from the sale of nameless or private brand merchandise? Why should such frequent combinations and reorganizations be necessary if these famous price-cutters were really making good profit and holding their trade?

To turn the scalpel in the wound a little more viciously, are the shrewd women buyers putting it over on the price-cutting chain stores rather strenuously by buying all the cut-priced standard goods, but nothing else?

Some months ago a great woman's magazine frankly told its several readers, in discussing this price-cutting proposition, that women were fairly entitled, for economy's sake, to buy all the cut-priced articles of standard quality that were offered by price-cutters, but that they should be pretty foxy and refuse to buy the unknown, untried high-profit goods which it was the hope of the price-cutters that they would also buy while in the store. Has this kind of advice been bearing fruit, and do the price-cutting chain stores feel that the game is getting too strenuous to stand alone in competition with each other; and is the marked tendency of the price-cutters toward combination a general movement away from price-cutting?—a confession that they have pursued a blind alley?

Repeating that my grounds are possibly still shadowy for this conclusion, I submit it as being a mighty interesting supposition on fairly justifiable grounds of fact. If it is not happening now it is bound to happen some day.

ARE WE HATED ABROAD?

From New York Journal of Commerce.

There are many stories, derived more from private sources than from public expression, of a dislike of the United States growing up abroad, especially in the countries which are fighting for their national existence, or think they are. It is sometimes said that the Americans are hated, or that their Government is hated, because the nation does not take the side of either combatant, does not protest strongly enough against the atrocities of the other, and insists upon its own rights while profiting from the conflict instead of sharing in its sacrifices. Some people fear that this dislike, or "hatred," as they put it, will work against us when the war is over.

It is hard to maintain friendly relations and keep the good-will of those who are fighting each other. In their excited state of mind the people of each nation believe it is entirely right, and that the neutral looker-on should not only sympathize with it, but do everything to help and encourage it. But we cannot be on both sides, and to be on one would be to make an avowed enemy of the other, which it would not be wise to do if it can be avoided. It would virtually get us into the war and make trouble for us in the future, which would not be good for the country whose cause we had espoused any more than for ourselves. It might be bad for the peace of nations in the future. If by the strict neutrality of our Government we are getting ourselves disliked in England or France, we shall have to endure it as best we may until they get done fighting.

Then we do not believe the feeling will persist. When the excitement is over and people sober down and prepare for terms of peace, they will recover their balance and judge more fairly. Those of the Allies, with whose cause they know that we really sympathize, will find that we were justified in maintaining our neutral position and can do more for them for having done so, if there is opportunity for friendly service. Even the Germans, who from their point of view have more reason for disliking the United States and its people, may wake up to the fact that the issue was not what they thought it was, and be convinced that their Government was wrong. They may find Americans understanding them better than anybody else, and making due allowances. They will find that Americans were not against them as a people, but against their form and manner of government and the policy that brought on the war. Relatively speaking, they may find us ready to be friendly, if they will consent to peace on terms that will respect the rightful claims of all nations and all peoples. That is the only peace that can be permanent.

REDFIELD'S CURE FOR DUMPING

From American Metal Market.

If Mr. Secretary of Commerce Redfield ever originates any ideas that can be approved by ordinary men who are merely engaged in commerce the cases are very rare. We understand that President Wilson favored a system of anti-dumping duties such as has worked so successfully in Canada, but Mr. Redfield proposes something altogether different in his annual report to Congress, and we presume it is a Redfield proposition, though now the Administration will have to stand for it. He goes to Australia for an idea and adopts something that does not seem to have worked out particularly well there, the principle of making dumping unfair competition and proposing a remedy through the courts, with confiscation of the goods. Obviously this is absurd as compared with the simple and easily administered extra duty system. Mr. Redfield says: "In my judgment the matter is one which may more wisely be treated as an attempted wrong to be forbidden than as an economic matter that needs to be restrained." Perhaps we do not gather Mr. Redfield's idea precisely, but rather looks to us as if he objected to making the punishment fit the crime and wants to get back to the days when they undertook to hang men for any crime. The world at large has progressed since those days.

To put foreign producers under the dread of such drastic punishment as Mr. Redfield proposes is to make them timid about doing business in the United States. How could they ascertain precisely how rigid would be the interpretation of American courts in such cases? Does not Mr. Redfield know something about American court decisions himself? Certainly he admits we want imports, but the plain ordinary American business man accustomed to pick his markets and select cases in which he will sell and will not sell, recognizes at once that the fear of the operation of such a law would often discourage a foreign manufacturer, not disposed at all to "dump," much more than would a very considerable increase in the duty. Mr. Redfield's proposition may be described as one calculated to discourage the exportation of all goods to the United States, to take slim chances on the possibility of occasionally punishing some one guilty and to get the United States into all sorts of diplomatic snarls.

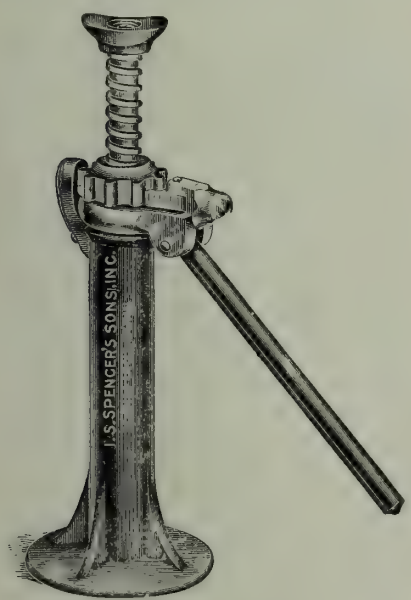
NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

QUICK AUTO JACK

J. S. Spencer's Sons, Guilford, Conn., have produced the Quick Auto Jack, an illustration of which appears herewith.

The makers state that lifting capacity, laboratory test, is 3,560 lbs.



Quick Auto Jack

The least height of the jack is 9¾ in., while the greatest height is 14¾ in.

The screw is made of ¾-in. Bessemer steel, accurately cut, three threads per inch, to which the nut is closely fitted, and designed for rapid operation with little effort. The lever is said to be of sufficient length for ample power, and still folds closely so as to occupy the minimum space in the tool kit. The cap, lever and base are finished in black japan. The nut, pawl and collar are finished in silver nickel.

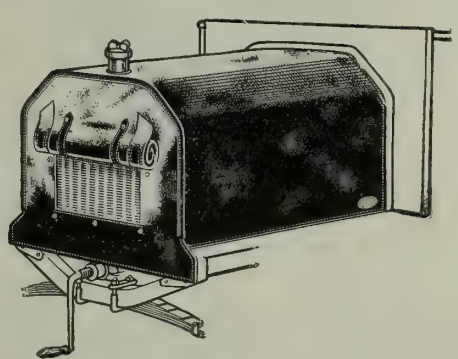
AUTO BODY DRESSING

The Permanent Ink Co., Ltd., 15 Wellington street north, Hamilton, Ont., offers to the trade "National" auto body dressing for preserving and polishing automobile and limousine bodies, hacks, coupes and all highly-finished carriages. The makers state that the dressing cleans as well as polishes and that new cars when treated regularly with the dressing will retain their original finish for years.

RADIATOR AND HOOD COVERS

Hopewell Brothers, Watertown, Mass., offer to the trade the Hopewell radiator and hood cover and Hopewell robes for automobiles. The makers state that the radiator and hood cover protects against cold, keeps the engine warm, and prevents the freezing of the water system. The cover makes easy starting in cold weather, and takes the place of robes or blankets, which are often stolen or lost.

The covers, it is said, are made of enameled cloth, lined with heavy padding, have adjustable ventilating flap in front to admit air in moderate weather. The covers are made in four styles. No. 1 cover is for radiator only. No. 2 hood cover is for both radiator and hood, all in one piece. No. 3 combination cover covers both radiator and hood, and is made in two pieces, which button together, so hood can be raised. No. 4 V-shaped radiator and hood covers (for Ford car only) can be furnished in any



Hopewell Radiator and Hood Cover.

of the above types. The covers are made for eight makes of cars.

"MAX" FARM SPECIALTIES

The Winnipeg Ceiling & Roofing Co., Ltd., Winnipeg, Man., realizing that the Western farmer will be spending more money this year, probably that he ever did before, have commenced the manufacture of a number of sheet metal farm specialties. For a long time they have been experimenting on stock water-tanks, having two objects in mind: first, reasonableness in price, and secondly, an article that was substantial, would give good service, and at the same time not cut the necks of the animals, or burst when frozen solid.

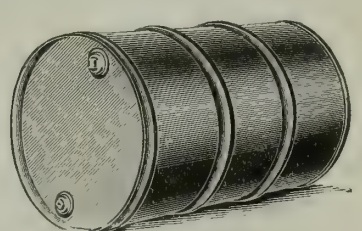
They are now turning out a stock watering-tank which they claim embodies these characteristics. It is made both circular and with round end, of galvanized steel, with stamped sides which allow for expansion and contraction, thus preventing cracking or splitting, as well as strengthening the tank.

"Max" Wagon Tank

Somewhat on the same principle, they are also making a wagon tank, which is fitted with two splash boards, manhole and cover, as well as draw-off plug. This fits any wagon box, and solves the problem of drawing water for threshing or stock.

Another new "Max" line is a shipping and storage barrel, for gasoline, coal oil, etc. In these days when many farmers drive their machinery by power and run automobiles, they require a strong, durable and safe receptacle for oils. The manufacturers claim that this is the very thing the Western farmer requires. The shipping barrel is painted red, and has a capacity of 47 gallons. The storage barrel is painted black, and carries 41 gallons.

Another "Max" specialty is the stock trough heater. By the use of heavy sheet



"Max" Shipping and Storage Barrel

steel for the body, with welded seams to make it water tight, they have produced a heater that is easily handled, easily heated, and which sells at a comparatively low figure. It has a feature worth noting in a self-dumping grate, which makes it unnecessary to disturb the heater in the trough when cleaning out ashes. It also has smoke pipe with spark arrester, and poker.

EVENTS IN THE TRADE

Enlists for Active Service

Preston, Ont.—Elmer Mock, of Bernhardt & Spalding's sales staff, has enlisted for active service. The firm and staff presented Mr. Mock with a gold wrist watch.

W. C. Mancarrow Ill

Calgary, Alta.—W. C. Mancarrow, of the Calgary branch of the J. H. Ashdown Hardware Co., wholesale hardware dealers, has been compelled, on account of illness, to take a holiday, and has left on a four months' trip for Honolulu.

Entertain Travellers

Winnipeg, Man.—The Canadian Credit Men's Association, in conjunction with the Sales Managers' Association, entertained travellers from various wholesale houses, at the Fort Garry Hotel, on Tuesday night. A splendid musical programme was provided.

Auto Accessory Department

The J. H. Ashdown Hardware Co., wholesale hardware dealers, Winnipeg, consider the time ripe for opening a special department for handling auto accessories. This will be in charge of Mr. Conley, of the sporting goods department.

Another Wetmore Store

Dougherty & Small, Swift Current, Sask., have sold their business to the Wetmore Hardware Co., and the store now comes under the management of Val. H. and W. M. Wetmore, of Regina and Vancouver, who are purchasing a new stock, and will occupy the premises the first of the year.

Brockville Travellers Elect Officers

Brockville, Ont. — The Commercial Travellers' Association met recently and elected the following officers for the ensuing year:—President, John Plewes; vice-president, W. M. Brouse; treasurer, M. Donley; secretary, F. L. DeWolfe; Board of Directors—F. E. Graham, S. A. Jackson, T. G. Cook, L. V. Johnston, J. P. Grant.

Credit Men Elect Officers

Winnipeg, Man.—L. J. Mylius, of the National Drug Co., was appointed president of the Canadian Credit Men's Association, succeeding W. L. Helliwell. T. D. McGee, of the Thos. Ryan Co., was elected vice-president. Two vacancies on the Board of Directors were filled by the appointment of W. R. Saults, of the J. H. Ashdown Hardware Co., and E. B. Frost, of Ogilvie Flour Mills Co.

New Firm

Fleming, Sask.—Dynes & Travis is the name of a new hardware firm opening up here.

Business Changes

Gray, Sask.—R. A. Rosebrugh has disposed of his hardware business to Eichenberger & Gillis Co. The new firm took possession on January 1.

Fire Losses

Liverpool, N.S.—The store and stock of the McClearn Hardware Co. was totally destroyed by fire.

St. John, N.B.—A portion of the stores of W. H. Thorne & Co., on Market Square, was badly gutted by fire. The loss is estimated at $100,000.

Ontario Incorporations

The Western Machining Company, Limited, capitalized at $40,000, head office, Port Arthur, to manufacture and deal in boilers, shells, iron and stell, etc.

Consolidated Steel Co., Ltd., capitalized at $100,000, head office, Toronto, to carry on the business of iron founders, tool makers, brass founders, etc.

Obituary

Halifax, N.S.—The death took place here suddenly from heart failure of John P. Longard, senior member of Longard Bros.

Toronto, Ont.—The death took place suddenly of Saxon F. Shenstone, treasurer of the Dominion Radiator Co. Mr. Shenstone was 37 years of age, and was born at Brantford, Ont.

Toronto, Ont.—Death came suddenly to John Knox Lindsay, financial manager of the Toronto branch of the Canadian Consolidated Rubber Co. Mr. Lindsay was 62 years of age.

Halifax, N.S.—The death occurred here recently of J. S. Nelson, who for many years was local representative of the Plymouth Cordage Co. Mr. Nelson underwent a serious operation a week prior to his death.

New Glasgow, N.S.—The death occurrel here recently of Graham Fraser, who for many years was closely identified with the steel industry in the province.

In the days when wooden shipbuilding was a great Nova Scotia industry the late Mr. Fraser commenced to manufacture the iron parts entering into the ships built at New Glasgow and Pictou. When that industry died out, he went into the manufacture of other lines of iron, and this gradually broadened out into the Nova Scotia Steel and Coal Co.

The first pretentious attempt at an industry was the Hope Iron Works, established in 1872, with a capital of $4,000, of which Forrest Mackay, one of the present Scotia directors was a partner. Mr. Fraser played an important part in guiding the growth of the industry, and when he left it in 1904 to become a director and director of works of the Dominion Iron and Steel Company, it was a big concern and a worthy monument to his toil and energy.

He retired from active work after a relatively short period of service with the Dominion Steel Company. In his retirement he took an active interest in the municipal affairs of New Glasgow and served as Mayor.

Western Canada Notes

Lance-Corporal MacDonald, formerly head shipper for the Winnipeg Ceiling and Roofing Co., Winnipeg, who was wounded at Ypres, is now doing light duty at Folkestone, England.

A. D. O'Brien and C. J. Johnston, travellers for the G. F. Stephens Co., Winnipeg, were in Winnipeg during the holidays.

Anderson & Anderson is the name of a new hardware firm opening up in Wadena, Sask. The members of the firm visited Winnipeg last week on a buying trip.

Two employees of the G. F. Stephens Co., of Winnipeg, enlisted last week, making a total of 22 who have left the head office for active service.

Travellers Elect Officers

Montreal, Que.—The thirtieth annual meeting of the Dominion Commer-

cial Travellers' Mutual Benefit Association, held in the association rooms, Board of Trade Building, empowered the new board to make special assessments to increase the rest fund to $25,000. Charles Roberts was in the chair.

Twenty-five death claims were paid during the year, and the financial report showed a balance on hand of $15,645.59, an increase of $2,454.09 over 1914. The new officers are:

President, M. Salomon; vice-president, W. J. Joyce; treasurer, Chas. Gurd; trustees, J. Hamilton Ferns, J. McLellan, L. J. Decelles, A. A. LaLvoie, F. S. Cote, David Watson, Maxwell Murdock, R. Lawrence, L. L. P. Bernard.

Winnipeg Travellers Elect Officers

Winnipeg, Man.—L. C. McIntyre is about to enter his twentieth consecutive term as treasurer of the organization. Mr. McIntyre was unanimously re-elected to his position at the annual election of officers.

The annual meeting was attended by a goodly number of members. They listened to a flattering financial report, which had as its climax the fact that the association has nearly $40,000 in the treasury at the present time.

John M. Scott was re-elected as president of the association, succeeding Chas. M. Holden, last year's president. Mr. Scott is raised from the vice-presidency. George R. Bolton is the new vice-president chosen. The office of secretary, which is now held by F. J. C. Cox, will not be decided on for the ensuing year, until the first meeting of the new board of directors, to be held in January, takes place.

The new directors chosen are: O. H. Dingman, J. E. Holland, A. Webber, E. M. Chantler, J. P. Minhinnicke, George Harvey, H. Turner, J. Snydal and G. C. Sarcker.

Postal Census of Manufacturers

The Census and Statistics Office, Ottawa, has sent out forms for securing information from manufacturers, in connection with the postal census of the manufacturers of the Dominion.

Manufacturers are requested to fill in the forms and return them by Jan. 21, 1916, the information to cover the year ended December 31, 1915, or the last financial year of the manufacturer.

The schedule will be trated as absolutely confidential by clerks sworn to secrecy, and will be used only in tabulations which will not reveal individual business.

Manufacturers are requested in the special interests of the industrial and commercial community, to co-operate with the Census and Statistics Office.

SALES MANAGERS FORM AN ASSOCIATION

C. H. S. Bamford Elected President of New Organization, With W. J. Wilson as First Vice-President

A new association, which has all the appearances of being a success and spreading right across the Dominion, was inaugurated in Winnipeg recently, and will henceforth be known as the Sales Managers' Association of Canada. At the first meeting opinions were expressed that the time had arrived for organizing such an association, which would foster and promote a feeling of

C. H. S. BAMFORD,

Sales Manager, J. H. Ashdown Hardware Co., Winnipeg, Man. Mr. Bamford was recently elected President of the sales managers' association, a new body recently formed in Winnipeg.

fellowship and good-will among sales managers, and on broad and equitable lines advance the welfare of trade conditions in relation to salesmanship and the management thereof.

Another meeting was called a few days prior to Christmas, when the election of officers took place. The first president of this body is a hardwareman—C. H. S. Bamford, sales manager of the J. H. Ashdown Hardware Co., Winnipeg—who is one of the best known business men in the West, having been there for over twenty years.

The position of vice-president went to another well known man in the hardware trade—W. J. Wilson, sales manager of the Winnipeg Ceiling and Roofing Co., Winnipeg. J. H. J. Murphy, sales manager of Royal Crown Soaps, Ltd., Winnipeg, was elected second vice-president. A. E. Burns is the secretary, and headquarters are in Winnipeg.

MARLIN ARMS CORPORATION BUYS THE MARLIN FIREARMS COMPANY

The Marlin Firearms Company of New Haven, Conn., established in 1870 by John M. Marlin, and owned and controlled exclusively by the Marlin family up to this time, has just been purchased by the Marlin Arms Corporation. The new organization is incorporated under the laws of New York State with a capital of $3,800,000, to manufacture firearms, explosives, projectiles, and military and naval supplies.

The incorporators are R. L. Bacon, New York City; Edward Park, Larchmont, N.Y.; and L. E. Stoddard, of New Haven.

The Marlin family has withdrawn, but the rest of the organization remains as before, with the addition of the new officers and directors, the executive officers being:

A. F. Rockwell, president and general manager, also president of the Bristol Brass Company, and formerly connected with the New Departure Manufacturing Company.

John E. Owsley, assistant general manager, in charge of executive work. Mr. Owsley was formerly general manager of the Eastern Steamship Company, and assistant to the vice-president of steamship lines of the New Haven Railroad System.

Elmer E. Neal, works manager, formerly superintendent of the Smith & Wesson factory at Springfield, and recently with the Remington Arms Company at Bridgeport.

The new corporation has already secured contracts for the manufacture of machine guns under the Colt's patents, and already extensive additions are being made to the buildings, machinery and equipment, and a large force of employees will be added. With the larger, better organization, the company will be able to handle quickly the large war orders for machine guns, and at the same time maintain a complete stock of Marlin sporting firearms, sufficient to take care of all trade requirements.

There is no intention whatever of discontinuing or reducing the regular Marlin line of repeating rifles and shotguns—the full line will be maintained, and the guns will be improved wherever possible—and new guns brought out from time to time, as occasion requires.

J. L. Landry, of Marcelin, Sask., passed through Winnipeg last week on his way to Quebec Province, where he will spend New Year's at his old home.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

Following the Christmas rush, there has been a period of quietness during the week. Travelers are in off the road until the New Year, and stock-taking is under way in most wholesale and retail businesses. One feature of December trade this year was the rush of business right up to the last day on which travelers were out. There is some apprehension regarding market developments in view of the recent increases, and the prospects of others. Rumors of proposed tariff changes have also caused uneasiness in some quarters. The metal markets are active, and the improvement in demand continues. Prices are firm, on most metals, with an upward tendency. Recent cold weather and heavy snowfalls have stimulated the demand for many winter lines of hardware. Among the price changes this week are advances in the price of stove bolts, screws, butts, pipe fittings, shot, chisels, planes, door checks, pipe cutters, wood screws, etc. Many advances are predicted for the near future. Booking for spring has been heavy and indicates that improved business conditions, and higher prices on many lines are expected by the retailers.

MONTREAL

MONTREAL, Dec. 31.—A remarkable feature of the closing period of the year in the hardware trade has been the rush of business right up to the last days on which the travellers were out before the holidays. Even on the day before Christmas there was a good showing of orders—some houses even finding that day as good as any in the past couple of months. And these orders were not booking orders, but practically all for immediate delivery, indicating that stocks are low and that with the assurance of a continued good demand, retailers are beginning to stock up again. No doubt there is some apprehension regarding the market developments in view of the recent general increases and the prospects of others and tariff changes as well. The indications are that as soon as the year is turned and the travellers start out again that there will be heavy booking for spring.

Generally speaking, the year has been a very satisfactory one and much better all round than was expected from the outlook last New Years. During the early months and through the summer there was a very fair movement considering the conditions, but it was only after the harvest and the circulation of the money from this source and from the manufacture of war supplies that buying commenced to be really active. Not only were stocks short and the demand fairly active, but there was a generally advancing market and this always encourages the retailer to stock up as protection. Then came a holiday trade that was much better than had been expected. Altogether the last three months of the year made a splendid showing. Factors for a continuation of these conditions are the spreading influence of more plentiful supplies of money from the sources stated.

As has been pointed out from time to time since the upward movement in the iron and steel markets commenced, there are advances being made in different manufactures of these metals as the manufacturers are forced to pay more for their raw material to turn out goods. Such advances may be expected to continue. As regards metal products such as sheets, pipe, etc., there are no changes this week, but this appears to be rather due to lack of demand than to any uneasiness in the situation and the outlook is that if there is heavy booking after the new year further advances will be made; in fact, the trade is looking for them.

This week there are new and advanced quotations for stove bolts, screws, butts, pipe fittings, shot, oakum, screw hooks and eyes, chisels, planes, gouges, door checks, pipe cutters, etc. In the metals, copper has been the active feature with a material advance, but generally the metals have been quiet over the holiday period, with buyers generally content to stand by and wait developments until the new year.

As to future developments, advances are being predicted on pipe, sheets, nails, wire, staples, screws, cow chains, and some other lines influenced by the iron and steel market. A new list on Stanley goods is being adjusted by the trade.

Tariff Prospects.—The prospects of a higher tariff, referred to in recent issues of Hardware and Metal, in the 1916 budget, will undoubtedly play an important part in the hardware trade during the early stages of the new year. Information on the subject is difficult to obtain. Some of the reports which are receiving attention come from American manufacturers who are evidently following the situation. These reports indicate that the increase will probably be 7½ per cent., making a total war tax of 15 per cent., while one opinion heard is that the increase will be to 20 per cent., which would mean a new tariff of 12½ per cent. The consensus of opinion is that there is almost certain to be something done by Parliament in this direction to increase revenue. A number of prominent Canadian firms are of the opinion that if a change takes place it will be an addition of 5 per cent. to the general tariff and 2½ per cent. to the British preferential.

Tin Recovers Strength.—Although tin has shown a fractional net decline in New York since last report, the after-holiday tone has been very strong on London influence. The recovery on Monday was ½c to 1c on spot. The shipping situation was given as a bullish factor in London, freight room from the east being scarce and moving upwards. The general attitude of traders seems to be to await until after the holidays to see what developments are. Montreal quotation: 45c-46c, steady.

Spelter.—There has been little change in the spelter situation either locally or in New York or London. A holiday spirit seems to rule for the time being and there has been a very small export movement. However, the general tendency is firm and it appears to be a waiting market with the extra demand for copper and the attendant excitement not reflected in the attitude of the buyers. There appears to be no effort to advance prices and the producers will undoubtedly be satisfied if things hold firm until the end of the year, after which an increased demand from consumers is looked for. Montreal quotation: 22c-22½c, steady.

Lead is Firmer.—The local lead situation is firmer, although there has been no change in the quotation of the American Trust. However, on the outside market at New York there are prices as much as 10c per hundred above the Trust, this strength evidently being the result of export demand, which seems to be more prospective than actual. Buyers are showing a general disposition to wait developments until after the turn of the year. Montreal quotation: 7½c-7¾c, firm.

Copper a Feature—The copper market has been the feature of the week, there having been rapid advances following the placing of a contract for 60,000 tons for the British Government at a price reported as 21c. Those interest-

ed in making an advance have taken full advantage of the state of mind into which many consumers have been thrown and every half cent in increase means millions to the producers in increased profits. The price has been run up to 22c and in every direction there are reports that producers have been sold out. However, there is at bottom some doubt as to whether actual consumption warrants the price developments and although the indications are that the situation will be strong for a month or so, a reaction is not unexpected. Montreal quotation: 24c-24½c, strong.

Antimony.—The antimony market is quiet and strong for spot and early deliveries, although New York reports that producers are offering larger quantities than consumers showing a willingness to take up at the price. Montreal quotation: 42c-45c, firm.

Aluminum.—The aluminum market is quiet, there being a very small demand with the season and high prices operating to discourage consumption. Local quotations are unchanged, but there is a slightly easier tone in evidence in New York. Montreal quotation: 68c.

Solder Still Higher.—Further advances are being made in the quotations for solder. There is a considerable range in prices but the basis is generally as follows:

Commercial half-and-half 27c-28c
Strictly half-and-half 29c-30c

Steel Market Still Stronger.—There is no relief in sight in the iron and steel situation so far as the trade is concerned. True, there has been some falling off in the buying demand, but as time passes the cost of the products of these metals is more and more affected as the higher costs go into effect with buyers who may have been protected for a certain period on their contracts. This condition of affairs also applies to the higher manufactures and many changes being made from week to week though the range of goods is an indication of the far-reaching effect of the rising market. On the different varieties of bar iron and the long list of items in steel, there have been no changes this week, but this may be rather the effect of the holiday lull in the buying than an indication of the market. The outlook appears to be that if booking is free after the turn of the year there will be further advances to protect stocks, the replacement of which is not assured. However, there is always a point as to when the top of a movement of this kind is reached for a certain measure of reaction is almost certain to take place.

Pipe on the Upgrade.—Although it is only a couple of weeks since the last material advance on black and galvanized iron pipe, the trade is looking for a further increase in the very near future. This is the direct effect of the continual advances in the iron and steel markets and if there is a strong buying demand after the first of the year as seems likely to be the case, higher prices are inevitable.

Plates Are Firmer.—As compared with last week the situation as regards Canada plates is firmer, the advance then recorded for several firms now being general. The market basis is as follows:

Ordinary, 52 sheets $3.50
All bright, 52 sheets 5.00

Sheets Very Strong.—With the rising market in steel, further advances in black sheets are looked for and these are likely to be encouraged after the first of the year when the spring booking will commence in earnest.

Nails and Wire.—The word has gone forth in the trade that there are to be important advances on wire products after the turn of the year. The indications are that this will not only affect plain and galvanized fence wires and hay wires, but nails, staples and other products. This is another evidence of the rising steel market.

Stove Bolts Up Again.—Another advance has been made on stove bolts this week. The action of this item of the bolt list is regarded as an emphatic indication of the rising market as changes in stove bolt discounts are usually few and very far between. The discount is now 80 per cent. as compared with 82½ per cent. formerly.

NEW DISCOUNTS ON WOOD SCREWS

Wood screws have again advanced in price, and the discounts now in effect at Montreal, Toronto, Hamilton and London are as follows:

Flat Head Bright.....85% off list.
Oval Head Bright..... 80% off list.
Round Head Bright....80% off list.
Flat Head Brass,... 62½% off list.
Oval Head Brass.....60% off list.
Round Head Brass ....60% off list.
Flat Head Bronze...57½% off list.
Oval Head Bronze...52½% off list.
Round Head Bronze. 52½% off list.

TERMS:—*2% Cash 30 Days.*

Orders will only be accepted with specifications and for prompt Shipment, and these Discounts are subject to change without notice.

New Stanley List.—There is a new list out on Stanley hardware. Montreal wholesalers are working on it at the present time, and it is expected that it will be put into effect shortly. In the meantime some houses have withdrawn their prices. The new arrangement will cover a general advance, but it is yet early to speculate as to the percentage.

Another Advance on Screws.—Nothing could give more emphatic evidence of the rising market for the higher manufactures of metals than the further advance on screws. Usually an advance on screws is an event, but recently there have been a number of very extensive character and the trade has it that there will be further increases in the near future. The following comparisons give an idea of the effect of the last change:

	New discount		Old discount	
Wood, F. H., bright	85	80	10	10
Wood, R. H., bright	80	80	10	10
O. H., bright	80	80	10	10
Wood, F. H., brass.....	62½	67½	..	..
Wood, R. H., brass	60	65	..	..
Wood, F. H., bronze	57½	60	..	..
Wood, R. H., bronze.....	52½	52½	..	..

Butts.—Advances on butts and hinges are looked for and already there has been a stiffening of the concessions with the result that discounts are being closely adhered to. The discount on heavy tee and strap is 37½ per cent., and on light tee and strap 65 per cent. On butts: Nos. 804 and 840, 65, 10 per cent.; Nos. 800 and 838, 67½ per cent.; No. 802, 60 per cent. and Nos. 810 and 814, 62½ per cent.

Fittings.—There is a general increase on fittings on the Montreal list, the new discounts being as follows: Canadian malleable, 37½ per cent.; bushings, 65 per cent.; plugs, 65 and 5 per cent.; flanges, 67½ per cent; unions, 65 and 5 per cent.

Shot Is Higher.—An advance has been made in shot which is evidently the effect of the high market for lead and the generally strong demand for ammunition. The new base is $10.50, which covers an increase of 75c. The extras continue as before, chilled being $1.25, added.

Oakum Is Higher.—Higher prices are being asked for oakum and plumbers' is now generally quoted at 5c a pound with some slight allowance on large orders. This is an advance of about ¾c from the last figure.

Screw Hooks and Eyes.—The new lists on screw hooks and eyes have been put into effect locally; the increase is approximately 10 per cent. Discounts: Bright wire screw hooks and gate hooks and eyes, 60 per cent; screw eyes, cornice hooks, and stove pipe eyes, 50 per cent. Brass screw eyes are now net.

Chisels and Planes.—Higher prices are going into effect generally on gouges, chisels and plane irons, this being the effect of the rising cost of the raw materials entering into their manufacture. The increase on the Howard list is approximately 10 per cent.

Door Checks Higher.—New quotations are being made on door checks and springs, the readjustments covering advances of from 5 per cent. to 10 per cent.

Pipe Cutters Up.—Changed discounts on pipe cutters cover substantial advances, the new allowance on Barnes being about 67½ per cent. and on Saunders 62½ per cent., the increase being about 7½ per cent. in each case.

Cow Chains.—Higher prices for cow chains for the spring booking will be in order. Already some of the local wholesalers have made a change and a discount of 40 per cent. is heard as compared with 50 per cent. formerly.

New Year's Trade.—Although the Christmas trade for this year is a thing of history there is still some small business in gifts in the city, largely due to the fact that with the French-Canadians New Years is quite an important day for giving; this is largely a benefit to the French-Canadian houses.

New List on Wares.—Following the alterations on the discounts on enamel and other wares a couple of weeks ago,

new net lists have been printed and are being issued to the trade.

Stove Trade Quiet.—With the holiday season there has been a falling off in the demand for stoves and the winter season is now regarded as being practically over. Altogether it has been a very good fall and winter in stoves, especially when the conditions are taken into consideration.

Old Materials.—Old materials continue to show advanced prices. Copper and wrought and machinery iron have been affected this week, the new quotations being as follows:

Copper, heavy	17c
Wrought iron, No. 1	$11.50
Machinery cast iron	14.50

The increase is 1c for each of the last two items, and ¾c for the first.

TORONTO

TORONTO, Ont., Dec. 30.—The year 1915 has been an extremely interesting one in many ways in the hardware market. In the first place the gradual improvement in trade has been a most encouraging feature and further the remarkable advances in prices have been the means of keeping the market very active during the greater part of the year. Another feature has been the satisfactory conditions in the rural districts. The country trade has been uniformly good throughout the year, and has been the mainstay of the hardware trade. In the industrial centres trade was dull for the first month or so, but improved considerably as the year passed, when factories became busy on war orders. The building trade has been dull all the year and there was a corresponding light demand for builders' hardware and supplies. The market has been unsettled for the greater part of the year owing to the many price changes affecting practically all lines of hardware and metals.

The increase in the tariff in February resulted almost immediately in an all-round advance. Later on, prices of iron and steel began to advance which eventually affected the hardware market and prices began to move upward. This has been more pronounced during the last three months of the year when hardly a week has passed without some important price changes being announced. The war has directly or indirectly affected practically all the raw materials, while the rapid increase in ocean freight rates and shortage of tonnage has also increased the cost of some raw materials. All ingot metals have advanced in price, thus increasing the cost of a number of hardware lines.

Fewer Price Changes.—Business in the hardware trade has been quiet this week after the Christmas rush. The Christmas trade this year has been exceptionally good, considering the conditions prevailing and there was quite a good demand for the usual lines favored for presents. Travellers are in until over the New Year, and stock-taking is general. There was a brisk movement in snow shovels during the week and an active demand for skates, sleigh bells and lines for winter sports. There are only a few price changes to note this week but higher prices on many lines are expected early in 1916. Stove bolts and wood screws have advanced again. Manufacturers of butts and hinges have raised their prices but the jobbers have not put the advances into effect as yet. Higher prices for wire, wire nails and copper rivets are expected any time.

Iron and Steel.—The iron and steel market at the end of the year 1915 is in an exceptionally strong position. The demand is greater and prices have attained a level never before known in the history of the trade in Canada. The steel companies with the large extensions to their plants, made during the year, are operating on capacity and when the boom subsides will be in a position to handle a large volume of business in normal times. The profits made during the year have placed the companies in a sound financial position which will place the steel trade on a firmer basis than formerly. The market is very firm and prices on all steel products are gradually going high. Boiler and structural rivets, ¾-in. and larger, have advanced, and are quoted at $4. Higher prices for boiler plates and tubes may be announced shortly, while other lines are also expected to advance.

Just as Hardware and Metal is going on the press word has arrived that wire nails have advanced 20c per keg; all steel wire has advanced 15c per 100 lbs.; barb wire staples have advanced 15c per 100 lbs.; fence hooks have advanced 15c per 100 lbs.; bale ties have advanced 15c per 100 lbs.

An extraordinary situation closely connected with the steel trade has arisen in the States. All railroads running into New York have placed an embargo on all shipments of iron and steel products destined for export. The freight yards have been gradually becoming more congested with export shipments for some time, due to shortage of ocean tonnage and heavy export shipments. This serious situation can hardly be relieved unless more tonnage is requisitioned to take care of the ocean transportation. The embargo, while being of material relief to domestic consumers does not appear to be making the market any easier. Prices continue to advance and some authorities believe the market to be in a top-heavy condition. Prices on contract bars, plates and shapes now generally 1.80c, Pittsburgh, are at the highest level since the formation of the U.S. Steel Corporation. Bessemer and open-hearth billets have advanced again and are now quoted at $32 and $33 per gross ton, Pittsburgh. Forging billets are unchanged at $52, Pittsburgh.

Pig Iron.—The market is quiet but strong with a tendency for higher prices. The furnaces are operating at capacity as the demand for steel-making pig continues heavy. Prices of grey forge, Pittsburgh pig iron have advanced to $18.10 per gross ton, while Hamilton and Victoria iron are unchanged at $24 per ton.

Old Materials.—The market is firm and prices generally unchanged. A good demand for scrap copper continued and prices are very firm. Heavy melting steel is also active and prices firm. Supplies of old aluminum are being quickly taken and prices will go higher.

Metals.—There is little of interest to note in the metal market, this week being under holiday influence. There are no important price changes to note, the market being generally steady. The tin market is unsettled on account of possible interference with shipments of tin in the war zone. The situation in the copper market is strong and higher prices are looked for. The spelter market is quiet and firm. It is reported that a bounty on spelter is being advocated in England to encourage the industry. The lead market is firm and unchanged while antimony is very quiet. Aluminum is weaker but unchanged. There is no change in prices of solder.

Tin.—There is considerable uncertainty in the tin market owing to the possibility of shipments being lost at sea or some new British regulation affecting the transportation of tin. The market has been quiet over the holiday period and trading has been almost suspended. Quotations are unchanged at 43c per pound.

Copper.—The copper position is a very strong one and higher prices are looked for in the near future. The British Government has contracted for several thousand tons of copper in the States for delivery during 1916, but the price has not been disclosed. There is a scarcity of spot copper and consumption is reported to be greater than production, while the demand continues heavy. Local quotations are unchanged at 21¼c per pound.

Spelter.—The market is quiet but very firm. Inquiry has been light but some business has been done, consumers being inclined to wait developments. The export from the States continues heavy and an increased demand is expected. Quotations are unchanged at 19c per pound.

Lead.—The situation is unchanged and the market is very firm with an upward tendency. Trading has been light on account of the holiday season. The "Trust" price of 5.40c, New York, is being maintained. Local quotations are firm at 7c per pound.

Antimony.—The market is quiet but very firm, for prompt and January delivery, and there is good enquiry for futures. Consumption of antimony continues heavy and is getting ahead of production. Local quotations are firm and unchanged at 40c per pound.

Aluminum.—The situation is unchanged with the market a trifle easier. Aluminum is quoted at 65c per pound.

Solders.—Prices of all lines of solder are firm but unchanged. Fair business is reported.

Wood Screws Advance.—Another advance in wood screws has been announced. The increase is about 20 per

cent. on flat head, bright, and approximately 5 per cent. on other lines. The new discounts are given in accompanying panel.

Stove Bolts Advance.—An advance has been made in stove bolts, the new discount being 80 per cent. as against 82½ per cent. formerly. A number of lines of bolts advanced last week, but stove bolts were not included in the new discounts, as no change had been made then.

Galvanized Sheets. — There is no change in the galvanized sheet situation which continues very unsettled. Black sheets continue to advance while spelter and acid are both high in price with little prospect of being cheaper for some time. There is still a considerable range in prices of galvanized sheets and some makers are keeping out of the market. The prices given in the current quotations are pretty close to the market.

Black Sheets.—Prices of black and blue annealed sheets are very firm and have an upward tendency. The mills are running full time and have a large amount of work ahead. Prices of black sheets continue to advance in the States which will affect local quotations.

Butts and Hinges.—Makers of butts and hinges have raised their prices but jobbers have not as yet made any change, although by next week the new list will no doubt be available.

Pipe.—Prices of wrought iron pipe are holding very firm. Lead pipe is also very firm and unchanged at 10c and waste pipe at 11c per pound.

Wire Nails.—The market is very strong and an advance in price may be announced any time. The market is very strong in the States and prices are going up, which will no doubt result in higher prices here. Wire nails are quoted at $2.85 and cut nails at $2.90 per keg.

Wire.—The market is very unsettled and higher prices may be announced any time now. Raw materials are going higher all the time and makers of wire will only quote against prompt acceptance. Prices of galvanized fence wire are still withdrawn.

Rivets.—An advance in copper rivets is expected very shortly as the raw material is increasing in cost. The discount for copper rivets is 20 per cent. and iron rivets 65 per cent.

Rope.—The market is steady and prices of most lines of rope and twine are very firm. The market in the States is strong and prices are higher there for hemp twines. There is no improvement in the raw materials situation and the sisal market is very unsettled owing to the action of the Mexican Government in taking over the control of the sisal production.

WINNIPEG

WINNIPEG, Man., Dec. 30, 1915.—It is remarkable to what an extent business has kept up during the month of December. In looking back over the number of orders handled, jobbers are agreed that it has been an unusual condition which has prevailed. This is due, no doubt, to the hand-to-mouth buying which the biggest percentage of the retailers have been doing all year, and their desire to keep stocks low until after stock-taking.

During the next few weeks retailers throughout the country will be taking their inventories. It is absolutely essential that every retailer make a fair statement of his stock.

Price Changes.—A number of price changes have gone into effect, and, as usual, lines of wire and steel are the ones affected principally. Readers of this column will notice many lines taking a further advance, which we advised booking some time ago, and the advantage in so doing would be now apparent.

Leather belting has taken a further jump, and the discounts as quoted today are as follows: Standard, 50 and 5 per cent. off list; extra, 40 and 10 per cent. off list.

Prices on stove pipes have been made for next year, and the prices now quoted on standard are noted herewith: 6 in., $9.75 per 100 lengths; 7 in., $10.50 per 100 lengths.

Stove pipe elbows are quoted: 6 in., $1.53 per doz.; 7 in., $1.71 per doz.

Lead pipe has taken a further advance, and prices now read as follows: In coils, $10.40 per 100 lbs.; in less than coils, $11.40 per 100 lbs.

The new prices mentioned last week on hoop iron are given herewith:

Hoop Iron—	Per 100 lbs.
¾ x 19	$4 75
⅞ x 19	4 50
1 x 19	4 50
1¼ x 19	4 50
1½ x 19	4 25
1¾ x 19	4 25
2 x 19	4 25
2 x 3-32	4 25

Pipe Higher.—New prices on wrought iron pipe, both black and galvanized, represent a further advance of about 5 per cent.

Black Iron Pipe—	Per 100 ft.
¼"	$ 2 93
⅜"	3 02
½"	3 78
¾"	4 41
1 "	6 75
1¼"	9 00
1½"	10 58
2 "	14 22
2½"	22 65
3 "	29 70
3½"	55 10
4 "	42 50
4½"	52 20
5 "	59 40
6 "	77 40
Galvanized Iron Pipe—	**Per 100 ft.**
¼"	$ 4 55
⅜"	4 64
½"	5 67
¾"	6 98
1 "	10 31
1¼"	12 60
1½"	15 30
2 "	19 80
3 "	46 80

The latest discounts on bolts and nuts are as follows:

Carriage Bolts, ⅜ and smaller, 50% off list.
Carriage Bolts, 7-16 and larger, 35% off list.
Machine Bolts, ⅜ and smaller, 50% off list.
Machine Bolts, 7-16 and larger, 40% off list.
Sleigh Shoe Bolts, ⅜ and smaller, 40% off list.
Sleigh Shoe Bolts, 7-16 and larger, 35% off list.
Plow Bolts, 40% off list.
Coach Screws, 55% off list.
Tire Bolts, 62½% off list.
Square and Hex Nuts, case lots, 1½c lb. discount.
Square and Hex nuts, small lots, net list.

Well Casing, Inserted Joint.

	Winnipeg	Ft. William
4¼	$36 35	$33 75
4½	37 20	34 25
5	45 15	41 75
5⅝	52 05	47 65
6¼	57 30	52 50

Many travellers' conventions are slated for this week, and the knights of the grip are wearing the broad smile of men expecting big things for the New Year. Already a very satisfactory number of spring cars have been booked, and shipments are due to be made, starting early in January. There is going to be great rivalry for next year amongst the travellers of each organization, as well as between the various organizations, to see who will carry off the greatest honors.

LONDON

LONDON, Ont., Dec. 30, 1915.—A number of important price changes have again taken place this week. Wood screws have advanced, following the advance reported at Toronto last week. Nails are firm, and a further advance is predicted for the near future. There has been a falling off in trade this week, as is usual during the holiday week, following the Christmas rush. Local wholesale houses are stock-taking, and travellers are in until the New Year.

Christmas business was good right up to Christmas Eve, and the volume of December business compares favorably with the best of former years. Most firms report a substantial increase over the business of December, 1914. There is a scarcity of some lines of cutlery and skates. Higher prices on many lines are expected early in the New Year, despite the abnormally high prices which are now prevailing on many lines.

Wood Screws Advance.—New discounts are in effect on bright, brass and bronze wood screws. They are as follows:

Flat Head, bright	85 % off list
Oval Head, bright	80 % off list
Round Head, brass	80 % off list
Flat Head, brass	62½% off list
Oval Head, brass	60 % off list
Round Head, brass	60 % off list
Flat Head, bronze	57½% off list
Oval Head, bronze	52½% off list
Round Head, bronze	52½% off list

Linseed Oil.—Although prices on linseed oil are unchanged, they are firm. There is very little change in the local situation. The demand at present is not heavy. Quotations locally are as follows:

	Per gal.
Raw linseed oil, 1 to 2 bbls.	87c
Raw linseed oil, 3 to 5 bbls.	86c
Raw linseed oil, 6 to 9 bbls.	84c
Boiled linseed oil, 1 to 2 bbls.	90c
Boiled linseed oil, 3 to 5 bbls.	89c
Boiled linseed oil, 6 to 9 bbls.	87c

Turpentine remains unchanged, and is quoted in single-barrel lots at 86c per Imperial gallon; 2 to 4 barrels, 85c per Imperial gallon; 5-gallon lots, 93c per Imperial gallon.

Wire Goods.—Wire nails are firm, but unchanged at $2.85 base; cut nails are quoted at $2.95 base. Wire fencing remains at the prices to which it advanced two weeks ago, as follows:—Barb, $3.45 per 100 lbs.; No. 9 galvd., $3.10 per 100 lbs.; No. 12, galvd., $3.25 per 100 lbs.;

WEEKLY PAINT DEPARTMENT

How War Affected Paints and Brushes

Prices of Ready-Mixed Paints Advanced Considerably During 1915 as a Result of War—Makers State Reduction Not Warranted—How War Affected Supply of Bristles

IN last week's issue of Hardware and Metal; details are given regarding the trend of linseed oil, turpentine, white lead and dry color prices during the year 1915.

Further information regarding prices of other products sold in the paint department, should prove interesting at this season, when stock-taking is in full swing.

Ready-mixed Paints

Hardware and Metal on April 10, 1914, announced advances in the price of ready-mixed paints, to go into effect on April 15, and to apply to deliveries after May 1. The advances were: General lines of mixed, incluindg floor and porch paints and enamels, 10c a gallon, excepting bright reds, on which the increase was 25c:; flat oil paints, 10c a gallon, with 50c a gallon for bright reds; barn paints, 5c a gallon; carriage paints, a small advance for all colors, excepting reds, which went up 33 1-3 per cent.; wagon paints, 10 per cent. advance on all colors, excepting reds, which advanced 25 per cent. Colors in oil—Greens, 1c lb.; other colors, 2c lb., excepting vermilions, Prussian blues, Chinese blues and Japan colors, which were withdrawn.

The most radical change took place on June 15, and represented an advance of 20 cents per gallon on a number of ready-mixed lines. After repeated predictions that there would be a decline in the price of ready-mixed paints, Hardware and Metal announced on October 30 that a reduction of 10c per gallon on house paints, excepting whites, outside porch paints and flat wall paints. Other lines remained unchanged.

Several paint manufacturers claimed that the reduction was not warranted, and it is said that had the price adjustment been left a few days longer, there would certainly have been no reduction made by the manufacturer. Since then, lead, zinc, linseed oil, turpentine and other raw materials which enter into the manufacture of paint have become firmer, and in many cases advanced in price.

Same raw materials which are used extensively in making high-grade paints have become almost unprocurable at any price, and unless conditions improve to a considerable extent, paint will probably be considerably higher in price by spring. Manufacturers state that dealers at present have every encouragement to book good and strong for spring at prices which are prevailing at present.

The outlook for spring business in paint lines is exceptionally bright. A feeling of optimism is percolating throughout all branches of the paint trade, that did not exist at this time last year.

Retailers are booking freely for 1916 delivery. Improved business conditions, a bright future outlook and the expectation of higher prices on some paint lines has greatly stimulated buying for spring.

Situation in Brushes

The sale of paint brushes during 1915 has been very satisfactory. There was a good domestic demand, while war orders were responsible for a heavy demand for shoe brushes, shaving brushes, horse brushes, cloth brushes, etc.

During the fall of 1914 following the outbreak of the war, the price of bristles advanced about 40 per cent. Many manufacturers in Canada were forced to gauge their 1915 prices on the basis of the advanced costs of raw materials.

Bristles used in brush making come principally from Russia and China. During 1915, spasmodic shipments of bristles in fairly large quantities were received from Russia. The shipments in the aggregate, however, were far below the usual quantity received from this source.

Prices on paint brushes are said to have been kept remarkably low, when conditions are considered. It is predicted that there will be a serious shortage of bristles during 1916. With an improvement in paint consumption during 1916, there is bound to be an improvement in the demand for paint brushes. It is also expected that the cost of black or China bristles will advance considerably during the early part of 1916, and if such is the case many lines of brushes are also bound to advance.

Edmonton Notes

C. E. Race, of Race, Hunt & Giddy, has returned to the city from a trip to Peace River Crossing, where he has been successful in securing an opening for hardware for his firm.

The salesmen and administative staff of Marshall Wells, Alberta, Ltd., were the guests of a dinner held at the Macdonald Hotel, over which J. F. McMullen, the manager, presided. Salesmen present were S. M. McLeod, H. Bearstoe, W. Robinson, W. Mores, H. Hughes, A. E. Fulthorpe, R. R. Butler, R. McLure, C. Roy, A. Withey, and J. F. McMullen, manager; W. Montgomery, traffic manager; W. Peters, manager of the cutlery department; J. Mohr, buyer, and H. Flowers, manager of the Sommerville Hardware Co. H. Wilkins and Mr. Perrett were also guests. A pleasing incident of the gathering was the presentation of a set of silverware to J. Mohr, general buyer for the company on the occasion of his approaching marriage.

BEX-O-LAC REG'D. 1912 —*the King of Brush-Settings*

BEX-O-LAC is a brush-setting of an entirely different nature to any of the so-called compounds used by Brush Manufacturers to set the Bristles in, as we found that we could not depend on the many mixtures with rubber, resin, etc., for their basis.

And Furthermore

BY USING BEX-O-LAC THE BRUSHES ARE NOT SUBJECTED TO ANY PROCESS INVOLVING INTENSE HEAT, TO HARDEN THE SETTING, AS SUCH IS VERY INJURIOUS TO THE ELASTICITY AND PAINTING QUALITIES OF THE BRISTLES.

After several years of experimenting, we have been successful in working out a formula—the product being superior to anything now used as a brush-setting, and one that will absolutely, under all conditions, hold each and every bristle firmly in its place.

This brush-setting is protected under the registered name of "Bex-o-lac," and is used only in the manufacture of

BOECKH'S PAINTERS' BRUSHES

which are guaranteed not to shed the bristles.

THE BOECKH BROS. COMPANY, LTD.

TORONTO, CANADA

Your Store is What You Make It—

Conduct business on the quality and value basis and trade comes easily.

When it comes to paints and varnishes, you'll take the right step by securing the agency for

Jamieson Line

It has never disappointed and it never will. We realize that the more our agents sell the more business we'll get, and therefore put forth our most diligent efforts to produce and maintain a superior quality of product.

WEEKLY HARDWARE MARKETS

(Continued from page 41.)

No. 13 galvd., $3.35 per 100 lbs.; No. 9 coil spring, $3.15 per 100 lbs.

O and A wire remains unchanged as follows: No. 10, $3.16 per 100 lbs.; No. 11, $3.22 per 100 lbs.; No. 13, $3.30 per 100 lbs.; hay baling, No. 14, $3.40 per 100 lbs.

Spring Booking

Quotations on poultry netting are still withdrawn. Harvest tools are quoted at 40-12½ per cent.; painted screen wire cloth is quoted in 100 ft. rolls at $1.70 per 100 feet; in 50 ft. rolls at $1.75 per 100 sq. ft.

EDMONTON

EDMONTON, Alta., Dec. 30.—The holiday trade is over and merchants are well satisfied with the volume of business done. Stores were kept open late for several evenings previous to Christmas in order to give shoppers every chance to make their purchases early. While the more expensive articles suitable for presents were avoided, there was a good trade in smaller and cheaper lines. Wholesalers report that stocks of holiday goods, cutlery, sleds, etc., are almost cleaned out. Bookings for spring have been satisfactory, hardwaremen anticipating a rise in many lines with the new year. Collections are said to be good generally.

Activity North of Edmonton.—Peace River Crossing, north-west of Edmonton, is the scene of some activity at the present time, following the opening of a regular passenger train service. Excavation work has begun for the concrete piers and abutments of the new steel bridge which is to be built over the Heart River at this point. The steel work will be some six hundred feet long and over three hundred feet high. Considerable fur trading is done here. Revillon Wholesale, Ltd., have opened a branch warehouse with a stock of hardware and groceries. The old fur trading warehouse of Revillon Freres has been utilized. J. E. Brown, the manager of the Edmonton house, is at the Crossing supervising the opening of the new business. Several retail stores have also opened recently.

WEEKLY PAINT MARKETS

(Continued from page 46.)

paign. There are few price changes to note this week, but the market is very firm, and some lines, notably mixed paints, are expected to advance early in 1916. The linseed oil market is very strong and higher prices are practically assured. Turpentine is weaker, but unchanged. Gasoline, benzine and coal oil have advanced, which was expected as there is no improvement in the oil situation. Crude oil has become very scarce and higher and there is an unusually heavy demand for gasoline.

Ocean freight rates have been gradually getting higher all the year and have consequently assisted in raising prices of materials imported from England, while in addition the shortage of tonnage has made it often extremely difficult to get shipments over. In this regard glues and whiting especially have been affected. At the present time conditions are worse rather than better and a scarcity of whiting is expected in the spring. Considerable fluctuations have occurred in white lead and the market has been very firm for the greater part of the year. Pig lead has been for the most part firm, especially during the latter half of the year and lead in oil has consequently advanced to the prevailing high level. Prices of mixed paints are now generally conceded to be lower than is warranted considering the high cost of all raw materials. Mixed paints did advance earlier in the year but were later put back. Since then, however, lead, zinc oxide and linseed oil have become more expensive so that logical result would be higher prices for mixed paints.

To deal comprehensively with the linseed oil market would fill a book. The general trend of prices during 1915 appeared in Hardware and Metal last week. The demand for oil has not been particularly heavy at any time during the year, but conditions in the flaxseed market during the last six months have been such that the oil market has been for the greater part of the time unsettled and prices have been steadily advancing until the prevailing high level has been reached. The flaxseed crop has been known for some time to be light and in addition a comparatively small amount of seed left the farmers' hands, thus further complicating the situation. The latest report is to the effect that the crop is even lighter than was estimated and with the difficulty at present being experienced in getting seed to the East to the crushers, the situation has become serious. With seed high in price and with the crushers experiencing such difficulty in obtaining supplies it is reasonable to suppose that linseed oil will advance to higher levels than at present prevailing.

The turpentine market has been fairly steady during the year. The local market is largely influenced by conditions prevailing in the primary market at Savannah. The crop in the South was light last spring but as the demand has hardly been up to normal, no particular scarcity has been felt. Stocks of turpentine are, however, becoming depleted, and although the market has recently been weak it will no loubt become firmer during the next two or three months and prices may consequently advance.

Linseed Oil.—The flax seed market is very strong and comparatively little seed is coming to the crushers. It has been stated on good authority that the seed crop is considerably lighter than was estimated. The crop was generally known to be light, but this new development will tend to stiffen the market. The demand for oil is very light and the market this week is quiet. There is, however, a firm undertone to the market and every indication of higher prices in the near future. The spread of prices has narrowed up ranging from 85c, 88c, and 87c to 90c. The following prices are more generally being quoted in Toronto:

	Raw	Boiled
1 to 2 barrels	87c	90c per gal.
3 to 5 barrels	86c	89c per gal.
6 to 9 barrels	84c	87c per gal.

10 barrels and over, open.

Linseed Oil Sharp Advance.—Since the above item was written some Toronto dealers have advanced prices of oil, the new quotations being as follows:

	Raw.	Boiled.
1 to 2 barrels.....	93c	96c per gal.
3 to 5 barrels.....	92c	95c per gal
6 to 9 barrels.....	90c	93c per gal.

Turpentine.—The market at Savannah is firmer and prices a little higher there. Stocks of turpentine in the South are gradually becoming depleted which will have a tendency to hold the market firm. The local market is a little stronger but prices are unchanged. The market has been very quiet during the week, and stocks in the hands of jobbers are very light. Turpentine is being quoted locally as follows: 1-barrel lots, 86c; 2 to 4-barrel lots, 85c, and 5-gallon lots 93c per Imperial gallon.

White Lead.—The position of white lead at the close of the year is certainly a strong one. Indications point to higher prices for pig lead owing to the heavy demand but white lead in oil will probably remain at the present level unless the pig lead market attains a considerably higher level.

Pure white lead is firm at $10.20 per 100 pounds in ton lots with 30c extra for less than ton lots.

Mixed Paints.—No developments have to be recorded in ready mixed paints. Prices are very firm, and an advance is looked for early in January.

Gasoline and Benzine Higher.—As predicted in Hardware and Metal an advance has been announced in gasoline, benzine and coal oil. Prices are 2c higher for gasoline and benzine, and ½c to 1c higher for coal oil, according to grade. The gasoline situation is very acute owing to the shortage in the supply of crude oil and heavy demand for gasoline. Crude oil continues to advance in price and the available supplies are not sufficient to yield large enough quantities of gasoline as are required at the present time. Indications point to further advances in gasoline.

Whiting.—The market is very firm, and supplies are becoming very scarce. There is no improvement in the situation as regards getting supplies and whiting is becoming more costly to import. Higher prices for whiting are anticipated.

Glass.—The market has been quiet during the week, but the situation is much improved.

Putty.—The demand for putty is light, but prices are very firm as raw materials are increasing in cost. The following prices are being quoted for standard putty in less than ton lots:

	Per 100 lbs.
Bulk, in casks	$2.50
Bulk, in 100-lb. drums	2.70
Bulk, in 25-lb. drums	2.80
Bladders, in barrels	3.10

Pure putty, 60c per 100 lbs. advance.

THE large and constantly growing demand for Berry Brothers' varnishes is based on such a firm foundation that it cannot be shaken.

Since our label first appeared in 1858 the call for Berry Brothers' varnishes and enamels has steadily increased. Their uniform excellence has always been maintained and the label of Berry Brothers is accepted without question by varnish buyers as a guarantee of quality and a sure protection against inferior varnishes.

You can insure satisfactory and profitable varnish sales, and increase the volume of your varnish business by making a leader of Berry Brothers' lines.

Here are four of the most saleable wood-finishing specialties:

Luxeberry White Enamel

Makes a permanent snow-white finish in either dull or gloss effects.

Liquid Granite (*for floors*)

Also for all interior work exposed to hard wear such as bathrooms, window sills and casings, etc. Waterproof lasting, mar proof.

Luxeberry Wood Finish (*for general interior work*)

Develops and preserves the grain of all woods, and makes a permanently beautiful finish.

Luxeberry Spar (*for exterior use*)

Made especially for durability under outside exposure. Front doors, store fronts, marine finishing, etc.

Write for our price list and interesting dealer's proposition.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Dec. 30.—The year is closing on a period which in the paint trade has been a generally satisfactory one under the conditions prevailing; that it would be up to the normal was not to be expected. Compared with 1914, the showing is a remarkably good one, and the outlook for 1916 is regarded with optimism on the strength of booking already placed and the general improvement in the store and industrial trades. In the annual results the dullness of the fore part of 1915 have been offset by the good business done during the last four months. This consisted not only of substantial bookings for spring delivery, but unusually heavy prompt deliveries, indicating not only that the future situation was regarded as strong, but also that stocks had been run down to a low stage, and that the retailers, with confidence in a renewed demand in season, were getting their shelves filled. The December deliveries were unusually heavy for that month, and strong indication of the change in trade sentiment. This, of course, applied largely to the early part of the month, there being small interest shown during the last Christmas rush and the between-holiday week, when the travellers were off the road.

The great factor in the paint situation has been—during 1915 and promises to continue during 1916—the ever-changing situation as regards prices. All the important ingredients used in the manufacture of ready-mixed have risen materially in cost, including linseed oil, turpentine, lead and zinc, while the value of many colors has gone to abnormal levels, with certain shades almost impossible to procure. The result has been that quotations have not only been tending upward, but they have been very erratic and generally unsatisfactory to manufacturers, jobbers and retailers. A couple of material advances were made in the spring, but the general idea seemed to be that the conditions prevailing were temporary, and the trade was given an opportunity to book on ground-floor rates. The general assumption was that before the fall campaign there would be an improvement reaction as regards the cost of materials, which would permit of a reduction on a more or less generous scale.

With the idea that lower prices would be announced for the fall selling campaign, the summer buying was very dull. However, when the time for an announcement came it was found that instead of the reduction in raw materials which had been hoped for, there had been a continued stiffening of the whole range, and that a further advance was a more logical step than was a reduction. A slight concession was made merely because of the prospects which had been held out, but it was not warranted. Since that time the stiffening process has continued, and the present situation is that the quotations to the trade are low in proportion to the cost of production. There has been talk of an increase from time to time, and this talk has become more general with the new year, but there is a difference of opinion as to whether a decisive step will be taken at an early date or whether action will be deferred until the end of the present selling season—about the 1st of May. In any event, higher prices are a logical development unless there is a reaction in the markets for raw materials—and such a reaction is not at present in sight. It has been this firmness which has encouraged good spring booking, with a larger than usual proportion of immediate deliveries.

A feature of the week is the advance in wax and candles as well as coal oil, while lubricants are also on the upgrade. This movement has been predicted for some weeks in view of the increase in the cost of crude oil.

Linseed Oil.—The situation as regards linseed oil holds very firm, with flax continuing to stiffen in price. Crushers state that the future is very uncertain, and that developments are likely from day to day, in sympathy with the cost of seed. In the trade the price range is maintained in narrow bounds, and this is a contrast to the conditions which have prevailed for some months. Evidently the stocks of low price oil are being exhausted, and that jobbers are protecting themselves at the market; however, higher trade quotations are to be looked for if there is no relief as regards the cost of flax. One quotation of 85c and 88c is heard, but the market may be generally summed up as follows:

	Raw.	Boiled.
1 to 2 barrels	86c-87c	89c-90c
2 to 5 barrels	85c-86c	88c-89c
6 to 9 barrels	84c-85c	87c-88c

Turpentine.—There is a little easier tendency in the turpentine market, as indicated by the fact that one firm has dropped its quotation to the trade from 78c to 76c for single barrels. However, this is hardly an indication of the situation, as the basis is a couple of cents below that of the refiners. The bulk of the business seems to be done at between 80c and 82c on the single barrel basis, with the usual allowances for quantities and most of the quotations favor the top figure.

White Lead.—The lead situation has been very steady and firm recently, and there is no change in the position of white lead and little indication that there will be immediate developments in this market. The basis is $10.05, with 30c added for less than ton lots.

Gasoline and Benzine.—The advances on gasoline and benzine announced last week have been absorbed on a firm market, although the volume of business has not been great. Quotations follow:

Gasoline in wood	27½c
Gasoline in drums	25½c
Gasoline, tank wagon	25c

Benzine, 1c lower.

Advances in Oils.—Several advances in oils have taken place following the announced indications of the past week based upon the increased cost of crude. On coal oil the change is 1c per gallon and on lubricants there are some readjustments covering slightly higher quotations. In connection with lubricants, further advances are to be looked for in the near future. The following quotations are now in order:

Canadian Prime	14c
Royalite	14c
Palacine	17½c
Black oil, summer	13½c
Black oil, winter	14½c

Castor Oil.—There have been remarkable advances in the prices of castor oil since the outbreak of the war. As compared with about 8c a pound in the early summer of 1914, the barrel quotation is now about 22c and the case price is around 25c.

Candles and Wax.—Candles and wax have also been affected by the recent movement and advances of 1½c a pound have been made. This is important in relation to the former prices of 6½c to 7c on wax and 6c to 7c on candles. It amounts to about $4 additional per case for the latter.

Glass and Putty.—The glass situation is generally firm on the new quotations announced last week, and the demand is slow. The discount of 30-5 per cent. only applies to quantities up to 35 cases, above which figure the prices are open. Putty is strong on the price basis which has prevailed for some time.

TORONTO

TORONTO, Ont., Dec. 30.—The closing week of the year has been seasonably quiet. Travellers are all in until the New Year and preparations are being made for the spring cam-

(Continued on page 44.)

1916 In Beginning the New Year

Look back over the past year 1915

DO you remember last Spring when you found that you could have handled much more paint business, that probably slipped past, by your not being sufficiently stocked with a good assortment of **B-H** "ENGLISH" PAINT?

WHAT occurred last season is liable to occur to a greater extent this season, for undoubtedly **B-H** "ENGLISH" PAINT will enjoy a much wider sale and a greater demand than ever before.

OUR new advertising campaign for this season is going to develop a great deal of new business, we believe, and it is not a bit too early to make your arrangements to meet the demand for **B-H** "ENGLISH" PAINT, which opens early in the season.

STANDARD GRINDERS after FIFTY YEARS

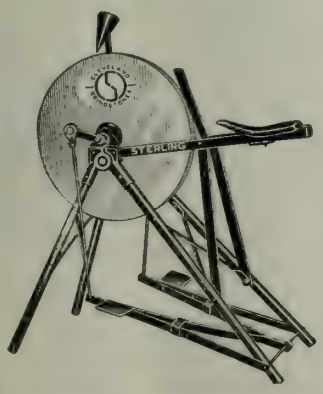
Fifty years make half a century, and it takes a mighty good article to hold supremacy in its class all that time. Cleveland Grindstones have done it! That's because they are made of genuine Berea Grit, the finest all-round abrasive known, which has a fine, even texture all through. Furthermore, every Cleveland Grindstone is specially selected by our expert graders, and we ship to a dealer only the grit best suited to his customers. You'll be "playing safe" and will make sales without a come-back if you handle

CLEVELAND Grindstones

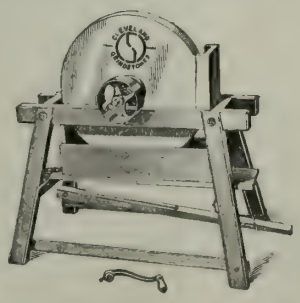
Sold only to Hardware and Implement Dealers

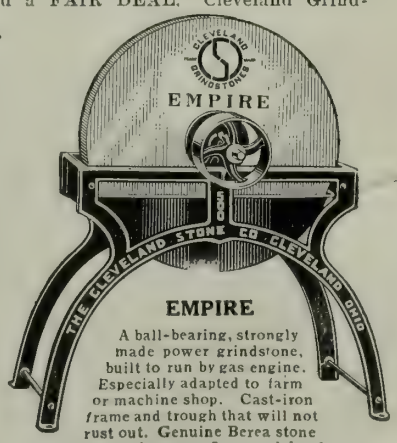
If you handle grindstones stamped with the quality mark shown above, you will be sure you're getting the **only** Berea Grit. You'll be backed by an unlimited supply, best factory equipment, expert workmen and a FAIR DEAL. Cleveland Grindstones will help you get the business that now goes out of town.
To start the ball rolling, write for illustrated Trade Price List. Tell us your jobber's name. Ask also for our famous book, "How to Keep Mail Orders at Home."

The Cleveland Stone Co.
Leader-News Bldg., CLEVELAND, O.



Farmer's Special Model (Hand or Engine Power)





EMPIRE
A ball-bearing, strongly made power grindstone, built to run by gas engine. Especially adapted to farm or machine shop. Cast-iron frame and trough that will not rust out. Genuine Berea stone
One of the many fine models of CLEVELAND GRINDSTONES

TRADE MARK KEYSTONE BRAND REGISTERED

A LIGHT BROOM THAT'S GOOD

You know that you had been apt to look upon a light broom as a cheap, unserviceable broom. Your customers preferred the light brooms, because they are easier to work with then they came back and kicked at the quality.

Then came the

"NUGGET" Broom

as light as the lightest, and as good and strong as any on the market—corn won't fall out, or turn up at the tip. Fine, smooth handle, stitched with four rows of yellow twine—a *good, light* broom that sells quickly and brings repeat demand.

Write for figures, etc.

Stevens-Hepner Co., Limited
Port Elgin, Ont.

This is only *one* of the winners in the line of Keystone Brand Brooms and Brushes.

M & S 1852

A class of brush that gets the best class of painters

MEAKINS BRUSHES ARE THE CHOICE OF THE WIDE-EXPERIENCED PAINTERS BECAUSE THERE ARE NO FALLING BRISTLES TO ANNOY AND DELAY, AND THERE IS JUST THE RIGHT AMOUNT OF FLEXIBILITY TO MAKE THEM EASILY MANIPULATED.

Their service is your guarantee of satisfied customers and re-orders.

Send for our catalogue — and then order from your jobber.

MEAKINS & SONS, Limited

Warehouses: Winnipeg, London, Toronto, Montreal

Handle your Oils and Gasoline with the

WAYNE PUMP

IT PREVENTS WASTE DUE TO EVAPORATION, LEAKAGE AND SPILLING, AND MAKES THESE GOODS MORE PROFITABLE.

It saves time and labor, as there is no constant filling and handling of measuring cups, and does away with dust and unpleasantness. **Throws a pint, quart, half-gallon or gallon, and measures exactly.**

Works easily, and when not in use can be securely locked. Gears are completely housed. All parts are accurately machined and thoroughly tested, and are interchangeable.

If you are interested in a clean, safe, money-saving way of handling oils and gasolines, jot down a line for full particulars on the Wayne System NOW.

Eastern Agents: C. F. Hohlstein, 1016 New Birks Bldg., Montreal, P.Q.
Distributors for Canada: National Equipment Co., Ltd., No. 1 Wabash Ave., Toronto, Ont.
Western Agents: D. J. Austin, 273½ Portage Ave., Winnipeg, Man.

FERNALD QUICK-SHIFT

Every time a shaft bolt rattles, every time one rusts and sticks and makes shaft changing a time-wasting, temper-rasping job—

—just so often is another Fernald Quick-Shift buyer created.

Are you there with the goods when the demand comes over your counter? If not, your jobber can supply you.

Fernald Manufacturing Company, Inc. North East, Penn.

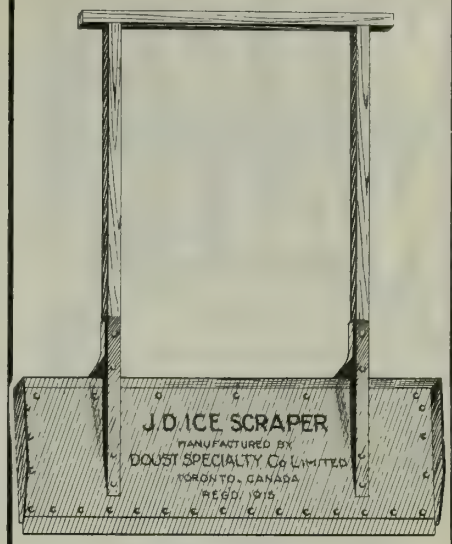
How to Invest Money

By GEORGE GARR HENRY

One of the most useful and easy-to-read books ever written on the elementary principles of investment.

Will save the ordinary investor many mistakes. Price, prepaid, $1.00. Insure your capital by ordering this book at once from

TECHNICAL BOOK DEPARTMENT
MACLEAN PUBLISHING COMPANY, Limited
143-153 University Avenue, Toronto

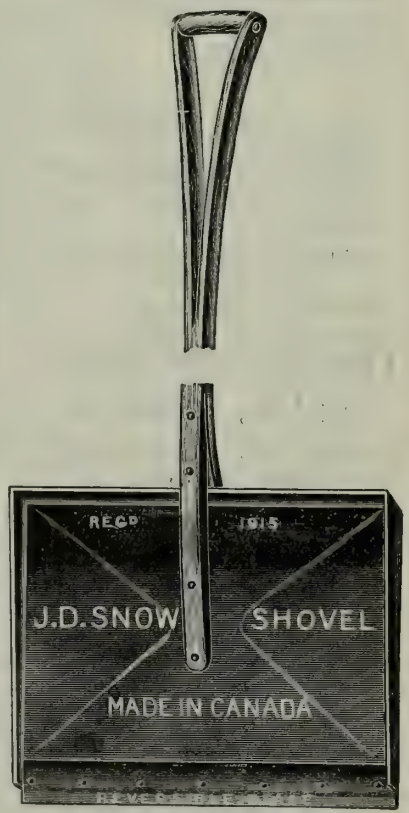


TO THE TRADE:

The J. D. ICE SCRAPER

fills a long-felt want by owners of skating rinks. It combines strength, utility and lightness, and is easily handled by one man.

It has been endorsed by and supplied to the Toronto Parks Department for use in all the rinks owned by the City of Toronto. **Price $48.00 dozen**



The J. D. SNOW SHOVEL

is a new shovel every hardware merchant should stock. It is strongly built and made to wear.

A very important feature about it is the reversible steel blade, which, when one edge is worn down, can be reversed in a few minutes, thus giving the shovel a new lease of life. **Price $6.75 dozen**

Manufactured by the

Doust Specialty Co., Ltd.
77 York Street, Toronto, Canada

WIRE NAILS

ANY SIZE OR PATTERN

One quality—the best.

The points and heads are perfect, and we have taken special care in the drawing so as to obtain a regular gauge.

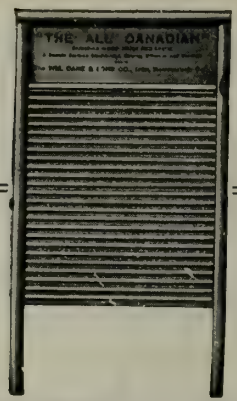
A. T. Diggins, Stair Bldg., Toronto, Ont.
H. E. O. Bull, Montreal, Que.
Harry F. Moulden, Winnipeg, Man.
Geo. W. Laidlaw, Vancouver, B.C.



COSTS LESS

than aluminum and zinc wash boards, is just as good and is more serviceable.

The All-Canadian
All-Wooden
Wash Boards

are the result of great scarcity and high price of zinc and aluminum—a price that has greatly handicapped washboard sales.

All-Canadian grown wood, Canadian-made nails, and by Canadian workmen—that's why it's all-Canadian.

The finest grained hardwood is used for rubbing surface.

Retails at 20c and leaves a BETTER profit.

Standard zinc, glass and enamel wash boards always on hand for prompt delivery, until notice to the contrary.

The Wm. Cane & Sons Co., Limited

Makers of the New Wooden Wash Board

NEWMARKET, ONT.

Malleable Iron Castings

for Carriage and Special Castings of all Kinds

Manufactured by

THE KYLE MALLEABLE CASTINGS CO.

MERRICKVILLE, ONT.

COLLINS' STURDY **SPRAYER**

Latest and best compressed air sprayer. Used for spraying fruits and vegetables, for whitewashing, for cleaning autos and buggies, and as a fire extinguisher. Book your orders now for spring delivery.

THE COLLINS MFG. CO.

413-415 Symington Ave., Toronto.

BOOKS FOR HARDWAREMEN

Every hardwareman can get valuable pointers and make his business a more profitable proposition if he will study the experiences of experts who have 'made good.' Our Technical Books for hardwaremen cover a wide range of subjects, among which may be mentioned Metal Working Books, Hardware Window Dressing, Store Business Methods, Paints and Painting, Salesmanship and Sales Plans and Advertising. We have also the very latest books on the plumbing and heating problems.

Technical Books, 143-153 University Ave., TORONTO

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

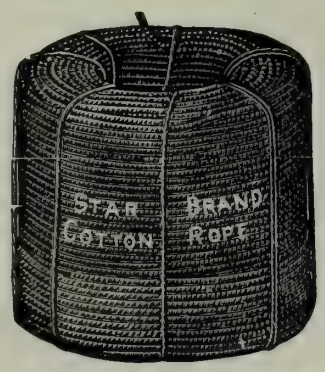
Big Profit and Satisfaction in Selling

"AYLMER" Force Pumps

They are certain to sell easily because it has several advantages over the ordinary style.
Has longer stroke, more power, and works easier.
While designed for hand use it can be readily converted into a Windmill Pump by the addition of a flat bar, which screws into the cross head at top.
It will be to your interest to write for full particulars now.

Aylmer Pump and Scale Company, Limited
Aylmer, Ont., Canada.



FOOD CHOPPERS

Knives and plates made from wrought Swedish steel of finest quality. These choppers may be had tinned all over or enamelled white inside and japanned red outside. Stock carried.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

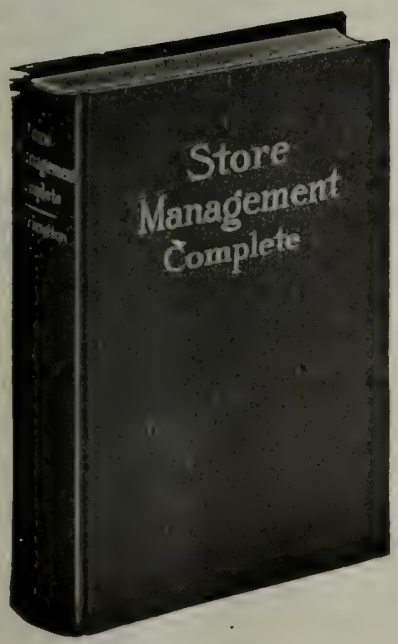
ICE TOOLS

Every Farmer, Butcher and Dairyman cuts ice. We have a tool for every use. Write for particulars and prices.

We also have a full line of Snow Plows, etc., for municipal work

ROBERT DONALDSON & SONS, Montreal

ARE YOU THE MAN AT THE HELM?



Are you running your ship of business along the shortest and safest course to the harbor of success? Or are you going a roundabout way, scratching and scraping along the rocks of loss and failure.

Get in the right course, be on the lookout for new thoughts, ideas, schemes, etc., and you will have a successful run.

STORE MANAGEMENT COMPLETE

is a guide that will show you how to get the maximum trade and profit out of your business. This book is written by Frank Farrington (a companion book to "Retail Advertising Complete.") It tells all about the management of a store. The following is a synopsis of one of the chapters:

CHAPTER V.—THE STORE POLICY—What it should be to hold trade. The money-back plan. Taking back goods. Meeting cut rates. Selling remnants. Delivery goods. Substitution. Handling telephone calls. Courtesy. Rebating railroad fare. Courtesy to customers.

"Store Management—Complete" is bound in cloth, contains 272 pages, 16 full-page illustrations, and 13 chapters. $1.00 brings this book to you postpaid. Money refunded within 10 days if not satisfactory.

Condensed or "Want" Advertisements

Those who wish to sell or buy business or stocks obtain competent help connect with satisfactory positions, or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer. RATES (payable in advance): 2c. per word first insertion, 1c. per word subsequent insertion, 5c. additional each insertion, when Box Number is required. Each figure counts as one word.

WANTED

YOUNG MAN, WELL EDUCATED, TWELVE years' business experience, five years secretary-treasurer of Toronto company, desires similar connection, or sales work. Box 239 Hardware and Metal. (1)

WANTED — EXPERIENCED HARDWARE clerk to take charge of retail hardware business. State whether married or single, salary and any references. Apply Box 238, Hardware and Metal. (1)

FOR SALE

FOR SALE—NATIONAL CASH REGISTER, as good as new for less than half price. J. S. Lockie, Newton, Ont. (2)

MOULDING MACHINE FOR SALE. WE have a No. 2 Arcade Machine which is in first-class condition. Having changed our equipment we have this for sale at a very low figure. If interested write us. The Enterprise Foundry Co., Sackville, N.B. (1)

MISCELLANEOUS

FIRE INSURANCE. INSURE IN THE HARTford. Agencies everywhere in Canada.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.

HARDWARE STORE BUSINESS METHODS—The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10, postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS IS the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

Want Ads.

If you want a buyer for your business, or have a situation to fill or want a situation, send us a Condensed Advertisement. There is someone who is looking for a proposition such as yours. For two cents a word you can speak across the continent with a condensed advertisement in this paper.

Try it out

When writing advertiser kindly mention that you saw his ad. in this paper.

Make Your Store Headquarters for the

SWEEPER-VAC.

It makes the work around a house twice as easy. Surely your lady customers can be interested. This is the one and only original. SURE SALES—GOOD PROFITS.

Write for Full Particulars

Frothingham & Workman, Limited
Montreal

A STRAIGHT TALK FROM THE MANAGER

No. 27

New Year's Resolutions

This is the open season for promising one's self to be good for the next twelve months. Everybody is "resoluting" and, of course, you will have to join in the procession.

But, instead of the usual silly kind of New Year's Resolution (such as swearing off smoking or eating candies), why not make up your mind to do some one thing conscientiously, throughout the year, which will really help you to become a better business man, and more especially, a better hardwareman?

I do not know of any New Year's Resolution more likely to accomplish this result than the determination to carefully study each week's issue of Hardware and Metal throughout the year. Developments in the hardware trade have been spectacular in the year just past, but they promise to be even more so in 1916. To keep fully informed, you should read every issue of Hardware and Metal, and especially the advertising pages, where you will constantly unearth new selling ideas that will spell profit for merchants and promotion for clerks. And there's another thing. Having made this resolution, be sure to keep it up for the twelvemonth, and do not let it fritter away into forgetfulness around the first of February, as so often happens to the silly kind of resolutions.

J. G. L.

Hats off to 1916

Stock-taking is general—and if you have not a full range of Ross Sporting Models, including the Ross .22 Cadet Rifle, you are taking chances on sending good business to your competitors.

The Ross .22 has been a very good seller and is giving great satisfaction—Do not neglect the profitable opportunities it offers.

Ross Rifle Company, Quebec

TWO PROFITABLE SAWS

ATKINS NO. 5 PERFECTION is the Finest Cross Cut Saw that has ever been made. The STERLING STEEL used, is as fine as razor steel. Our Dealers are making more profit on them because they are worth more and bring a higher price.

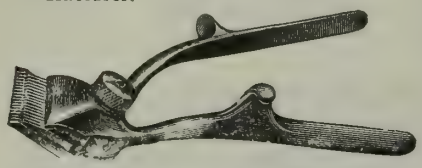
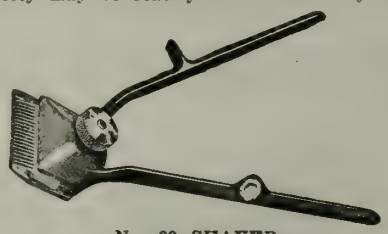
PRIEST'S HORSE and TOILET CLIPPERS

Made by American Shearer Mfg. Co.

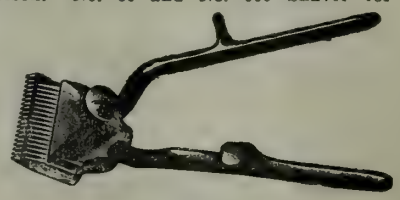
present a complete line at a range of prices covering all requirements of the trade. They are all quality goods, and represent best designs and highest standards of workmanship, regardless of price.
Some styles of Toilet Clippers are illustrated below. All are heavily copper plated and polished before nickeling, thus giving a higher finish, which lasts much longer than ordinary plating. The utmost care is used in grinding and tempering the cutting plates, giving cutting qualities whose superiority may be readily demonstrated by comparison. No. 00 and No. 000 Shaver for beard and neck trimming, are clippers of the utmost lightness and refinement, not paralleled by any other American manufacturer.



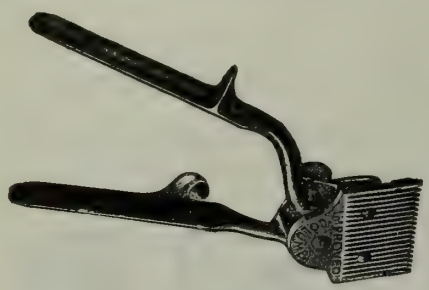
STANDARD No. 0, No. 1 and No. 2.
Retailing at about $2.50. High-class barber's clipper.



No. 00 SHAVER
A light and elegant Clipper for beard and neck trimming. Retailing at about $2.25.



SPEED
Best low-priced Clipper made. Retailing at about $1.00.



IMPROVED COLUMBIAN
with grooved bottom plate, retailing at about $1.50.

"The World's Greatest Tool Makers"

New York **London** **Chicago**

Manure test of Black Armco Iron, Plain Steel, and Copper-Bearing Steel. Armco Iron in good condition. Plain Steel badly corroded. Coppered Steel total failure.

Purity, Evenness and Solidity

form the basis of rust-resistance. Among all commercial metals of which iron is the base, these qualities are most highly exemplified in

ARMCO American Ingot IRON

Never less than 99.84% pure iron—with physical evenness guarded by minute care and constant inspection—with gas content reduced to the lowest point known to the industry.

ARMCO IRON
Resists Rust

far better than steel or other irons.

Unequalled for Enameling

The same qualities that make Armco Iron unique for service in exposed situations make it also the best possible base for enameling. The comparative absence of the solid and gaseous impurities makes possible the most perfect finish and reduced the culls practically to zero.

Write for full information as to its adaptability to your purposes.

The American Rolling Mill Co.

AMERICAN ARMCO INGOT IRON

The trade mark ARMCO carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

Licensed Manufacturers under Patents granted to The International Metal Products Company.

Armco-American Ingot Iron, Black and Galvanized Sheets, Roofing, Pipe, Gutter, Metal Lath and Terne Plate.

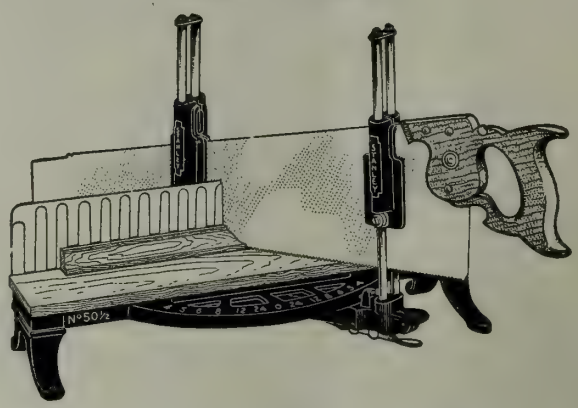
Stanley Tools



No. 50½ MITRE BOX

This has a single-piece Frame, both the base and the back of which are accurately machined.

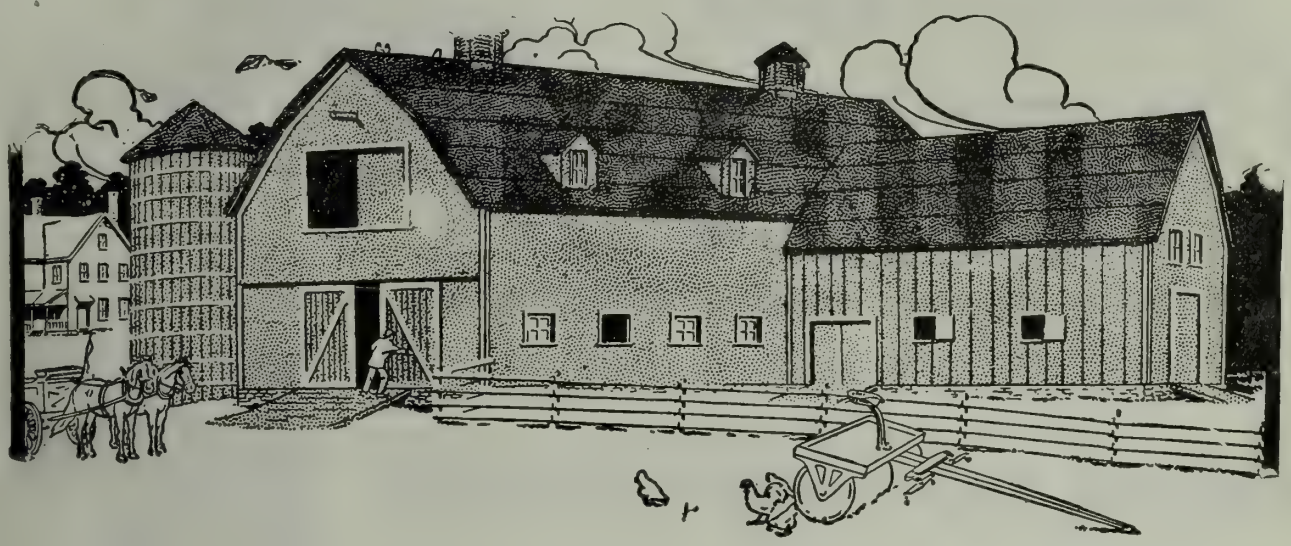
The Saw Guide Uprights are steel rods and carry the Saw Guides in which the saw works. The Uprights, which are instantly removable, are adjustable.

The special feature of these Boxes is that any ordinary Panel Saw may be used in place of a Back Saw if desired. A strong and accurate tool at moderate price.

STANLEY RULE & LEVEL CO.
NEW BRITAIN, CONN. U.S.A.

WINNING THE BUYER'S FAVOR

THE best possible buyer is not made an actual buyer at a single step. It is one thing to win the buyer's favor for an article and another to make adjustments incident to closing the sale. Winning the buyer's favor is the work of trade paper advertising. Under ordinary conditions it should not be expected to do more.



SAMSON ROOFING

combines every excellence that can enter into the making of a successful Roofing.

ABSOLUTELY GUARANTEED.

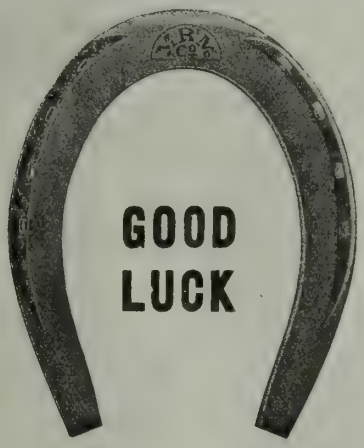
QUICK SHIPMENT—a complete stock available at MONTREAL, TORONTO and HEAD OF LAKES.



is said to follow the finder of a Horse Shoe. Sometimes it is so, but we **know** that satisfaction **certainly** follows the purchase of

"M.R.M." Horse Shoes

They combine all the merits of a high-grade shoe:

High Quality—due to selected materials.

Natural Shape—means less fitting.

Proper Crease—gives right setting to nails.

Clean Punching—less work for the farrier.

Careful Sorting — gives the Smith a "full" keg of "good" shoes.

It is a case of "It pays to buy the best."

It Pays to Sell the Better Tools

Selling tools on a price argument means selling cheap tools that don't give the customer satisfaction or pay you any profit.

MILLERS FALLS
STAR HACK SAW No. 1019

is one of the best examples of a good tool that is profitable to push because it gives the user such remarkable satisfaction.

It has a pistol grip that leaves plenty of room for the largest hand. Handle can't break because it's vulcanized over a steel rib that runs the full length. Straining nut under the handle means full stroke under all conditions. Rigid back frame. Blades faceable in four directions.

LET US SHOW YOU

Nicholson's Globe Files
Reece Screw Plates
Parker's Vises
Community Silver Plate
Jos. Rodgers' and Wostenholm's Cutlery

and other well-known lines

Because we consider it to be in our clients' interests to offer goods made by the best known manufacturers in preference to others.

First of all the names of these goods are firmly established in the minds of the buying public, who have full confidence in them.

Then again we consider it to be a decided advantage for a dealer to have the maker's guarantee behind each article as well as our own.

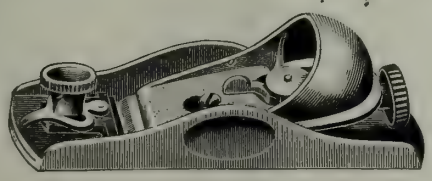
This, coupled with the advertising carried on by all these concerns in magazines and papers throughout the country, creates a demand for their products that makes the sale easy and that of substitute lines difficult.

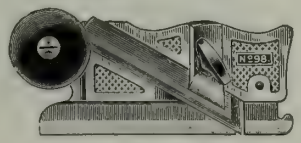
Why waste time creating an interest in goods you know little about, when you can secure the same articles made by firms whose reputations are firmly established for manufacturing quality goods at reasonable prices?

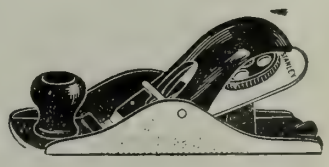
Remember all our goods carry the C.L.Co. guarantee.

Caverhill, Learmont & Co.

89 St. Peter Street, MONTREAL







W P WARD

GARDEN TOOLS

Established in 1803

We are one of the largest makers of these goods in England. The quality is of the best and they are beautifully finished. We are putting in hand large stocks for the coming season, and we ask you to give us a trial order. Our Garden Shears are so well known that they need no advertising; our other tools will be found equally satisfactory.

Time to Order
FREEZERS

They are always in season. THE LIGHTNING, GEM or BLIZZARD in your window is an index to your business and creates confidence that means increased trade of the highest quality. Any Jobber can supply you.

Be sure to add the LIGHTNING CHIPPER. You can sell one to every housekeeper who makes ice cream. Just show them how easy and quickly it chips a block of ice into small, uniform pieces, —how much easier it will be to make ice cream at home.

The Blizzard being a single action Freezer, is cheaper in price and sells well with either the Lightning or Gem.

Let us send you free some attractive window show cards and hangers, or electros for local advertising. Mention the style you are handling.

NORTH BROS. MFG. CO. PHILADELPHIA, PA.

Every Merchant Should Take One

An Accurate Inventory is a Valuable Asset to a Merchant—What to Include—Placing a Value on Stock—How to Take in Accounts—Allowances for Depreciation —Making Extra Copies.

By WALLACE IRVINE

ALTHOUGH an inventory may be made up at any period of the year, it is preferable that it be taken immediately after the first of January. During this period, stock as a general rule is, or should be, at its lowest point, and business is inclined to be quiet, thus allowing considerable freedom for those who are engaged in taking stock. All accounts are, or should be in good shape, and the retailer should have paid as many of his debts as possible.

The requirements of some businesses require stock-taking more than once a year. Some large firms conduct what is known as a perpetual inventory, that is, adding purchases as bought, and subtracting the value of merchandise as it goes out. However, it is customary and as a general rule sufficient, for the average retailer to take an inventory once a year if it is done properly.

When a stock is low it can be taken more easily than at any other time, and in addition, a merchant's affairs generally look best when his stock is at its lowest, and cash at its highest.

An Unusual Condition

Although it is generally known that most retail stocks of hardware are very low at the present time, it must be admitted that stocks of certain hardware lines are heavy.

For some time past, Hardware and Metal, and firms who wished to give the retail trade an opportunity of covering themselves, have advised the trade that many important price changes would take place, on certain lines of goods, and that in nearly all cases they would be in an upward direction. The result is that retailers have bought heavily of certain lines, which since the time of purchase have advanced considerably, and will advance further before spring.

It is unlikely that any firms have overbought because it looks as though there will be an improved demand during the months to come, and most retailers have carefully gauged their requirements, before purchasing. The increased value of many stock lines will have to be carefully taken into consideration during the present stock-taking period, in order to eliminate, as far as possible, any danger of over or under-estimating the value of the stock on hand.

Points to Consider

There are several important points which have to be considered in stock-

PAGE TOTAL

The above shows the style of inventory form used by a well-known and successful hardware firm in taking the annual inventory. The sheets are numbered consecutively, and when completed are turned in and filed in a loose-leaf binder. This form is a very complete yet exceedingly simple one, that will meet all the requirements of a large or small business. Spaces have been provided for date, location, name of prices, etc. Provision has also been made for quantities, description, no. or size of articles, cost, selling price, if desired, extension, etc. Each page is totaled separately.

taking. In the first place a suitable form or book should be used for listing the stock. Some retailers have special forms drawn up. Others use books which are secured from local stationers, and then ruled suitably for listing and extending stock prices, etc. The accompanying illustration shows a form used by a well-known hardware firm. The firm in question used separate sheets. In a small business where a stock-book is used, it could be ruled in a manner similar to the form reproduced here.

Every hardwareman should have his stock fully insured, and he should also have a complete stock-book showing the value and location of the stock at the last inventory time. A book of this kind is absolutely necessary when fire losses are being adjusted, or insurance is being placed. A hardwareman, whose stock has been destroyed by fire, and who has no record of his stock is in a very unfortunate position when he attempts to secure a settlement of his fire loss.

What to Include in Inventory

The inventory should include all real estate—which includes the store and the land upon which it stands. This item of course, would be omitted if the merchant does not own the building and land. It should include the correct value of all merchandise on hand at stock-taking time. Store equipment of all kinds at its actual value should also be included. Accounts receivable, cash on hand and in the bank should also be included.

When the total of all these items has been taken, and from the total the merchant subtracts accounts payable, he knows just where his business stands and what he is worth financially.

In valuating his store, fixtures, etc., the merchant has to use good judgment. Some merchants in boom times are inclined to place too high a value on the store and fixtures. This is unwise. The merchant, on the other hand, should not rate them too low. One authority claims that the building, land and fixtures should be included at the price it would bring if put up for forced sale. This, of course, is a matter that has to be settled by the retailer.

Value of Stock

When taking an inventory of the stock on hand, everything must be included. Accuracy is one of the chief essentials in taking a complete inventory. Each article, or each line should be priced separately. In some cases it will be found that certain articles have depreciated in value. Allowance should be made in such cases for depreciation.

On the other hand if an article or line of goods has increased in value, it should be taken into stock at the increased value provided the increase is a legitimate one.

When it is found, as often happens, that an article has been in stock for a long time, and has decreased in value through wear and tear, out-of-dateness, or for other reasons, it is generally agreed that the article should be taken into stock at what it should or could be sold for, rather than at its original cost.

In placing a value on equipment the merchant is often at a loss to know just what value should be placed on fixtures, etc. A few dealers unwisely inventory their equipment, year after year, at first cost. The majority, however, make an allowance for depreciation.

One plan followed by many successful concerns is to charge off, from 5 to 10 per cent. every year for depreciation. This will provide for an entire replacement of fixtures in from 10 to 15 years, according to the allowance made.

When this plan is followed, the merchant should be careful to see that five or ten per cent. of the original cost is figured off each year, and not five or ten per cent. of the last inventory value.

Value of Accounts

In listing accounts receivable in the inventory there are many things to consider. All accounts which are known to be absolutely good should be taken in at face value.

Other accounts may be good, but it will take considerable time and some expense to collect them. If it will cost five or ten per cent. to collect them, they should be taken in at their value after the cost of collecting has been deducted. Still another class of accounts receivable are those which are practically worthless. There is no chance of collecting them. In some cases it will cost as much to collect them through the courts as will be received by the merchant. These should not be taken in the inventory.

A merchant who enters into his inventory, accounts receivable at par, when he knows there is no chance of collecting them, is only deceiving himself and his creditors.

Copies of Inventory

Some very successful merchants have three copies made of the complete inventory. This is done to guard against loss by fire, accident, theft, etc. One copy is kept in the safe or vault in the store. One copy placed in a safety deposit box, and another is kept by the proprietor in his home.

A strictly accurate inventory is a valuable asset to any merchant. The merchant owes it to himself, his family, his creditors and the insurance companies to have a strictly up-to-date inventory that can be referred to at any time on short notice.

Advise Cash Basis or Thirty Days

Situation in West Reviewed From All Angles at Big Meeting of Sales Managers and Travellers in Winnipeg—Prominent Hardwaremen Among Principal Speakers — Plenty of Money in Country.

"THE year 1915 now rapidly drawing to a close, has been strenuous for all of us. An All Wise Providence has blessed us with an abundant harvest, the dark and lowering clouds that hung so heavily upon us during the greater part of the year are rapidly vanishing into thin air, the sky is once more clear and blue, and with the advent of 1916 breaks the dawn of grander days."

With these words, C. H. S. Bamford, sales manager of the J. H. Ashdown Hardware Co., Winnipeg, and president of the recently-formed Sales Managers' Association of Canada, closed his address to a gathering of about eight hundred Winnipeg business men at the annual banquet of the Canadian Credit Men's Association in the Royal Alexandra Hotel, Winnipeg. Those present at the banquet comprised credit managers, sales managers, commercial travelers, and many others. The attendance was so large, the banqueting hall was unable to accommodate them, an overflow meeting of about 150 being held in an adjoining room.

Some of the principal speakers of the evening were hardwaremen. The names of those who spoke are as follows:—C. H. S. Bamford, of the J. H. Ashdown Hardware Co., Ltd.; B. J. Daley, of Walter Woods & Co., Ltd.; J. H. J. Murphy, of Royal Crown Soaps, Ltd.; Albert Webber, the Merrick Anderson Co.; W. J. Wilson, of Winnipeg Ceiling & Roofing Co., and H. Annis, vice-president of Marshall-Wells Company.

During the evening a number of telegrams were read expressing good wishes for the future of the association and hoping for the success of the meeting. Among those who sent these wires were: W. L. Helliwell, Montreal, ex-president of the association; Frank R. Freeze, of Calgary, on behalf of the credit men, salesmen and travelers at that city; and from the credit men at Regina.

President's Address

L. J. Mylius, the new president of the Credit Men's Association, after expressing his pleasure at seeing such a representative number of business men present, said:

"To the sales managers let me say that we, the Canadian Credit Men's Association, welcome heartily the child recently born in Winnipeg (The Sales Managers' Association of Canada). We will watch its future with interest, and trust it will flourish. But it can only flourish if it brings out sufficient reasons for its existence.

"To the travelers, I would say that you can forward the best interests of the firm you represent and the city from which you travel by being loyal to the interests of both. I am not a believer in sectionalism, but if we did not have loyalty amongst our people as applied to the different localities, there would never be room for the different distributing and manufacturing centres which we must have in this growing Canada of ours. Remember that the credit man is just as anxious as you to see a large increasing business, but it is his duty to guard the resources of the company he represents and see that credit is judiciously placed.

Back to Cash System

"I would give a message through the traveling salesmen to the retail customers. Last week a prominent banker stated in the presence of many of the gentlemen who are here to-night the fact that not only had the banks a large accumulation of money, but that the farmers in hundreds of instances had paid all their bills, paid off their mortgages and have actually written to the banks and to the mortgage and loan companies, asking them where they can invest their money. The banks do not want to take any large amounts on deposit for they cannot use it. The loan companies do not know what to do with the money they have. Therefore, it seems a most opportune time for the retailers to get together in the respective towns and sections and reduce their business to a cash basis, or 30 days. The doing of this would largely remove the disadvantages they are now under, necessitating larger profits than the consumer will pay. They should establish considerable difference between cash and credit prices, thus capturing the trade which now goes to the mail order houses at a distance.

Extend Helping Hand

"To the credit men of the different houses I would say that the testing time is approaching. The West should never go back to the easy credits and cheap money of the past. We should extend a helping hand wherever it is deserved by the personal and financial standing of the man who wants to go into business, but the day is past when we should take "long chances." Easy credits and long terms are often a disadvantage to the wholesale house, the manufacturer and the customer. Take advantage of the phenomenal results of the agricultural products of the West for 1915, and keep your business down to sane methods, remembering the hard road we have traveled since 1913. There is always the possibility of conflict between the sales department and the credit department. Make up your mind to give every consideration to the traveling representatives. See to it that the office does not undo the good work of the travelers. One injudicious letter may break down the connection which has taken the traveler years to make.

W. J. Wilson, sales manager, Winnipeg Ceiling & Roofing Co.; Vice-President Sales-Managers' Association of Canada.

The Inside Fellow

"To the house staff, the 'inside fellow.' Do your best for every customer. Use your experience and ability to the end that orders are filled correctly and intelligently, and despatched promptly. Satisfactory service means an easier road for your travelers and the credit manager."

Work of Sales Managers

C. H. S. Bamford, president of the new formed (the announcement of which appeared in last week's issue of Hardware and Metal) Sales Managers' Association, said the evening marked the nativity of this association, which was an organization whose objects were to foster and promote a feeling of fellowship and good-will among its members, and on broad and equitable lines to advance the welfare of trade conditions in their relation to salesmanship and the management thereof.

Having stated that a meeting of this kind would promote a better understanding among them, bring them closer together, and materially assist them in the solution of problems that were daily becoming more varied and more complex, Mr. Bamford said that to meet the ever-changing conditions and to keep abreast of the onward and rapid march of trade and commerce, greater constructive and executive ability were required in each succeeding generation of business men. Going on to make the position of the association clear to the traveling salesmen present, the speaker said he wanted them to realize that their co-operation was desired. At all times suggestions from them that would tend to improve conditions would be welcomed, and the association would work in harmony with them to promote their welfare, increase their efficiency, and render their services more profitable to themselves and the firms they represent.

The First Step

In his judgment the first step toward this end was not the acquisition of more knowledge, but the better organization of what they already knew. The organization of what they already knew could only be accomplished by the co-operation of all the branches of business life represented at the meeting that night. The Sales Managers' Association intended to co-operate with the various commercial travelers' associations, with the credit men, and with the transportation men, and would lend its support to any movement that tended to raise commercial efficiency, increase the power of production and decrease the distributive losses.

The work of the educational committee and the legislation committee which are to be formed was outlined by Mr. Bamford.

Unity Essential

W. J. Wilson, of Winnipeg Ceiling & Roofing Company, said all business, whether great or small, whether consisting of one man, two or more parties, or a giant corporation, divides itself into distinct divisions which may be limited to four main activities, and it was his purpose to show that the success of the whole was dependent upon the equal development of each to assure a proper return on the capital and energy expended. These activities, Mr. Wilson described

(Continued on page 34.)

"The Beeton Bell Still Rings"

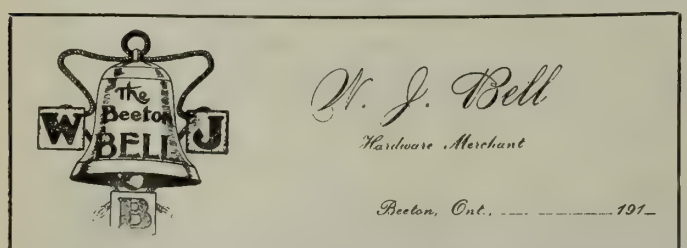
This Store Slogan Has Helped to Build a Big Hardware Business — Thwarting an Attempt to Steal Slogan—Unique Credit System—How to Direct a Customer's Stove Purchase

NESTLED snugly among the surrounding hills, the little village of Beeton is a perfect type of the prosperous communities which dot rural Ontario. It has a magnificent country round about, and the farmers who cultivate it are uniformly prosperous.

But anyone who has spent even a day or so in Beeton will find that he will remember Beeton not so much for the scenery nor for the air of contentment which pervades the place, nor even for the long drive from the C. P. R. station, which is somewhat of an ordeal, when there are six or seven drummers to be transported in the little old Ford which does duty as a motor bus.

The thing that will stick is the slogan "The Beeton Bell," because you see it and hear of it wherever you turn in this little town.

Picking up the local newspaper, you will find that the advertisement which dominates the sheet carries a flaring headline: "The Beeton Bell Still Rings." As you walk along the main street, you cannot help noticing on the frosted glass doors of the largest store in town a good-sized reproduction of a bell, with rope apparently whipped by the wind, into peculiar gyrations to form the initials: "W. J. B." Passing along the leading residential street, you will pause to admire a handsome brick residence, the finest in the village, and the same decorative bell design on the glass of the front doors will force itself on your attention. And if you are fortunate enough to sell hardware in Beeton, you will be struck by the ingenious use of the same emblem on the stationery and even on the cheques that come into your office from W. J. Bell.

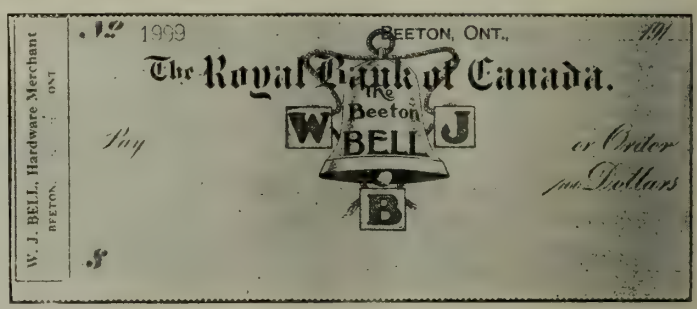


The "Beeton Bell" is featured on all stationery used in connection with the business.

Few there are in the hardware trade—in Ontario at least—who have not heard of "The Beeton Bell." For the past 32 years he has given good service to the people of Beeton and vicinity, and he has deservedly made money in doing so. This little story of his successful methods may prove helpful to many of Hardware and Metal's readers, especially those who have a big country trade.

The Value of a Slogan

Most retail merchants appreciate the value of a good slogan, and also realize how difficult it is to coin one which will really catch on with the public. In this Mr. Bell has been singularly fortunate, and his slogan has spread his fame far beyond his own district.



Showing how the "Beeton Bell" has been used on cheques issued by W. J. Bell of Beeton, Ont.

"I never made any attempt to register or copyright the slogan," said Mr. Bell, in discussing the matter with Hardware and Metal, "but I soon realized what a valuable asset it was to my business. It was repeated by word of mouth, and driven home by newspaper and circular advertising, until nearly everybody within many miles of Beeton felt that he really knew 'The Beeton Bell.'

"Perhaps, though, I did not fully realize the importance of my slogan until I suddenly found myself confronted with the danger of losing it.

"One day, on the street, I met the bank manager and a stranger, and the manager promptly introduced me, explaining that the stranger was 'the Beeton Bell,' and that he was opening a hardware store right next door to me.

"It seemed that the new man had gotten out his stationery and a considerable amount of literature, all of which played up the words: 'The New Beeton Bell,' and I saw immediately that the slogan which had helped me to build my business was going to be used to tear it down.

"I lost no time in securing good legal advice, and I learned that, while I had never formally registered my slogan, I had used it so long that, in the eyes of the law, it belonged to me.

"You may be sure that I went right after my competitor, and compelled him to abandon the use of his slogan, which was clearly designed to build up his business at the expense of mine. This store experienced some ups and downs, and finally I had a chance to buy in the stock at 75 cents on the dollar. When it came to the point of negotiating for the stock it only took 45 minutes to close the deal. My competitor locked the door and handed me the key, and I took possession of the business just as it stood the following morning."

His Business in a Roll Top Desk

Mr. Bell's store is very deep, and he originally had his office in the extreme rear. However, he soon found that this was a hardship, as he was continually being interrupted when he tried to look after his correspondence or bookkeeping.

"So I saved up my money and bought a roll-top desk," is Mr. Bell's characteristic explanation of how he solved the difficulty.

The desk is of the latest design, and is placed in line with the counters, exactly half-way down the store. It is thus accessible from every part of the premises, and to complete its convenience, a desk phone is used. A typewriter is also part of the office equipment. When a customer comes in to pay an account or a traveller to book an order, Mr. Bell finds all the data and supplies necessary in the roll-top desk. It saves him a good many hours every week.

After watching a customer cheerfully settling his bill, Hardware and

Are Retailers to Blame?

Mail Order Houses Selling Fencing—Have Mail Order Houses Thrived as a Result of the Apathy of the Retail Trade?—Why Fencing Should be Bought Early.

By ROBT. E. PAXTON

PROBABLY in no department of his business will the Western hardware dealer feel the mail order competition more this year than in fencing, and fencing supplies. The competition will be all the keener on account of prices being much higher than they were a year ago. As every hardwareman knows who has been reading this paper regularly, the price of raw material used in the manufacture of wire products has been advancing right along, and will advance even further in the near future unless the demand for munitions of war falls off. There is, of course, always a danger of the war ending abruptly, but few people expect it at the present moment, and it will not pay the dealer to put off buying his fencing on that account.

Mail order houses are going to figure more in western business this year than ever before, and the dealer west of Winnipeg is going to have a run for his money. Mail order competition, said a Winnipeg wholesaler this week, is the only black spot on the horizon as far as the retail dealer is concerned. The outlook in country districts is certainly as encouraging as it ever was, as far as general business conditions are concerned. Farmers have the money, and are spending it freely, but there is still a tendency for him to send his money East, and he is just as forgetful that the retail merchant has been carrying him for months and months past.

Farmer Wakes Up

There is heaps of evidence that the western farmer is waking up. He is awakening to the fact that he has got to sow better seed if he is going to make the best out of his farm. One has only to take one peep at a vast organization in Winnipeg to realize that the Western farmer is co-operating with his fellows, not only in the sale of his grain, but in the purchase of his binder twine, his coal, his fencing, and a score other lines, some of which he formerly purchased exclusively from the local hardware dealer.

The farmer is also awakening to the fact that his ready cash will do more for him by sending it to the mail order houses, and in a way, it is not surprising the amount of business the mail order houses are doing in Western Canada. From a careful study of the situation if the retail dealer is going to retain the farmer's trade, he has got to put himself on a better footing to meet this competition. He can achieve much by co-operating with his fellow dealer, and determining how best to handle the farmer under these changed conditions.

A well known specialty man, who does a big business with the retail hardware trade in the West, recommends that the dealer get down as soon as possible to the cash basis instead of carrying the farmer as he has been doing. Only then can he hope to buy and sell at any where near the same level as the mail order houses. And this is the best time to do it if there ever was one, now that the farmers have the money to pay off their debts.

A Battle Imminent

There is no use playing with the facts. The retailer is going to meet mail order competition on such a scale this year as he never did before. No one can read the newspaper reports of Toronto mail order houses establishing distributing centres in Regina and Saskatoon without seeing that there is a battle royal ahead between him and his M.O. friends. And it is not the Toronto mail order houses which make the outlook so dark. There are about a dozen young ones springing into being in the city of Winnipeg itself, which, on account of the influential backing they have, are bound to make things hot for the country dealer. It would surprise the hardware dealer greatly if he only knew some of the houses which are at the back of these attempts to capture the farmer's trade through the mails.

Is Retailer To Blame?

Is not the retailer to blame to a great extent for allowing these healthy mail order plants to spring into being? Has his time-honored system of giving credit led him into a false belief that the farmer has got to come to him anyhow, and that he can charge him whatever price he thinks fit? The writer came across a case this week where a Manitoba farmer came into Winnipeg for a pump. He stated that his dealer had quoted him $12 for a pump which he was able to buy in the city for three dollars less. This particular article costs the dealer from four to five dollars. The same farmer stated that he had bought while in the city a cream separator for $45, for which his dealer asked him $110. Altogether he claimed to have saved $77 on his trip to Winnipeg.

Now, if these facts are correct, and if they apply to dealers all over the West, the farmer cannot be blamed entirely for sending his money to the cities.

High Price on Gates

The manager of a wire fence company related a similar instance to the writer. He was in the country, and required one or two gates. Entering the local store, he found gates manufactured in his own factory on sale. The dealer wanted $12 apiece for them. "What will you let me have half a dozen for?" asked the prospective customer. The dealer could not see his way clear to sell them for any less. Those gates cost the retailer less than five dollars each. The manufacturer revealed his identity, and gave the hardwareman a good lecture for running his business on such principles. The only reply he gave was that he only sold one or two, and he had to get a good price for them. That is exactly why he only sold one or two; orders for the others went to the mail order houses.

What Happened to Fencing

This is what has been happening in the fence business, and has resulted in a considerable portion of it being taken out of the hands of the hardware dealer altogether. No dealer has a chance of making a hundred per cent. profit on fencing to-day; the mail order houses make that impossible. In fact, profits on

(Continued on page 39.)

WILL RETAILERS REPLY?

The accompanying article deals with various phases of the retailing of wire fencing in Western Canada. The suggestion has been offered that retailers are to a considerable extent, responsible for the success of the mail order houses.

HARDWARE AND METAL would like to hear from retail hardwaremen, who will present their side of the case. There are many retail hardware merchants in Canada who are successfully combating mail order competition. There are others who are suffering to a very great extent from the inroads of mail order competition. Retailers are requested to send in their views, addressed to HARDWARE AND METAL, 143-153 University Ave., Toronto.

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVIII. TORONTO, JANUARY 8, 1916 No. 2

BRIEFS

THE NEW standard lists on tacks and capped goods, all subject to one discount, and shown elsewhere in this issue, will be greatly welcomed by the trade, especially the retailers.

* * *

THE MAN who makes a New Year's resolution and breaks it in a month is better off than the man who doesn't even bother to keep a resolution for one month.

* * *

THERE ARE a lot of people who think more of a cheerful manner than they do of a five per cent. discount. Cordiality is the cheapest thing you can dispense in your store.

* * *

UNLESS YOU know the value of each moment as an investment, each day that passes is only a stumbling block that sends you blundering on into the indifference, helplessness and decline of old age.

* * *

AN ORDER in council has been issued at Ottawa, prohibiting the export of scrap steel and scrap wrought iron to all destinations abroad other than the United Kingdom, British possessions and protectorates. This is another indication of the part which steel and iron have recently been playing in the munitions problem and the possibility of a famine in such metals should the war demand continue.

* * *

AUTHORITIES who have made a close study of figuring profits claim that it is scientifically correct to use either the cost or selling price as a base in figuring the percentage of profit, as long as it is stated and made clear on what base the percentage has been calculated. The vital issue, however, is the showing of net profit in dollars and cents at the end of the business year, when the inventory has been completed and the books are closed. And in order to make a satisfactory showing, it is necessary that a proper method of figuring profit should be followed throughout the year.

SUBMARINES BOOST PRICES

SUBMARINE activity in the Mediterranean during the past week has been responsible for sharp advances in the price of tin. In addition to this, there has of late been an eagerness in the United States to buy tin, owing to fears of British restrictions on the amount they would allow to come to America.

The sharpest rise occurred when news was received to the effect that the Japanese steamer "Kenkon Maru" en route from the East Indies to London, had been torpedoed and sunk in the Mediterranean, and that part of the cargo consisted of tin.

The situation in the American market is still chaotic for all deliveries before June. Sellers do not care to quote prices or to trade until the situation is clearer. The market is therefore purely nominal.

Lead is on the upgrade again and the London and American markets have advanced. If the firmness continues and prices advance much further it is altogether probable that many lead products including white lead, both dry and in oil, will advance in price.

Copper has again advanced and the market is very firm. Advances in the price of many products into which copper enters, may be looked for if the present state of the market continues. An American authority in referring to the copper situation states that the mines could readily produce more copper but production is now limited by the refining capacity which is taxed to the utmost.

DANGER OF SHORTAGE

FROM present indications it appears highly probable that jobbers' stocks of many lines during the coming spring will not be complete. Owing to the disorganization of various trades, on account of war conditions, jobbers are having considerable trouble in getting certain supplies promptly, or in sufficient quantities to meet future needs, and there is great danger of serious shortages when spring trade opens up. Retailers stocks are low. For a long period there has been considerable hand-to-mouth

buying, but conditions in this respect are improving steadily, and will continue to improve with the approach of spring, especially in the country districts where conditions are very favorable, and the future outlook is bright.

With prices on most lines of iron and steel goods advancing rapidly, the best policy appears to be to book early. There will undoubtedly be, in the future, much higher prices on many lines than the already high prices now being quoted. Unless something unexpected happens, little or no relief is expected for at least six months. All iron, steel and kindred industries are exceedingly busy, with every prospect of continuing so for several months. Quotations on a number of hardware lines are withdrawn, and when new prices are issued, they will undoubtedly be much higher than those formerly in effect.

There are a great many retailers who took advantage of the market predictions made several months ago, and protected themselves as far as possible against the high prices which were sure to follow. On the other hand, there are merchants who have not made a close study of market conditions, who have not protected themselves, and they are now at sea. They find that they are confronted with dollar linseed oil, three dollar nails, and many other lines correspondingly high.

CAMPAIGN A SUCCESS

ACCORDING to the Commission of Conservation, the results of the Greater Production campaign conducted in Canada during the latter part of 1914 and the early part of 1915, far exceed even the most sanguine hopes. Canada has harvested a crop of wheat estimated at over 336,000,000 bushels—more than double that of the previous year, and 45 per cent. more than any previous wheat crop in her history. The dairy industry sent from the port of Montreal butter and cheese valued at $23,705,000, exceeding the exports of 1914 by over $5,000,000.

In mineral production, Canada has made numerous advances. Copper and zinc refining plants have been established at Trail, B.C., and are treating native ores. Improvements have been made in certain steels to enable them to be used for shell purposes. Improvements have also been made in the concentration of molybdenum ores, the molybdenum being used in the manufacture of big gun linings and high-speed lathe tools. The recovery of benzol from by-product coke ovens has been developed. Benzol is used in the manufacture of explosives. In Western Canada the discovery of phosphate of lime in Rocky Mountains park should prove of great value to the agricultural interests.

Canada's fisheries have received especial attention, not only in the production but in the marketing. Both on the Atlantic and Pacific coast advances have been made. Due to conditions brought about by the war, Canada last year placed her fish upon the British market, and it is hoped that some species may be permanently established there.

Progress has been made in the cultivation of ideals looking to improvements in our homes and our municipalities. Conferences and meetings have been held from coast to coast. Nova Scotia to-day possesses advanced town-planning legislation. Other legislatures have special town-planning acts under consideration. On January 20th next, there will be held at Ottawa, under the auspices of the Commission of Conservation, a conference for the formation of a Civic Improvement League, to embrace all Canada, and to endeavor to secure betterment of conditions in the cities, towns and minor municipalities of the Dominion.

While greatly increasing her wealth through the output of natural resources, Canada has also made a very large saving by reduction of her fire losses. While the figures are not yet available, these, it is expected, will show substantial progress toward the standards of other countries in the ratio of fire losses.

The past year has been an era of awakening in Canada, and earnest endeavor has been made to eliminate waste, not only in manufacturing, but in mining and in the developments of all our natural resources.

COMFORT STATIONS FOR THE FARMER

A Simcoe, Ont., newspaper touches on an important question in these remarks:

> "It seems somewhat strange that rest rooms or comfort stations are not more generally provided in our towns and smaller cities into which farmers and their families drive to trade. Women, especially when children are with them, are often inconvenienced by the lack of such places. When tired with the shopping and oftentimes affected by bad weather, the existence of such rooms provided by the business men or by the municipality would indeed be a boon. Regarded from a humanitarian standpoint they make greatly for convenience and health. Regarded as a business proposition they pay, and people are glad to trade in a town where such privileges are found. To be sure the cost of providing and maintaining such rooms is considerable, yet nothing to what is often expended for institutions or events that have no value or at the best only a passing value."

While merchants individually have frequently carried into effect the above suggestion, yet we know of no instance in Canada where as a body or an association, they have acted. One of the great objects of the retail dealer to-day is to keep the interest in the home-town alive in mind of the farming community and it would seem that a big step in the right direction would be the establishment of what the Simcoe writer terms "comfort stations." Make the farmer understand that you appreciate his trade and he is your friend.

ADVISE CASH BASIS OR THIRTY DAYS

(Continued from page 29.)

as the executive or administrative department; the finance, including the credit department; the purchasing or producing department; and the sales department.

Having given details of the operations necessary in each of these departments, Mr. Wilson stated: "If you want to move a great bulky article with a four-horse team, the surest way to do it is to hitch the horses so that all will be pulling steadily in one direction; and in business if you wish to reach the goal of business, the bull's-eye of the target of business, 'profit,' you must so hitch the four-horse team of business organization —executive, finance, purchasing and sales department — on the same side, shoulder to shoulder, and encourage them to pull surely, steadily, and unitedly toward the goal of profit. There must be no lagging, no holding back, no jealousy, but one strong, well-sustained, united effort, and if we can induce this in the various institutions with which we are connected there will be no danger of our failing to take advantage of the magnificent prospects that stretch before us. Let us on the threshold of this New Year which should be the greatest and grandest Western Canada has ever known, firmly resolve that so far as we can individually do as we will, work in harmony and full accord with our fellows, and with them make a long pull, a strong pull, and a pull altogether for the betterment of our own institutions. The result will take care of itself—and of us as well."

Big Step Already Taken

H. Annis, vice-president of Marshall-Wells, Ltd., declared that when representatives of trading concerns, salesmen, credit men, buyers, and managers could meet as they were doing that night to discuss matters of mutual interest, that will help to increase sales and profits and tend to reduce losses, through careful handling of credits, they had gone a long way toward arriving at an understanding that would be mutually beneficial. With a view to indicating the advantages and the disadvantages of the location of Winnipeg as a business centre, Mr. Annis sketched the history of the city from the time it was a trading post, stating that the more he knew of Winnipeg and the West and the possibilities of development, the surer he was of their future and the greater occasion he had to feel that it was a privilege to be here. The territory that they as merchants were endeavoring to serve would in time become one of the great countries of the world, and future generations would be envious of those who were here and their day and generation. Because of this country's ability to produce grain and live stock a steady growth was assured, and to this had to be added the possibilities of mineral development.

The Distributing Centre

Winnipeg, stated Mr. Annis, was naturally the point from which goods can be distributed to best advantage to the country that lies to the West. In some heavier lines local western distributors had the advantage within the territory immediately surrounding their point, but in a general way there was no need for him to explain the advantages that Winnipeg possessed.

"But do not be entirely contented with our location," said Mr. Annis. "We have something here we must safeguard against those who have held us in light regard during the trying period of the last two years. This country has produced sufficiently well this year to have its attractions now for those that cared little for us in the time of our adversity. We cannot hide from them now evidence of our prosperity, for the crop we have produced is running over the tops of everything the farmers tucked it into. Make no mistake about what we have here. When the final returns are all in, the results, in my judgment, will exceed any estimate that has been published, and the results of marketing a portion of the crop are already written on the countenances of those assembled here. There is a good British motto, 'What we have we hold.' Its meaning has been made clear to me this fall. To me it means, if we held the bag when there was little in it, let us hold it now when we have difficulty in tying the string, and let nothing be diverted that belongs rightfully to this community of merchants."

ARE RETAILERS TO BLAME?

(Continued from page 31.)

fencing in some districts have become so small as a result of this competition, dealers are not disposed to handle it at all. The mail order houses come along with their prices in black and white, which cannot be met as long as the dealer continues to do business on the old system. And what is now true of fencing, is liable to be equally true of many other hardware lines before long.

Dealer Has Cold Feet

A fence manufacturer used the following words when asked why the dealer was losing his fence trade:—"The dealer has got cold feet in many cases, and refuses to carry good stocks because he is afraid that the farmer will send away for his fencing anyway. If dealers would get right out, and say they have got to head off this business, they would keep it at home. The dealer can't get the same credit from us he used to get. Manufacturers are content to work on a smaller margin—they have had to do so since this mail order competition commenced to get so strong. If the dealer paid cash, he would be in a better position to handle the fence trade. Instead, he gets an inquiry for fence, and writes to us for prices. Possibly he gets cash from the farmer, but he wants 60 to 90 days from us. In other words, he is using our money to finance the rest of his business. That's why some manufacturers are going after the mail order business—they get the cash.

"A great many dealers are holding their fence customers, and it is mostly through their own efforts. It is like any other branch of the hardware business, if they concentrate their efforts on it, they will get it."

Must Anticipate Requirements

Now as regards the prospects of the dealer next spring. He can safely expect that the farmer is going to buy earlier and more than he did last year, the chief reason being that the farmer has the money, and is disposed to pay more attention to his farm than he did in former years. That buying will be done earlier this year is evident from the fact that manufacturers are receiving inquiries daily, in larger volume, and much earlier than they ever did before. There is a good demand for barb wire, but it is probable that more woven fencing will be required next spring.

As already stated, prices will be higher, and it is necessary for dealers to anticipate their requirements if they are going to do business on the same level as their city competitors. Prices are higher than they were last year. Barb wire which cost 2.25 per 80 rod spool in 1915, will cost 3.25 for next season, and with the raw market on the up grade, quotations are bound to go higher still before very long. Manufacturers predict a further advance of about ten per cent., and are not guaranteeing prices. Not only is the raw market advancing on wire goods, but manufacturers are having difficulty getting supplies.

BRITISH INDUSTRIES FAIR

Fair Will Be Held in London, England February 21

In view of the success of the British Industries Fair, held in the Agricultural Hall, London, England, from May 10 to 21, 1914, the Imperial Board of Trade have decided to hold the second British Industries Fair at the Victoria and Albert Museum, Kensington, London, on February 21, 1916. The fair will be open for 12 days. The trades exhibiting will be toys, glassware, fancy goods, earthenware, and china, printing and stationery.

Making Show Cards Doubly Attractive

By Using Illustrations Taken From Advertisements in Hardware and Metal, Show Card Writers Have Overcome a Former Difficulty—Three Attractive Show Card Suggestions.

By T. O. CRAWFORD

THE three show card suggestions accompanying this article can be easily and quickly made by any card writer or window trimmer who is at all handy with a brush or pen.

Those who have been following the Edwards course of card writing which is running in Hardware and Metal [article 13 appeared last week] will find that all phases of card-writing necessary for making show cards, such as are shown here, have been treated in the regular course. The illustrations used in preparing the accompanying show card suggestions have been taken from advertisements which have recently appeared in Hardware and Metal. The illustrations make the show cards doubly attractive. A well illustrated show card, like a well illustrated newspaper advertisement, attracts attention, and holds it. By using illustrations taken from the advertising pages of Hardware and Metal the card-writer can save a great deal of time when preparing show cards.

At one time you often heard show-card writers lamenting because they could not draw suitable illustrations or figures for show cards. This difficulty has now been overcome by using the splendid illustrations which are used in advertisements in every issue of Hardware and Metal.

The illustration used in preparing the "Military Service Mirror" show card

The illustration used in preparing the above show-card suggestion was taken from an advertisement which appeared in a recent issue of Hardware and Metal.

was taken from an advertisement which recently appeared in Hardware and Metal.

The illustration of the soldier shaving was cut from the advertisement and pasted on a sheet of plain white cardboard, measuring 9½ in. x 13½ in. The illustration showing the mirror and case was also cut from the advertisement and pasted on the card as shown. The heavy

The illustration used in preparing the above show-card suggestion was taken from an advertisement which appeared in a recent issue of Hardware and Metal.

border surrounding the larger illustration was made in black with a brush, and the black border was in turn surrounded by a slate grey border.

The lettering "Military Service Mirrors" is called a brush stroke "Bradley." It is one of the easiest of all the brush stroke alphabets to master. In making this lettering the brush at nearly all times is held in the same position. The smaller lettering at the bottom of the card was made with a stub pen. The grey color used for ruling was made by mixing black and white together.

The illustration used in preparing the show card suggestion featuring "Stanley" hammers was taken from an advertisement which recently appeared in Hardware and Metal. This card is very appropriate for use in a window or interior display of tools. A good variety of hammers is shown on the card, in very small space. The finished show card measured 7½ in. x 14 in. The large lettering on this card was done with a No. 1½ round writing pen. The shading was done with a small brush. A stub pen was used in making the small lettering.

Card No. 3, featuring step-ladders, is a rather unusual one, because as a general rule step-ladders are seldom featured in this manner.

The illustration of the step-ladder was taken from an advertisement which appeared in a recent issue of Hardware and Metal.

The card was quickly and easily made. The ladder illustration was cut from the advertisement and pasted on a sheet of plain white cardboard, measuring 13 in. x 14 in. The ground work below the ladder was washed in with black ink thinned down with water. The lettering on the card is a slanting Roman shaded. It is brush stroke work all the way through. A No. 6 red sable brush was used in making this card. The border was made with a stub pen.

The tools and materials used in making the cards are as follows:—Cardboard, paste, black for brush, black ink for pen, card-writer's white, No. 6 brush, 1½ round writing pen, stub pen, ruler, scissors.

The illustration used in preparing the above show-card suggestion was taken from an advertisement which appeared in a recent issue of Hardware and Metal.

WHAT OTHER PAPERS SAY

COMMERCIAL JUDICIARY NEEDED

(From Canadian Credit Men's Journal)

One of the chief difficulties confronting creditors when they bring a prosecution against a crooked debtor is failure to get adequate sentence imposed by the Courts when guilt has been established. Unfortunately, to our way of thinking, there are too many judges on the Bench who are thoroughly skilled in the law, but have little idea of its application from a commercial standpoint. Commercial judges — men who have a thorough knowledge of trade and commerce and know something of the intricate nature of crooked deals—are rare, and until the country builds up a judiciary, skilled in business and for the express purpose of handling commercial cases, there will always be more or less ground for complaint. The judges to-day, we believe, follow the statutes according to the best of their knowledge and belief, but there are a vast variety of nefarious transactions not covered by the statutes of which many of these judges have little knowledge; and the result is, not appreciating the importance of the situation, the debtor has the benefit of the doubt and goes free, or with a sentence of a class or kind that has no deterrent effect on the other fellow who may be considering a similar scheme.

* * *

HUGE CROPS HALF MARKETED

(From Financial Post)

At the close of the year there are several facts which should be reassuring to business men, the chief of which is that of the great cereal crop reaped in 1915, but half has as yet gone to market and for that which remains, and the moving of which will tax our transportation facilities, there is every prospect of the price being higher than that obtained for the half already marketed. It is a striking fact, also, that as the year closes, the banks carry more deposits than they have done at any previous time in their history. Those companies that have gathered from abroad during the past half century, funds to use in developing our farms and other resources, and those organizations that have encouraged thrift by inducing the investment of savings in assurance, find from their investments a return better than in normal times. After taking from the people's savings the proportion loaned to the Government, and payable during the first months of the year, there will still be left large sums available for investment. It was expected that the war loan would for a time exhaust the resources of the investor, but as a matter of fact his appetite for the high-class securities seemed fresher after his application for $100,000,000 than before, and in consequence prices advanced somewhat. With half our crop to market, with our coffers well filled and the prospect of a strong market for our products generally during 1916, there is every reason to enter the new year with cheerfulness.

* * *

AN OLD ACQUAINTANCE

(From Montreal Journal of Commerce)

In the disclosures recently made of alleged plots at San Francisco to destroy bridges and tunnels on the Canadian Pacific Railway, Canada hears again from an old acquaintance. The plots are said to have had their origin in the office of the German Consul General at San Francisco, Mr. Franz Bopp. Mr. Bopp was Consul General for Germany in Canada a few years ago, with headquarters at Montreal. He it was who represented the Kaiser in the Dominion when the commercial war between the two countries began. The German Government undertook to punish Canada for the granting of the preferential tariff to Great Britain. The step then taken by Canada was, it is true, a departure from the then existing relations between Canada and Germany, but it was not a step that gave Germany a good cause of complaint. Germany and Belgium had old treaties with Great Britain which not only assured those nations of what was commonly known as "most favored nation treatment," but went further, guaranteeing to Germany and Belgium the same tariff treatment as Great Britain herself received in the British Colonies. These treaties, made at a time when the wishes and opinions of the Colonies were not deemed worthy of consultation, really stood in the way of freedom of commercial arrangements within the British Empire. Petitions and resolutions seeking the termination of these treaties had proved of no avail. It was only when the Canadian Government, taking the bull by the horns, decided to ignore the treaties and grant a preference to Great Britain that a change was effected. This vigorous action led the British Government to give notice to Germany and Belgium that the treaties would be denounced. Belgium saw no cause of complaint in what Canada had done, but Germany took offence and immediately penalized Canadian products by subjecting them to the higher German tariff. Mr. Bopp was then then German Consul General in Canada. Representations were made through him, as well as through other channels, to the German Government by the Government of Canada, setting forth that Canada still granted to Germany all the tariff concessions that were granted to any foreign nation, that therefore Germany should not feel offended, and incidentally pointing out that in event of a tariff quarrel between the two countries, Germany stood to be the loser. If Mr. Bopp was himself favorably impressed by this argument, it is certain that his chiefs at Berlin were not. Canadian trade with Germany continued to be handicapped. Then, finding that the Germans would not be reasoned with, the Canadian Government applied a club in the form of a surtax on imports from Germany, which speedily shut out the products of Germany, and brought the German Government to sue for commercial peace. Mr. Bopp had in the meantime passed out of Canada, leaving to his successor the task of readjusting the relations between the two countries. Now Mr. Bopp reappears at San Francisco in a role which, if the allegations are well founded, is decidedly hostile to Canada.

CONSUMPTION OF ALUMINUM

(From Canadian Mining Journal)

The consumption of aluminum in the United States in 1914 was the largest on record and amounted to 79,129,000 pounds, valued at $14,523,000. Sixty years ago aluminum was a chemical curiosity, valued at $90 per pound. The total amount produced in 1883 was 83 pounds. About 1889 it was selling in the United States at $4.50 per pound, and the output was 75 pounds per day. With cheapened electric power and improvements in manufacturing processes, due to the genius of men like Charles M. Hall, the metal has ceased to be a "chemical" and its uses and applications are growing. At the end of 1914 it was selling at 19 cents a pound, but now, owing to the great demand, it is worth 60 cents a pound.

The consumption of metallic aluminum in the United States is much greater than the output and, though some metal is exported, a much larger quantity is imported. Much secondary aluminum is recovered from one source or another, largely from scraps, borings, and turnings. This recovered aluminum amounted, in 1914, to 6,253 short tons, or 12,506,000 pounds. The consumption of the metal is growing rapidly and the facilities for turning out enough for home consumption are inadequate. The one concern manufacturing the metal in the United States has steadily expanded its plant capacity in recent years, and has recently acquired an immense plant capable of generating 100,000 horsepower at Whitney, N.C., financed by French capital, but on which work has been suspended.

The great increase in the consumption of metallic aluminum has been determined by the peculiar properties of the metal, especially its lightness. Commercial aluminum has a specific gravity of about 2.7, whereas the specific gravity of brass is about three times as great, that of steel about 2.8 times as great, and that of copper approximately 3.3 times as great. Hence the metal has been in demand in the manufacture of automobiles, aeroplanes and dirigible balloons.

PANORAMA OF PROSPERITY

(From the Wall Street Journal)

The prosperity of the country at the present time can hardly be more evident than it is to the Jersey commuter on his trip to the office every morning. Beginning at the West Shore yards at Weehawken, he sees hundreds of freight cars side-tracked and waiting to be unloaded, while packages of every description are piled high, on each available foot of space. At anchor in the river are at least a half-dozen freight vessels, loading or awaiting their turn to dock. Small sailing craft, schooners and other infallible signs of abnormal times are receiving their share of the bountiful shipping harvest.

The only sight, alien to this industrious scene, is the idleness of the German piers at Hoboken, but we need only look to the other side of the river to see the contrast. Here ships, surrounded by lighters, grain elevators and barges, are rapidly settling to a depth which seems almost unsafe. The piers are choked with piles of goods awaiting export.

WHERE CONSERVATISM FAILS

There is something about the retail business which tends to make the merchant conservative, and that kind of conservatism which causes him to take time enough to find the "worth while" of each proposition before making changes—that is the kind on which good business is built.

But there is another kind which keeps dealers moving along in the same old rut, oblivious of modern and helpful ideas; this, too, is called conservatism. In reality, it is dry rot.

It may be said that, so far as their business is concerned, few dealers let their conservatism run to a point where it paralyzes all initiative.

But when it comes to politics it is a different matter. It has been their custom to keep out of politics, to leave it to their beneficent Uncle Sam to give them a square deal in legislative matters, and, as a result, they find themselves both neglected and misused.

Senator Clapp, of Minnesota, in a recent address, hit the point exactly when he said: "The man who is pursuing the even tenor of his way, asking nothing but what is right and just, wanting nothing in government but justice, forgets that his supineness will be taken advantage of by the eternal vigilance and activity of wrong."

Here is the strongest possible justification for every trade association and every retailer taking an active interest in politics.

We are coming out of it and getting to work rapidly. The activities of all the associations in the last four years show it, but more of us must become active and not leave it all to the state and national officers.

At this very moment there are two laws which we especially need.

One is a price regulation law, as set forth in the Stevens Bill, and the other is an honest advertising law similar to one in Germany which, among other things, has done away with this "save middlemen's profits" talk and other statements of a like misleading and untruthful nature.

These measures mean so much to the welfare of every honest business man that no member of any retail association can afford not to support them, and we believe this fall and winter will show a further discarding of old customs and a greater interest on the part of retailers in pushing legislative questions.

THE JUNIOR CLERK'S PAGE

Personal Efficiency*

A Man in His Lifetime Has Two Things to Do—A Narrow-Minded Man Can Never be Truly Efficient—Need To-Day of Symmetrical Men

THE efficiency that I am going to talk about is the efficiency that makes well-rounded men to lead symmetrical and successful lives. The personal efficiency that I have in mind is the best development of the human individual, not only from the standpoint of business and work, but from the standpoint of culture and play also.

When we talk of success or a successful life we are tempted to analyze the qualities that enter into this success. The most important of these qualities, to my mind, are courage, energy, persistence, initiative and character.

Courage is the quality that sustains a man's heart in tackling difficulty. It makes him stand up under the burden and heat of the day, and encounter each new difficulty with zest and with a determination to overcome it.

Energy is the steam of the boiler, the driving power. It enables a man to keep going and not lag in his energy. It is that peculiar, undefinable power in a man that keeps him going.

Persistence is the bulldog quality of tenacity, the ability to hang on. That quality that says, "never say die." It is the quality that insures a man from not being baffled by difficulties; what we sometimes call sand or grit.

Initiative is the power to plan, and to adminster. It is the power that distinguishes the master from the slave, the leader from the followers. It is the characteristic that distinguishes the human from the machine.

Character is that pervasive and intangible thing that sees to it that all other qualities are used to right ends. It is the compass of a man's life. Without this all the other qualities mentioned will simply make of a man an educated and finished rascal.

Success in almost any line may be purchased by a man of even average ability or intelligence, if he is willing to pay the price. Scholarship, wealth, position, may all be had if a man is but willing to give up the things that will be required to attain his object.

Offices and workrooms now have many labor-saving devices, I need only instance the typewriter, dictaphone and the adding machine. What are these labor-saving devices for? Is it not that a man may save time? But what are you going to do with the time you have saved? It has been truly said that a man is known by the way in which he spends his leisure.

A man in his lifetime has two things to do. First, to make a livelihood; second, to live a life. Some men make the former of these two the chief business of life, as though life were but a procession from the cradle to the grave.

All of you have known old men who have devoted their entire lives to the strenuous and unremitting pursuit of wealth. In old age these old men are helpless and have nothing to do. They may have attained wealth, but they have no way in which to spend the leisure which their wealth brings them. They do not care for books, art or music. These qualities have been allowed to starve during their pursuit of wealth.

On the other hand, many of us have known old men who in their old age were in the most beneficent and useful part of their lives. They have no difficulty in finding ways in which to spend their time. They are fond of books, reading, art, literature, music. They present to the world a picture of a serene and honorable old age.

Real personal efficiency consists in the building of a well-rounded and symmetrical life. I once heard a great sermon preached on the text, "Behold, I set before you an open door." In youth men have about them many open doors. One is called history, another music, another art, another literature, another biography, another science, and so on.

These doors at first spring open and shut very easily. As long as they are used properly they are easy to open. However, if you neglect to use them, gradually one by one they begin to rust shut, and after a while the time will come when you will no longer be able to open them. Instead of looking out on life through 50 doors, you will be looking out perhaps through three or four doors. Your life lacks that much, therefore, of being truly efficient.

Lives are really lived in breadth and depth, rather than in length. The poet spoke wisely who said, "Better 50 years of Europe than a cycle of Cathay."

Men's lives are measured by the versatility of their interests. From this it follows that in order to make an efficient man it is necessary for a man to cultivate every side of his nature thoroughly, and to take an interest in as many things as possible. He must not devote himself singly and wholeheartedly and with his whole time to business. He must also think of music, of art, of literature, and all of the other things that minister to a man's best nature. He must attempt to make of himself an all-around man. It is necessary to keep open as many doors as possible, so that life may be viewed broadly and wisely, and not narrowly. A narrow-minded man can never be truly efficient.

There is great need to-day of symmetrical men. We are living in a time when problems are constantly arising, and it takes men of the highest calibre and of the greatest all-around efficiency to solve them. They cannot be solved by men of narrow interests. The problems of to-day need breadth and vision.

The problems of the coming century cannot be solved by men who know only their business. The fact is, we know that the problems of the past decade or two would have been very much better solved if their solution had not been attempted by men solely of a business training.

After all, the highest personal efficiency is based in the fullest development of a man. A man must cultivate his heart, his mind, and his spirit if he is to build a truly efficient life.

We all want to develop the best type of our class. We all want to be well-rounded and symmetrical men; therefore, to any man who asks me how best to attain personal efficiency, I would say something like this: So live, and so develop, and so grow, that when you depart men may not say of you, he was a good merchant, or banker, or lawyer, or bookkeeper, but rather, he was a man.

*From an address delivered by Richard R. Price, Director of University Extension, University of Minnesota.

Sheet Metal Workers' Course

By Chas. Sievers

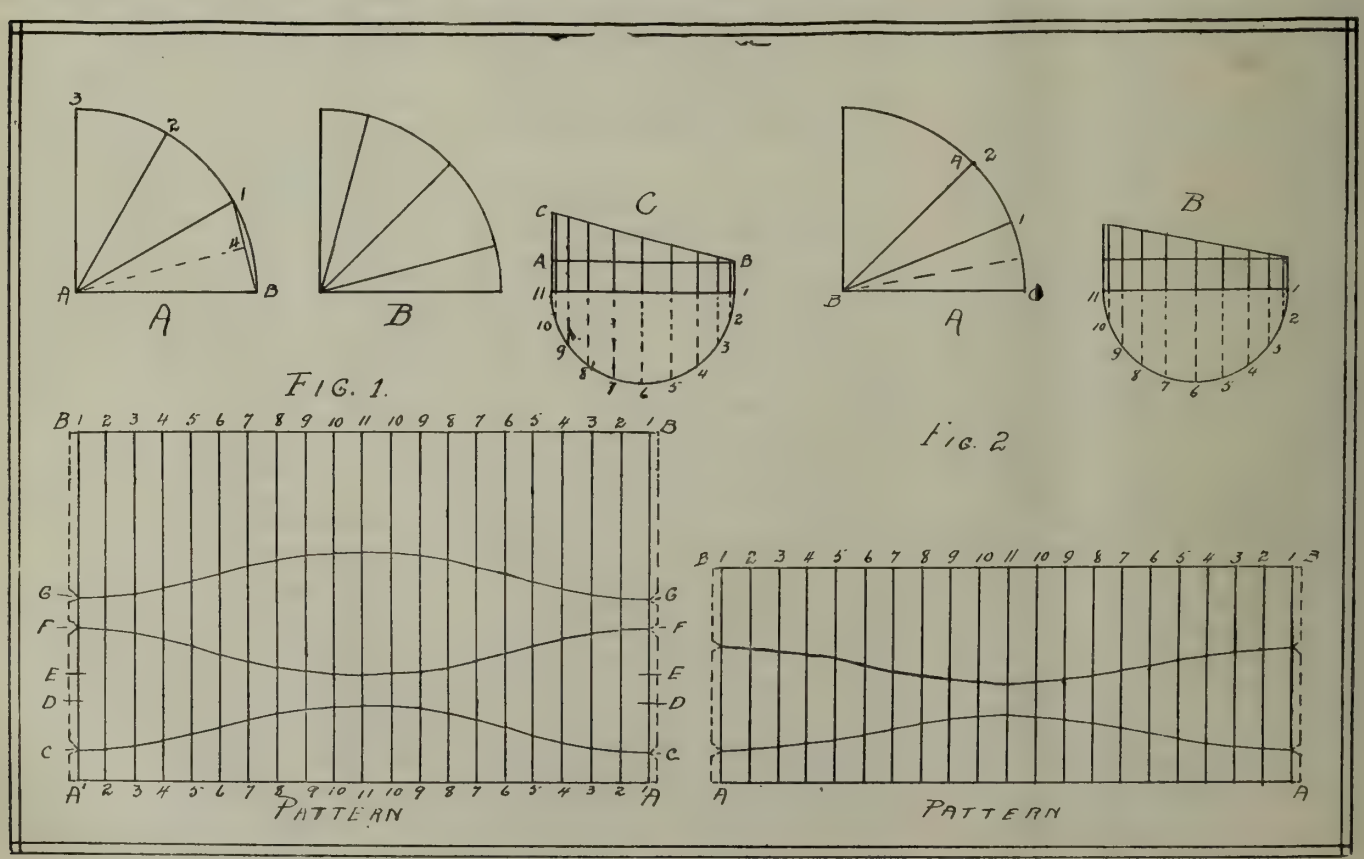
A READER recently asked for some details regarding the proper course to pursue to cut a more than two-piece elbow in round pipe. No doubt many sheet metal workers would be interested in the same lesson.

This lesson will explain the problem. Having decided how many pieces the elbow is to be made, the first step is to find the amount of rise to give each section of the elbow. To find this, draw a quarter circle, with a radius equal to the diameter of the elbow required, as shown by A-B at A in Fig. 1. With dividers or compasses divide the quarter circle in two equal parts, one part less than the number of pieces required in the elbow, so that for instance for a four-piece one, divide into three equal parts, as shown by 1, 2, 3, at A in Fig. 1. Divide one of these divisions into halves, one of which will be the raise required, as shown by B-1-4 at A.

At B is shown the sections as divided, laid out in a similar manner to an elbow.

In ordinary practice it is only needed to develop one-piece of the elbow. At C is laid out A-B equal to the diameter required, and at right-angles to A-B at A is A-C equal to one raise of the elbow as shown by B-4 at A. On the line A-B draw a half-circle, divide the half-circle into a number of equal parts as shown by the figures 1 to 11. From each of these points draw lines at right angles to A-B extending them until they join the line C-B. The next step is to outline the pattern. Draw two parallel lines as shown at A-A and B-B. At one end draw a line at right angles to A-A to B-B. From this point set off on A-A and B-B the divisions on the half-circle, from 1 to 11, and repeat in order to make the circumference complete. Next draw lines joining 1 to 1, and 2 to 2, etc. With compasses or dividers measure the distance from the line 11-1, to the line C.B, commencing at point 1, and set off from A-A on lines numbered 1, measure off space 2, and set off on lines two, measure off space 3, and set off on lines numbered 3, and so on until the space numbered 11 is reached, when it can only be marked off once, it being the centre of pattern. Now draw a line through the points just obtained on pattern, which will give outline of one end piece. To mark out balance of elbow, one line 1-1 on each end mark off, first the amount of raise, as from A-C shown at C, then the desired width of each piece of elbow in the throat, and then the raise A-C, as shown, by D-E and F at each end. Cutting out the portion of pattern just finished, turn it over on to the upper part of layout, keeping the points C-C even with the points F-F when even scribe off with scratch awl or pencil. To

(Continued on page 43.)



NEW HARDWARE GOODS
OFFERED TO CANADIAN HARDWAREMEN

HONE HANDLE STROP

American Hone Company, Olean, N.Y., recently produced the hone handle strop, here illustrated. The new strop has a hone handle, which the makers claim is of an exceptionally high quality, and will not break easily by dropping. It may be washed, and acts as a form to wind the strop around when you wish to pack it in a travelling case. The makers of the hone handle strop claim that the easiest way to keep a razor in condition and the only way to keep it in perfect condition is to draw it across a fine hone

The Hone Handle Strop

two or three times every time you shave, and then 10 to 15 light strokes on a fine strop held taut. The hone is said to be hand-made, silk sifted and non-filling. The strop has a tannage of shell horse-hide.

The strop and hone can be used for either ordinary or safety razors. Complete descriptive matter will be supplied on request.

NEW ELECTRIC LANTERNS

The Canadian H. W. Johns-Manville Co., Toronto, announce a new series of electric lanterns. All of them are constructed to take the regular standard dry battery, but the makers claim that the unenclosed type differs radically from any other lantern on the market.

They state that the chief difficulty hitherto with this type has been that the weight of the battery was carried almost entirely on the terminals, which by the undue strain thrown on them, soon broke away, rendering the whole outfit useless.

In the new "Battery Clasp" lantern, the battery is held by a strong metal "clasp" which almost encircles it and takes the weight entirely from the terminals, leaving them to perform only their natural functions.

The other two numbers are both of the enclosed type, the difference lying in the fact that they are for one and two cells respectively. The containers forming the body of the lantern are of heavy rolled metal, strongly seamed and stove japanned. The lens and reflector are said to be of the most approved type, throwing a powerful beam of light for upwards of 100 feet.

The new automatic lock-switch furnished with these is said to have a very valuable feature. In both patterns the switch is positive and self-locking in any position, so that it can neither be turned on or off accidentally.

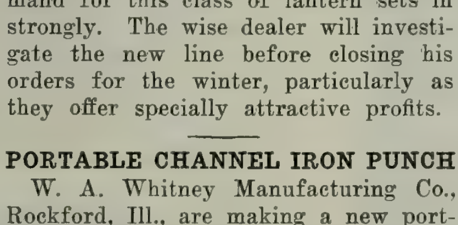
The advantage of this will be apparent to anyone who has had the experience of a battery wasting away unnoticed, simply because the switch had become accidentally turned on, with the result that the lantern was useless just at the time it was needed.

This is the time of year when the demand for this class of lantern sets in strongly. The wise dealer will investigate the new line before closing his orders for the winter, particularly as they offer specially attractive profits.

PORTABLE CHANNEL IRON PUNCH

W. A. Whitney Manufacturing Co., Rockford, Ill., are making a new portable channel iron punch, which they claim is a tool every sheet metal worker has always needed.

The capacity of the new punch is ¼-inch hole through ¼-inch iron. Punches to centre of 4-inch channel iron, with

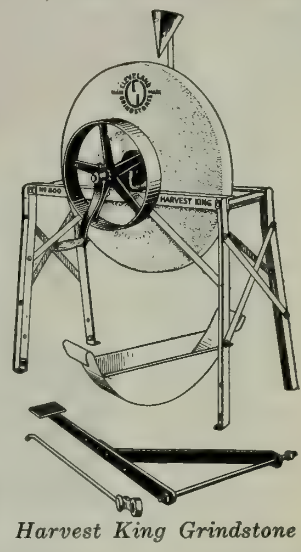


Portable Channel Iron Punch

1½-inch flanges. The new punch is very similar in design to the No. 2 punch made by the company; the same punches and dies and all other small parts can be used in both. The only part that is different is the drop-forged lower jaw, which has the opening back of die socket that allows channel and angle iron to be pushed through from the side, and punched in web, between the flanges. The new punch is a trifle heavier than the No. 2 punch. Both punches have the same sizes of punches and dies—⅛ to ½-inch by 1-32nds.

HARVEST KING GRINDSTONE

The Cleveland Stone Company, Cleveland, Ohio, offers to the trade the Har-



Harvest King Grindstone

vest King, No. 800, power mounted grindstone.

The frame is of heavy angle steel, 1¼ in. x 1¼ x 3/16, strongly braced. The frame folds up, and it is only necessary for the ultimate buyer to attach one end of each of four side braces to set it up.

The bearings (roller bearings) are made from cold rolled steel shafting. The makers state that the stone is the only cheap power stone on the market with bearings of this type. The stone is a standard high-grade selected Cleveland grindstone, 24 in. x 2 in., with a ⅝ in. shaft, 12 in. x 2⅜ in. pulley, and heavy steel roller bearings, hand crank and drip cup. The makers state that the stone can be set up in a few minutes without instructions. The finish is green and black. The weight with regular equipment is about 125 lbs. Weight complete with trough and treadle is about 140 lbs. The frame is shipped folded complete. The stone is crated separately to save freight.

The Dealers' Mint of Selling Hints

Contained in This Folder Will Be the Means of Helping Every Kyanize Dealer Increase His Profits

IF there is no Kyanize agent in your town, write to-day for the *"Dealers' Mint of Selling Hints"* contained in the red folder which fits your files. It will open your eyes to what co-operation—a partnership between Factory and Dealer — really means. Write us now while the matter is before you. We will answer by return mail.

A STACK of dealers' letters every day thanking us for our co-operative sales help, telling us that we're selling Kyanize for them 365 days in the year, inspires us.

We're going to give our Kyanize dealers the right kind of thanks. We're going to do even *more* for them—send *more* customers to them, create *more* sales, *more* profits than ever before.

"The Dealers' Mint of Selling Hints" tells all about it. It's all in the red folder.

Our co-operative advertising plan, our big national advertising campaign, our steel and wood display cabinets, our wonderful life-size cut-outs, our hanger signs, our movie slides, our circularization helps, our free coupon offer, our Painters' "come-on."

There never was anything like this in the varnish business! It will *Kyanize* the Dominion!

No concern ever stepped up to the Dealer's side and did as much for him—sold as many goods for him—helped him like we help *Kyanize* dealers.

No wonder our Dealers say that every Dealer should grab a Kyanize Exclusive Agency.

Boston Varnish Company

Everett Station **Boston, U.S.A.**

Canadian Distributors:

The J. H. Ashdown Hardware Co., Limited, Calgary, Winnipeg, Saskatoon.

Sturgeons, Limited, 91 Church St., Toronto.

The E. Cavanaugh Co., Limited, 935-945 Notre Dame St. West, Montreal.

Kyanize
KY-AN-IZE

Here's a Plan That Brings Thousands of Dollars to Kyanize (KY-AN-IZE) Dealers in Every Section of the Dominion

A Good Brush for Ten Cents and a Can of Kyanize Free

FIRST you get reliable boys to distribute the coupon circulars to every house-owner and housewife in your town.

The circular tells the uses of Kyanize for floors, furniture—for all interior and exterior woodwork.

The coupon is good for one can of Kyanize free—at your store—with the purchase of a 10-cent brush to put it on with.

Then you run an ad in your local newspaper from the electros we furnish you.

You make a counter display of Kyanize and brushes and put up our "Free to-day" sign in your store window.

This plan brings customers to your store — makes sales — makes profits.

Our dealers are enthusiastic about it. If there isn't a Kyanize Agency in your town write us for our "Dealers' Mint of Selling Hints." Keep it in your files.

Write us to-day for it.

A FULL 15 CENT CAN

FREE TO-DAY Kyanize

FLOOR FINISH FOR ALL WOOD WORK

If you buy a 10 Cent Brush to put it on with

EVENTS IN THE TRADE

Personal Notes

J. W. Gibson has been appointed general manager of the Canada Cycle & Motor Co., Toronto.

John Mackenzie, of Mackenzie Bros., Ltd., Winnipeg, Man., wholesalers of hardware specialties, Winnipeg, has been in New York and other eastern centres in search of suitable lines for the western trade. He also attended a convention of representatives of the Rochester Stamping Co., at Rochester, N.Y.

J. A. MacPherson, Winnipeg manager of the Frost Wire Fence Co., has been visiting his home in St. Thomas, Ont., during the holidays, while East, he called at headquarters in Hamilton.

W. E. Beresford, Sarnia, Ont., manager Perfection Stove Co., left recently for a business trip through the West to Vancouver.

H. H. Pigott, formerly credit manager for the J. H. Ashdown Hardware Co., Winnipeg, has accepted that position again, and is now located at Winnipeg. Mr. Pigott was one of the pioneer members of the Canadian Credit Men's Association, and was president of that body for two years.

A. C. Fairbairn, Saskatchewan representative of the Winnipeg Ceiling and Roofing Co., was one of those present at the Credit Men's banquet in Winnipeg on Tuesday night, Dec. 28.

Transferred to Aviation Corps

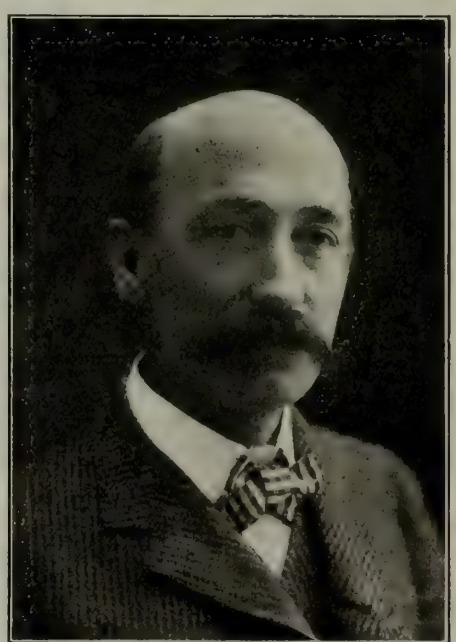
Brantford, Ont.—Sergeant A. Grant MacDonald, of the 125th Battalion, formerly assistant superintendent of construction of the Schultz Brothers Company, Ltd., has been transferred to the Canadian Aviation Corps with the rank of Flight Lieutenant. Lieut. MacDonald's departure was made the occasion of a presentation by the firm of a handsome portmanteau.

Credit Men's Banquet

The second annual banquet of the Western Credit Men's Association and Wholesalers, was held in the Palliser Hotel, Calgary, on December 28th. The gathering was the largest and most successful yet held, there being about three hundred and fifty guests present from all over Alberta, including a large number of commercial travelers. During the evening addresses were delivered by Bruce Robinson, P. Burns, and R. R. Gray, of Calgary, and J. E. Brown, manager of Revillon Wholesale Ltd., Edmonton.

Obituary

Summerside, P.E.I.—The death occurred here recently of James A. Mackenzie, an employee of Stanley Shaw & Peardon, hardware merchants.



Lieut.-Col. W. M. Gartshore, Vice-President and General Manager, McClary Mfg. Co., who was elected Mayor of London, Ont.

Vancouver, B.C.—Word has been received here of the death at San Diego, Cal., of Thomas Dunn, a pioneer hardware merchant of this city. Mr. Dunn came to the city in the early 80's, and was a member of the first City Council. His firm, T. Dunn & Co., occupied premises on Cordova Street, now the Wood, Vallance, Legatt Co.

Toronto, Ont.—The death occurred here recently of Robert C. Brayley, aged 77 years. For 25 years Mr. Brayley represented Doon Twines, Ltd., between Toronto and St. John, N.B.

Owen Sound.—The death occurred here suddenly of Henry Stephens, who for many years conducted a hardware and tinshop on Second Avenue East.

Toronto, Ont.—The death has been announced of Lieut. H. C. Jones, who prior to enlisting was a city traveller for the British American Oil Co. Harry Jones left Toronto a private, was promoted to sergeant on Salisbury Plains, and was afterwards promoted to a lieutenant on the field of battle. Death resulted from a gunshot wound in the jaw.

Industrial Notes

West Lorne, Ont.—The West Lorne Motors, Ltd., will establish a plant to manufacture gasoline tractors, etc.

Toronto, Ont.—The Canada Metal Co. have applied for a permit to erect an additional building to their factory on Fraser avenue at a cost of $25,000.

Peterborough, Ont.—The by-law to purchase the Exhibition Grounds was defeated, and the Peterborough Metal Products Co.'s exemption from taxation by-law carried.

Montreal, Que.—The Canadian Car & Foundry Co. has closed an order for nearly 2,000 freight cars valued at about $2,000,000, for the French Government. Work on the order is to be started at once.

Chatham, Ont.—Three industrial by-laws carried by large majorities. These grant fixed assessments to the Gray-Dort Motor Co., American Well Works Co., and the Dominion Sugar Co.

New Industry

Hamilton, Ont.—It has been announced that the Perkins Glue Company, of Lansdale, Pennsylvania, would locate a factory in this city. The company has leased the premises on York Street formerly occupied by the Climax Road Machinery Company, and extensive alterations are being made to the building. A Dominion charter has been applied for and the company will have a capital of $40,000. It expects to start operations on February 1.

Ontario Incorporations

W. G. Edwards Company, Ltd., capitalized at $40,000, head office Bridgeburg, Ont., to manufacture and deal in tools and vehicles of all kinds.

The Precision Manufacturing Company, Ltd., capitalized at $60,000, head office, St. Catharines, manufacture and deal in tools, machinery and metal articles.

Hardwaremen in Civic Elections

Various Branches of the Hardware Trade Represented by Men Who Were Returned in Elections Held in Ontario During the Past Week.

Elections at London

London, Ont.—Lieut-Col. W. M. Gartshore, vice-president and general manager McClary Mfg. Co., was elected Mayor of the city at the recent election.

Frank White, of the London Rolling Mills, was elected to the Board of Control.

C. W. Summers, hardware merchant, was re-elected as alderman.

E. R. Dennis, of the Dennis Wire & Iron Goods Co., was elected to the Utilities Board at the recent election. Mr. Dennis received the largest vote in the whole election, being returned with 4,770 votes.

F. G. Mitchell, of the London Engine Supplies Co., is a member of the Utilities Board, having been elected for a two years' term last year.

W. W. Nobbs, local sales manager McClary Mfg. Co., was elected as a member of the Board of Education.

Mayor of Welland

Welland, Ont.—J. H. Crow, hardware merchant, was elected mayor by acclamation.

Reeves Elected

Jos. Weber, hardware merchant was elected reeve of Neustadt, Ont.

J. B. Skelton, hardware merchant, was elected reeve of Palmerston, Ont. Duncan McNabb, of McNabb Bros., hardware merchant, was elected reeve of Orillia, Ont.

Other Offices

Brantford, Ont.—W. R. Turnbull, of Turnbull & Cutcliff, Ltd., of the Street Railway Commission, was re-elected. Alex. Ballantyne, hardware merchant, was elected as alderman.

Charles W. Conn, president Ontario Retail Hardware & Stove Dealers' Association, Tillsonburg, Ont., was elected councillor.

D. Brocklebank, Arthur, Ont., was elected reeve.

Mayor of Galt

Galt, Ont.—Alexander McKay Edwards, president Galt Stove & Furnace Co., was elected mayor by acclamation.

Guelph, Ont.—H. Occomore, hardware merchant, was elected water commissioner by acclamation.

Mayor of Sarnia

Sarnia, Ont.—Thos. Doherty, president Doherty Stove & Co., Ltd., was elected mayor by acclamation.

Toronto, Ont.—Miles Vokes, of the Vokes Hardware Co., Ltd., Toronto, was re-elected to the Board of Education.

Blind River, Ont.—H. F. G. Dreyer, hardware merchant, has been elected mayor of this town.

Mount Forest.—J. P. Noonan has been elected as councillor.

Oshawa, Ont.—A. Goyne has been elected as councillor.

Owen Sound, Ont.—J. Knox Christie, of Christie Bros., has been elected as councillor.

Renfrew, Ont.—H. N. Moss has been elected as Reeve.

"THE BEETON BELL STILL RINGS"

(Continued from page 30.)

Metal asked whether Mr. Bell did much credit business.

"My cash business is growing all the time," said Mr. Bell, "but I have always made it a rule to give practically unrestricted credit."

Hardware and Metal was surprised and looked it.

"The strange thing is," continued Mr. Bell, "that in the 32 years that I have been in business, I have not spent $2 altogether in dunning my customers, and in all my life I have only sued one man."

Just here the conversation was interrupted by a red-cheeked, good-natured-looking rustic entering the store and claiming Mr. Bell's attention. He bought several articles, for which he paid cash. When he had left the store, Mr. Bell resumed:

"That man who was just in once owed me an account that had been running for eight years, and I had more trouble in collecting it than with all the other accounts on my books. He resorted to every possible trick and subterfuge, but my blood was up, and I followed him up so hard that he finally was shamed into paying me. Now, he nearly always pays cash for his purchases."

Mr. Bell's unlimited credit policy would not be a safe one to adopt in the average community, but it has undoubtedly worked well among the high-class country trade which makes Beeton a shipping centre.

Some Stove Salesman

One of Mr. Bell's windows was devoted to stoves at the time of Hardware and Metal's visit, and one side of the store, about half its entire depth, was also given over to showing stoves, each of which was mounted on caster-trucks.

During Hardware and Metal's visit, Mr. Bell, single-handed, sold no less than three heaters. One of them went to a farmer and his wife, who seemed determined to buy a cheap heater. But they drove away with one of the best on the floor. A few minutes later another farmer came in and W. J. sold him the heater that the farmer and his wife had just considered, without making an effort to sell him the very expensive line.

"I knew that the couple who wanted the cheap heater could easily afford the best I had," said Mr. Bell, "so I switched them away from the one they appeared willing to buy, and showed them that the more expensive one would give better heat, look better, and be altogether more satisfactory. But the argument that clinched the sale occurred to me when the wife began to tell about the particular corner of the room where she wished to set up the stove. I then pointed out how the heater I wanted to sell would look particularly cheerful in that corner, and would practically give the effect of a fireplace. The wife immediately decided that she wanted that heater, and no other would do. And it was lucky, too, because the man who came in later really couldn't afford a more expensive heater, and if I had sold the couple the heater they first wanted, I wouldn't have had anything to suit him, for it was the last of the kind I had on my floor."

Mr. Bell has made a fine success of his paint department, and an interesting story of his experiences will appear in an early issue of Hardware and Metal. Another important feature of his store, which will be referred to later, is an ingenious rack for holding forks, rakes, shovels, and dozens of similar articles. The farmers fairly revel in the goods displayed in this rack, which is a real "silent salesman."

SHEET METAL WORKERS' COURSE

(Continued from page 38.)

obtain the next piece, on lines 1-1 mark off the width of each piece at the throat as between D and E, as shown by G-G. Using the first portion of pattern obtained, next place the points C-C over the points G-G and when even scribe around. The balance of the layout or piece will form fourth piece of pattern. The dotted lines show the allowance for locks on each end, (no allowance is shown for small end), the notches on the locks are to allow machines turn edges.

In Fig. 2 we have an angle elbow in three pieces. At A is shown the angle A-B-C, which is divided in the same manner as described for a square or 90 degree elbow. At B is shown the raise laid out to obtain the height at the different points, and below is shown the pattern developed all the different steps being the same as described in Fig. 1.

Business Changes

Tribune, Sask.—Benning & Kyle have dissolved partnership, J. H. Benning continuing.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

The Markets at a Glance

Prices of many hardware lines are still soaring and the trade is beginning to wonder what will be the consequences of such unprecedented advances. There is no relief in sight, and those in touch with the situation can see nothing ahead but still higher prices as stocks become exhausted without assurance of further supplies. There is almost certain to be serious shortages of many lines of goods when the spring trade opens up. A few of the many lines which have advanced this week are wire, sheets, picks, crow bars, clothes line, stove pipe wire, cotton waste, copper, tin, iron and copper rivets, locks and knobs, cotton rope, hinges, lead sheets, vises, wrenches, shoe treads, staples, nails, iron and steel, linseed oil, turpentine, dry white lead. Further advances on many lines are predicted in this week's reports.

Nearly all travelling salesmen are again on the road, and reports from all districts indicate that the outlook for business is exceedingly bright. Prices on many lines are withdrawn and quotations are only made on application. The steel companies are working night and day on war orders. It is felt in many quarters that there will be very little relief from present high prices for at least six months. The situation regarding ready-mixed paints is again becoming critical. If the present high costs of raw material continue, and further threatened advances take place, it will be necessary to advance prices in the near future.

Stock-taking is being carried on throughout the retail hardware stores of the Dominion at present, and considerable attention is being paid by retailers to the collection of outstanding accounts.

Advances are expected in the near future on files, screen doors and windows, refrigerators, white lead, iron pipe and other lines referred to in the following reports. New lists on tacks and capped goods have been issued and are shown elsewhere in this issue. The new prices on tacks represent an advance of from 10 to 20% on the best selling sizes.

MONTREAL

MONTREAL, Jan. 6.—Up and up continues the movement of the markets for iron and steel and the products and higher manufactures thereof. There is evidently no relief in sight, and dealers who are in touch with the situation can see nothing but continued adjustments to higher levels as stocks become exhausted without assurance of future supplies. From one quarter comes the report of small orders taken from Canadian firms this week, but at prices which would warrant further substantial increases on the present market. Otherwise the deadlock continues and deliveries are being further and further deferred.

The iron and steel list has again been affected in practically all its items, the advances being from 10c to 50c. Galvanized sheets have gone up another 50c. Nails are up 20c and staples 15c, and there are advances of 15c on all the different wires, including hay, plain steel, and plain fence, and 10c on barb and other galvanized. Lead sheets are up 75c, copper rivets 5 per cent., and other items which have advanced are: picks, crowbars, screw hinges, cotton rope, stove pipe wire, clothes lines, boiler rivets, vises, wrenches, shoe treads and old materials generally.

Higher prices are being predicted for steel sheets, galvanized sheets, plain and galvanized pipe, boiler tubes and plates, the various kinds of iron and steel, shovels, etc.—in fact, throughout the list of iron and steel products. Copper, tin and lead have scored advances in the metals department.

The first week of the year being a broken one in the French trade owing to Epiphany being widely celebrated as a holiday, in many of the fields the travelers have not taken the road. From Western points the mail orders have been very satisfactory, and the indications are that the optimistic outlook generally entertained in the trade will be fulfilled. Orders indicate a general sorting business in spring lines, and there are evidences that stocks in retailers' hands are being brought up to something more like a normal state.

Tin Advances.—There has been an advance of 1c on tin in the local market during the week. This is in sympathy with the New York situation, where there has been a net gain of ¾c since Christmas, following the recovery referred to in last report. The contributing reasons for the strength, as given by the American metal market, have been the eagerness to buy tin shown by customers, on fears of British restrictions on the amount to be allowed to come to America, and heavy American deliveries for December, representing accumulating safety stocks by consumers. This has been accentuated by the fear that the Japanese steamer, torpedoed in the Mediterranean, was one of the name bearing a cargo of tin. Sellers in New York are declining to quote prices until the situation is clearer, and the market is, therefore, nominal and largely guesswork. Montreal quotation: 46c-47c—strong.

Spelter Steady.—The local quotations for spelter continue as they have been for some weeks. Outside markets are practically unchanged, and London is particularly quiet. Spot and early deliveries continue very scarce, and this keeps the quotations steady. St. Louis reports that the year closed with considerable strength, with good inquiry for spot and for prompt shipment and sellers displaying more interest in disposing of futures. Montreal quotation: 22c-22½c—steady.

Lead Still Higher.—Last week's advance in lead is followed by another increase of ¼c, and there are indications that the new price will be maintained for some time, and perhaps raised higher. The American Trust has raised its price 10c since Christmas, and second-hands, which were on a par with the old figure, are 2½c above the Trust level, which indicates that there is a fairly active demand. New York strength appears to be the result of London influence, and the impression that lead is urgently wanted abroad, with the inference that America will be called upon further. An advance on the part of the Trust to $5.70 is anticipated. Montreal quotation: 7¾c-8c—strong.

Copper Soars Again.—This week the sensational advances in the American market, which were being recorded at last report, find their full force in taking the local quotation up an additional 3c, which means 5c for the movement. Indications are for further advances, with London in the lead. However, it

must be remembered that a very high level has been reached, and it is not warranted by the possibilities of the mines, being rather the result of shortage of facilities for the refining processes. The future is certainly a vague and unsettled one. Montreal quotation: 24c-24½c—firm.

Antimony.—The antimony situation is inclined to develop strength, although there is no actual change in prices, and a considerable range in quotations continues. The American market indicates a scarcity of spot with a fairly good demand and prices somewhat higher than at last report. However, substantial arrivals are expected shortly, and this should relieve the situation to a large extent. England has been able to reduce the price in that country by government regulation, but this has no effect while the embargo continues. Montreal: 42c-45c—nominal.

Aluminum.—There seems to be some relief in the tension which this market has so long felt, but it has not yet made itself evident in any material reduction in prices. The Boston News Bureau makes the interesting observation that with the extraordinary advance in the price of this metal it would cease to compete with copper, and that some of the transmission lines in the West which were using aluminum wire were even considering the advisability of pulling them down and taking a profit on the metal while replacing with copper. Montreal quotation is 68c.

Solder is Steady.—In sympathy with the position of raw materials the solder market is firm, and the increases noted at last report are well maintained. The Montreal basis is generally as follows:

Commercial half-and-half......	27c-28c
Strictly half-and-half	29c-30c

Steel Goes Up and Up.—There appears to be no new light on the steel and iron situation. Increases are recorded from week to week in the baser products, and as time passes the influence of the higher cost of raw material is more and more widespread throughout the long list of higher manufactures. This week sees advances in the long list of iron and steel, on sheets, on wire and nails, etc., and a number of other manufactures. Dealers report that the attitude of the mills shows little change, and that they are taking very little business. One big house reports that recently some small orders were placed, but that the prices which were charged would warrant much higher resale prices than those now being quoted to the retail trade. Under such conditions, as the present stocks run short, readjustments of quotations from time to time to higher levels must be expected. When the high limit is reached, there will probably be a reaction, and for this reason judgment must be used in the extent of supplies secured, but the present outlook is that there will be much higher prices before there will be lower.

Galvanized Sheets Up.—In sympathy with the steel market a further advance of 50c all round is being made on galvanized sheets, and, with no definite relief in sight as to further supplies, still higher prices are to be looked for. Montreal quotations for case lots are now as follows:

B.W. Gauge	Queen's Head	Fleur de Lis	Gorbal's Best
16	$....	$....	$5 00
16-20	5 90	5 65	....
18-20	....	....	5 20
22	....	....	5 45
22-24	6 00	5 80	....
24	....	....	5 50
26	6 25	5 95	6 30
28	6 50	6 25	6 60

	Premier	Apollo Colborne	Crown
14	$4 90	$4 90	$....
16	4 70	4 90	5 30
18-20	5 30	5 10	5 30
22-24	5 50	5 20	5 50
26	5 75	5 30	5 75
28	6 00	5 80	6 00
10¾ oz.	6 25	6 00	....

Black Sheets Strong.—In sympathy with the general steel situation black sheets are very strong on the recent advances, and higher prices are being predicted so long as the uncertainty as to future supplies continues.

Boiler Plates Very Firm.—Boiler plates are very firm, and difficulty is increasing in getting deliveries from the mills. Predictions are made in the trade that further advances in prices are practically certain, the present quotations being really under the market.

Pipe also Strong.—Advances in black and galvanized pipe to new high levels are expected. The situation is very strong and the difficulties in securing deliveries are increasing.

Nails up 20c.—A very important change in the price of nails takes the quotation up 20c to a level of $3.10 for wire. For many weeks there have been advances of about 10c a week, but this jump of 20c is out of the usual run for even these abnormal times. The trade hardly knows where it stands with regard to wire products at present.

Staples also.—Staples were also affected by the same conditions as brought about the advance in nails, there being an increase of 15c for both bright and galvanized varieties. New quotations are:

Fence staples, galv., in kegs......	$4.20
Fence staples, galv., 25-lb. boxes..	4.45
Fence staples, bright, in kegs.....	3.35
Fence staples, bright, in 25-lb. boxes	3.60

Smooth Steel Wire.—Practically all wire and wire products were affected by the last announcement from the mills, which, following so many others, brings the market to a very high level and emphasizes the extent to which steel has been affected by the war demand. The advance is an additional 15c, making the base $3.15. Quotations follow:

No. 0-9 gauge, $3.15 base; No. 10 gauge, 6c extra; No. 11 gauge, 12c extra; No. 12 gauge, 30c extra; No. 13 gauge, 30c extra; No. 14 gauge, 40c extra; No. 15 gauge, 55c extra; No. 16 gauge, 70c extra.

Fence Wire.—All fence wires are affected by the advance, the increase on barb and other galvanized varieties being 10c, and on Nos. 10, 11 and 12 O and A 15c. New quotations:

Barb	$3 95
No. 9, coil spring	3 60
No. 9, plain galv.	3 55
No. 12, plain galv.	3 75
No. 13, plain galv.	3 80
O. & A., No. 10	3 31
O. & A., No. 11	3 37
O. & A., No. 12	3 40

F.o.b. London: Barb, $3.45; No. 9, gal., $3.10; No. 12, gal., $3.25; No. 13, gal., $3.35; No. 9, coil spring, $3.15.

Hay Wire.—Hay wire, both in coils and cut, is included in the advanced list. The increase is 15c all round. New quotations are:

Hay wire, in coils—No. 13, $3.20; No. 14, $3.25; and No. 15, $3.35.

Annealed cut hay baling wire—No. 9, $3.90; No. 10, $3.95; No. 11, $4.05; No. 12 and No. 13, $4.15; No. 13½, $4.25; No. 14, $4.40, and No. 15, $4.65.

Wire Bale Ties.—Wire bale ties are similarly affected to the extent of 15c. The new quotations are:

No. 12	$ 3 50
No. 13	3 60
No. 13½	3 65
No. 14	3 75
No. 15	4 05

Iron and Steel.—The increasing seriousness of the situation in iron and steel, with the prospects of a possible famine, if there is no improvement in the outlook as to production, is again indi-

PRICE LIST OF CAPPED GOODS

Adopted January 1st, 1916

Saddle Nails or Tacks (Silver and Japanned)	
No. 4, All lengths, 100 to paper, per paper	68c
No. 4, All lengths, in bulk, per pound........	$2.25
Lining Tacks (Silver and Japanned) in Papers	
2½ to 12 oz. (75 in a paper), per paper	25c
14 to 24 oz. (75 in a paper), per paper........	32c
In Bulk	
2½, $5.10 per lb; 3, $4.90 per lb.; 4, $4.25 per lb.; 6, $3.65 per lb.; 8, $3.20 per lb.; 10, $2.90 per lb.; 12, $2.65 per lb.; 14, $2.65 per lb.; 16, $2.65 per lb.	
Capped Trunk Tacks (Same price as Lining)	
Tufting Buttons (22 Line)	
Silver and Japanned (100 count in doz.), per doz.	$6.65
Colors (100 count in doz.), per doz.	$9.20
Tin Capped Trunk Nails (in 1 lb. papers)	
½ in., $1.50 per lb.; ¾ in., $1.35 per lb,; ⅞ in., $1.28 per lb.; 1 and 1⅛ in., $1.20 per lb.; 1¼ in., $1.10 per lb.; 1½ in., $1.00 per lb.	
Brass Plating, per 100 lbs., extra net	$3.00
Copper Plating, per 100 lbs., extra net	$2.00

The above new list is subject to a discount of 80, 20 per cent.

cated in advances on a number of items in this department: Norway iron, 50c; mild, band, sleigh shoe, domestic, reeled machinery tire and toe calk steel, 15c, and spring steel 35c. The new quotations follow:

Norway iron	$ 5 75
Mild steel	2 70
Band steel	2 70
Sleigh shoe steel	2 70
Domestic	2 70
Reeled machinery steel	3 30
Tire steel	2 80
Toe calk steel	3 65
Spring steel	3 35

For bar iron the usual figure heard remains at $2.35, but as high as $2.60 is being quoted by some houses.

Lead Sheets.—With the advancing lead market there has been an advance of 75c all round made for lead sheets. The new prices are as follows:

Sheets, 3 lb. sq. ft.	$ 9 75
Sheets, 3½ lb. sq. ft.	9 50
Sheets, 4 to 6 lbs. sq. ft.	9 50

Cut sheets, ½c per lb. extra.
Cut sheets to size, 1c per lb. extra.

Netting and Fencing.—Prices on poultry netting have been open for some time, and as yet there has been no definite adjustment. However, some of the Montreal houses are booking on a basis of 35 per cent. discount. Also some firms announce a discount of 10 per cent. on ready-made fencing, and this discount is expected to apply generally.

Copper Rivets.—The advance on copper rivets, which has been so long expected and so often predicted in these columns, has finally gone into effect. The discounts have been cut down 5 per cent., and are now as follows:

Copper rivets, usual proportion of burrs, 15 p.c.; burrs, net.

Extras on coppered rivets, ¼-lb. packages, 1c per lb.; ¾-lb. pkgs., 2c lb.

Coppered rivets, net extras, 2½c per lb.

Picks.—Picks are being affected by the advancing markets of the raw materials entering into their manufacture. One firm announces the following new schedule coving increases of 70c to over $1:

	Clay.	Rock.
5 to 6 pounds	$3.90	$4.40
7 pounds	4.20	4.70
7 to 8 pounds	4.50	5.00
8 pounds	5.05	5.50
9 pounds	5.65	6.15

Crow Bars.—Crow bars have been also affected by the metal markets and the rising cost of raw materials, the price having advanced $3 to $3.25 and $3.50.

Screw Hinges Advance.—There has been an advance on screw hook and strap hinges. The new quotations on the Ontario basis are as follows:—

Under 12 inches, per 100 lbs.	$5.50
Over 14 inches, per 100 lbs.	4.90
Larger, per 100 lbs.	4.60

The Quebec basis eliminates the second item and makes a quotation of $4.60 for all sizes above 12 inches.

Cotton Rope Advances.—There has been another advance on cotton rope, particularly affecting ¼-inch and larger. Prices now are: 3-16 inch, 25c; ¼-inch and larger, 24c.

Stove Pipe Higher.—Stove pipe wire has been affected by the general movement in this department, the increase being 15c. No. 18 is now quoted $4.30, and No. 19, $4.55.

Clothes Lines Higher.—The advance on cotton rope has affected the clothes line list, and there has been a general advance on the different sizes covering an increase of about 5 per cent.

Boiler Rivets Advanced.—Boiler rivets have been advanced about 10 per cent., and a departure is made in the list in that there is now an extra for coneheads of 10c a pound on the net list price.

Window Glass to go Higher.—Following the increase in glass of a couple of weeks ago, there has been a further advance of about 15 per cent. in American markets, and it is expected that there will be another adjustment in the Canadian situation. Higher prices are, therefore, anticipated.

Shovels may Advance.—It is reported in some sections of the hardware trade that there is to be another stiff advance on shovels in the near future. This would be in line with the general upward movement of steel manufactures.

Standard Vises Advance.—In the movement of metal manufactures vises are advancing in value. One firm has recently made an increase of 50c in its quotations.

Stillson Wrenches.—One of the local wholesale houses handling Stillson wrenches has made an advance, the old discount of 70 and 10 per cent. off being changed to 70 and 5 per cent. off.

Shoe Treads Advance.—So small a thing as shoe treads are affected by the war trend of the markets for raw materials entering into the manufacture of metal products. One firm has made an advance of 10c a pound on this line.

New Tack List Issued.—Following the general objections to the complicated nature of the new tack list recently published, the mills have sent out a readjusted price sheet which has had the effect of disposing of the objections made and very much simplifying the application of the altered quotations. The new list is shown in separate panel.

Old Materials.—Following the continued high position of the different metals further advances are being made on the offers for old materials. This week there are increases all round of about 5 per cent., and the classified list should be figured on this basis for Montreal.

TORONTO

TORONTO, Ont. Jan.—The holiday season is now over and the trade is getting down to business once more. The few days preceding the New Year were quiet, as is generally the case, but since the first of the year business has been picking up and by the end of week will be again brisk. The outlook for the year is distinctly encouraging and unless anything unforseen happens, this year should be a prosperous one. A good start has been made with record crops, large savings deposits in the banks, many factories engaged on war orders and unusual activity in the iron and steel trade, the latter is now generally conceded to be a basic industry. On the other hand some industries not benefiting from war orders are quiet and there is general tendency towards economizing on account of the conditions prevailing of the war. The possibility of tight money conditions and the heavy demand on the financial resources of the country on account of the war expenditure will tend toward a policy of retrenchment in national and municipal expenditure.

At the beginning of the year Canada is in an exceptionally strong financial position due to the improvement in the export trade which has been increasing in volume during the past twelve months and has resulted in a very favorable trade balance.

There is no doubt but that high prices will prevail during the greater part of and probably during the entire year. The situation with regard to raw materials is getting more serious on account of scarcity and steady advance in prices. Practically all lines of hardware will be affected and finished iron and steel goods more so than others. Prices of iron and steel continue to advance while ingot metals particularly copper are showing considerable strength. The scarcity of steel is becoming more serious than ever thus creating a difficult situation for manufacturers to contend with.

Many manufacturers both in the United States and Canada made considerable advances in their prices on Jan. 1st, while others have withdrwn prices and will only quote on application. It is becoming more difficult every day to obtain dates of deliveries owing to the uncertain situation. It is quite evident from present indications that jobbers stocks will not be anything like complete when the spring season opens up. Merchants would therefore be well advised to place orders for delivery at an early date and necessarily wait until they require the goods, as prices will advance and a scarcity of many lines is expected to develop by the Spring.

Important Price Changes;—The steady upward trend of prices continues and further advances have been made during the week. The hardware tack list has been revised. In the old list there was a discount for each individual line whereas in the revised list one discount covers the entire line. The same arrangement has been made in copper goods and one discount covers the entire list. The new list went into effect on Jan. 1st. Another advance has been made in iron rivets and copper rivets have also advanced. Locks and door knobs have advanced approximately 7½ per cent.

Iron and Steel.—The year opens with the steel trade exceedingly prosperous and every indication of continued activity for many months. The large contracts for steel which are being placed in the States by the Allies—a considerable proportion being for third quarter delivery—is an indication of what may be expected in Canada. Even if the demand for steel for shells, to be made in

this country, were to fall off during the year, there is every probability of large orders for steel being placed with Canadian mills to help to meet requirements in the Old Country. Prices on finished and semi-finished steel are very firm and some products are higher. Seamless boiler tubes have advanced from $3 to $5 per 100 feet according to size. The discount on cold drawn steel shafting ex-warehouse is now 15 per cent as against 20 per cent., before. Higher prices for boiler plates are looked for any time.

The embargo by the railroads in the States on export shipments of iron and steel is still in force but prices have not been affected owing to the strength of the market. There is no relief in sight although the British and French Governments are exerting every effort to supply tonnage to relieve the situation.

Metals.—The sharp advance in copper and tin and the unsettled situation in the tin market are the principal items of interest this week. Higher prices for copper have been anticipated for some time on account of the continued strength in the market. The position of this metal is a strong one and the demand continues heavy. Two matters of importance are affecting the tin market; one is the close restrictions which the British Government are placing on exports and the other is the delay occasioned to shipments from the East on account of steamers coming round by the Cape instead of the Suez Canal. The former naturally affects the New York market but is in no way serious if importers live up to the prescribed regulations, unless the amounts are restricted. The delay in bringing shipments round by the Cape route is offset by the decreased liability of cargoes being sunk by submarines, this also holds good for antimony shipments.

Copper Higher.—The market is excited and higher. The consumption of copper is so great that producers are hardly able to keep up with the demand and there is little or no possibility of any permanent decline in prices while the war lasts. In the local market, copper has advanced and is now quoted at 25c per pound.

Tin Advances.—The market is strong but unsettled for reasons already stated, and prices for spot and near-by tin are very firm. There is no serious scarcity of spot tin, so the delay in shipments need not affect the market to any appreciable extent. The New York market is affected by the difficulties still experienced in getting permits to ship tin to America, and the outlook on near-by deliveries is thus rather serious. Quotations are nominal and higher at 48c per pound.

Spelter.—The market is quiet, both London and New York being unchanged. There is a good demand on prompt and early deliveries but no interest is being shown in futures. Local quotations are unchanged at 20c per pound.

Lead Advances.—The market is strong and the "trust" have advanced prices $2 per ton, making the current quotation $5.70c New York. There is a good demand for lead and a further rise in the near future is probable. Local quotations are higher at 7c to 7¼c per pound.

Antimony.—The market is active for futures and strong for spot metal which is scarce. The heavy war demand continues and the market is holding very firm. Quotations are unchanged at 40c per pound.

Aluminium. — The situation is unchanged with a strong market and higher prices. Aluminium has advanced 3c and is now quoted at 68c per pound.

Solders.—There is no change in the local market on solders this week but the higher prices for tin which now prevail will no doubt lead to an upward movement in solders. The market is very firm with a fair demand.

Hardware Tack List Revised.—A revision has been made in the hardware tack list which went into effect on Jan. 1st. The new list which differs radically from the old one is arranged so that one discount covers the entire line. The discount is 80 and 20 per cent. off and the list is given in the panel below.

The new list is a decided improvement on the old one and will be far less complicated for the trade.

Capped Goods List Revised.—A new and revised list for capped goods has been issued by the manufacturers. The new list is arranged so that one discount 80 and 20 per cent. will cover the entire line. The new list will be found in a panel.

Iron Rivets Advance Again.—The recent advance in iron rivets has been followed up by another. The new discount on blocked and turned iron rivets is 60 per cent. with the same discount for burrs.

Copper Rivets Advance.—The advance in copper rivets predicted in these columns, on account of the continued increase in the price of copper, has been made. The new discount for copper rivets is 15 per cent., assorted rivets and burrs 15 per cent. and burrs only net list.

Door Locks and Knobs Higher. — Prices on locks and knobs have advanced approximately 7½ per cent.

Galvanized Sheets.— The galvanized sheet market is very unsettled and prices are very firm with a decided upward tendency. Some makers of galvanized sheets in the States are practically out of the market, owing to the very unsatisfactory conditions prevailing in the trade. Black sheets continue to advance and are scarce, spelter is high in price rendering the manufacture of sheets a very speculative and unattractive proposition. English galvanized sheets are practically off the market and prices are nominal these having been more important for some months.

(Continued on page 52.)

REVISED HARDWARE TACK LIST, ADOPTED JANUARY 1st, 1916.

Martin-Senour Convention

Salesmen From All Territories East of Port Arthur Gathered in Annual Convention at Montreal—Travellers Present Satisfactory Reports — Prizes Awarded For General Efficiency.

THE annual convention of the salesmen of the Martin-Senour Co., Limited, was held in Montreal on the dates of December 13, 14, 15 and 16, 1915, and it was judged by those present to have been the most helpful and successful convention which the company has ever held.

Salesmen representing all territories in Eastern Canada from Port Arthur, Ont., to the Maritimes, were present, and each brought in satisfactory reports of existing conditions together with optimistic views of the future.

The opening session was held at the Place Viger Hotel, which was the out of town salesmen's headquarters during the convention period.

On Monday morning, Dec. 13, at 10.30 a.m., the roll was called, and the opening address was given by W. H. Gerke, vice-president and managing director of the company. The sales staff had shown some expansion during the year and new members from Ontario, Quebec, New Brunswick and Nova Scotia were introduced.

The afternoon of the first day was given over to territorial reports which were more than encouraging in view of general conditions which had existed during the year. The already large family of Martin-Senour dealer agents, had shown quite a healthy increase during the year.

The Tuesday, or second day sessions of the convention were held at the fine new manufacturing and administrative home of the company at Beaumont street and Greenshields avenue, and after a group photo had been taken, the different departments of the paint and varnish factories were visited. This concrete evidence of expansion in the shape of such increased and modern facilities for manufacturing was quite a revelation to the salesmen, more especially among the older members of the staff who remembered the very humble start of the company in the Inspector street premises. While visiting the factories many demonstrations of Martin-Senour products were made by the experts of the Company. The printing plant, where practically all of the literature used by the company is produced was also a point of interest. The different processes of varnish making was interestingly shown.

At noon a large family luncheon was held in the advertising room, when salesmen and home staff all sat down together.

Tuesday afternoon was devoted to considering the advertising and sales promotion plans for the coming year and the new features which were shown for the first time brought forth hearty expressions of approval. A feature of this session was the dressing of a model store window with Martin-Senour products and display by A. T. Black, a halftone of which is shown herewith.

Tuesday evening, a theatre party was held at the Orpheum theatre.

Special Paint Window Display Arranged by A. T. Black for Martin-Senour Company Sales-Staff Convention.

Group of the Martin-Senour Company Officials and Sales-Staff who Attended the Convention

Wednesday was the big day of the program. The subjects under discussion were: "How to present the Martin-Senour Exclusive Agency Proposition to Dealers." "Presenting our Varnish Proposition." "Establishing Agency with Small Town Dealers." "Cultivating a Friendly Relationship with our Dealer Agents." "Relations of the Salesmen with the House."

These subjects were all discussed under the leadership of J. H. Conover, C. F. Kendall, C. D. Cookson, J. A. Naud and A. T. Black.

The annual family dinner of salesmen and home staff was held at the Canada Club on Wednesday evening.

The awarding of the Z. E. Martin trophy took place on this occasion. The beautiful trophy, donated by the president of the company, for annual competition, was won by C. D. Cookson, who had shown the largest business increase of the year. A close runner up was Ros. Bernier, who thereby won second prize. General efficiency prizes were awarded to E. J. Cookson, C. F. Kendall and C. Tasse, and a special varnish prize to C. F. Kendall. All prizes took the form of substantial purses of gold.

The several members of the staff who are wearing the King's uniform, and fighting for our common cause at the front were not forgotten, and tribute was paid them.

Thursday brought the convention to a close and everyone carried away pleasant memories of a gathering from which they derived both pleasure and profit.

The convention program was attractively gotten up in the form of an 8-page booklet. The following verses appeared on the last page:

100 Per Cent. Pure

As we speed through our lives,
There's analogy quaint,
Twixt the make-up of men,
And the make-up of paint.
Some are good; some are not;
Some use price to allure;
And a few lead the rest,
Like "100% Pure."

So, look yourself over.
Stare facts in the face.
And put yourself down
In your own rightful place.
Be guided by Truth;
Let not Vanity lure,
And see if you measure
"100% Pure."

Are you known to your friends
As "the best in your line?"
Are you known to your friends
As "time-tested and fine?"
Can the friends you have made
(And they're true ones, I'm sure)
Say of you with all truth,
He's "100% Pure."

CANADIAN-MADE WIRE

The Weekly Bulletin of the Trade and Commerce Department states that it is interesting to note that substantial orders for both galvanized and barbed wire have recently been placed with Canadian manufacturers for early delivery in the United Kingdom. The observation that the business which has arisen is likely to be continued on a substantial basis in the future.

PURCHASING AGENT MOVES TO OTTAWA

E. Fitzgerald, of the C. P. R. purchasing department, who has for some time been acting as purchasing agent for the British War Office, with headquarters in the C. P. R. offices in Montreal, has removed to Ottawa with his staff. It is unofficially stated that Mr. Fitzgerald has been made purchasing agent for the Imperial Munitions Board, and at the same time will continue the duties which he has been performing for the British War Office in the purchase of general supplies.

WEEKLY PAINT DEPARTMENT

AMERICAN DEALERS ADVANCE PRICE OF GLASS

Give War as Cause for 16 2/3 Per Cent. Advance in Plate Glass Prices at New York—Imports and Exports of U. S. Glass Tell Interesting Tale.

New York, N.Y., glass dealers on Jan. 1 announced an increase of 16 2/3 per cent. in the price of plate glass. Coupled with the increase is a decrease in the usual allowance for the salvage of glass returned to the dealers by 50 per cent.

Dealers give four reasons for the upward change in the price of glass as follows:

1. Reduction in the importation of glass from Europe since the beginning of hostilities.

2. Several of the large United States glass factories are not operating at full capacity. It is reported they are working upon war supplies for Europe.

3. The increase in freight rates and the general advance in the costs of raw materials and of labor.

4. The demand for plate glass from South America, which is now cut off from its usual source of supply in Europe.

Dealers state that the glass factories of Belgium and Germany are cut off from the United States, and many of the establishments of England and France are injured by the necessities of war; extra demands have been made upon the facilities of the United States.

The following table, compiled from the report of the Department of Commerce at Washington for the nine months of 1915 ending in September, shows the reduction in the importation of plate glass from abroad:

Imports Plate Glass

	September.	Nine months.
1914	$22,000	$475,000
1915	.21	7,000

The following table shows the increase in exports from the United States during the same period:

Exports Plate Glass

	September.	Nine months.
1914	$ 10,000	$ 40,000
1915	217,000	1,217,000

FUTURE OF RUSSIAN BRISTLES

Russian Bristles Will Be Scarce, and Prices High—Goods Being Sent as Passenger Luggage

A well-known Canadian manufacturer of paint brushes, has forwarded to Hardware and Metal, a letter received from Petrograd, which indicates some of the troubles that may be expected by those who have to look to Russia for supplies of bristles.

The brands of bristles such as C.H., J.K., H.D., and S.G.B. are regular standard brands of Russian bristles. The letter reads in part as follows:—

"We are afraid that next to no offers of bristles will be possible now for several reasons, and there is no doubt that prices will be much higher.

"The forwarding is exceedingly difficult, and partly even impossible, and in any case far dearer. People in many cases send the goods as passenger's luggage whenever possible, at a tremendous expense.

"Most Polish dressers are unable to dress, firstly, because they can not get the raw bristles and, secondly, because many of them have no premises in which to dress the bristles, and have no workmen.

——— (Ch Ch) established himself in Nishny, but cannot dress because he can find no lodgings for his workmen. ——— (J.K.) has been on the look-out for premises in Nishny, Jaroslaf, etc., but so far in vain. ——— (H.D.) has sold out and is not in a position to dress now. Bravermann (S.G.B.) cannot offer any more goods, and we think Mr. ——— (BpB) is no longer dressing. All the other Polish dressers are in a similar position, and therefore no goods are offered.

"Under such circumstances the buyers should certainly take whatever they are offered, and should secure all the goods they can lay hands on."

The foregoing letter would indicate that there will be a serious shortage of Russian bristles. Prior to the war bristles were dressed in Poland, and in the portion of Russia now occupied by the Germans.

DYESTUFFS SITUATION IMPROVING

According to a statement issued by the Customs Department at Ottawa on December 31, arrangements are under way by which Canadian manufacturers will be assured a supply of dyestuffs in future. Through the co-operation of the Imperial authorities, who have exerted pressure on American manufacturers of such dyestuffs, the Government has been able to relieve the serious situation which promised to develop here. It arose out of the refusal of American manufacturers to export the manufactured dyestuffs to Canada as usual. The scarcity of dyes in Great Britain has rendered export from that country to Canada almost impossible, and Canadian companies had been getting their supplies in the shape of logwood dyes from the United States. When, however, with a view to controlling the product so that the Empire's demand might be met, the British Government placed an embargo on the export of logwood from Jamaica and Honduras, the American companies canceled their contracts with the Canadian companies, and a famine in dyestuffs threatened. Negotiations were at once commenced by the Canadian authorities looking toward relief. As a result arrangements have already been made to allow the export of 4,700 tons of logwood to the United States companies on condition that these firms shall continue to supply the reasonable demands of the Canadian mills, and further negotiations are under way, which, it is hoped, will result in a workable agreement by which a reasonable supply of goods from the countries named will be allowed to be exported to the United States dye manufacturing companies coupled with conditions which will ensure a supply of the same for Canadian manufacturing purposes.

WHAT OTHER HARDWAREMEN DO

Reward Employees

St. John, N.B.—T. McAvity & Sons, Ltd., presented each of their employees, who returned to the premises on the night of the Thorne fire and assisted in the work of protecting the building, with a ten-dollar gold piece. This was done in recognition of their services on that occasion. The employees returning to the store rendered valuable assistance and aided materially in preventing the fire in the building adjacent from getting a foothold in the McAvity block.

WEEKLY HARDWARE MARKET REPORTS

(Continued from page 47.)

Domestic brands are readily obtainable but prices are necessarily high while American sheets are also increasing in cost. The prices given in the current market quotations are liable to change any time.

Wire.—As Hardware and Metal was going to press last week word was received that wire had advanced 15c per 100 pounds making a new base price of $3.15. This advice was received when the current market quotation sheets had gone to press, the changes were thus unavoidably omitted. The change affected many lines of wire such as barb wire staples, fence hooks, bale ties and O and A fence wire which all advanced 15c per 100 lbs. The market is very unsettled and it is very doubtful if the top of the market has been reached. The advance was predicted in these columns as it was felt that with raw material increasing in cost, wire was bound to be affected.

Wire Nails.—The market for wire nails, continues very firm at the advance of 20c per keg announced last week. The market in the States is very strong and higher prices may be looked for. Wire nails are quoted at $3.05 per keg and cut nails at 2.90 per keg.

Pipe.—The market for both wrought iron and lead pipe is very firm and higher prices are likely in the near future as raw materials continue to advance. Lead pipe is quoted at 10c and waste at 11c per pound. Wrought iron prices are given in the current market quotations.

Waste.—Another advance in cotton waste predicted in Hardware and Metal has been made. This is the second advance in less than three weeks and is due to the scarcity and increase in cost of raw materials. The market is very firm and manufacturers are only quoting on application as there is a possibility of still higher prices.

Rope.—Business is quiet but prices are very firm on account of the raw material markets. The Mexican Government have taken over the sisal industry and fibre is increasing in cost. The shortage of tonnage is affecting hemp, manilla and jute and high ocean freight rates are increasing the cost of these materials. The possibilities of shipment of hemp and jute being lost at sea owing to submarine attacks is also affecting the market. It would not be at all surprising to see prices of rope and twines advance although in the meantime prices are unchanged.

LONDON

LONDON, Ont., Jan. 6.—Business this week is seasonably quiet. Most retail firms are busy stocktaking. On account of higher prices which are expected in the near future retailers are buying and booking ahead willingly. There should be a heavy buying movement following stock-taking.

It is expected that there will be a serious shortage of many lines of goods during the coming spring.

Many important price changes have taken place this week, and many more are expected in the near future.

Wire Nails Advance.—As predicted last week, wire nails have advanced, and the new price is $3.05 base, being an advance of 20c per keg over the former price. Cut nails are still quoted at $2.95 base.

Wire Advances.—Galvanized wire has been advanced 10c per 100 lbs. Barb wire is quoted at $3.55 per 100 lbs.; No. 9 galvanized is quoted at $3.20 per 100 lbs.; No. 12, $3.35 per 100 lbs.; No. 13, $3.45 per 100 lbs. No. 9 coil spring wire is now quoted at $3.25 per 100 lbs.

O and A wire has advanced 15c per 100 lbs.

Hay baling wire No. 14 is now quoted at $3.55 per 100 lbs.

Fence staples have advanced 15c per 100 lbs. Galvanized staples are quoted in kegs at $4.20 per 100 lbs.; galvanized in 25-lb. boxes are quoted at $4.45 per 100 lbs.; bright staples in kegs are quoted at $3.35 per 100 lbs.; bright staples in 25-lb. boxes are quoted at $3.60 per 100 lbs.

Fence hooks are 15c per 100 lbs. higher, and are now quoted in 100-lb. kegs at $4.20 per 100 lbs.; 25-lb. boxes are quoted at $4.45 per 100 lbs.

Other Advances Expected.—An advance of 5 per cent. is expected shortly on screen doors and windows and refrigerators. Further advances are predicted for iron pipe, files, enamel and tinware, poultry netting, white lead and linseed oil.

Linseed Oil Higher.—Linseed oil has advanced 6c per gallon, and further advances are expected. Ruling prices today are as follows:

Raw Linseed Oil—	
1-2 barrels	93c per gal.
3-5 barrels	92c „ „
6-9 barrels	90c „ „
Boiled Linseed Oil—	
1-2 barrels	96c „ „
3-5 barrels	95c „ „
6-9 barrels	93c „ „

Turpentine is quoted locally in single barrels at 85c per Imperial gallon; 2 to 4-barrel lots, 84c per Imp. gal.; 5-gal. lots, 92c per Imp. gal.

White lead in oil is firm at $10.20 per 100 lbs. in ton lots, and $10.50 per 100 lbs. in less than ton lots. An advance in the price of white lead is expected in the near future.

WINNIPEG

WINNIPEG, Jan. 6.—After interviewing a great number of salesmanagers and salesman, of the various Western jobbing houses, we might say that we feel "it is good to be a Westerner," for one cannot live long in this country without becoming an optimist. The keynote of all travellers' conventions has been "bigger and better business for 1916," and we feel quite sure that this is going to be a year of exceptional activity in the hardware trade. This is indeed very encouraging, and it is more than likely that all business will be conducted on a much saner and safer basis than ever before. In as far as possible, merchants throughout the country have cleaned up their accounts with their jobbers, and will start 1916 with a clear field ahead of them for pushing trade. There has been some difficulty in various districts in procuring a sufficient number of cars to handle the amount of grain in the country, and a great number of merchants expect to be collecting accounts until the middle of next summer. In as far as possible, merchants should impress on the farmers' minds that they can procure a loan from the local branch of their bank on their grain and they should do this now and pay their accounts so that the merchant will be in a better position to purchase his supplies, thus serving the interests of the farmer to a much better degree.

Many Price Changes for the New Year

There are a number of changes to record in the prices of various lines, and a memorandum is given herewith of lines affected. In speaking to the representative of one of Canada's largest steel companies who has just returned from a visit to their factory and head office in the East, he states that supplies are becoming rather limited, and this condition will affect the market as greatly as the exceptional demand. All of their branches are working night and day filling war orders, and this condition will also have its effect in upholding or even increasing the present high prices prevailing.

New Prices which have gone into effect here are as follows:—

	Per lb.
Bluestone	$ 0.10
Rawhide Cut Laces	1.20
Tanned Cut Laces	1.25

The Varnish Problem

THERE are no real varnish problems for the experienced dealer. He knows that if varnishes are made right they will act right and give complete satisfaction if used under the right conditions. In other words, varnishes are consistently good, or consistently bad or indifferent.

This knowledge of varnish values enables the dealer to give useful advice and service to such customers as need it.

You can adopt no surer way of increasing the volume of your varnish business than by making a leader of Berry Brothers' products, which are always high grade, uniform and dependable.

Write for our price list and interesting dealers' proposition.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Jan. 6.—The situation regarding ready-mixed paints is becoming critical. With further advances this week on oil and turpentine, with prospects of higher prices on lead before another week and with zinc maintaining a strong position, manufacturers to-day can hardly see that they will be able to defer increases in general quotations to the end of the present campaign for spring business. When the prices for the season were set there was a small concession on some of the previous advances but this was not warranted by the position of raw materials—and since that time there have been material increases in the chief ingredients. Under the circumstances the outlook is certainly "bullish" and unless there is some radical change which at present cannot be foreseen higher prices are inevitable.

The travellers are on the road again and the reports which have been received thus far indicate satisfactory spring booking. However, with Epiphany a French holiday and generally observed throughout Quebec the week is a broken one and it will be some days yet before the volume of business can be accurately gauged. Under the conditions which prevail in the market it is expected that the trade will be encouraged to take advantage of the present quotations to get their orders on record.

Linseed Oil Advances.—The oil market continues to advance. Disappointing statistics as to the supplies of Canadian flax available together with the intimation that the British government may withdraw vessels operating in the trade between North and South America—thus interfering with transportation of Argentine flax—have had the effect of materially stiffening the quotations on raw material. Prices on the product have advanced at the same time and dealers state that the present figures of 90c and 93c, for raw and boiled respectively, are lower than conditions warrant and that further increases are to be looked for in the immediate future if the position of flax is maintained. At the same time there are cases where prices are being cut by firms who secured their supplies before the recent advances and who are prepared to take smaller profits on business with old customers; quotations are even heard below the present crushers' figures. The market basis may be regarded as follows:

	Raw	Boiled
1 to 2 barrels	90c	93c
3 to 5 barrels	89c	93c
6 to 9 barrels	88c	91c

Turpentine—There is a firmer tone in the turpentine market and some quotations have been advanced as much as 4c a gallon. As compared with a range of 76c to 82c quoted last week, there is nothing below 80c this week and the bulk of the business is being done at 82c. The market basis is, therefore, 80c to 82c on a single barrel quotation with the usual allowances for larger quantities.

White Lead.—With materially higher quotations in both the Canadian and American lead markets, the situation in white lead is very firm and advances are in order. In most quarters the opinion prevails that increases will be made before another week. The present basis is $10.05 for ton lots with 30c additional for smaller quantities.

Oils and wax.—The advances on oils and wax referred to last week are now in effect and are being steadily maintained. Canadian prime oil is 14c gallon, castor oil about 22c by the barrel and 25c by the case, wax of good quality is 8½c to 9c, and candles about 9c to 9¼c.

Paris Green—Although the new quotations on Paris Green have not yet been announced, there is some booking being done at open prices. It is anticipated that the season's figures will be higher owing to the advanced price of sulphite of copper and acids.

LEAD IN OIL TO GO HIGHER

As Hardware and Metal is going to press, information has been received that white lead in oil will be advanced at once. Some firms have withdrawn prices.

TORONTO

TORONTO, Ont., Jan. 6.—The paint market is seasonably quiet, but now that the holidays are over and with travelers out again, more activity may be expected. Business during 1915, was, under the circumstances, most satisfactory and indications point to this year being just as good, if not better. One prominent paint house reports that the bookings of their travelers in Ontario showed a nice increase last year over the previous year, and that similar conditions are expected this year. The feature of the week has been the sharp advance in linseed oil, and the general opinion is that prices are going still higher. There is very little flax-seed in sight and the market is very high. Dry white lead has advanced and higher prices for lead in oil are looked for. Canadian crude oil has advanced and gasoline is very strong. The oil situation shows no improvement, there being a heavy demand for gasoline and a shortage of crude oil. Cotton waste has advanced again, being the second change in three weeks.

Linseed Oil, Sharp Advance.—As Hardware and Metal was going to press last week, word was received of a sharp advance of 6c in linseed oil. This week oil has advanced another 6c, making 12c in the week. The market, it will be observed, is very unsettled, and it is generally conceded that higher levels will yet be reached. There is very little demand for oil, the excitement in the market being entirely due to the flax-seed situation. Flax-seed is now over $2 in Winnipeg and supplies coming forward are extremely light, in fact practically no seed at all is coming East and the situation is becoming serious for the grinders, as it is impossible to tell when they will get any seed. The only apparent relief to the situation would be the importation of Argentine seed, but the shortage of tonnage may render this step impracticable. There is in addition the probability of the British Government taking over all British ships trading between the Argentine and North American ports. The range of prices of oil have been gradually closing up and the following prices for oil are generally being quoted in Toronto:

	Raw.	Boiled.
1 to 2 barrels ..	99c	$1.01 per gal.
3 to 5 barrels ..	98c	1.00 per gal.
6 to 9 barrels ..	96c	.98 per gal.

Turpentine.—The market is strong and prices considerably firmer than last week. Prices of turpentine at Savannah have advanced and stocks are low. The demand is light, otherwise prices would be higher. Stocks are being depleted and there will be no new turpentine for some months, the market may therefore advance later on in the month. The local demand is light and quotations are unchanged in Toronto as follows: 1 barrel lots, 85c; 2 to 4 barrel lots, 84c, and 5 gallon lots, 93c per Imperial gallon.

White Lead.—The market is very firm and higher prices are looked for. Dry white lead has advanced 50c per 100 lbs. Pig lead is higher, the "Trust" price being now $5.70 New York. It will thus be seen that with conditions as at present prevailing high prices for lead in oil are very probable. The present price for pure white lead is $10.20 per 100 lbs., in ton lots, with 30c extra for less than ton lots.

B. FIVE FEATURES B.
That Attest Its Excellence

Covering Capacity

BRANDRAM'S B. B. GENUINE WHITE LEAD will cover the maximum amount of surface, 100 lbs. thinned with 5 gallons of Pure Linseed Oil, covering 4,500 square feet, one coat over primed wood, giving a thoroughly covered surface.

Ease of Working

BRANDRAM'S B. B. GENUINE WHITE LEAD works out under the brush easily and freely, saving time and giving the best results.

Protective Power

BRANDRAM'S B. B. GENUINE WHITE LEAD when properly applied will not peel, check or crack. It wears away gradually and after its long life, leaves the building in a good condition to receive a fresh coat of paint.

Properly Proportioned

BRANDRAM'S B. B. GENUINE WHITE LEAD is regulated to contain exactly the proper amount of carbonate of lead to hydrate of lead, giving an even texture paint with large covering properties.

Whiteness

BRANDRAM'S B. B. GENUINE WHITE LEAD is the whitest heavy-bodied white lead known, and gives the most beautiful finish of any white lead yet produced.

These five features commend B. B. to both the dealer and the consumer and account for its rapidly increasing sale in Canada.

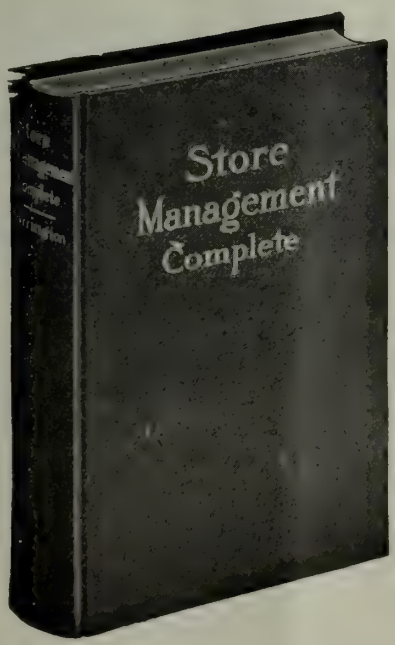
ARE YOU THE MAN AT THE HELM?



Are you running your ship of business along the shortest and safest course to the harbor of success? Or are you going a roundabout way, scratching and scraping along the rocks of loss and failure.

Get in the right course, be on the lookout for new thoughts, ideas, schemes, etc., and you will have a successful run.

STORE MANAGEMENT COMPLETE

is a guide that will show you how to get the maximum trade and profit out of your business. This book is written by Frank Farrington (a companion book to "Retail Advertising Complete.") It tells all about the management of a store. The following is a synopsis of one of the chapters:

CHAPTER V.—THE STORE POLICY—What it should be to hold trade. The money-back plan. Taking back goods. Meeting cut rates. Selling remnants. Delivery goods. Substitution. Handling telephone calls. Courtesy. Rebating railroad fare. Courtesy to customers.

"Store Management—Complete" is bound in cloth, contains 272 pages, 16 full-page illustrations, and 13 chapters. $1.00 brings this book to you postpaid. Money refunded within 10 days if not satisfactory.

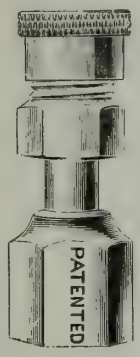
Money in These

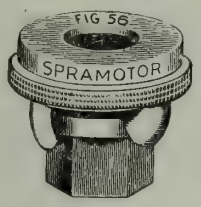
There's many a hardware merchant making a nice annual profit handling SPRAMOTOR parts and accessories. The SPRAMOTOR is universally used. It has become standard through its excellence, and there is a steady demand for the superior parts we make.

When you handle the SPRAMOTOR you handle the best made. We have outfits selling all the way from $6 to $400, and the dealer who sells a



Spramotor
It isn't a SPRAMOTOR unless we made it

satisfies a customer. Our persistent advertising has familiarized the name "SPRAMOTOR" to such an extent that we have had to adopt the protective slogan under the name-cut above. This indicates how widely our machines are known.



Why not accept some of the money being made? Write for our proposition. Made in Canada. No duty to pay.

Spramotor Works
2820 King St., London, Canada and 2920 Erie St., Buffalo, N.Y.

How to Invest Money

By GEORGE GARR HENRY

One of the most useful and easy-to-read books ever written on the elementary principles of investment.

Will save the ordinary investor many mistakes. Price, prepaid, $1.00. Insure your capital by ordering this book at once from

TECHNICAL BOOK DEPARTMENT
MACLEAN PUBLISHING COMPANY, Limited
143-153 University Avenue, Toronto

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Big Profit and Satisfaction in Selling

"AYLMER" Force Pumps

They are certain to sell easily because it has several advantages over the ordinary style.
Has longer stroke, more power, and works easier.
While designed for hand use it can be readily converted into a Windmill Pump by the addition of a flat bar, which screws into the cross head at top.
It will be to your interest to write for full particulars now.

ADVERTISING.

Advertising in a trade paper is simply stating openly who you are and what your business is. It is pointing out to the readers that you have something of service for them, a commodity of usefulness to profit both you and them. The only men who do not advertise are those who have nothing to offer. They are dead, even if they do not know it.

CLASSIFIED LIST OF ADVERTISEMENTS

Insertion of advertisers' names in this Classified Index is not a part of the advertising contract. It is a service we give free, and it is printed solely for the convenience of our readers.

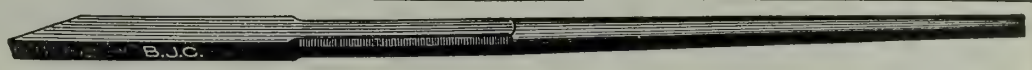
CROWBARS



No. 102-A—CHISEL POINT

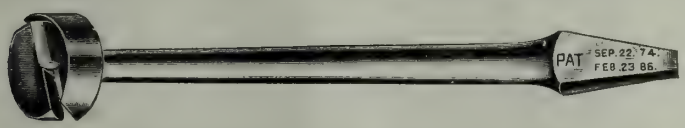
We offer you bars made of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Send us a trial order.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario St. East, MONTREAL

TARRED FELT

SPECIFY DOMINION BRAND

J. H. McCOMB, LIMITED Manufacturers of all kinds of Building Paper, Pitch and Coal Tar MONTREAL



THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

ICE TOOLS

Every Farmer, Butcher and Dairyman cuts ice. We have a tool for every use. Write for particulars and prices.

We also have a full line of Snow Plows, etc., for municipal work

NICKEL

SHOT—High and Low Carbon
INGOTS—Two Sizes 25 lb., 50 lb.

Electrolytic Nickel 99.80%

Prime Metals for the manufacture of Nickel Steel, German Silver, Anodes, and all remelting purposes. Our Nickel is produced as rods, sheets, strip stock, wire and tubes.

MONEL METAL

We are Sole Producers of this natural, stronger than steel, non-corrodible alloy. Manufactured forms are rods, flats, castings, tubes, sheets, strip stock and wire. Ask for descriptive booklet.

Send inquiries direct to us.

THE INTERNATIONAL NICKEL COMPANY
43 Exchange Place, New York.

LONDON BAR IRON

High Grade

Our iron bars are tough, fibrous and corrosion-resisting, just such bars as your blacksmith friends want to use. Why not carry them in stock for your customers, or if you prefer, have them direct shipped from the mill?

London Rolling Mill Co., Limited
LONDON, - ONTARIO

Condensed or "Want" Advertisements

Those who wish to sell or buy business or stocks obtain competent help connect with satisfactory positions, or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer. RATES (payable in advance): 2c. per word first insertion, 1c. per word subsequent insertion, 5c. additional each insertion, when Box Number is required. Each figure counts as one word.

WANTED

A THOROUGHLY EXPERIENCED HARDware and housefurnishings man as assistant manager in large department store. State age, experience, salary expected, and give references. Apply Box 240, "Hardware and Metal," Toronto. (2)

TRAVELLER OPEN FOR POSITION FEBruary 1st. Eight years' experience calling on hardware and stove trade in Western and Northern Ontario. Reply Box 241, Hardware and Metal. (2)

FOR SALE

FOR SALE—NATIONAL CASH REGISTER, as good as new for less than half price. J. S. Lockie, Newton, Ont. (2)

FOR SALE—SMALL HARDWARE, TINsmithing and plumbing business, 25 miles from London; good territory; worth investigating. Apply Box 242, Hardware and Metal. (2)

MISCELLANEOUS

FIRE INSURANCE. INSURE IN THE HARTford. Agencies everywhere in Canada.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.

HARDWARE STORE BUSINESS METHODS—The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10, postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS IS the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

A Straight Talk from the Manager

No. 28

BE PROGRESSIVE

Whenever two or more Canadian hardwaremen chance to be together, it is not long before the conversation switches around to "shop talk." The chances are that they will soon be discussing an article or a bit of news which they saw in Hardware and Metal. Whether consciously or unconsciously, they are sizing up each other's progressiveness, by the knowledge displayed in Hardware and Metal's contents.

In the same way, when a hardwareman can tell you the details of advertisements he has seen in Hardware and Metal, he knows that it stamps him as an up-to-date hardwareman —one who is thoroughly in tune with the spirit of the age. It will win him greater respect from his fellows in the hardware trade, whether manufacturers, jobbers or retailers.

No hardware man, in these days, feels that there is nothing for him to learn about his business. There are many facts of the most far-reaching importance to be learned from every issue of Hardware and Metal. So, to make the greatest possible progress in your business, you should read Hardware and Metal each week, carefully and systematically—from cover to cover.

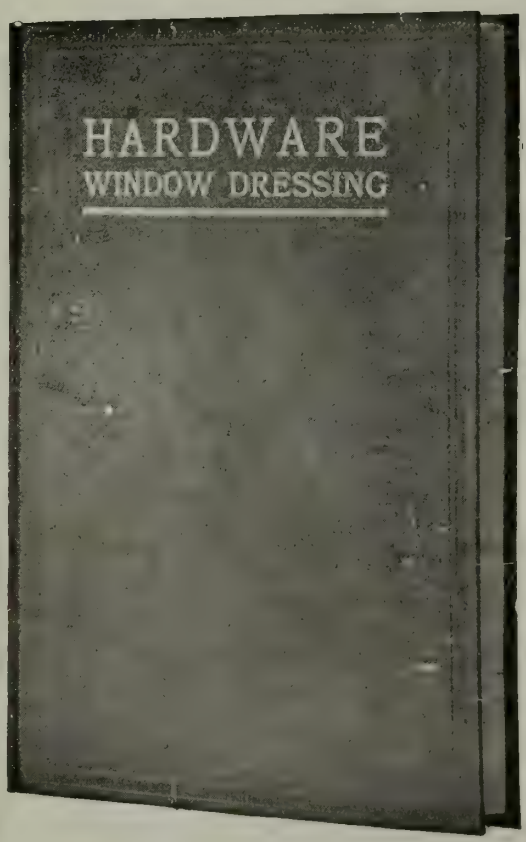
J. G. L.

Hats off to 1916

When Stock-taking remember if you have not a full range of Ross Sporting Models, including the Ross .22 Cadet Rifle, you are taking chances on sending good business to your competitors.

The Ross .22 has been a very good seller and is giving great satisfaction—Do not neglect the profitable opportunities it offers.

Ross Rifle Company, Quebec



You May Become a Practical Window Dresser for $2.60

This is the first book ever written devoted exclusively to Hardware Window Display, and is a really new and good book. It is a practical, up-to-date collection of ideas of the most expert window dressers in the world. There are hundreds of displays in the book that can be put in at practically no expense — any one of them will bring enough extra trade to the store to pay for the book many times.

DOMINION SHEET METAL CO., Ltd.
HAMILTON, CANADA

"I Can't Help Reading the Covers!"

So said the Manager and Buyer of one of the largest hardware firms in Ontario, in discussing the value, to him, of Hardware and Metal's advertisements.

When you consider that nearly every good hardware merchant in Canada is a paid subscriber to Hardware and Metal, and that the front and back cover advertisements positively grip the attention of every one of them, you will not fail to recognize the immense influence exerted by these special positions.

We have a few front and back covers still available for 1916. If you have a worthy proposition for Canadian Hardware Merchants, write us for a list of these available dates, and full particulars as to price.

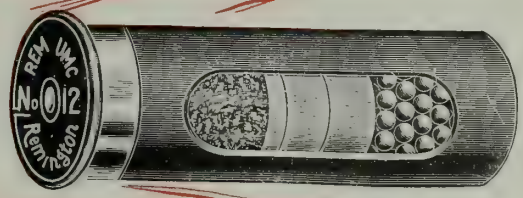
REMINGTON UMC

THE SUN OF PROSPERITY



A low-priced heavy seller—the REMINGTON shot shell

Here's the shell you can buy rock-bottom and sell at a popular price. And you needn't care who you sell it to because this "Remington" Shell has Remington quality all through and it will make good in any company.

The "Remington" really is the highest grade, low-price, Canadian-made Smokeless Shell. Loaded with Standard Smokeless Powders, primed with the famous No. 33 Primer and loaded with drop or chilled shot. Ask your jobber for early quotations.

Just one more example of Remington-UMC determination to give our dealers the best of it against any and all other shells on the market.

Remington UMC

.22's—the little fellows that make big business for Remington-UMC dealers. Just three reasons: low price—high quality—big publicity. You can't go wrong from any standpoint in placing heavy orders with your jobbers, NOW.

Exclusive UNIVERSAL Feature

The non-breakable, heat-proof glass top, now furnished with UNIVERSAL Percolators.

Exclusive UNIVERSAL Feature

The Patented Spreader Plate which distributes the water evenly over all the coffee, extracting all of the healthful, flavor-producing elements from every berry.

Exclusive UNIVERSAL Feature

The Patented Pumping Device which circulates the water through the coffee 6 to 10 times more than any other make. This point is the secret of good coffee.

X-Ray View showing the UNIVERSAL Method of Percolation.

UNIVERSAL Coffee Percolators

circulate the water through the coffee six to ten times more than any other make, extracting every bit of the flavor and aroma from the coffee berry and making the most delicious beverage imaginable.

By the **UNIVERSAL** Process the water starts circulating through the coffee as soon as heat is applied to the percolator, and before the boiling point is reached percolation is completed and the coffee is ready to serve.

UNIVERSAL Percolators are made in various designs and sizes in Aluminum, Porcelain Enamel, Copper polished or with nickel or silver-plated finish. Prices to suit every purchaser.

For prices, etc., write to your jobber or direct to us.

This Man Must Have Instruments of Precision

HIS work demands tools of extreme accuracy—his job depends upon them. When he wants tools or instruments that he can depend upon he goes to the leading dealer to get them. If the dealer shows him Starrett Tools he buys them without question because every skilled machinist knows that

Starrett Tools

are mathematically accurate. Every engineer, machinist and high-class workman whose work requires accuracy, knows Starrett Tools to be standard. Starrett advertising is addressed not only to workmen and engineers, but to superintendents, foremen and manufacturers.

We deal direct with retail hardware men.

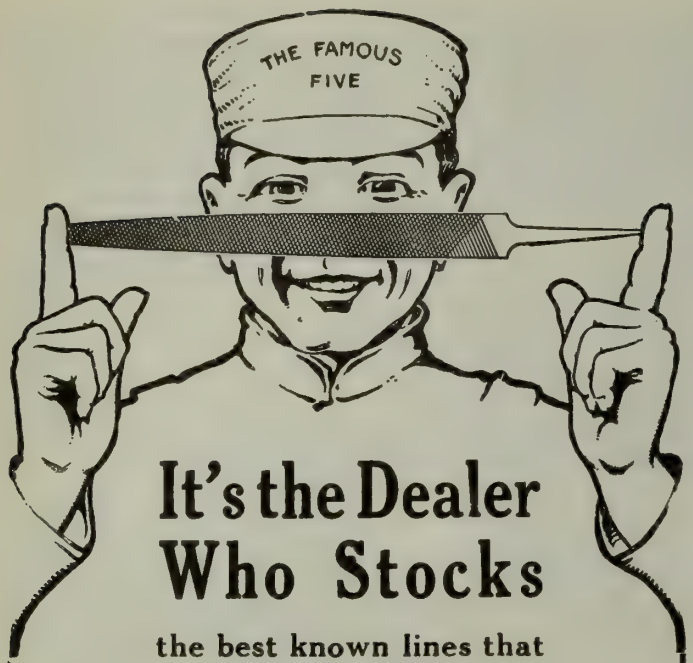
Send for Free Catalog No. 20-M.A., prices, etc.

THE L. S. STARRETT COMPANY

"The World's Greatest Tool Makers"

ATHOL, MASS.

NEW YORK LONDON CHICAGO



It's the Dealer Who Stocks

the best known lines that gets the business.

Your file stock should therefore consist of the following famous brands:

KEARNEY & FOOT
GREAT WESTERN
AMERICAN
ARCADE
GLOBE

(Made in Canada)

When you bear in mind that 10,000 dealers in Canada stock these famous five—

When you know that behind you is our 50-year-old experience in the making of files—

When we tell you that the Nicholson output is over 60,000,000 yearly—

The question is: Can you afford to be without these well-known brands of files on your shelves?

To help you, we're educating your customers, through advertising, to throw away their files when the "inefficient" point is reached. And that our efforts are not wasted is proven by the increased demand for files—of the "famous five" mentioned above.

We are featuring a special line of Stainproof Cutlery — Ask about it.

Plymouth Is Always the Same

This hank of Manila fiber

is one of hundreds of thousands now in our warehouses.

To inspect such fiber, to judge how much is good enough for Plymouth Rope and to decide how various lots of widely different character shall be blended (as all Manila must be) to maintain definite standards of quality in the product—this is a job for true fiber experts.

Such men are none too numerous, but we have our quota of them—have always had. The accumulated experience of this group covers ninety-one years. It cannot be duplicated.

Our Manila purchases amount to nearly one-fourth of the importations of that fiber. And every lot is passed upon by these men. Their skill and this superior supply of raw material largely explain why Plymouth Manila Rope is of uniform quality.

93-97 Adelaide St. West, TORONTO

Why handle cheaply made inferior heaters?

Why, when you can buy heaters with no castings in their construction at all—heaters made so they won't bend or break—heaters that please your customers and help you sell more goods

Satisfied Customers are your best asset

You make that kind of customers when you sell them the celebrated

CLARK HEATERS

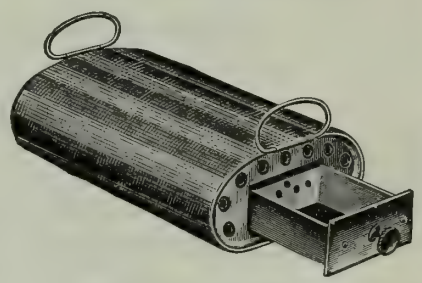
and they cost you no more than the heaters of inferior quality with cast ends.

Furthermore, Clark heaters are the only heaters that are now being advertised to your customers. They are the only heaters that have ever been advertised to users in Canada, and every advertisement asks the reader to go to his dealer for the heater.

Do not be misled. The heaters that sell best in Canada and every other country where heaters are used, are the Clark Heaters—they are made better, please better and offer as good or better profit. Almost every jobbing house of note in Canada handles the Clark Heaters—They must be best and we know you will find them so.

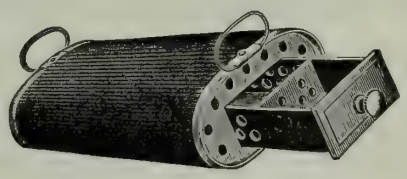
Insist on Clark Heaters. It pays.

Some Good Sellers from the Clark Line



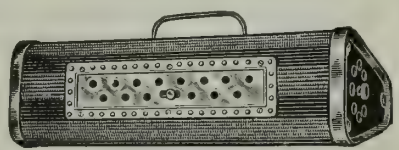
No. 5B Clark Heater

No. 5B Heater is light and handy, yet very enduring and sightly. Is 12 inches long and weighs 4 pounds. Heats quickly, furnishing a mild and comfortable temperature. This heater is used quite extensively by farmers, mail carriers and milkmen. Covered with fine Brussels carpet.



No. 3D Clark Heater

Our No. 3D Heater is one of the most popular sellers, being very strong and durable. It is 14 inches long and weighs 7 pounds. Has fine asbestos lining and is covered with Brussels carpet; has braid binding. Easily cleaned by brushing. Ends are of triple strength white metal.



No. 7D, showing side and end ventilators.

No. 7D Clark Heater

No. 7D Heater, a well known and popular style, having flat, slanting top, and having ventilators in both ends and at the side with which it can be made to throw out as much or as little heat as may be desired. Is 14 inches long, and weighs 9 pounds. Has cold drawn steel ends, heavily nickel plated and is covered with superior Brussels carpet.

Montreal

"Bristol"
TRADE MARK REG. U.S. PAT. OFFICE.

The Prize-Winning Rods

Biggest National Advertiser in the Sporting Journals—

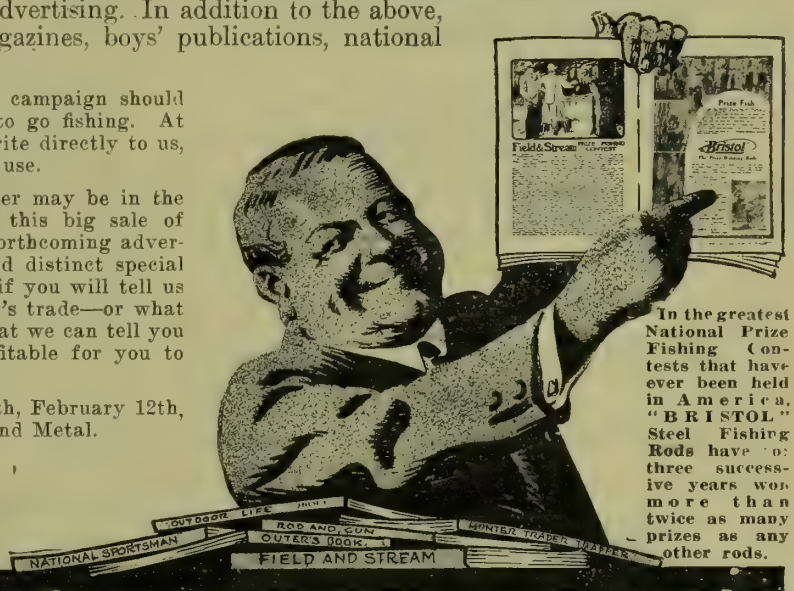
In Field & Stream, National Sportsmen, Outdoor Life, Hunter-Trader-Trapper, Outer's Book, and Rod & Gun, we are running 15 pages of advertising in each—a total of 90 full-page advertisements to increase the already large, nation-wide demand for "BRISTOL" Steel Fishing Rods. All of these advertisements will create a greater general interest in fishing and a demand for thousands of dollars' worth of fishing tackle of every description which you will sell to your trade as a direct result of our advertising. In addition to the above, we shall advertise in 15 or 20 other general magazines, boys' publications, national weeklies, etc.

Based on past experience, this great national advertising campaign should make not less than 500,000 men and boys more anxious to go fishing. At least 25,000 of these will be so interested that they will write directly to us, asking about the best rods to buy and the best tackle to use.

In order that every "BRISTOL" Steel Fishing Rod dealer may be in the best possible position to make the most money out of this big sale of "BRISTOL" Rods and other fishing tackle, we shall, in forthcoming advertisements in Hardware and Metal, make five different and distinct special offers on Advertising Helps which we will furnish FREE if you will tell us what "BRISTOL" Rods you have bought for this Season's trade—or what kind of fishing your customers are most interested in, so that we can tell you the kind of "BRISTOL" Rods which will be most profitable for you to handle.

Watch carefully for our advertisements in the February 5th, February 12th, March 4th, March 11th and April 8th issue of Hardware and Metal.

THE HORTON MFG. CO.
302 HORTON STREET, BRISTOL, CONN.



In the greatest National Prize Fishing Contests that have ever been held in America, "BRISTOL" Steel Fishing Rods have for three successive years won more than twice as many prizes as any other rods.

Do You Handle Automobile Accessories?

Not long ago, a Hardware and Metal representative walked into one of the biggest hardware stores in Canada, and, noticing a display of automobile tires near the door, asked the head salesman if they were going into auto accessories.

"Oh, no," he replied, "we just stock tires to accommodate a few of our contractor customers."

But the Hardware and Metal man soon discovered batteries, tire chains, wrenches, and a number of other articles used by motorists. He showed the head salesman that this store was in the auto accessory business without knowing it.

That same week, the firm inserted a big auto accessory advertisement in the leading daily, and filled their best window with a display of accessories. They know that they are handling auto accessories now. Their increased profits tell them that. And they have found out that, even in a large city, the average motorist would far rather buy his accessories in a hardware store than in a garage.

JOHNS-MANVILLE SERVICE
COVERS THE CONTINENT

THE Johns-Manville policy of unquestionable Responsibility for the performance of its products in service is a policy without a reservation. It's a bona fide, straightforward "square deal." This policy is applied to J-M Roofings by our new "Roofing Registration" plan. *You* ought to know about this plan. It's a trade winner for you and a money saver for your customers.

J-M Regal Roofing J-M Vise-Grip Cleats —A Winning Combination

The one weak point of ready-to-lay roofing has always been the difficulty of making tight joints at the laps.

Laps and Joints are now made watertight and the roofing is held against the boards with a continuous vise-like pressure. Warping and shrinkage of roof boards does not cause the roofing to pull away and leak as when the laps are fastened with nails and cement.

And the roofing. J-M Regal has proven itself the longest-lived and most satisfactory all-around "rubber type" roofing that can be produced. It is made of wool felt and genuine Trinidad Lake Asphalt in conjunction with other natural asphalts—a combination that assures the maximum of durability.

Inquire about J-M Roof Registration. Let us show you how to meet the demand for a durable ready roofing—and how to make money doing it.

Immensity of a New Industry

Remarkable Increase in Number of Auto Owners in Canada During 1915 — Where Cars Are Located—The Growth of the Auto Industry Has Developed a Huge Demand for Accessories

ACCORDING to figures supplied by a statistician of the motor vehicle industry, the number of automobiles in use in Canada at the beginning of November 1915, was approximately 83,128, as against 61,000 on the same date of the previous year. The 83,000 automobiles are owned by 73,000 people.

In the United States there are about 2,250,000 cars. Assuming that the population of the United States is 100,000,000, and the population of Canada 7,500,000, there are over twice as many automobiles in the United States per thousand of population as there are in Canada.

The United States has one automobile to every forty-four people, whereas in Canada there is one automobile to every ninety people. In both countries the sale of automobiles is growing rapidly, and there is no reason why, in a very short period of time, there should not be twice as many cars in use in Canada as there are at the present time. Automobile dealers in Canada state that the outlook for 1916 business is exceedingly bright.

It is expected that during 1916 there will be a heavy sale of cars in country districts. There are several reasons for expecting a heavy sale to farmers. In the first place, the farmers are more interested in motor cars than they have ever been in the past. Sales of cars to farmers during 1915 greatly exceeded the sales of any previous year. This year the farmers have the money to buy cars, should they desire to do so, and from present indications the farming communities are going to be worked hard during 1916 by auto salesmen.

That the country districts will be worked hard, is a foregone conclusion, when you take into consideration, the number of retail hardware merchants in small towns, who during the past six months have taken on agencies for moderate priced motor cars. And there is no better or more aggressive class of merchants to be found anywhere, than the hardware merchants, when it comes to pushing the sale of any commodity in the farming community.

Where are Cars Located?

There are a few people who have an idea that most of the motor cars in Canada are in use in the cities. Such is not the case. Approximately two-thirds of the motor cars in use in Canada are owned by residents of the smaller cities and towns and by people residing in the rural districts.

According to the registrations in the various provinces, the motor cars in Canada registered up to November 9, were located as follows:—Ontario, 36,300; Saskatchewan, 11,966; Quebec, 8,383; Nova Scotia, 2,345; New Brunswick, 1,941; Manitoba, 7,811; British Columbia, 9,100; Alberta, 5,192.

It will be seen by the foregoing figures that the cars are well distributed throughout the Dominion.

Increase Over 1914

In 1914, the automobiles registered in Canada numbered 61,058. By November 1915, the number had increased to over 83,000. These figures furnished astonishing proof of the growing popularity of the automobile, and give some idea of the vast importance of a comparatively new industry.

There is no industry growing more rapidly, and no industry, at the present time, that appears to have a greater or more hopeful future outlook.

With the growth of the automobile industry there has developed a huge demand for automobile accessories. The demand for accessories has grown to such an enormous extent that hardwaremen, garage owners and exclusive

Window Display of Auto Accessories by the James Walker Hardware Co., Montreal, Que.

auto accessory stores are doing a huge business in accessories.

The retail hardware trade of the Dominion took up the auto accessory line much more quickly than the jobbers. During the past two years Hardware and Metal has told how a great many retail hardware firms started in the auto accessory business, and by studying the needs of the auto owners have built up new and profitable departments.

How One Merchant Started

The story of how a Toronto merchant started to sell accessories is typical of many others, which might be told regarding the modest start made by some firms which have, in a comparatively short time, worked up a good trade connection in auto accessories.

When asked why the firm had started to handle auto accessories, the merchant stated that many auto owners used to stop at the store to purchase gasoline. The gasoline was carried at the rear of the store at first, but the demand grew to such proportions that it was considered advisable to instal a filling station at the front of the store—and after the filling station was installed, the business grew rapidly, very often several autos would arrive almost at the same time for gasoline.

Autoists stopping to purchase gasoline would ask for patches, rubber cement, etc., and requests of this kind soon became very frequent, so frequent that a small stock of cement, patches, etc., was put in. Before long the people who wanted patches and cement began to ask for other things, and when an article not stocked was asked for, it was procured for the customer—that is, if the latter could wait.

The articles asked for most frequently soon found their way in as regular stock, and in a comparatively short time a fairly representative stock of accessories had accumulated, and it was decided to push the line more vigorously.

When selling gasoline from the auto-filling station, the salesmen would tell the autoists that a line of accessories was carried in the store. This proved to be a good plan, and many autoists were induced to buy accessories as well as gasoline. The windows are also used with splendid effect. At regular intervals displays of auto accessories are arranged, and these may be seen from the filling station or by passing autoists.

The business has grown to such an extent that a special table and silent salesmen are now used for displaying automobile goods. In the silent salesman are shown lines such as lamps, goggles, spark plugs and smaller accessories which it is not always advisable to expose or place within too easy reach of people who are sometimes tempted to "lift" such articles.

Larger supplies are carried on a large table near the main entrance to the store, and include tires, pumps, batteries, carbide, horns, auto cleaning brushes, lamps, auto top dressing, oils, greases, jacks, bearing scrapers, bulbs for headlights, goggles, patches, cement, etc.

Demand in West

The coming year will no doubt see a bigger demand in the Canadian West for automobile accessories. Quite a number of the Winnipeg jobbers are introducing a department for this line of goods for the first time. One jobber has handled this line for over a year, and has found it successful. The only difficulty as far as the jobber is concerned, is in getting some dealers to realize the possibilities for them in automobile accessories.

Demand is Growing

The demand is growing from year to year, there is an excellent opportunity for the retail hardwareman to handle this line and make himself head-quarters for it. With the farmers at country points wealthier than they have been in a good many years, they should be excellent prospects for automobiles, and many hardwaremen are taking on agencies for the cars themselves, and are conspicuously successful.

Men Who Sell Cars

Among the dealers in Western Canada who have taken on agencies for cars, to mention only a few, are Ernest Valleau, Sintaluta, Sask., who sold 14 cars—Hugh McGillivray, Pense, Sask., who has sold scores—Hume & Osborne, Oak River, Man., who sold half a dozen Fords in a year—Henderson Bros., Vanguard, sask., who handle the McLaughlin—Buick and Chevrolet cars, Findley & Findley, Kincard, Sask., and Lavery & Scott, Newdale, Man., who sold a number of Reo's.

It has been observed that many hardwaremen who have been successful in handling cars, have not yet gone into the automobile accessory business to the extent warranted. It would appear that a man who found a demand for automobiles in his district would find an even bigger demand for automobile accessories, especially for tires, tubes and chains. The man who handles cars has this advantage, that he knows exactly what his customers want, and is able himself to buy intelligently.

One Winnipeg jobber who has announced his intention of going directly to the consumer, gives as his reason for this action that the average hardwareman is liable to buy too little or too much stock, thus causing trouble both to himself and the man who supplies him. When a dealer builds up a business in automobiles, there is little danger of him overstocking, especially if he handles Ford cars, the accessories for which are standardized.

It has been found necessary by a jobber who has recently gone into this business to conduct an educational campaign for the benefit of the dealer. This firm found considerable difficulty at first in inducing its clients to instal a stock of accessories. No attempt was made to force a stock on a dealer who was afraid of it, but where possible, he was induced to take orders from the catalogue, and have his supplies mailed to him as required. It invariably happens that the dealer in this way got on his feet, and it was not long before he was buying a stock of accessories just like any other hardwareman. Many dealers in the West are purchasing show-cases especially for this stock, and are buying cards bearing the words Automobile Accessories to attract attention to it.

Lost Opportunities

The writer has noticed during the past few weeks that where hardwaremen at certain Western points have not been alive to the possibilities of handling automobile accessories, that they have allowed the business to pass into the hands of men who are not so conservative, and who are perhaps less capable of handling the line than they themselves would have been. The dealer's great drawback is that he does not understand machinery, and for that reason is afraid to tackle automobile accessories. In such cases it has been found advantageous for dealers to take on the agency for some make of car, purchase one for himself at the wholesale price, and use this to drive out into the country, calling upon his customers and making collections. In this way the dealer becomes thoroughly acquainted with the car and is then in an excellent position to know what stock to handle.

Tires in the City

Where dealers in the West have not definitely gone into the automobile accessory business, there are many who are slowly invading this territory, almost unconsciously, handling wrenches, spark plugs, dry cells and battery connectors, etc. If there is a demand for these from automobile owners, there should also be a good demand for tires and other accessories. It has been found in the larger cities that while dealers are not so quick to handle accessories as in the country, they have experienced a bigger demand for tires, at least many of the city dealers are handling them.

While the number of firms handling accessories in the city of Winnipeg is small, it is worthy of note that one of the largest departmental stores in that city—Robinson & Co., Ltd., Main & Portage, are just introducing this line.

Retailer Meets Mail Order Competition

Retail Merchant at Hardware Convention Describes the Selling Policies of Mail Order Houses—Some Mail Order Paint Estimates —How Retailer Can Compete.

AT the last convention of the Ontario Retail Hardware and Stove Dealers Association held in Toronto in February, 1915, a lengthy discussion took place on how to meet mail order competition. No doubt the matter will again be taken up at the convention to be held in Toronto next month, as it is generally known that the mail order houses have been particularly aggressive during the year 1915.

The subject, "Meeting Catalogue House Competition." is a live one whenever a body of retail hardwaremen get together in either Canada or the United States, particularly in the latter country.

Mail order houses in the United States, as would naturally be expected, are much more numerous than they are in Canada, but of late a number of new mail order concerns have started business in the Dominion, mostly in Western Canada.

The retail hardware associations of the United States have been fighting "catalogue house competition" for many years, just as Canadian associations are now, and will have to, for many years to come.

At the recent conventions of the Retail Merchants' Association of South Dakota, an address was delivered by a retailer who has made a close study of "mail order competition," and has been fighting this competition for a number of years. This merchant dealt at considerable length with the business methods of the mail order houses. He contends that every retailer could make a dent in the business of the catalogue house if he would. The speaker pointed out that the fight against the mail order houses is not the fight of one man, or a group of men, but the fight of every man who is engaged in the retail business.

The speaker gave some interesting sidelights, on the sales plans of the mail order houses, which should interest every retailer. A portion of the address is here appended:

Mail Order House Idea of Service

"If you want to know the value which the mail order house places on service, read their catalogue. They quote nails, for instance, at two dollars per hundred pounds, and five pounds for fifteen cents, the difference in the price for service. Screw eyes are twelve cents per gross, but if you want less than a gross, the price is doubled for the extra cost of the service. Take a certain size of screws that are sixty cents per gross, and in smaller quantities eight cents per dozen."

Now don't draw the wrong conclusion from this recitation of the mail order house prices for service. I am not suggesting that you add fifty per cent. to cover service. But the mail order house emphasizes price, and puts the soft pedal on service. If you are rendering a superior service to that rendered by the mail order house, you are justified in emphasizing that fact to your customers.

I want to take up the point of getting and studying the catalogues. If you are called to combat their arguments, you must know what arguments they are using, and if you make it a point to get their catalogues, you will find they are talking about you and your prices. Follow it up by asking their prices. If you are paying twenty cents for an article that the catalogue house is selling at eighteen cents, find out from somebody what is the matter. Your customers don't hesitate to keep you on needles and pins when your price is above that of the catalogue houses. Why should you be so considerate of the jobber and the manufacturer?

What Constitutes the Price?

There are many little things that go to make up price that the customer does not at once grasp. It may be a twelve ounce package and the price may be made in Chicago, Sioux Falls, or Southern Louisiana, and there will be delays in receiving goods. I have had customers tell me that they have waited six weeks for their goods. Then the goods may be shipped "knocked down" and require considerable time to put them together. You should study these points and let your customers know and understand them. You will find, too, by a close study of the catalogues that there are many inconsistencies in them. You will find a shoe quoted at three dollars, with a usual retail value of four dollars. You will find them quoting an article at $2.50, and stating that the "Usual retail value of $4.50," and claiming a saving of two dollars. Just how this is to be effected you will find by figuring it out for yourself, and should explain that to your customers. By buying mail order house goods you will get a line on some things that are not down in the catalogue. You will be able to go before your customers with a definite statement, and not have to draw on your imagination. The best way to compete with mail order house merchandise is to know all about the merchandise.

Some Inconsistencies

On the twelfth of February a year ago, it was my privilege to address the Merchants' Short Course at the University of Minnesota. I secured from one of the catalogue houses a house dress which they advertised was of a "usual retail value of $1.60. Our price eighty cents." Through the Dry Goods Reporter of Chicago, I had been able to match the dresses at seven dollars a dozen. I had also secured a petticoat, which I tried to match. I found that most of the department stores had never heard of the kind of material. They advertised it as a usual two-dollar value. Our price one dollar. I had considerable difficulty in matching this up at all at any price, as the style was quite old, in fact about two years old. I found that when it had been in style it had sold at $8.50 a dozen. These garments, and the house dress, together with the statement in the catalogue, were sent to the post

HARDWARE AND METAL IN A NEW ROLE

The following letter is from W. J. Carter of Carter Bros., hardware merchants, Picton, Ont. Mr. Carter is first vice-president Ontario Retail Hardware and Stove Dealers' Association.

Geo. D. Davis,
Editor Hardware and Metal,
Toronto, Ont.

Dear Sir,—Just a few lines of appreciation for the more than valuable assistance Hardware and Metal proved to us after our recent fire. We took stock last August, but became so busy immediately after taking same, that we did not have time to do any pricing or adding. Consequently, when the fire struck us about a week before Christmas, it meant three days pricing and preparing our stock books for the insurance inspectors and adjusters, and during that time Hardware and Metal was our only reference, as our catalogues and price lists had been destroyed by water. Truly, Hardware and Metal was worth several years subscription to us in this case alone. With kindest regards,

Yours very truly,
W. J. CARTER.

office department, with a request for a fraud order. Since that time in all the literature I have seen sent out by that house, and I think I have seen it all, I have seen but one small article with "The usual retail price, and our price."

Truth in Advertising Needed

Some weeks ago I had occasion to outline some remarks in connection with a speech I made in New York City, and I took this position that if the mail order houses were compelled to give the values that they claim to be giving, within six months' time every mail order house in the land would be bankrupt, and that if they were equal to what they claim, every retail dealer and jobber in the country would be forced out of business. In other words, my position is simply this, that the catalogue houses ought to be compelled to either advertise what they give, or else to give what they advertise.

I am not seeking to work along spectacular lines. It is a plain business proposition. I am acting no differently with my catalogue friends than I would with my competitor in the same town if he were misrepresenting.

"Where Have Our Profits Gone?"

Now at our retailers' convention in Minnesota, there was a talk upon the subject, "Where Have Our Profits Gone?" I don't know whether you have heard that talk, but I am going to tell you where your profits have gone. They have gone to the retail mail order houses in Chicago. Ten millions of dollars of net profits left your community and mine in the last twelve months, and went to the mail order houses in Chicago. That profit would have been well worth having. What are you doing to get that business? Almost nothing. What are the mail order houses doing? They are advertising.

Show Your Customers the Facts

It is my plan to run through the catalogues and present my side of the story, and I think it is up to the dealer to show his customers the full truth in regard to these matters. It has been my method to advertise a matter like this, and to call attention to the misrepresentations of the catalogue houses. A catalogue house recently made four claims as to a grindstone. They stated "Our price $2.90. Usual car lot price $3.25. Usual retail price $4.50. Our saving $1.60." Of these four claims three were wrong, and the only one of them that was true was that the catalogue house price was $2.90, and the fact that that price was in Chicago was not particularly emphasized by them.

Some Mail Order Paint Estimates

I have found that it pays to show up these facts, not for the direct results, but for the indirect effects. There is probably not a dealer in this house who has been handling paints, who has not been affected by the catalogue house prices. It is published in their catalogue that their house paint has a covering capacity of 250 square feet, and that is figured for a house with a more than plentiful supply of windows and doors. One is a figure on a 26 x 23, 22 feet high. This figures 2,600 square feet. There are 16 windows and 8 doors. Twenty-four windows and doors all told. After taking these out it leaves about 2,100 square feet of painting surface. They figure it will require eleven gallons of paint. As a matter of fact this figures less than 200 square feet of actual painting surface to the gallon. Their price is $22 in Chicago for the job.

To Compete—Raise Your Price

I have it on the word of the catalogue houses themselves that they don't know how to make paint, that is, good paint. They state that they are making their paints as good as they know how. The best they know how is a heavy percentage of barytes, water, and other inferior ingredients. They say it requires fifteen gallons of paint to cover eighteen hundred square feet of surface three coats. That is about one hundred square feet to the gallon, and they warn their customers against paying $2 or $2.50 a gallon, when they can buy it of them at $1.12. And yet at their figures on a house they are really getting $2 for their paints. The only way I can meet their price is by raising my price 25 cents a gallon, and if you will quit selling paints by the gallon, and sell them at the cost of painting and good service, there is nothing about this catalogue proposition that should bother you.

Our Export Trade With the Allies

Leading Industries of the Dominion Working Along Practical Lines to Cement Market Relations of Empire and Take Advantage of Strategic Position to Secure European Business After the War.

BY J. W. TYSON.

IN winning the war, we should not forget why we are winning it. We are fighting not only for our national existence, but for our industrial future.

Canada as an integral part of the British Empire is devoting full energy to the solution of the great European problem, but in marshalling her forces for the field she owes it to herself to marshall her industrial energies to take their part in working out her economic success. Canada to-day is an ally of the Allies on the battlefield; the dawn of a brighter to-morrow may find her in a favored position as an ally in the peaceful marts of trade if advantage is taken of the strategic relationship which she to-day holds—brothers in arms should be brothers in trade, at least so long as other considerations are reasonably equal. It is with the idea of taking advantage of this battlefield relationship, to pave the way to future business connections and of cementing the trade policy of the members of the Empire family, that the Export Association of Canada was formed. Already it is doing a work which is bringing actual, substantial results, and is paving the way to the development of the broad trade potentialities of the future.

Before going further, it might be advisable to define the project. The Export Association of Canada is a private corporation. It is composed of about a hundred of the leading manufacturing concerns of the Dominion—particularly to those looking to the development of an export trade. It is directly connected with neither the Manufacturers' Association nor the Department of Trade and Commerce, and yet works in step with both—or perhaps it would be better to say a stride ahead. Where the Manufacturers' Association and the Trade Commissioners work to solve trade problems and to create new markets, the Export Association not only does this, but also closes the actual business-taking orders, arranging methods and rates of shipment and, in some cases, doing the financing as well.

The organization so far effected covers practically every part of the British Empire. In addition to the joint managers —R. J. Younge, in Montreal, and F. C. Armstrong, in London—there are repre-

sentatives in Australia and New Zealand, while an important connection with about fifty other colonies and protectorates has been established through Crown agents representing them, with headquarters in London; the Export Association has been appointed the official purchasing agent in Canada of the Crown agents. In working out his organization in England, Mr. Armstrong has had the close co-operation of Sir George Perley, the High Commissioner, and the machinery of his office, the agents-general of the provinces, the London officials of all the Canadian Transcontinental Railways, the Commissioners of the Department of Trade and Commerce, and the British representatives of the big Canadian industrial interests who have organized a club along the lines of the Canadian clubs—all are working together to the end of putting Canada on the industrial as well as the geographical landscape of Europe.

The Plan of Campaign

While the plan of the association, of course, includes the soliciting of business which might be placed in the "war" class, the organization is devoting its chief activities to laying the foundation for the demands which may arise after the close of the conflict. At the same time, close attention is being paid to anything in the way of developing trade sentiment within the Empire. Plans with regard to European countries are as yet of a tentative nature, but the preliminaries are being arranged for an aggressive campaign when the first rays of the dawn of peace are definitely seen. To France, in Belgium, and in Russia will the chief energies of the organization be confined, and in the latter country particularly important results are anticipated.

Many Orders Already

Business which has already been received through the association's activities is very encouraging. It includes a large number of orders from Australia and New Zealand, which in themselves, however, are not so important as in their significance. Every such order with the shipment of goods to a foreign market has an almost invaluable worth from a missionary standpoint. With the importers it is usually an experiment in going into a new market, and much depends upon the measure of satisfaction when the goods are delivered. Much depends, too, upon the manner in which the goods are put up, the size of packages and their strength, not to mention the little individualities of the foreign retailer and consumer, and it is in this connection that the Export Association is able to give great assistance to Canadian exporters.

Canada and United States

The moving spirits of the association are well aware of the fact that if Canada is to take an important place in this European trade that she will not only have to acquaint herself with new conditions and supply new needs, but she will have to cope with strong competition. Undoubtedly the strongest actual competitor will be the United States. Germany and Austria will unquestionably be kept out of the Allied markets for some time after the war, and it is the opinion of trade authorities the demands during the reconstructive period will be such that North America will be taxed as at no previous period of her history. It is the competition of the United States to which particular attention must be given, and it is in this direction that active steps are being taken. The association proposes that Canada not only strengthen her relationships within the Empire, but should also be first in Europe, so as to take advantage for Canadian goods of that sentiment which will naturally be felt for this country as a war ally. Sentiment may not entirely overcome important advantages as to qualities or prices, but it is felt that there should be a certain preference for our goods if other things are equal or nearly so.

Membership and Service

There are, of course, limits to what the association hopes to accomplish. Canada has been an important country so far as manufactured goods are concerned, and to turn round and supply those markets from which we have been drawing many of our supplies is not an easy task. However, Canadian manufacturers generally are studying the situation very closely, and it is those who believe that they have possibilities as exporters that are playing the leading part in the campaign. The association is open to any and all, but there will be many with comparatively small scope for foreign trade.

At the same time, the breadth of the plans covers not only members, but any others for whose goods there may be a demand. Each member submits prices and details of goods manufactured, and where orders are received they naturally have the preference. But if the order or the inquiry calls for anything which can be turned out in this country the business is placed either within or without the association. The basis of the campaign is to secure business for Canada, and the duty of the organization is as a sort of clearing house where adjustments as to prices, terms, shipping facilities, etc., can be arranged.

The Psychological Moment

Undoubtedly the Export Association has chosen a psychological moment in the industrial history of Canada for its aggressive activities. For years we have been heavy importers while developing our country. In building up a national machine, we have been paying more attention to extension than production. Statements of exports and imports prove this. Now Canada has reached the place where, with rising rates of interest and difficulty in securing capital, it behoves her to speed up her plant and produce—and produce not only for herself, but for the Empire and the world. Already through our increased agricultural production and the manufacture of war supplies we have been able to change from a debtor nation to a creditor nation, and when the war is over much will depend upon the position our industries can maintain in replacing these war supplies with a similar amount of peace wares. The best way to supply a foreign market is to study that market's needs and endeavor to meet them.

The membership of the Export Association is about one hundred, and includes such firms as the following, which have also located representatives of their own in London:

Dominion Iron and Steel Company.
Canadian Car and Foundry Company.
Canadian Locomotive Company.
Dominion Bridge Company.
National Steel Car Company.
Nova Scotia Steel Company.
Canadian General Electric Company.
Northern Electric Company.
Dominion Textile Company.
Hudson's Bay Knitting Company.
Ames Holden & Macready (boots and shoes).
Laurentide Company (pulp and paper).
Canadian Consolidated Rubber Company.
Gutta Percha and Rubber Company.
Dunlop Tire Company.
Goodyear Rubber Company.
Allied Saddlery Association of Canada.

All Canadian manufacturers interested in the aims of the Export Association of Canada and in developing export business can secure all particulars by communicating with R. J. Younge, the Canadian manager, at the organization's headquarters, Eastern Townships Bank Building, Montreal. Those behind the movement believe that its scope could be largely increased to the industrial benefit of the Dominion.

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVIII. TORONTO, JANUARY 15, 1916 No. 3

STOCK-TAKING will show up many lines of slow sellers. Make an effort to dispose of them. Dead dollars never pay dividends.

* * *

IN VIEW of the fact that a great many price changes are taking place weekly, and many more are anticipated, retailers should keep closely in touch with market conditions and endeavor to protect themselves by ordering or booking at the most favorable opportunity.

* * *

NOW THAT WE have turned another corner in the cycle of the years, let everyone resolve to do business in 1916 on strictly business principles. There is no more important thing than knowing the exact cost of operating the business.

* * *

ONE OF THE immediate results of the present war has been to encourage the smelting and refining of ores in Canada. While certain metallic minerals have, in the past, received preliminary treatment in Canada, the ordinary metals of commerce, excepting lead, have been exported for refining. Recent reports announce the establishment in Canada of plants for refining both zinc and copper.

* * *

WITH THE OPENING of parliament and the prospect of an early reply to the speculation which has been rife in manufacturing, wholesale and retail circles as to the prospects for an increase in the tariff, the opinion seems to have gained ground that a general readjustment of the duties will be deferred. There can be no doubt but that the country needs additional revenue and that it will be obtained by some special measures; there are also grave possibilities that it will be effected at least partially through an addition to the war tax.

But recently there have been definite steps taken towards something in the nature of a tariff policy which will embrace not only the different portions of the Empire, but will bind their interests with those of the other Allies' countries to offset the general effects of the great conflict and at the same time to place at a disadvantage the industrial plants of the Central Powers in the markets of the Entente nations. There is reason to believe, therefore, that tariff action will be deferred in Canada until an Allied policy is decided upon.

STOVES COST MORE

ELSEWHERE in this issue appears an announcement regarding an advance in the price of heating stoves. The advance of 5% in the cost of stoves to the retail trade has been made by the manufacturers as a result it is said, of the increased cost of materials used in stove-making, and also in the increased cost of labor.

In comparing the figures of costs that now face stove manufacturers, in comparison with costs of a year ago, there is an approximate advance of nearly 15% in the cost of production.

Pig iron used extensively in stove-making has advanced over $6 per ton. Copper, used in making some parts of stoves, has advanced from 10c to 11c per pound, and the market at present is very firm. Stove bolts, used in huge numbers in stove-making, have advanced about 10%. Sheet steel has advanced to a very considerable extent. Nickel trimmings have advanced about 20%. All foundry supplies, including coke, etc., have also advanced in cost. Owing to a scarcity of labor caused by men enlisting for active service, there has been an advance in the cost of labor. Some firms claim that labor is now costing them from 10 to 15% more than it did prior to the war.

Many manufacturers had the foresight to protect themselves and consequently secured a goodly portion of their year's requirements before the full effects of the advanced costs worked out. Manufacturers claim that the advance of 5% which has taken effect will not cover the advance that will be necessary during the year and that a further advance will be found necessary before the close of 1916.

FACING ACUTE SHORTAGE

AMONG the many lines affected by the war, probably the most important from the hardwareman's point of view is steel. Following the outbreak of the war, many buyers of steel products in awaiting developments, allowed their stocks to become exhausted. And, while stocks were becoming exhausted, a tremendous demand was developed by the Allies for steel for war purposes. The result of this demand has increased the activity of Canadian and American steel companies, and although they have been working to full capacity, and have brought into operation all available producing equipment, they have been steadily falling behind in deliveries, until an acute shortage has developed. The American mills have been extending their plants as rapidly as possible, and although they are producing approximately thirty-nine million tons of pig iron annually nearly double the tonnage of a year ago, and away in excess of the greatest production in former years, they have found it impossible to cope with the demand for war materials combined with the increased demands of the home market for domestic requirements, railroad building, etc. These unusual conditions in the United States have affected the Canadian steel concerns with the result that the latter have had to refuse more business than they can produce. It is well known that some of the Canadian firms have refused attractive offers from abroad, preferring to retain sufficient supplies for their domestic customers, despite the fact, that prices on many lines for shipment abroad are much more attractive than is being quoted for domestic business.

It is important that all buyers, anticipate their wants as early as possible in order to obtain deliveries in time for requirements.

SUPPLIES FROM ENGLAND

COMPLAINTS are frequently heard regarding the great difficulty, and in many cases the impossibility of getting supplies of various hardware lines from England.

Some importers realize that English manufacturers are facing tremendous obstacles, and are trying to make the best of it. Others are impatient and are evidently unaware that industrially, conditions in England at present are much more upset than they are in Canada. The lot of the English manufacturer of metal goods or hardware is not any easy one at the present time, and he deserves considerable sympathy.

An English hardware trade journal, *The Ironmonger,* in referring to the fact that many ironmongers (in England) appear to entertain a suspicion that English manufacturers are using the industrial dislocation caused by the war as an excuse for extortion and for relieving themselves, at the expense of their customers, of trading obligations that have become irksome, states in part, as follows:

"Our knowledge of the conditions in the manufacturing industries convinces us that the manufacturers as a body are straining every nerve to satisfy their customers. Given no higher motive, self-interest would be a sufficient inducement to do so, for they cannot be insensible of the truth that when peace returns and war orders come to an end they will have to look again for support to their old customers, and when that time comes the few black sheep that are now making the most of their opportunities regardless of the rules of fairness and justice will suffer for their present sins. That some amount of avoidable trouble has arisen from unsystematic and slipshod methods in manufacturers' warehouses and counting-houses cannot be denied. We have, in fact, received a good deal of evidence of such shortcomings. Manufacturers have often neglected their duty of warning customers against difficulties of which they themselves had special or early knowledge, whereby trouble in the retailer's shop and unpleasant remarks from the shopkeeper's customers might have been avoided. On the other hand, no ironmonger has any excuse for being ignorant of the state of the metal market and of the congestion at the works, as all these matters are recorded from week to week in his trade journal."

BROOM PRICES ADVANCING

A MONTH ago HARDWARE AND METAL called attention to the firm situation in the broom corn market and pointed out that broom prices were strong and would likely advance. Altogether this advance has been in the neighborhood of from 50 to 75 cents per dozen. The chief cause of this situation was the wet weather in the broom corn states which interfered greatly with the harvesting and produced a lot of inferior corn. This meant less good stock.

A Canadian manufacturer points out that choice broom corn at the present time is scarcely obtainable at any price and anything that looks like corn will bring $100 per ton. Choice corn if obtainable would bring readily $200 per ton. Besides there being a short crop and a very large percentage of red and black corn, there is an unusual scarcity of "hurl" or long corn used for the outside covering of the broom. This tends to make broom manufacturing a difficult problem for those who did not lay in a supply of "hurl" corn early in the season. Apart from this and chiefly as an effect of the European war the prices of lumber, aniline dyes, brimstone, wire, twine and other materials used in broom manufacturing have all advanced. It would appear that still higher prices will be quoted in the near future.

Took Advantage of an Opportunity

How a Struggling Hardwareman Secured a Good Start Through the Advent of the Automobile—Sold Nine Cars the First Season—Farmers Now Buy Accessories

ABOUT three years ago there were two merchants in a certain Western town, the population of which does not exceed six hundred. They were both hardware merchants, but of a very different calibre. The population being small, there appeared to be only room for one officially recognized hardware store. It happened, then, that the second dealer, who was late in arriving, was compelled to wander along devious paths to make both ends meet. While he handled a fair stock of kitchen hardware (with which he did a fair trade among the surrounding farmers), not being the officially recognized hardware dealer, he was compelled to branch into the co-related trades of plumber and tinsmith.

Now it so happened that hardware dealer No. 1 was an English-speaking man, and was doing a very good business, most of the farmers in that district speaking the mother tongue. His competitor on the other hand, bore a name that was foreign, but despite this handicap, he was wide-awake. He was broad-minded and ambitious, and not slow to take advantage of new conditions. His fellow merchant on the other hand, was conservative, and shy of anything that smacked of novelty. As an example, he had in his employ an enterprising clerk. One day this young man observed that the carriage bolts were carried in one big box, so that it was necessary for farmers to pick and choose, when they required one of a certain size. During his spare moments one day, he went to the trouble of sorting these carriage bolts, and arranging them in small boxes, which he labelled accordingly. His employer, on finding what had been done, declared this was all nonsense, that he could not afford space for such a large number of small boxes, and promptly emptied the bolts back into a heap.

This little story is told in passing, for it illustrates the type of man he was, and explains why he did not grasp a splendid opportunity which passed right by his door some time later. It happened that an agent for Ford automobiles passed that way one day, and before he left, succeeded in landing one or two orders from local farmers. The seed had been sown, and it was not long ere farmers were driving into town in their automobiles.

Now, while many stories have been told of late to illustrate the stability of the Ford car, there are cases on record where they have gone out of kilter. And so it happened one day in this small western town and it was up to some one to devise a remedy.

The conservative hardware dealer was peeved. While he could supply the farmer with anything in the hardware line, he was not running a machine shop; and he told him so. Thereupon, the car was pushed over to the premises of the plumber-steamfitter-tinsmith who, while admitting that he was not a mechanic, opined that if he could tackle a water closet, he had at least a fighting chance with an automobile. He did his best, and eventually the delighted farmer was able to drive away instead of submitting to the tortures of the local hotel.

The fame of the plumber soon spread abroad throughout the district. Whenever there was trouble with a car, it was brought to him. Thus he developed another string to his business, which gradually grew, until he became the officially recognized automobile headquarters for that locality. In time, he succeeded in securing a car agency for himself, bought one at reasonable terms, and began to make calls on his customers in the country. In this way he secured orders for nine cars, the profit on which was sufficient to pay for his own.

Moreover, each car that he sold brought him more business, for in the meantime he had had taken on a stock of the best selling auto accessories and tires. Every year sees a dozen or more cars in that district, and the farmers are regular purchasers of supplies for their autos.

RECORD HIGH PRICES ON FUTURE BUSINESS

Some idea of the conditions of the steel trade may be formed from details supplied by The Iron Age, which states that no year has held out such promise at its beginning as the American steel trade finds in looking forward into 1916. Never has so large a volume of firm orders, as distinguished from cancellable contracts, been on the books of the steel mills, and never since the Steel Corporation was formed have prices on future delivery business been at so high a level.

Generally new orders in December were less than in November and the Steel Corporation's statement of next week is likely to show something less than the prodigious increase of November.

The annual canvass of new steel capacity under construction shows far greater additions under way for 1916 than any estimates the trade has entertained. Independent steel companies are building or have plans for 73 new open-hearth furnaces with an annual capacity of 2,715,000 tons of ingots, while the Steel Corporation has made appropriations for 18 new furnaces (including four large ones for duplexing), representing 1,550,000 tons a year.

Here is the amazing total of 4,265,000 tons of capacity coming forward—an amount fairly raising the question whether war prosperity may not lead to the overdoing of new construction.

To-day only 10 blast furnaces are under construction, representing 1,750,000 tons a year, and little of this capacity will be ready in 1916. This unbalanced situation, with its effect on pig-iron and scrap prices, as steel companies come into the market to feed their large melting capacity, is a factor of which more will be heard.

Pig-iron output in December made a further gain, in spite of expected holiday slackening, the output being 3,203,322 tons, or 103,333 tons a day, as compared with 3,037,308 tons in November, or 101,244 tons a day. Production on Jan. 1 was at 105,400 tons a day for 295 furnaces as against 103,033 tons a day for 287 furnaces at the beginning of December.

The country is now making pig iron at the rate of 38,800,000 tons a year, including charcoal iron. At the opening of 1915, with 147 furnaces in blast, or half the number now running, the active capacity represented only about 18,000,000 tons. One of the results of the year is thus an increased output per unit in operation.

Bessemer pig iron has advanced at Pittsburgh, the entire available supply apparently being in the hands of two producers. A sale of 3500 tons for first quarter delivery was made at $21, Valley furnace, representing an advance of $1.50 a ton. A French buyer has offered $22 at furnace for 5000 tons or more of Bessemer iron for prompt shipment.

Southern foundry iron has sold at $15 to $15.50 for the first half and the tendency is upward. There are indications in other markets also of further advances in foundry iron.

Advances of the first week of the year include $2 a ton on merchant pipe and line pipe.

Plates are still the feature of the market in their spectacular rise, 2.25c. to 2.50c., Pittsburgh, being prompt prices.

Eastern mills have advanced bar iron to a 2c., Pittsburgh, basis, a total of $6 in a month.

Our estimate of the pig-iron production of last year is 29,950,000 gross tons, which puts the record of 1915, with all the handicap of six poor months at the beginning, second only to the 30,966,000 tons of 1913.

Sheet Metal Workers' Course

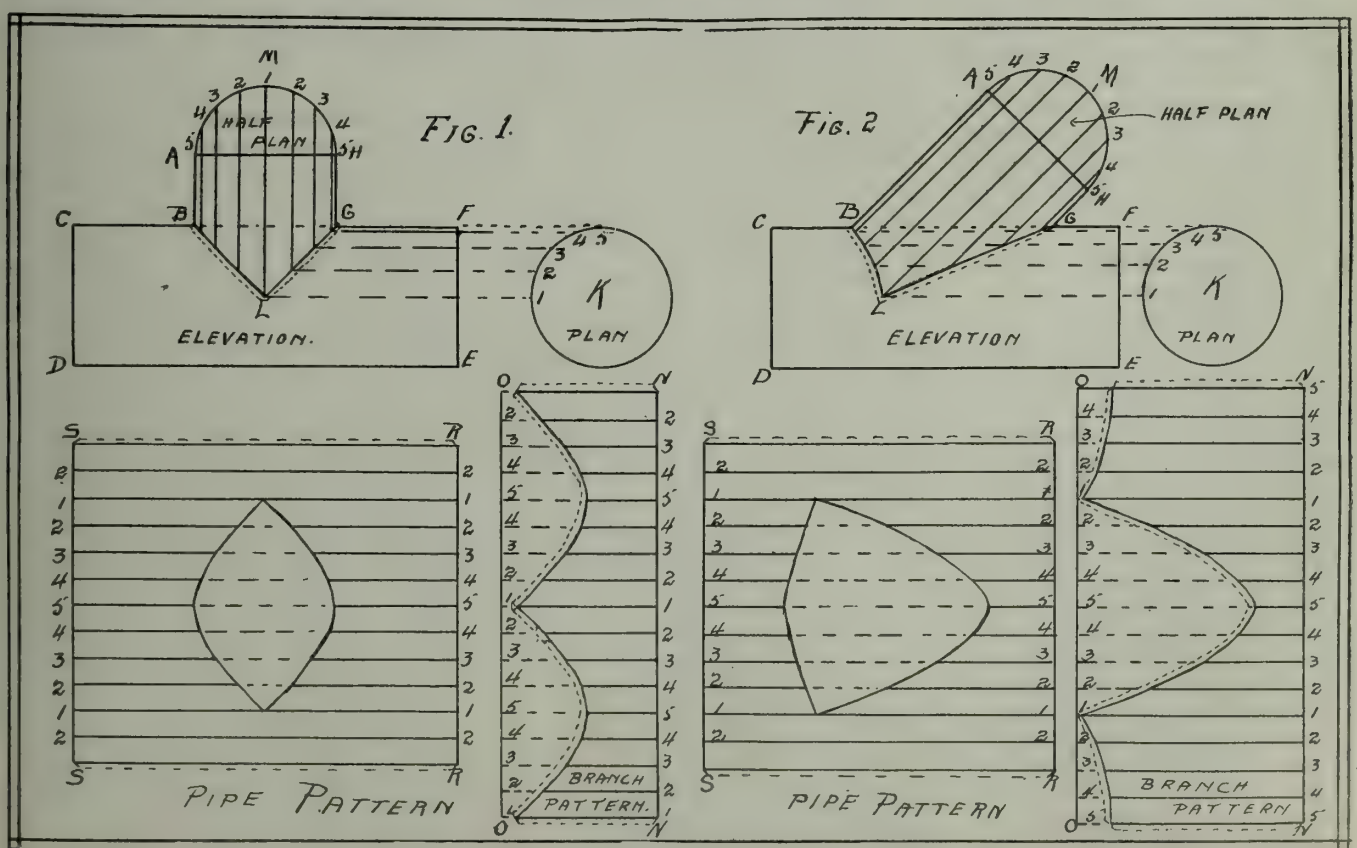
By Chas. Sievers

IN the two problems shown here, we have in Fig. 1 a tee pipe, or equal tion between two pipes of equal diameter, and in Fig. 2 a junction between two pipes of equal diameter, but not at right angles to each other.

To develop patterns for Fig. 1 draw a side view as shown by A-B-C-D-E-F-G-H. On the line A-H draw a half section of the branch shown by the semicircle A-M-H. Divide this half circle into a number of equal parts, as shown by the figures 1-2-3-4-5, etc. At right angles to A-H draw lines from these points, extending them beyond B and G. On end, as at E-F, draw another half section or section of pipe, as shown by circle K. Divide portion of circle K into same number of equal parts, as section on line A-H. At right angles to E-F draw lines from these points, extending them until they intersect lines drawn from corresponding numbers on the section at A-H. Connect the points obtained, obtaining the line B-L-G, which is the line of intersection between the two pipes. To lay off the pattern of branch or part outlined by A-B-L-G-H, draw two parallel lines, as N-N and O-O. At one end draw a line at right angles to N-N, joining it to O-O, as N-O. From these lines, N-N and O-O, set off the spaces shown, 12-3-4-5, etc., on half section A-M-H, repeating these measurements so as to make the circumference complete. Draw lines connecting 2-2-3-3-4-4, etc. With the compasses or dividers measure distance from A-H on line numbered 1 to point L, and mark off this distance on lines numbered 1 on stretch-out, using, say, N-N as the line to measure from; measure from A-H on line 2 to its intersection with line L-G or L-B. In this case both are the same, and set off on spaces marked 2; measure from A-H on the remaining lines 3-4 and 5, and set off in the same way or corresponding lines on stretch-out. A line drawn through points on stretch-out thus obtained will give outline of pattern for the part of tee outlined by A-B L-G-H.

To obtain the outline or shape of the opening required in main part to receive branch, draw two parallel lines, as R-R and S-S, and draw a line at right tngles, joining them as R-S. From this line set off at least half of the circumference of pipe, as shown by the figures 1-2-3-4-5, etc. Working from the line F-E, measure the distance from the line F-E on each of the lines drawn from the section K on the end to their intersection with corresponding points on lines B-L-G, setting off distances obtained on lines 5-4-3-2 and 1 on the lines numbered 5-4-3-2-1 on stretch out. A line drawn through

(Continued on page 48.)



WHAT OTHER PAPERS SAY

WAR TARIFFS

From Toronto Globe

Canadians are willing to shoulder all legitimate war expenditure entailed through participation in the European campaign. Having given of her best to serve in the trenches, Canada will not grumble over the necessary cost of maintaining her armies at the front and of providing for other charges involved. But there is a real danger that the war may still further be made the pretext for enriching privileged interests at the expense of the country at large.

The tariff changes introduced in the Budget of 1915 reached in some cases, a point where they served mainly to increase the protection to home producers, and thus defeated their ostensible object: the raising of revenue for extraordinary purposes. The decline in imports may be accounted for on various grounds, but the fact remains that the protective tariffs on many lines of imported goods are prohibitive. This increased protection for the home market has not lessened the cost of living, and the big drop in imported goods shows that revenue has not benefited by the Finance Minister's proposals for meeting the extraordinary expenditures created by the war. Nor have British exporters received the consideration to which they are entitled, having regard to the financial backing that Canada obtained from Britain in the early and crucial stages of the war, and the large war orders that have helped so materially to reduce Canada's trade balance. A drop of $32,700,000 in merchandise imported from the United Kingdom compares very unfavorably with the increase in exports from Canada to the Mother Country, amounting to $73,000,000.

If the Finance Minister is wise he will not further increase tariffs that are now purely protective and no longer serve revenue purposes. This is not a time for enriching any class in the community, either directly through war orders that accumulate excessive profits for those on the Government patronage list, or indirectly and clandestinely through protective tariffs. Instead of tariff increases that lay grievous burdens on the backs of people least able to bear them, the Government can do much to strengthen the finances of the country by stern repression of waste and extravagance in the public departments, by a tax on excessive war profits, and by strict economy and retrenchment wherever possible

* * *

WHAT HAS HAPPENED TO OUR DOLLAR?

From Financial Post.

The average individual is perplexed because the Canadian dollar does not buy as much as it did years ago, nor does it buy now as much as it did one year ago. In 1899 the goods then purchasable by one dollar to-day will cost you $1.49. A year ago they cost $1.35. A record of prices kept officially enables The Financial Post to determine with accuracy the purchasing power of the dollar.

In July, 1914, the purchasing power had been reduced by 25.7 per cent., and in October, 1915, by 32.73 per cent., as compared with prices in 1899, so that at the dates named the equivalent value of one dollar in goods was 74 cents and 67 cents respectively.

For the same reason that the baker now gives less daily bread for a dollar, the investor wants more for lending a dollar. This is shown by the fact that the Dominion and Provincial Governments and other borrowers have had to pay more for loans in the last few years than they had around 1900.

On the basis of the present purchasing power of the Canadian dollar, an investor who bought a 30-year bond in 1899, making a similar purchase to-day, would expect something like the following increase in the rate of interest:

4% in 1899 should expect 5.95% now.
5% in 1899 should expect 7.44% now.
6% in 1899 should expect 8.93% now.

The following table illustrates some fluctuations in the investment value of the Canadian dollar between 1905, 1910, 1914, and October, 1915, on the basis of the average wholesale price of commodities, as ascertained by the Department of Labor:

4% in 1905 equivalent to 5.20% now.
5% in 1905 equivalent to 6.50% now.
6% in 1905 equivalent to 7.80% now.

4% in 1910 equivalent to 5.20% now.
5% in 1910 equivalent to 6.50% now.
6% in 1910 equivalent to 7.80% now.

4% in 1914 equivalent to 4.42% now.
5% in 1914 equivalent to 5.53% now.
6% in 1914 equivalent to 6.63% now.

This is another illustration that gold is not wealth in itself, but simply a commodity like wheat or coal, and derives its value chiefly because it is a good means of exchange of other commodities, fairly easy to handle and hard to get, except by some such exchange. Capital is symbolized by gold and demands its wages equally with labor—an increase in times of stress, a decrease when times are slack.

NO CONSCRIPTION IN CANADA

From the American Metal Market

Editor, American Metal Market,

Sir:—In your issue of December 29th last, page 4, the first item under the heading "Items of Interest," is as follows:

> "The tide of American immigration to Canada has turned, and American farmers who went there are returning to escape conscription. They became naturalized Canadians to obtain State lands, and now fear official action as well as public sentiment."

You are entirely misinformed on this matter, as there is not a word of truth in this statement. There is no such thing as conscription in Canada, nor any probability of it. Every man who has joined the Canadian army has been a willing volunteer and a British subject.

Many hundreds of Americans have been rejected on account of not being British subjects, and it was never necessary for them to become naturalized to own land in Canada, as anybody (with the sole exception, since the commencement of the war, of alien enemies) can own land here.

And it is not true that Americans are leaving the country, any more than the few that were always coming and going for the last 20 years.

A statement like this is most unfair to Canada and I have no doubt you will correct it. This is one of the many malicious lies circulated by the enemy, and which the American Consuls themselves would show to be false, if they were asked.

Yours truly,
T. R. DEACON,
President and Gen'l Man.
The Manitoba Bridge & Iron Works, Ltd.

Winnipeg, Jan. 3, 1916

DUMPING

From Journal of Commerce (Montreal).

We read with surprise the following in a recent number of the Calgary News-Telegram:

"Dumping Hurts Western Canada."

"For the campaign of the British Columbia lumbermen to the end that 'Made-in-Canada' lumber may be given preference on the Prairies there will be considerable sympathy. For years the Prairies have been used as a dumping ground by American lumber manufacturers who are content to sell in the Western provinces at cost, and to make their profit on their own side of the line. If the Canadian lumbering industry is to be kept alive it must be protected against dumping. Ordinary competition can be met without trouble, but when invading concerns are ready to sell at cost, or even at a loss, in order to keep their mills running and to destroy a Canadian industry, there is no remedy except in a tariff barrier that will force them to sell in Canadian markets at prices that will be fair to Canadian manufacturers."

The propriety of legislation against "dumping" was at one time much debated. Eventually the public appeared to accept as sound policy that where foreign competition took such an illegitimate form as that which is described by our Calgary contemporary, defensive legislation would be justified. Accordingly Canada some years ago took the initiative in the adoption of such legislation, commonly called the "Dumping Law." Canada's law on this subject attracted much interest among political economists everywhere. Australia has followed Canada's example, though not on exactly the same lines. In the United States the Canadian law is often quoted as an example of how the evil of illegitimate competition may be dealt with. But the surprising thing is that our Calgary contemporary writes in advocacy of a dumping law, forgetting or ignoring the fact that Canada has had such a law for many years.

Dumping is a matter that requires careful handling by the Government. Not every allegation of dumping is found to be correct. If the price at which the goods are sold to the Canadian importer is the actual selling price in the country of production, there is no dumping, no matter how low that price may be. But such trade practices as are described by our Calgary contemporary are clearly dumping, and are contrary to the Canadian law. Why, then, is the law not enforced?

* * *

THE DEMAND FOR FILES

(From The Ironmonger, England)

The boom in high-speed steel, upon which we commented in our issue of December 11, has been followed by a similar movement in the file trade. Until the late autumn the demand for files was barely normal; in fact, if the makers had been fully staffed the trade would have been called quiet, for the file plays a comparatively minor part in the manufacture of shells and other munitions. Lately, however, the demand for files has been increasing by leaps and bounds, principally from overseas, and as it is impossible to increase the output very much in the present scarcity of labor and raw material, a great deal of the business that is being offered cannot be placed. The Sheffield file list was revised just in time to enable the manufacturers to take advantage of the many new orders which came in during November and the present month, and as practically no discounts have been lengthened since it took effect, whilst many have been reduced, consumers have to pay the highest prices in their experience. Most of the files now made are forged and cut by machinery, and the output can therefore be increased to some extent by the employment of more women, but the expansion is restricted by the inability to procure new machinery within a reasonable time. The demand brings with it a great increase in the consumption of Swedish bar iron for the best quality of files, and although there is no present shortage of this material, the future supply is very uncertain owing to difficulties of shipping and to the somewhat strained commercial relations between this country and Sweden.

THE JUNIOR CLERK'S PAGE

Some Principles of Salesmanship*

Practical Pointers on Salesmanship—Studying the Temperaments of Buyers —Responsibility Rests With Every Man—Go in to Win Battle in Mind of Buyer.

IN these modern days, salesmanship has justly been classed as a profession, and has been developed along scientific lines, until it ranks equally as high as law, medicine and kindred sciences, and requires equally as much study, thought and training as is required in obtaining success in any of the above.

In later years there have been developed scientific sales schools and clubs. Today most of the larger manufacturing and commercial concerns throughout the United States have their own sales schools to increase the efficiency of their sales force. Some of the big railroad companies are now educating their employees from the ground up—fitting them for positions of responsibility and larger remuneration.

Selling goods is essentially a process of the mind between buyer and seller. Psychology as one writer puts it, is "The Science of the Mind." Every sale combines the elements of mind over mind and unless there is a willingness of the buyer to purchase and the willingness of the seller to sell there can be no sale.

Let us consider first some of the qualifications necessary for the successful salesman to possess and, second, some of the various characteristics of the purchaser.

No salesman can expect consideration at the hands of his customer and command his respect unless he possesses SELF-RESPECT.

Every self-respecting man has a certain amount of dignity. This does not mean he should be independent or egotistical. A self-respecting salesman has the courage and determination and faith in himself so that he can look every man in the face, and be a true man in every sense of the word. The salesman should always bear in mind that he is not asking any special favors from his customers when he tries to sell him his goods but, on the other hand, should try to convince his prospect that he is there to render him service by selling him the product that in turn will prove profitable to all concerned.

Banish every sense of Fear, for the salesman that is conscious of any thought of littleness will never succeed. If your goods are right no apology is necessary when you try to sell them.

Cheerfulness, Politeness and Enthusiasm go hand in hand. "As a man thinketh, so is he." This is as true from a salesmanship standpoint as it is from a moral or spiritual standpoint. The man who can smile and does smile, the man who is cheerful even in the face of disappointment, is always in greater demand than the grouch or pessimist who is always looking on the dark side of things. Kickers and knockers have no place in the business world. Many a sale would otherwise be lost if it were not for the fact that the buyer was impressed by the pleasant, good-natured attitude of the salesman. Some authorities claim that these qualities are of as much importance as a knowledge of the goods, showing the interest in the welfare of your prospect, and working into his confidence and goodwill, will always bring its reward.

If your prospect is inclined to argue and show his resentment, agree with him for the time being, and if you are tactful enough, you will soon have him agreeing with you. A little study of human nature will convince you of this fact. A man's character is often expressed by the clothes he wears, the manner of his walk, the expression in his eyes. A judge of human nature will read a man's character in his face.

It is essential that the salesman be neat in his dress. This does not mean to be a fashion plate or to wear gaudy clothes, which attracts attention from the real man.

It is said of the president and sales-manager of one of the greatest concerns in the United States, that in a meeting of his sales force, numbering into the hundreds, he addressed a dozen or more of his men, and warned them that unless they had their clothes pressed and wore a subdued color of a necktie, that their resignations would be accepted.

Soap and water are cheap, and there is no excuse for a salesman to neglect their use. Keep your collar and shirt clean. Keep the body well bathed; a clean shave each day; hair brushed neatly and trimmed; teeth and nails should always be kept clean. Pay strict attention to your health. The salesman who is careless in all these matters will be careless of his business.

The use of cigarettes and liquor should be shunned. The smell of tobacco or liquor on the breath has lost many an order from a good customer and in some cases the buyer has quit dealing with the house altogether.

Experience has proven that it is not necessary to indulge in these habits or to entertain your customer in this manner in order to get his business.

Hope, Determination, Stick-to-it-iveness are just as important for the salesman to cultivate as any other qualifications. The man with the desire to be successful will reach his goal sooner than the man who never hopes to attain the first place in his profession. It is true some men have their wish-bones where their backbones ought to be, but the man with the definite aim and purpose in life, the man who is not a drifter, the man who aims at the bull's-eye, is bound to win the prize of the high calling of successful salesmanship. Think success and you will be successful. The salesman who possesses the bulldog spirit, the saleman who says "I will" and "I can" is the man who will not yield to opposition, no matter from what source it comes—never let go and when you are sure you are right—go ahead.

This spirit will develop confidence in yourself and nothing can stop you. Persistence in the right direction if not overdone will in most cases land the order that you are so eager and anxious to secure.

Characteristics of the Purchaser.

It has been said that the real battle in making a sale is in the mind of the buyer. As the temperaments of two people are hardly alike, so it becomes necessary for the successful salesman to study in no small degree the various temperaments of his prospects. Human nature is a peculiar thing, and the salesman who can judge the general disposition of the purchaser, his strong and

(Continued on page 48.)

EVENTS IN THE TRADE

New Firms

Macrorie, Sask.—Chas. Evans, harness and bootmaker, has added a stock of hardware.

Oil Company to Erect Plant

Regina, Sask.—An announcement has been made to the effect that the Imperial Oil Co. will erect a million-dollar oil refinery here. When in operation, it is said, the plant will require the services of 450 hands.

Business Changes

Brooking, Sask.—John Mitchell has sold out to A. Duboff.

Kamsack, Sask.—Parliament & Waugh have sold out to W. Carmont.

Orangeville, Ont.—S. A. McCartney, hardware, has sold out to F. A. Falconer.

Strassburg, Sask.—J. A. Howse, hardware merchant, has purchased the hardware stock of Marshall & Eliot.

Winnipeg Notes

F. Morton Morse arrived back from Europe this week.

The Miller-Morse Hardware Co., Ltd., held their annual sales convention last week, and their travellers are all on the road again.

Edmonton Notes

J. E. Brown, manager of Revillon's Wholesale, Ltd., has returned to the city from a trip to Peace River Crossing, where a new branch warehouse has been opened in Revillon Freres' old stand. Mr. Brown was impressed with the possibilities of the new country to the north-west, which is rapidly being settled up, and where much development is taking place. Mr. Nix will have charge of the new establishment just located at the Crossing.

Hardwaremen Forego Dinner

St. John, N.B., Jan. 8,—Among the citizens active in patriotic work none have been more prominent and none have been more generous contributors than the hardware men of St. John. Another example of their willingness to help, even when it involved a bit of self-sacrifice, was their decision at the annual meeting of the St. John Iron and Retail Hardware Association this week, to forego their annual dinner and devote the amount of money which it would cost to the Canadian Patriotic Fund.

A. M. Rowan was re-elected president with Stanley Emerson as vice-president and W. S. Clarke as secretary. The executive committee for the coming year will include these officers with Senator W. H. Thorne, J. A. McAvity, and James Pender.

A. M. SMITH

General Sales Manager, McClary Mfg. Co., London, Ont., who has been elected President, Canadian Hardware Manufacturers' Exhibitors Association. The Association will hold a hardware exhibition at London, Ontario, during the third week in June.

Personal

H. J. L. Brathwaite, hardware merchant, Webbwood, Ont., was elected Mayor by a majority of 40 over ex-Mayor T. A. Douglass. Before going to Webbwood, three years ago, to manage the hardware business of his brother, F. Y. W. Brathwaite, of Blind River, H. Brathwaite represented White's, Limited, Collingwood, in the north.

John Douglas, hardware merchant, Wroxeter, Ont., has been elected as councillor for a third term.

P. H. Alexander, president of the Alexander Hardware Co., Hamilton, has been appointed quarter-master of the Halton and Dufferin County Battalion, which is now being organized. Mr. Alexander will qualify as lieutenant, and will have the honorary rank of captain, which is always given to quartermasters.

Dominion Incorporations

Eastern Canadian Copper Corporation, Ltd., capitalized at $990,000, head office, Montreal.

Canada Nitro Products, Ltd., capitalized at $5,000,000, head office Toronto, to manufacture and deal in war munitions of all kinds.

British Munitions Company, Ltd., capitalized at $50,000, head office Montreal, to manufacture and deal in fuses and parts, etc.

Western Canada Notes

L. D. Osborne, of Hume & Osborne, Oak River, Man., has been on a visit to St. Paul, Minn.

Geo. A. Langtry, Tessier, Sask., has been visiting in Winnipeg, and arranging for spring purchases.

W. McInnis, of McInnis Bros., Acme, Alta., who has been in Winnipeg over the holidays, is leaving this week.

R. G. McKeag, manager of the Manitoba Anchor Wire Fence Co., Winnipeg, has been on the sick list for several weeks.

Wood, Vallance, Ltd., held their sales convention last week, and their men are now on the road again. The travellers report that there will be a good demand next spring for practically everything in the hardware lines.

E. E. Lyday, manager of the Maytag Co., Limited, Winnipeg, manufacturers of power and hand-washing machines, will leave shortly on a trip to the factory in Newton, Iowa. Following this, he will make his annual trip to Vancouver, Calgary, Edmonton, Regina, Saskatoon and other Western cities. Mr. Lyday reports an exceptional demand in the West for power-washing machines.

A. Hanley, manager of Kidd & Clements, Ltd., Wapella, Sask.; W. R. Merrill, Antler, Sask.; F. N. Morris, of Campbell & Ferguson, Melita, Man., and F. S. Humphreys, of Bengough, Sask., were all in Winnipeg last week visiting the trade.

The marriage took place at Arcola, Sask., on December 29th, of L. Clifford Fawcett and Miss Olive G. Umphrey. Mr .Fawcett is a member of the firm of Fawcett & Bowes, of Arcola, having within the past year taken over the business formerly conducted by Douell & Danbury.

HARDWARE LETTER BOX

Steel Flag Staffs

Jas. S. Lockie, Newton, Ont.—Kindly advise us where we can get steel flag staffs, suitable for putting on buildings or for building on a foundation.

Ontario Wind Engine & Pump Co., Liberty St., Toronto, Ont.; Dennis Wire & Iron Works, London, Ont.; Goold. Shapley & Muir Co., Brantford, Ont.; Stratford Bridge & Iron Works, Stratford, Ont.—Editor.

Wire Guards for Electric Lights Which Lock With a Key

Fowler & Windsor, Sudbury, Ont.—Kindly advise us where we can procure wire guards for electric lights that lock with a key.

Northern Electric Co., 131 Simcoe St., Toronto, Ont.; Canadian General Electric Co., 212 King street, W., Toronto, Ont.; Factory Products Co., 220 King street, west, Toronto, Ont.; Monarch Electric Co., St. Lambert, Que.; Mechanics Supply Co., Quebec, Que.; Canadian Westinghouse Co., Hamilton, Ont.; Jones & Moore Electric Co., 206 Adelaide Street W., Toronto, Ont.; Duncan Electrical Co., Montreal, Que.—Editor.

Geo. E. Pearson, Associate Editor of Hardware and Metal, who has been invalided home, and has resumed his duties on the editorial staff of Hardware and Metal. Mr. Pearson enlisted with the Princess Patricia Light Infantry in August, 1914, served for five months with them on the firing line, and entered hospital in May of last year. Mr. Pearson has so far recovered as to be able to take up the duties of civil life, and will be located at the Montreal office of Hardware and Metal.

WESTERN FIRMS AMALGAMATE

Munro Steel & Wire Works, Ltd., and Hero Manufacturing Co., Ltd., Winnipeg, Will Operate Together

The Munro Steel & Wire Works, Ltd., Winnipeg, have amalgamated with the Hero Manufacturing Company, Limited, and the combined concerns have increased their capital to $100,000, to meet the demand for the products they manufacture, consisting of spring beds, mattresses, couches, Davenports, camp and military beds, wire work of all kinds, wire fencing, ornamental iron fencing, fanning mills, washing machines, children's sleighs, etc.

J. H. Munro, Thos. Wadge and his son, Earl, will have charge of the different departments of the business. William Blackwood, Charles Midwinter and other Winnipeg men are financially interested. Mr. Munro is the principal owner of the Munro Wire Works, Limited, New Glasgow, N.S.

Trade Inquiries

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

Please Quote the Reference Number When Requesting Addresses

3. **Wire Nails, Wood Screws and Tacks.**—A manufacturers' agent at Sheffield wishes to be placed in touch with Canadian exporters of wire nails, wood screws and fine-cut blue tacks.

6. **Bentwood Chairs.**—A London company wishes to obtain supplies of Canadian bentwood chairs, etc., for shipment to Siam, and invites quotations from Canadian manufacturers.

7. **Calcium Carbide and Potassium Chlorate.**—A London firm desires the addresses of Canadian manufacturers of carbide of calcium and also of chlorate of potash.

8. **Electric Pocket Lamps and Torches, and also Electric Pipe Lighters.**—A London company seeks supplies of electric pocket lamps and torches, and also of electric pipe lighters, and wishes to get into touch with Canadian manufacturers in a position to supply these specialties.

10. **Brushes, Woodenware, Cutlery, etc.**—A firm in London, England, inquires for the names of Canadian houses in a position to supply the following articles: Woodenware suitable for brushes and household purposes, cutlery of every description, brushes, surgical instruments and appliances, surgical glassware and chinaware, enamelware, etc.

1281. **Forgings.**—A Rugby firm would like to hear from manufacturers in a position to supply large forgings to specification.

1282. **Axles and Tires.**—A Nottingham firm inquires for makers of wagon tires and axles to British clearing house specification.

1283. **Forgings.**—A Birmingham firm inquires for best quality forgings.

1284. **Springs and Deals.**—A Rotherham firm inquires for railway wagon springs and deals for wagon building, 7 by 2½ inches, 7 by 3 inches, 9 by 3 inches, and 11 by 3 inches; also oak planks, 12 by 5 inches, in lengths from 15 feet to 17 feet 6 inches.

An Explanation

In the January 8 issue, under the heading "Hardwaremen in Elections," it was stated that Duncan Macnab, of Orillia, had been elected as reeve. The new reeve is not connected with Macnab Bros., hardware merchants.

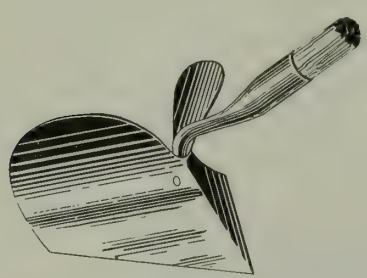
NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

SCHOENER'S HANDY HOE

Schoener Manufacturing Co., St. Cloud, Minn., recently produced the Schoener handy hoe and garden hand plow, here illustrated. The makers state that the hoe breaks up the ground, plows, hills, cuts weeds and grass, and cultivates the soil quickly. It is claimed that the hoe does the work of any ordinary hoe, and can also be used as a plow for hand plowing in a garden. It can also be used for hilling or cultivating vegetables or plants.

The makers state that when used as a plow it can be used as such by simply drawing it through the ground to be plowed. When taking up plants or hilling, it can be drawn forward, and by the formation of its mold-boards it throws the soil as desired, away from or toward the plants or growing vegetables, by lowering the handle and drawing the point forward, the tool can be used for



Schoener's Hoe and Garden Plow.

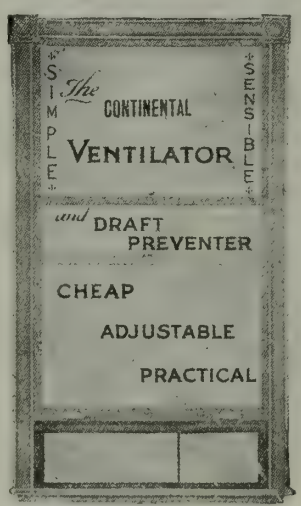
making furrows or trenches any size required for sowing or planting. The bases of the mold-boards are so constructed that they have sharp cutting edges, and can be sharpened by merely filing them with a file.

The hoe is made of half hard cold-rolled polished 20-gauge special steel. Socket and shanks made of malleable iron casting, high-grade polished waxed handle, 4½ ft. long. Both sides of the hoe are alike.

NEW CONTINENTAL VENTILATOR

The Continental Company, Penobscot Building, Detroit, Mich., offers to the trade a new Continental ventilator for cold weather.. The ventilators permit a constant circulation of fresh air, but keep out all draughts, dust, rain, and snow. They are made in an adjustable hardwood frame, with fine mesh specially treated cotton cloth. The construction is said to be solid and substantial.

The ventilators retail from 25c to 50c. For the home they can be used in sleeping rooms, kitchen, bath rooms, etc., and



The Continental Ventilator.

are said to be particularly valuable where children sleep.

The makers state that in the United States the ventilators are being used in schools, offices, hospitals, and many other places. It is said that schools particularly are taking to the article, as it is not necessary to convince educators of the value of fresh air.

The ventilators are adjustable, and are made in a number of sizes.

DE VINE SAFETY RAZOR

De Vine Safety Razor Co., 608 South Dearborn Street, Chicago, Ill., offers to the trade the De Vine Safety Razor, which the makers state combines all the advantages of the ordinary razors with the safety idea. The razor, it is claimed, is so constructed that it can be kept in perfect condition by men who do not know anything about how to strop or hone a razor.

The Devine Safety Razor

The makers state that the De Vine razor is hand-finished, and is made from finest razor steel. The razor is double-edged, simply constructed, and has a shaving guard which cannot get out of order. Booklets describing the razor will be mailed on request.

CATALOGUES AND BOOKLETS

Lawn Mower Catalogue

Taylor-Forbes Co., Guelph, Ont., has issued catalogue No. 59-1916, featuring lawn mowers. The catalogue consists of 32 pages, is attractively gotten up, and well illustrated. The complete line of T. F. mowers is shown in the catalogues. The catalogue has been mailed to the trade, but any firm that has not received a copy can secure one by writing to the manufacturer.

Harding Manufacturing Co. Catalogue

Harding Manufacturing Co., Mansfield, Mass., has issued a 31-page catalogue descriptive of the "Blue Line" and "Gray Line" screwdrivers, fine mechanical tools and other specialties made by the company. Among the many lines illustrated and described in the catalogue are electricians' screwdrivers, machinists' screwdrivers, special, junior and midget screwdrivers, opticians' screwdrivers, etc.

Miller's Falls Tools

Miller's Falls Company, Miller's Falls, Mass., recently issued catalogue No. 35, consisting of 183 pages. The catalogue is attractively gotten up, is well illustrated, and features the extensive line of tools made by the company.

In compiling the volume, special pains have been taken to group together tools of the same and kindred classes, and to express all the principal facts as briefly and clearly as possible. A number of new tools, recent productions of the company, are featured in the new catalogue. Hardwaremen who have not received a copy of the catalogue can secure a copy by writing to the manufacturer.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

The Markets at a Glance

The end of higher hardware prices is not yet in sight. This week's market reports contain advices regarding many important prices changes which have taken place during the week. Many of the price changes have been predicted in these columns for some time past. Among the many lines on which higher prices are quoted this week are putty, white lead in oil, linseed oil, building paper, black and galvanized sheets, cut nails, iron pipe, copper tubes and sheets, brass sheets, rods and tubes, lead pipe and lead sheets, brass wire, heavy and light tee and strap hinges, coil chain, wrapping twine, hoop steel, mechanics' tools, iron blocks, firearms, wrenches, eavestroughing, etc. Although there is nothing in sight yet but further increases, it should be remembered that the market is reaching an abnormal level and a word of caution may be in order. Such movements as the tremendous upward movements in many hardware lines are nearly always affected by a reaction. There is a scarcity of some lines of hardware and an acute shortage will probably develop in a few lines during the early spring. Stoves have advanced 5%, owing to the increased cost of materials and labor.

Travelers are all on the road again and their efforts are resulting in substantial orders being sent in to jobbing houses. A large number of retail firms are still engaged in stock-taking.

MONTREAL

MONTREAL, Jan. 13.—There seems to be nothing in sight but a continuation of the upward climb of the prices of iron and steel and the products and manufactures thereof although recently interest has been divided to some extent by the action of the copper and lead markets. Dealers report that there is no improvement in the attitude of the mills as regards sheets, plates, tubes, pipe, etc., while as time advances the prospects of a famine in these lines become serious. In the higher manufactures the influence of the higher cost of raw material is becoming more and more widespread and travellers representing big American firms report that the shortage is becoming serious. The December report of the United States Steel Corporation indicates an addition of over 600,000 tons to the unfilled tonnage and there are no signs that the volume of business is falling off. However, while, as stated, there is nothing in sight as yet but further increases, it must be remembered that the market is reaching an abnormal level and a word of caution may be in order. Such movements are nearly always affected by a reaction, when, with supplies of high priced goods on hand, buyers lose interest and a general decline follows.

Business indications are very favorable. During the past few days orders of a very substantial character have been received and these are really the first sign of the general conditions as the opening week of the year is a continuation of the holiday season in the French districts. The demand is for general hardware lines with a preference for staples and the number of orders on which immediate delivery is asked indicates that there is a return of confidence in the future. In the city too there has recently been a marked improvement in demand.

In the advances this week are incuded: galvanised sheets, black sheets, plain and galvanised Canada plates, charcoal terne plates, black and galvanised pipe, cut nails, copper tubes and sheets, brass sheets rods and tubes, lead pipe and lead sheets, brass wire, heavy and tight tee and strap hinges, coil chain, stove bolts, poultry netting, shot, wrapping cotton, hoop steel, Stanley tools, English iron blocks, certain firearms, wrenches, eavestroughing, etc.

In addition to a general prediction that there will be higher prices on iron and steel lines generally and manufactures of these metals, special mention is made of bolts, screws, and boiler plates; copperware is also very firm. The metals generally have not been very active although lead is higher and copper firm on the recent advances.

With the parliamentary session beginning something in the nature of an announcement on the tariff possibilities is being awaited with interest. However, the feeling has recently strengthened that an advance in the duty will be deferred at this time until plans are completed as regards a general policy which may embrace all the trade and industrial interests of the countries opposed to the Central European powers.

Tin.—Although tin has been strong and higher since last report because of the fear that stocks on this side of the Atlantic might prove inadequate in the event of the Suez Canal being closed to traffic as the result of military operations, and although prices as high as 45c were heard for spot in New York, there has been a reaction and the American market is given on a basis of 41½c at writing which is a net loss of ½ cent since last report. The market is now extremely dull with very little interest shown. In the local situation there is practically no change and prices are generally as at last report. Montreal quotation: 46c-47c, steady.

Spelter somewhat easier.—Although the local situation shows no material change there is a slightly easier tone in New York on the influence of weakness abroad. However, the London decline is not being taken very seriously as previous experience in New York has shown that it is a poor guide. Recently there has been less buying on the part of manufacturers of galvanised sheet iron, the fact that several of these mills have been closed by strikes being a factor. Montreal quotation: 22c-22½c, fairly steady.

Lead again advances—There has been another advance in lead since last report, the local quotation having been marked up ½c but recently cut down by ¼c, leaving a net gain of ¼c. The chief influence has been the action of the American Trust in advancing from 5.5c to 5.9c but there has been a disposition shown by the independents and the second hands to cut the higher figure. The market in New York has been generally quiet and dull on London weakness; however, it is still pointed out that London is yet much above the parity of the United States and even higher than when New York was quoting 7c of the movement of last summer. Montreal quotation: 8c-8¼c—steady.

Copper remains steady.—Following the violent movement on the part of the copper, when the action of the British government in placing heavy orders in the United States resulted in abnormally high prices, the market has been steady with the advance well maintained. London has shown dissatisfaction at the recent high prices with the result that following the securing of heavy supplies the British government issued instructions that private speculation be gov-

erned by limitations restricting transactions to 50 tons; this is given as the explanation for the big government purchases which enabled the authorities to control the prices for supplies for munitions purposes. Montreal quotations: 27c-27½c—steady.

Antimony.—The local situation as regards antimony has recently shown additional strength with advances in quotations to the top of the recent rather wide range. New York reports that better business is being done in that market, although recent advances are losing their strength; there is a net gain, however, over last report. Montreal quotation: 45c—firm.

Aluminum. — There is little or no change in the situation as regards aluminum, the abnormally high prices having a tendency to curtail business and the quotations given are for the most part nominal with a considerable spread according to the nature of orders placed. Montreal quotation: 68c—nominal.

Solder is firmer.—There is a firmer tendency in the solder situation, with the quotations of some firms being adjusted to slightly higher levels within the range which has been established for some time and which has considerable scope owing to the variety of qualities and makes being offered. Montreal quotations: Commercial half and half 27c, 28c. Strictly half and half 29c, 30c.

No improvement in steel.—Although this week there are few changes in the iron and steel list there is no indication that the situation is weakening or that the upward movement has been checked. There is no disposition shown on the part of the mills to broaden their policy as to accepting orders and so long as this continues the tendency of price adjustments must naturally be to higher levels on account of the lack of assurance as to future supplies. The December statement of the United States Steel Corporation, which is a good key to the general condition of the industry in North America, shows that the unfilled tonnage was over 7.800.000 tons at the end of the year and that the increase for December alone was over 600.000 tons. In general departments the upward movement of iron and steel in its effect upon the raw material used in many manufactures handled by the trade is becoming more widespread from week to week. On wire and sheets the result is very emphatic.

Galvanised sheets again.—Although it is only last week that an advance of 50c was announced on all galvanised sheets, and although this followed several others since the steel market started its upward movement, a further advance of 50c is now announced. Montreal quotations on case lots are now as follows:

B.W. Gauge	Queen's Head	Fleur de Lis	Gorbal's Best
16	$....	$....	$5 50
16-20	6 40	6 15	....
18-20	....	....	5 70
22	....	....	5 95
22-24	6 50	6 30	....
24	....	....	6 00
26	6 75	6 45	6 75
28	7 00	6 75	7 00

	Premier	Apollo Colborne	Crown
14	$5 40	$5 40	$....
16	5 20	5 40	5 80
18-20	5 80	5 60	5 80
22-24	6 00	5 70	6 00
26	6 25	5 80	6 25
28	6 50	6 30	6 50
10¾ oz.	6 75	6 50	....

Black sheets also.—Black sheets have also been affected by the last advances on steel products. In making the increase an adjustment in quotations has been made by most of the local houses as the result of which the 10, 12 and 14 gauges in which there has been a range of 20c are brought to the same basis which is now 35c to 45c above the old. The 18-20 and 22-24 gauges are unchanged but on the others there are advances from 5c to 15c. The new figures follow:

10-12-14 gauge	$3 50
16 gauge	3 25
18-20 gauge	3 25
22-24 gauge	3 25
26 gauge	3 45
28 gauge	3 55

Canada Plates.—Canada plates, ordinary and galvanised, have all been advanced on the strength of the movement in steel plates; the former are up 20c and the latter 25c while the polished remain firm at $5.00. New quotations are as follows:

Ordinary, 52 sheets	$3 70
All bright, 52 sheets	5 00

	Apollo	Galvanized Crown	Gorbals
18x24x52	$6 25	$6 25	$6 25
60	6 50	6 50	6 50
20x28x47	6 75	6 75	6 75
20x28x94	13 50	13 50	13 50

Terne Plates.—Another item in the steel plate list affected by the upward movement of the market is charcoal terne plates on which there is an advance this week of 25c. New quotations follow:

Dean or I G Grade—
I C, 20 x 28, 112 sheets, 216 lbs., $9.50; 200 lbs., $9.25.

Pipe prices higher.—Another advance is expected on wrought iron pipe, both buttweld and lapweld and plain and galvanised, in the near future. Although the trade generally has no information as to what this advance will be one firm is readjusting its prices to the following basis:

Buttweld Size	Per 100 feet Black	Galv.
¼ in. and ⅜ in.	$ 2 46	$ 3 87
½ in.	3 06	4 71
¾ in.	3 57	5 81
1 in.	5 27	8 59
1¼ in.	7 13	11 62
1½ in.	8 53	13 89
2 in.	11 47	18 69
2½ in.	18 14	29 54
3 in.	23 72	38 63
3½ in.	28 52	46 46
4 in.	33 79	55 01
Lapweld.		
2 in.	12 95	20 17
2½ in.	18 72	30 12
3 in.	24 48	39 40
3½ in.	29 44	47 38
4 in.	34 88	56 14
4½ in.	41 82	67 95
5 in.	50 42	79 18
6 in.	65 28	102 72
7 in.	88 06	139 23
8 in. x 25 lbs. per ft.	92 50	146 25
8 in. x 28 lbs. per ft.	106 56	168 48
9 in.	....	....
10 in. x 32 lbs. per ft.	118 40	187 20
10 in. x 40 lbs. per ft.	152 44	240 92

This advance on pipe is about 2 per cent. all round.

Nails and wire—There is no further change in the wire market this week. Wire nails, staples and the different brands of fence and hay wires have maintained their advances well and there are still higher prices talked of as the general effect of the situation in steel. On the other hand there has been an important advance of 20c in the quotation for cut nails which are now quoted at $2.90 on a par with wire nails.

Copper products way up.—A very important advance on copper bars and sheets has been made as the result of the recent developments in the copper market, the increases being from 5c to 9c per pound. The revised quotations are as follows:

Bars, ½ to 2 in.	$35 00
Plain sheets, 14 oz., 14x28 in., 14x60 in.	36 75
Copper sheet, tinned, 14x60, 14 oz.	43 50
Copper sheet, planished, 14x60 base	47 00
Braziers' in sheets, 6x4 base	35 00

Brass Products also.—Brass products have also been affected by the movement but while there has been a general upward movement there are a couple of items.—rods and iron pipe size tubing—on which there is a slight decline. The new quotations are as follows:

Springs, sheets, 8" wide, up to 20 gauge	0 48½
Rods, base ½ to 1" round	0 43
Tubing, seamless base	0 40½
Tubing, iron pipe size, 1" base	0 41½

Lead products jump.—Following in the wake of the higher market for lead there has been an advance made on lead sheets and also on lead pipe. On pipe the advance is 50c and on the sheets from 25c to 40c. The revised quotations are as follows:

Pipe—
Lead pipe, $10.50.
Lead waste pipe, $11.50.
Traps and bends, 25% off.

Sheets—
Sheets, 3 lbs. sq. ft., $10.
Sheets, 3½ lb. sq. ft., $9.90.
Sheets, 4 to 6 lbs. sq. ft., $9.75.
Cut sheets, ½c per lb. extra.
Cut sheets to size, 1c per lb. extra.

Brass Wire.—With the general upward movement in brass products there has been an advance on brass wire—both spring and snare. The new quotations are as follows:

Spring: Nos. 3-8, 50c; Nos. 9-11, 51c; Nos. 12-14, 52c; Nos. 15-16, 53c; Nos. 17-18, 54c; Nos. 19-20, 56c; Nos. 21-22, 57c; No. 23, 59c; No. 24, 61c; No. 25, 64c; No. 26, 70c.

Snare—No. 17, 56c; No. 18, 56; No. 20, 57c; No. 22, 58c; No. 24, 63c; No. 26, 70c;

Hinges.—Both light and heavy tee and strap hinges have again been affected in the upward movement of metal products. The new list—net Montreal—is as follows and covers material increases.

Heavy.	Strap	Tee
4 in., doz. prs.	$1 35	$1 10
5 in., doz. prs.	1 60	1 30
6 in., doz. prs.	1 75	1 35
8 in., doz. prs.	2 40	1 80
10 in., doz. prs.	4 20	2 95
12 in., doz. prs.	5 20	4 85
14 in., doz. prs.	5 95	5 24
Light.		
3 in., doz. prs.	0 38	0 38
4 in., doz. prs.	0 45	0 41
5 in., doz. prs.	0 53	0 49
6 in., doz. prs.	0 64	0 56
8 in., doz. prs.	0 94	0 68
10 in., doz. prs.	1 30	0 90
12 in., doz. prs.	2 25	1 70
14 in., doz. prs.	....	2 05

Coil chain higher—New prices have been announced on proof coil chain which cover a re-adjustment to higher

levels. The new quotations are as follows:

Per cwt. ¼ inch $7,35; 5-16 inch $5.95; 3-8 inch $5.15; 7-16 inch $4.95; ½ inch $4.75; 9-16 inch $4.75; 5-8 inch $4.60; ¾ inch $4.50; 7-8 inch 4.35; 1 inch $4.20.

Bolts going up again—A further advance on the bolt list is being looked for in the trade as the result of the general trend of the iron and steel markets. Recently there has been another advance on stove bolts, the discount on which is now 75 and 10 per cent.

Screws going up.—Higher prices are also being looked for on screws and an announcement is expected with new discounts to cover the list. One authority in the trade states that he expects the increase to be about 20 per cent. additional. The developments in this market have been remarkable of late.

Poultry netting.—The trade has set a discount of 30 per cent. on poultry netting for the spring business. Last week it was stated that some orders were being booked at 35 per cent but it has since been decided to make the change referred to.

Shot up again.—Following the tendency of the lead market there has been another advance on shot, the new quotation being $10.90— an increase of 40c. Extras continue as before.

Wrapping cotton.—Wrapping cotton twine has been materially advanced. The new quotations are:

Four ply 26c, Three ply 25c.

Hoop steel higher.—Further advances are being made in the quotations for hoop steel. One firm has made increases this week of about 35c all round. Bar iron continues to cover a considerable range with some quotations as low as $2.35 and some as high as $2.60, while considerable business seems to be done around $2.50.

Stanley list up all round.—Important to the hardware trade is the further advance which has been made on the long lists of lines marketed by the Stanley Works. This includes, planes, chisels, levels, screwdrivers, etc., etc. It is difficult to give even a general idea of the readjustment because although the general movement is upward, there are certain items which have not been affected. However, as an example it may be stated that on planes the increases are 15c, 50c.

English iron blocks.—Quotations on English iron blocks are being advanced. One firm reports that the increases generally are 5 per cent. to * per cent.

Guns and rifles.—Higher prices are being quoted this week on some varieties of fire arms. The Iver-Johnson single and double barrelled guns and some of the cheaper of the small calibre rifles are affected, while in some quarters the Winchester is being marked up.

Wrenches dearer.—Wrenches are one of the many items on the list of steel products which are subject to advance on the present market influences. The Whitman and Barnes line have recently been marked up by one local wholesale house.

Eavetroughing Higher—An advance in eavetroughing of about ten per cent. has been made, the discount now being 40 per cent. against a former arrangement of 40 and 5 per cent.

Boiler plates firm.—Although there has as yet been no general change in the quotations on boiler plates the difficulty in securing deliveries is being more acutely felt and in the wholesale trade the terms are stiffening up in a manner which indicates that another increase in prices to the trade is coming shortly.

Copper Ware.—As the result of the recent upward movement in copper there has been a much firmer situation as regards copper ware. However, as yet there has been no change in the discounts and it is rather doubtful if there will be for the reason that the advances which have already been made have had the effect of reducing the demand to about the minimum. So long as demand does not warrant manufacturing from raw material secured on the high basis the tendency will be to hold the quotations down.

TORONTO

TORONTO, Ont., Jan. 13—Business in the wholesale hardware trade has returned to its former level after the quietness of the holiday season. The general situation is much the same, continued advances in prices being the principal feature. The outlook in the trade is favorable and there is a feeling of confidence in the future as regards the possible volume of business. There trade, however, is unsettled on account of the fluctuation in prices and possibility of a scarcity of some lines in the near future. The steady advance in the steel and iron, and scarcity of raw materials is seriously affecting manufacturers who are finding considerable difficulty in making good deliveries. For the same reason most manufacturers have withdrawn prices and will only quote on application.

Important Price Changes—The looked for advances in the Stanley lines have been adopted by the jobbers and are now in effect. A new discount of 30 per cent. has been placed on galvanized poultry netting for 1 inch and 2 inch mesh. This, however, is practically a nominal figure, as conditions in the trade are such that the discount is liable to change any time. Quotations on the smaller meshes have been withdrawn by the makers. Other lines which have advanced include conductor pipe, heavy and light tee and strap hinges, wrought butts, hinged hasps and chest hinges, some lines of files, cut nails, shot, lead pipe, copper wire, lead sheets, belt laces, bar iron, tire steel, spring steel, silver tool steel, cold rolled shafting, stoves, heaters and ranges.

Advances may be looked for in wrought iron pipe, iron rivets, copper and pieced ware, pig iron, boiler plates and tubes, galvanized and black sheets and many lines composed of iron and steel.

Iron and Steel—The iron and steel trade is extremely active and prices continue to advance steadily. The situation is becoming serious on account of the scarcity of steel. The mills have a large export business to take care of and the domestic demand is also heavy. They are getting behind on deliveries but are making every effort to meet the domestic demand, although the export business is more attractive financially. A comparatively small tonnage is coming from the States, thus increasing the congestion at the Canadian mills. Prices of all iron and steel products are very firm and in some lines have advanced. Bar iron is quoted at $2.60, steel bars and angles $2.75, tire steel $2.95 and spring steel $4.00 per 100 lbs. base. The new discount on cold rolled shafting is 20 per cent.

The embargo on export shipments of iron and steel products is being maintained by the railroads in the States, but there is possibility of the situation being considerably relieved within the next two or three weeks. In the meantime domestic consumers are reaping the benefit by getting quicker deliveries. The situation has had no effect on price, which continues to advance steadily with a strong market. Steel bars are now quoted at 2c, iron bars $1.95 and shapes $1.90 f. o. b. Pittsburgh. The demand for billets continues heavy and the market very firm, with prices unchanged. The U.S. Steel Corporation report unfilled orders of 7,806,220 tons on Dec. 31st.

Pig Iron—The pig iron market is very strong and prices firm. The entire production of the furnaces is being consumed and there is a possibility of a shortage of pig iron in the near future. Grey Forge Pittsburgh has advanced to $18.45, but Hamilton and Victoria brands are unchanged at $23 per ton.

Old Materials—The embargo on the export of wrought and steel scrap is still in force and local scrap dealers believe that it will not be lifted, notwithstanding the protests from American interests. The market for wrought and steel scrap is weaker, the mills are not buying very heavily at the present time. The scrap copper market is fairly strong and prices are a little higher. The lead market is strong and prices of tea and heavy lead have advanced. Aluminum and No. 1 machine composition have both advanced, but other prices are unchanged.

Machine Tools—There is no change to note in the machine tool situation. Business during the past few weeks has been much quieter, although there have been a number of enquiries for heavy lathes. The market for second-hand tools is quieter, suitable equipment being now more difficult to obtain.

Supplies—A number of important price changes have been made since the new year. Makers of milling cutters have again raised their prices and withdrawn all quotations on high-speed cutters. Carbon cutters are higher and are now quoted at the list plus 10 per cent. New prices have been issued for Armstrong tool holders. Turning and boring tools are now quoted at list plus 20 per

cent., and cutting-off and side tools at list, plus 40 per cent. Lathe chucks have been gradually increasing in cost for some time and are now 20 to 25 per cent. higher than the original price. Drill chucks have not changed much but are higher for certain lines, being those in demand. The demand for supplies from plants making shells is not so active, but there is very fair business being done with shops turning out shell parts.

Metals—The market is stronger, with a fair local demand, which is gradually improving. The copper market is very strong and quotations have again advanced, but are nominal. The British Government is restricting purchases in America and is apparently determined, if possible, to stop further advances, and absolutely to stop speculation. How this will affect the market is difficult to say as the copper position is an extremely strong one, and the supply is unequal to the demand. Quotations on tin are higher locally, but have declined in the primary market. The situation is more or less abnormal and prices of tin are nominal. The spelter market is quiet, with little interest being shown by consumers. Quotations are higher in the local market. The "Trust" have advanced lead and the market is strong and higher. Antimony and aluminum are unchanged, but prices of solders are higher.

Copper Higher—The copper market is very strong and higher. It is reported that the British Government is restricting purchases of copper and is determined, if possible, to stop further advances. This step has also been taken with the hope that speculation will be stopped. The situation is unprecedented and it is quite possible that prices may go higher, as the supply is unequal to the demand and production is getting behind the consumption. Local prices are 1c higher and Lake copper is now quoted at 26c per pound.

Tin—The primary market is slightly lower, but steadier. Locally, tin has advanced 2c per pound. The tin situation is more or less abnormal and buyers are keeping out of the market awaiting developments. Local prices are unchanged and nominal at 48c per pound.

Spelter—The local market is stronger and higher. London is unchanged and New York firmer on early deliveries. Spelter has advanced ½c, and is now quoted at 20½c per pound.

Lead—The market continues strong and higher in the primary market. The "Trust" have advanced the price to 5.90c New York. The lead position is a strong one and the demand is heavy. Lead has advanced ½c and is now quoted at 7½c per pound.

Animony—The market is quiet with an easier tendency. Spot antimony is scarce and there is little enquiry for futures. Quotations are unchanged at 40c per pound.

Aluminum—The situation is unchanged and the market featureless. Quotations are firm and unchanged at 68c per pound.

Solder—Higher prices are now being quoted for solders, due to the strength in the tin market. The advance is about ½c and prices are given in the current market quotations.

Galvanized Sheets—The market is very strong and prices firm at last week's advance. The situation shows no improvement and raw materials are steadily increasing in cost, which may lead to higher prices for galvanized sheets in the near future. Some makers of sheets are keeping out of the market on account of the uncertain conditions prevailing.

Corrugated Sheets—Prices of corrugated galvanized sheets have been readjusted and are slightly lower for some sizes and unchanged for 26 and 28 gauges. The new prices are as follows: 18-gauge, $12.50; 20-gauge, $9.75; 22-gauge, $8.50; 24-gauge, $7.15 per square.

Eavestrough—Prices for eavestrough, O. G. square bead and half-round, are as follows: 8-in. girth, $3.80; 10-in., $4.24; 12-in., $5.01; 15-in., $6.88 and 18-in., $8.80 per 100 feet. Extra of 12c for round bead.

Conductor Pipe Advances — Higher prices for conductor pipe have recently gone into effect, the advance being equal to about 10 per cent. The new prices for sizes all in 10-ft. lengths are as follows: 2-in., $4.40; 3-in., $5.34; 4-in., $7.04; 5-in., $9.63, and 6-in., $11.72 per 100 feet.

Lead Sheets Advance—A slight advance in lead sheets has been made, the new prices are as follows: 3-lb. sheets, $9.75; 3½-lb., $9.50 and 4 to 6 lbs., $9.50.

Poultry Netting, New Discount—Some time ago all prices on poultry netting were withdrawn, owing to the difficulties which the makers had to contend with in getting raw materials, and the steady increase in cost, particularly of wire and spelter. There is no English and very little American netting coming into this market, with the result that practically the entire requirements have to be taken care of by domestic manufacturers. The makers of netting are unable to meet the demand, as the greatest difficulty is being experienced in getting the raw materials. The new discount on galvanized poultry netting, 1 in. and 2 in. mesh, is 30 per cent., but this is to a great extent nominal and is liable to change any time. Prices on other meshes are still withdrawn.

Hinges, Tee and Strap, Higher — An advance has been made in both heavy and light tee and strap hinges. The new discount for heavy tee and strap hinges is 33 1-3 per cent. and for the light pattern 65 per cent. off maker's per dozen list.

Chest Hinges and Hinged Hasps Up — Prices of chest hinges and hinged hasps have advanced 10 per cent., the new discount being 55 per cent.

Files Advance—The increase in cost of steel has caused an advance in files. The new discount on Kearney and Foot's "Arcade" files is 72½ per cent., and also on the "Globe" files.

Wrought Butts Advance — Price of wrought butts have advanced about 10 per cent., the new discounts are as follows: Nos. 804 and 840, 65 per cent.; Nos. 800 and 838, 60 per cent.; No. 802, 55 per cent.; No. 808, 55 and 5 per cent., and Nos. 810 and 814, 45 and 5 per cent.

Cut Nails Advance—The price of cut nails has been advanced 10c, and they are now quoted at $3 per keg base. Wire nails are unchanged, but very firm at $3.05 base, per keg. Higher prices for wire nails are looked for.

Lead Pipe Again Advances — The steady advance in the pig lead market has resulted in an advance of ½c in lead pipe. The new prices are 10½c for lead pipe and 11½c per pound for waste pipe.

Wrought Iron Pipe—The market for wrought iron pipe is very strong and as raw materials are steadily advancing, higher prices for pipe may be announced any time. The prevailing list is given in the current market quotations.

Shot, New Price—A new and higher price has been issued for standard shot, which is now quoted at $11.15 per 100 pounds.

Copper Wire Up—Copper wire has advanced, following the continued strength in the copper market. The new discount is 25 per cent.

Belting—There is a good demand for leather belting, and the heavy consumption of leather is holding the market very firm. Cut laces have advanced slightly to $1.30, but other prices are unchanged.

Stoves Advance—An advance of 5 per cent. has been made in all lines of stoves, heaters and ranges. Cost of production has increased considerably, as sheets and pig iron are both much higher than they were a few months ago. Business is quiet as is usual at this time of the year.

Kitchen Utensils—Prices of all wares are very firm and advances in some lines are highly probable, particularly copper and galvanized and pieced wares. All raw materials have been getting more costly for some time and with no sign of any reaction in sight, manufacturers of wares will be obliged to raise their prices accordingly.

Wrapping Cotton Up—A new price on 4-ply wrapping cotton has been announced, which represents an advance of ½c. The prevailing prices are as follows: 3-ply, 21½c; 4-ply, 24c; 5-ply and higher, 24½c per 5-lb. lots. Cotton has been steadily rising for some time and a number of cotton products are therefore affected.

Waste—Another advance in cotton waste is looked for in the very near future. The cost of raw materials has risen considerably and makers are experiencing some difficulty in obtaining supplies. There is also quite a good demand for waste for munition plants.

Rope—The market is very strong and prices of many lines of rope may possibly be advanced in the near future. All raw materials, sisal, hemp, Manila and jute have been increasing in cost for some months and the finished products will also have to advance. One of the principal reasons for the high price of raw materials is the heavy increase in

ocean freight rates in all parts of the world and also the difficulty of obtaining tonnage.

LONDON

LONDON, Ont., Jan. 13, 1916.—During the past week many prices have changed, mostly in an upward direction. The constant drain on raw materials for munitions is responsible in most cases for the new prices and for the predicted further advances, which are promised, in some cases, to take effect in a few days. On account of the steady advance most of the retailers are buying now for future needs. Hardware stocks as a rule are light, and as usual in January a large percentage of the dealers are busy stock-taking.

Business is seasonably brisk. January is looked upon as a quiet month, but this year it is quite as good as could be expected.

Collections have been good.

The principal changes in prices are:

Linseed Oil.—During past few days linseed oil has advanced twice, the present price being:

	Raw.	Boiled.
1 to 2 barrels...	$1.00	$1.03 per gal.
3 to 5 barrels...	0.99	1.02 per gal.
6 to 9 barrels...	0.97	1.00 per gal.

Turpentine.—Turpentine advanced 2c per gallon, the new price being:

	Per Imp. gal.
1-barrel lots	87c
2 to 4-barrel lots	86c
5-gallon lots	94c

The predicted advance in white lead has taken effect, the price having gone up 50c per 100 pounds. The new figure is: $10.70 per 100 pounds, in ton lots, and $11 per 100 pounds, in less than ton lots.

Putty advanced 15c per 100 lbs. The new price is:

	Per 100 lbs.
Standard, in 100-lb. drums	$2.85
„ „ 25-lb. drums	2.95
„ „ bladders	3.25
Pure in 100-lb. drums	3.55
„ „ 25-lb. drums	3.65

Cut Nails Advance.—There has been no change in the price of wire nails, the base remaining at $3.05. Cut nails advanced 20c per keg, the price now being $3.15 base.

Many Other Changes.—The new price on bar iron is $2.55 base. Bar steel is $2.80 base.

The new price on iron rivets is 60 per cent. off list.

Malleable fittings are now quoted at 35 per cent. off list.

Globe files are now subject to 72½ per cent. off list.

Poultry netting is quoted now at 30 per cent. off list.

The discounts on stove bolts are now 75-10 per cent. off list.

Steel thumb latches are up 15c per dozen. The new price for No. 2 is 90c dozen, and for No. 3 $1.25 per dozen.

Common rim locks are now $1.45 per dozen, and common knobs (Jap. trim) are $1.20 per dozen.

A new discount on Stanley hardware has been issued. Planes, levels, braces, etc., have advanced approximately 10 per cent.

Steel and brass butts are now subject to the following discounts:

No. 804	65 per cent.
No. 840	65 per cent.
No. 800	60 per cent.
No. 838	60 per cent.

Table hinges are subject to discounts of 45-5 per cent.

Back flaps have discounts of 45-5 per cent.

Blind hinges have same discount.

Hinge hasps have discount of 55 per cent.

Light tee hinges have 65 per cent. discount.

Light strap hinges also have 65 per cent. discount.

The new prices on heavy tee and strap hinges are subject to 33 1-3 per cent. discount. The new prices are:

	Tee.	Strap.
4"	$1.07 per doz. prs.	$1.27 per doz. prs.
5"—	$1.23 per doz. prs.	$1.53 per doz. prs.
6"—	$1.27 per doz. prs.	$1.67 per doz. prs.
8"—	$1.70 per doz. prs.	$2.27 per doz. prs.
10"—	$2.80 per doz. prs.	$4.00 per doz. prs.
12"—	$4.00 per doz. prs.	$4.97 per doz. prs.
14"—	$4.93 per doz. prs.	$5.67 per doz. prs.

12-inch and smaller screw and strap hinges are now $5.50 per 100 pounds; 14-inch and larger are $4.90 per 100 pounds.

Cotton Rope Higher.—Cotton rope has advanced 1c per pound, 3-16-inch now being 25c pound, and ¼-inch and larger is now 24c per pound.

There has been no advance in the price of other ropes, the prices remaining as follows:—Pure Manila, 16c lb. base; British Manila, 13½c lb. base; African hemp, 13½c lb. base; sisal, 11½c lb. base; deep sea line, 27c per lb.; tarred marlin, 27c per lb.; lath yarn, 11½c per lb.

The price of fence wire and staples remains the same as last week.

Glass is firm. Single diamond is subject to 30 per cent. discount. Double diamond is also subject to 30 per cent., while cut lights are net list prices.

Advances are expected in the price of roofing and plain building paper.

Stoves Advance.—An advance of 5 per cent. has gone into effect on stoves and ranges.

WINNIPEG

WINNIPEG, Jan. 13, 1916.—Many important price changes have taken place during the week, nearly all in an upward direction. Wire, nails, sheets, building paper, linseed oil, and other lines are affected.

Business during the first of the month has been fairly good, and jobbers are looking forward to a big rush of business in another week or ten days. Practically all of the travelling staffs of the various jobbers are now on their territory, and the result of their work should be felt in an increased amount of business in a very short period of time. There is no question of doubt that it is to any merchant's advantage to place his orders as early as possible to protect himself against further advanced prices, and assure himself at the same time of procuring his goods.

Many Price Changes.—Black sheets have advanced 40c per 100 lbs.; galvanized sheets have advanced 50c per 100 lbs.; barb wire has advanced 10c per 100 lbs.; wire nails have advanced 20c per 100 lbs.; staples have advanced 10c per 100 lbs.; plain galvanized wire has advanced 10c per 100 lbs. An advance of 10 per cent. is expected in the near future on window glass.

Building Paper Higher.—One of the most important changes going into effect this week are those applying to building paper. There has been a revision in practically the entire line, and note is made herewith of just to what extent the prices have been altered.

Building Paper—Tarred, 66c to 90c per roll; plain, 44c to 76c.

Revised Prices on Trough, etc.—There has also been a revised price made on galvanized eavetrough, conductor pipe, and conductor pipe elbows. Along with all other lines of galvanized products, these three items may show further increases in the very near future. Ruling prices to-day are as follows:

O. G. Eave Trough—	Per 100 ft.
8 in.	$3 35
10 in.	4 10
12 in.	4 95
Conductor Pipe—	
2 in.	4 00
3 in.	4 60
4 in.	5 70
Conductor Pipe Elbows	Per doz.
2 in.	0 90
3 in.	1 00
4 in.	1 80

Linseed Oil Higher.—Another line to show an advance is linseed oil, and the price to-day, as given below, is 5c higher than formerly:

Linseed oil, raw	$1.03	per gal.
„ boiled	1.06	„ „
In 5-gal. tins, advance price	.05	„ „

Advance Expected.—It is more than likely that when the new goods being shipped to the jobber at present arrive there will be long lists of price changes go through affecting a very big percentage of hardware lines. It is to be hoped that the retailers will take advantage of the new prices at once, so that they can protect themselves at a later date should prices suddenly decline.

Sporting Goods.—Orders are beginning to come in already for sporting goods supplies for next season, and from present appearances it seems that there will be a big demand for baseball goods, tennis goods, fishing tackle, and many other lines for summer sports. Canadian and imported goods have not advanced up to the present; in fact, baseball goods have been sold at last year's prices. It might be advisable for retailers to place orders early for both baseball and tennis goods for fear an advance should take place at the factory.

The game of tennis is gaining popularity every year in this country, and this year will no doubt see a bigger demand than ever before for tennis goods. It is noticeable that there is a demand for better quality goods, and for supplies which hitherto have not had much

WEEKLY PAINT DEPARTMENT

Future of Linseed Oil Market

Opinions Vary as to Future of Linseed Oil—Some Firms of Opinion That High Prices Will Rule for Some Time—Others Claim Lower Prices Will Rule in Two or Three Months

THE retail trade has been greatly interested in the recent rapid advances in the price of linseed oil. Some large jobbing firms have been predicting that oil is going to reach an exceptionally high price, considerably over the dollar mark, in the near future.

On the other hand there are some jobbers who claim that oil will decline considerably in the near future.

At the present time oil is quoted generally at prices ranging from 95c to $1 per gallon, and prospects at the present time are that oil will go still higher before the decline commences.

Some crushers and jobbers claim that oil at the present high price is lower than the conditions of the seed market warrant, and that further increases may be looked for in the immediate future if the present high price of seed is maintained.

There is of course, at the present time considerable price cutting going on. Many firms secured supplies prior to the recent rapid advances and are taking smaller profits on business with old customers. Some quotations are heard below the crushers present figures.

Why Price Advanced

The recent advances reported from week to week in Hardware and Metal's weekly market reports, were caused, not by demand, but by disappointing statistics as to supplies of Canadian flax available together with the intimation that the British government may withdraw vessels operating in the trade between North and South America—thus interfering with transportation of Argentine flax.

Don't Overbuy

One well known crusher is of the opinion that high prices will rule for the next month or two, and that oil prices will go even higher than the prices now in effect. This crusher, however, states that the trade should remember that there is a possibility of oil going down in price in a couple of months time, and it would not be good policy to over-buy at the present high figures.

This crusher states that his company is well supplied with seed and is in a position to sell oil at a lower price later on, if the market goes down.

A U. S. Opinion.

An American contemporary in dealing with flaxseed and general markets in a recent issue says:—

"To the casual observer the market presents a very strong appearance, but some who are students of the situation claim there is twice as much flaxseed available as there was a year ago at this time. This covers both domestic and Canadian stocks in warehouse. On the other hand, it is perfectly apparent that as fast as flaxseed is offered at the northwestern terminals, it is bought up at the ruling market prices. We also know that the crop this year is one of the smallest on record. Other authorities are of the opinion that flaxseed is becoming more scarce and that the high prices which ruled last year will be seen before long unless there should be a marked decrease in the demand for linseed oil, and at the present time there is no indication of this. Some crushers are of the opinion that linseed oil buyers have purchased only about one-third of their requirements, and if this is the case, there must be quite a demand for linseed oil in the near future.

"As an evidence of the way the situation was regarded in Duluth a week ago, we print below the views published there on December 27. Facts and figures show that the Buenos Aires market has been declining during the past week and seed from the Argentine is offered at about 23c a bushel less, laid down in New York, than domestic seed. This would give rise to the belief that any quantity of Argentine seed could come into this country on a much lower basis than our domestic market is now ruling. Our own opinion of this matter is that a cable which is received from London, would indicate that the steamers which have been sent to Argentine to load flaxseed have been taken for other cargoes and, therefore, this will have a material effect on the quantity of flaxseed which it is expected will move, possibly during the month of January.

"The Calcutta market in London has been advancing, while the Argentine market has been declining. This is due to the fact that there is a great scarcity of steamers to carry cargoes from India, and furthermore, it is almost impossible to get through the Mediterranean now. Insurance rates have advanced abnormally and freight rates have been going up by leaps and bounds. It is a foregone conclusion that Great Britain will see that war supplies and foodstuffs are carried in preference to flaxseed or other merchandise.

"In reference to our own market, last week showed a continual advance, while on Monday of this week the market reacted slightly. On Tuesday May showed an advance of 2¾c over Monday's quotations, closing at $2.24½. The ships which are plying between New York and foreign ports are of the very smallest class, and under ordinary conditions could not be operated for anything but nearby cargoes. On the other hand freights have advanced to such a degree that these small steamers can profitably cross the ocean. This will indicate the great scarcity of freight room. Sailing vessels are commanding unheard-of prices. All of this would indicate that the movement of the Argentine crop, regardless of its size, is going to be most difficult.

"It is also a fact, Friday, that there is a great scarcity of linseed oil in England. Prices have advanced materially, and crushers in that country will be keen competitors of the United States' buyers for any foreign seed. It can also be said that Argentine seed is being offered to the United States' buyers in liberal quantities c. i. f. at much below our present market. As this presents a perplexing situation, we must leave our readers to determine for themselves what they believe will be the outcome."

Paint Men Defeat Hardwaremen

Toronto, Ont.—One of the most strenuous games of hockey this season took place in Sunnyside rink on Tuesday night, when the "Samson" seven of H. S. Howland, Sons & Co. went down to defeat before the star team of Sanderson, Pearcy & Co., by a score of 7 to 4. The strength which has recently developed in the paint markets is said to have helped the winners.

The Brooms you'll never hesitate to boost to the best class of trade because they never fail to give the best kind of service.

It's to your interest to recommend the **best** every time, for there is nothing more annoying to the housewife or more injurious to your broom department than poor broom service.

Boeckh's Brooms

Made in Canada

are strong and securely sewn, so that there is no danger of the inconvenience of loose strands of corn being strewn about the room. They are made of selected corn with soft velvety tip. They remove dust and dirt without undue wear upon broom or carpet.

And besides giving long, satisfactory wear to the user, they pay a good margin of profit. Our travellers are now showing samples of our newest designs in

Ideal Carpet Brooms "A," 5 Strings. Ideal Carpet Brooms "B," 4 Strings. Jewel Carpet Brooms, 4 Strings.

There's no better time than now to get full details and prices.

SOME PRINCIPLES OF SALESMANSHIP

(Continued from page 37.)

weak points, and use this knowledge to its best advantage, will, nine times out of ten, get in such close touch with him, that he will succeed in closing his sale.

Some buyers need coaxing to a certain extent. Some will want to argue and trip you up, and by taking you unawares, endeavor to get the best of the bargain. Some buyers are looking only for price instead of quality and service.

It is very seldom that any buyer is looking for you with outstretched arms to welcome you. After all, the orders which are hardest to get are the ones most appreciated. The salesman is in a true sense an educator.

Many new lines are being introduced to the public every day and if the article has the proper merit, the price asked for it is right, if it is backed up by the house and the salesman—you are justified in asking the time and attention of your prospect. Always make your customer feel that your business is going to prove profitable and beneficial to him. Some salesmen have been known to have talked themselves out of an order after they have once had it. So be careful and know just when to end your argument.

More salesmen fall down in closing their sales than at any other time. If you failed to make your sale be good-natured about it, or at least do not show your disappointment, but keep up your courage, for at some future time success will come from your efforts.

We read a great deal nowadays about "Clean Up" day and spring medicines to tone up the system, etc. This is the season for house cleaning, to get rid of the germs of laziness and lack of interest in our work and take our medicine regularly and faithfully. If you have a wife or a sweetheart, take her in your confidence and get her interested in your personal work. She will help you and inspire you. Be like Willard. Go into the fight to win. He said all during the big fight his thoughts were of his wife and children. Read up in books and magazines all you can about things pertaining to your business. Remember: Science is Knowing and Art is Doing.

If you want to reach the top round in the ladder of successful salesmanship, make up your mind to start to-day to take advantage of every opportunity which knocks at your door. Don't be afraid to work. Work with your brain as well as your hand and foot. Learn to think and use all the faculties with which God has blessed you.

The responsibility rests with every man as an individual and it is up to YOU to make your life a success or a failure.

WINNIPEG MARKETS

(Continued from page 45.)

of a sale in this country, such as copper, galvanized wire top nets. The demand for brackets and balls is expected to be exceptionally good this year.

From the way orders are coming in now, it would appear that Western dealers are going to buy larger supplies than ever this year. As is well known, the profit on sporting goods is big, and is easily made when industrial conditions are favorable to sport.

EDMONTON

EDMONTON, Jan. 13.—With the close of the year's business stocktaking is now under way, and it is anticipated that stocks will be found to be very low. Quietness prevails after the brisk holiday trade, which gives an opportunity to straighten up and re-arrange the goods and bring forward odd lines for sale. Salesmen are starting out on their former routes again, and are looking forward to booking even more than the usual amount of spring orders. Prices in most lines are higher than a year ago. Boiled oil is quoted at $1.09; raw, $1.06; turpentine, 94c; putty in drums, $4.20; putty in bladders, $4.00.

WEEKLY PAINT MARKETS

(Continued from page 51.)

facturers of white lead to raise their prices. The market is firm at the new schedule.

Gasoline.—The market is very firm, and prices will no doubt be higher in the near future. There is a considerable demand locally for gasoline even during the winter, but the heavy consumption, on account of the war, is greater and has created a scarcity, while production is practically stationary. Crude oil is advancing steadily, and visible supplies are getting scarce.

Mixed Paints.—The steady advance in lead, zinc oxide and linseed oil will most probably result in higher prices for ready-mixed paints. There is a feeling in the trade that higher prices are inevitable.

Pumice.—There is now a scarcity of pumice, as supplies are hard to get from Italy owing to the war. Prices are rising, and pumice is now quoted at 4¾c in barrels and 6c per lb. in small lots.

Glue.—The market has been firm for some time, especially for imported glues, which are greatly affected by the high ocean freight charges and higher cost of production in England. Imported glues have advanced about 2c per pound.

Putty.—The proposed advance in putty, referred to in last week's issue of Hardware and Metal, is now in effect. Standard putty is now 15c higher, with 70c per 100 lbs. extra for pure putty. The following are the new prices for standard putty in less than ton lots.

	Per 100 lbs.
Bulk, in casks	$2.65
Bulk, in 100-lb. drums	2.85
Bulk, in 25-lb. drums	2.95
Bladders, in barrels	3.25

Pure putty, 70c per 100 lbs. advance.

Oil Goes Still Higher

Just as Hardware and Metal is going on the press word has arrived that a number of firms have further advanced their prices in linseed oil and the prices in effect are now as follows:

	Raw	boiled
1 to 2 barrels	$1.09	$1.12 per gal.
3 to 5 barrels	1.08	1.11 per gal.
6 to 9 barrels	1.06	1.09 per gal.

SHEET METAL WORKERS' COURSE

(Continued from page 35.)

points thus obtained will give the outline of opening required to receive branch.

The problem in Fig. 2 is worked out in the same manner as described for Fig. 1.

Care should be taken to allow material for lapping at the joint, as shown by dotted lines at B-L-G, which will require to be turned down to fit the pipe.

Allowance must also be made for locking or seaming the joints at N-N and O-O on both patterns.

"THE HAND-TO-MOUTH DISEASE"

In the agricultural and daily papers a good deal has been said from time to time about hoof-and-mouth disease. The retail paint trade has a sort of distemper that is even worse. It attacks buyers frequently without warning, and is described by a contemporary as "the hand-to-mouth disease."

"How are things looking? Is business picking up?" "Yes, I believe things are looking very much brighter." "Glad to hear you say so, I have some things here that will sell." "No, no; I don't need them just now; come round again next week." "I can't; I have to work my whole ground. Order them now; you know you'll want them, and they can't get here before you are out."

There is too much of this business procrastination. It is sometimes right to buy in small quantities, but it is wiser to buy the goods just a little ahead of when you need them. It is quite time to check the hand-to-mouth business, and bring the manufacturer, wholesaler, retailer and consumer to apply the well-known remedy—confidence.

Among the Travellers

F. W. F. Davis, of Sanderson Pearcy & Co., Toronto, was elected as a director of the Toronto Commercial Travellers' Association.

W. J. Cowan, who for some years has been connected with the sales staff of Rice Lewis & Son, Ltd., Toronto, has joined the travelling staff of A. Ramsay & Son Co., Montreal, and will represent the latter company in Toronto territory.

THE large and constantly growing demand for Berry Brothers' varnishes is based on such a firm foundation that it cannot be shaken.

Since our label first appeared in 1858 the call for Berry Brothers' varnishes and enamels has steadily increased. Their uniform excellence has always been maintained and the label of Berry Brothers is accepted without question by varnish buyers as a guarantee of quality and a sure protection against inferior varnishes.

You can insure satisfactory and profitable varnish sales, and increase the volume of your varnish business by making a leader of Berry Brothers' lines.

Here are four of the most saleable wood-finishing specialties:

Luxeberry White Enamel

Makes a permanent snow-white finish in either dull or gloss effects.

Liquid Granite (*for floors*)

Also for all interior work exposed to hard wear such as bathrooms, window sills and casings, etc. Waterproof lasting, mar proof.

Luxeberry Wood Finish (*for general interior work*)

Develops and preserves the grain of all woods, and makes a permanently beautiful finish.

Luxeberry Spar (*for exterior use*)

Made especially for durability under outside exposure. Front doors, store fronts, marine finishing, etc.

Write for our price list and interesting dealer's proposition.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Jan. 13.—The tension in the paint situation as regards prices on ready-mixed lines increases. Since last report there has been a big advance in white lead, with prospects of higher prices almost immediately, and at the same time linseed oil has gone up to levels where some firms have considered it advisable to withdraw quotations altogether. When it is considered that the price basis last fall was regarded as being lower than warranted, and that since there has been nothing but an upward procession of practically all the important ingredients, there can be no doubt but that higher quotations are not only warranted, but are forced upon the manufacturers—further, they will probably be substantial. The only influences which are deferring the ascension are the already abnormally high position of the market, and the fact that manufacturers are at all times reluctant to raise their prices in the midst of a selling campaign. The hope of a reaction, which was previously a factor in keeping prices down, has been dissipated by the recent advances which have further deferred a return to anything like normal conditions.

Although, owing to the fact that in many districts in Quebec Province the holiday season is continued throughout the first week of the year, it is as yet somewhat early to judge of the trade conditions, reports are generally satisfactory, and indicate that retailers appreciate the present position of the market and the prospective higher prices, and are taking advantage of the situation to protect themselves on their stocks.

Oil Market Upset.—The linseed oil market, which for months has been in a very unsettled condition, has recently been entirely upset by the upheaval in the flax market. On the head of an upward movement, which has been of a rapid character in the past few weeks, about 12 cents a bushel has recently been added. Under the circumstances, quotations are little better than nominal, and some firms have withdrawn their prices altogether for the time being. One sales manager expressed himself: "We are not quoting because we don't want to sell; we don't want to sell because we can't buy—and we wouldn't buy if we could." In other words, it is evident that grinders consider that flax at present prices is out of reach, and if it continues at this level, new high records in the oil market will be established. Quotations heard indicate that business is being done by most houses with regular trade at from 96c to $1, and 99c and $1.03 for raw and boiled, respectively, in single barrel lots.

White Lead.—Following immediately on last report, there was an advance of 50 cents on white lead in oil, and this has been an important factor in adding to the tension in the mixed paint situation. Further than this, the pig market has been showing still higher quotations, and there has been an additional increase of 25c on dry white lead. Considering the position of pig lead and the rising costs of linseed oil, a further advance on white lead in oil is a logical prospect; opinion in the trade is that another 25c will be added almost immediately, unless there is some reaction. Quotations now are:

Five ton lots	$10 25
Single ton lots	10 55
Less than ton lots	10 85

Turpentine.—There is little or no change in the situation as regards turpentine, and the firm tone continues. Business generally is being done on a basis of 82c for single barrels, with the usual allowances for larger quantities.

Gasoline and Benzine.—The movement of gasoline and benzine is light, but this is usually the case at this season of the year. Quotations maintain the recent advances and are generally firm. Prices are as follows:

Gasoline, in barrels	27c
Gasoline, in drums	25½c
Gasoline, tank wagon	25c

Benzine 1c lower.

Putty.—The advances in putty, which have been regarded as a logical development for months, have finally gone into effect, being 15c on commercial and 25c on pure. In the first place, the higher prices are due to the increased cost of whiting as the result of higher ocean freight rates; this situation has existed for some time, but the change has been deferred until stocks in the country were largely exhausted. Then, in the case of pure products, there has been a further increase owing to the very high position of linseed oil. New quotations follow:

Bulk, in casks	$2 55
Bulk, 100-lb. drums	2 75
Bulk, 25-lb. drums	2 85
Bladders, in barrels	3 15

Pure putty, 70c advance.

TORONTO

TORONTO, Ont., Jan. 13.—The paint market is seasonably quiet, but prospects for good spring business are bright. Travellers are getting down to work, and some nice business has already been booked. The features of interest during the week have been the advance in white lead and further higher prices for linseed oil. The flax seed market is running wild, and higher prices are being recorded almost daily. A day of reckoning will come, however. Turpentine has also advanced during the week, and the market is stronger. Higher prices for putty have been expected for some time, so the new schedule in effect now was not a surprise. Higher prices for gasoline are expected, as there is no improvement in the crude oil situation. Mixed paints are also expected to advance, as the cost of all ingredients has risen considerably since the present schedule went into effect. Glue is another product which has advanced, particularly imported glues, which are, of course, affected by the prevailing high ocean freight rates. Prices of glass are very firm, and a change in discount may have to be made on account of the steady advance of prices in the States.

Linseed Oil Again Advances. — The market appears to be out of control and prices continue to advance. The demand is very light, but conditions in the flax seed market are affecting prices of oil. Seed is now quoted at $2.10 at Winnipeg, but there is none coming down East to the crushers, who will soon feel the effects of the shortage of supplies. While ever present conditions prevail in the flax seed market, there is little prospect of any pronounced reaction in the price of oil. At the same time the situation is such that it is very difficult to say what will happen except that it is probable that prices of oil will go still higher, but how much higher remains to be seen. The range of prices has closed up considerably, and the following quotations are generally heard in Toronto, being 2c higher than last week:

	Raw.	Boiled.
1 to 2 barrels...	$1.00	$1.03 per gal.
3 to 5 barrels...	0.99	1.02 per gal.
6 to 9 barrels...	0.97	1.00 per gal.

Turpentine Up.—The market is firmer this week, and prices have advanced 2c. Stocks of turpentine in Savannah are getting low, which will have a tendency to stiffen prices. The demand locally is light, and quotations are firm as follows: 1-barrel, 87c; 2 to 4-barrel lots, 86c; and 5-gallon lots, 95c per Imperial gallon.

White Lead Advances.—As Hardware and Metal was going to press last week word was received that lead in oil was to be advanced. At a later date it was announced that the price was increased 50c, making pure white lead $10.70 per 100 lbs. in ton lots. The steady advance in pig lead made it necessary for manu-

(Continued on page 48.)

B. FIVE FEATURES B.
That Attest Its Excellence

Covering Capacity

BRANDRAM'S B. B. GENUINE WHITE LEAD will cover the maximum amount of surface, 100 lbs. thinned with 5 gallons of Pure Linseed Oil, covering 4,500 square feet, one coat over primed wood, giving a thoroughly covered surface.

Ease of Working

BRANDRAM'S B. B. GENUINE WHITE LEAD works out under the brush easily and freely, saving time and giving the best results.

Protective Power

BRANDRAM'S B. B. GENUINE WHITE LEAD when properly applied will not peel, check or crack. It wears away gradually and after its long life, leaves the building in a good condition to receive a fresh coat of paint.

Properly Proportioned

BRANDRAM'S B. B. GENUINE WHITE LEAD is regulated to contain exactly the proper amount of carbonate of lead to hydrate of lead, giving an even texture paint with large covering properties.

Whiteness

BRANDRAM'S B. B. GENUINE WHITE LEAD is the whitest heavy-bodied white lead known, and gives the most beautiful finish of any white lead yet produced.

These five features commend B. B. to both the dealer and the consumer and account for its rapidly increasing sale in Canada.

This trade-mark stands for more than QUALITY in Paints and Varnishes

IT is a sign for S-W agents that means service, prompt and careful attention, and close co-operation in selling Sherwin - Williams paints and varnishes.

It means good-will for your store and will help to make your sales larger each year. Let it work for you, not against you.

RAMSAY'S

"MAKING GOOD"

The only way for paint to "make good" under the test of Canadian climate is to make the paint so good that it is worthy to bear the name RAMSAY.

Since 1842 we have manufactured the best paint we knew how to make—and since the first can was used "Ramsay's Paints" have been making good"—for us, for the dealer and for the man who finally uses them on the job.

Write us for prices on whatever you need. Ours is "The Complete Line."

"The Right Paint to Paint Right."

A. Ramsay, Son & Co., Montreal

48 Colborne Street, Toronto, Ont.

167 Pender Street Vancouver, B.C.

Made in Canada

The only profitable brush to handle

It is the kind that brings buyers back FOR MORE

M & S 1852

Meakins Quality

MAKES STEADY CUSTOMERS OF THE BEST OF PAINTERS

MEAKINS BRUSHES HAVE A FLEXIBILITY THAT ASSURES EASY MANIPULATION AND THERE ARE NO FALLING BRISTLES TO AGITATE THE USER.

Send for our catalog and then order from your jobber.

If he cannot supply you, we will do so quickly.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

Big Profit and Satisfaction in Selling

"AYLMER" Force Pumps

They are certain to sell easily because it has several advantages over the ordinary style.
Has longer stroke, more power, and works easier.
While designed for hand use it can be readily converted into a Windmill Pump by the addition of a flat bar, which screws into the cross head at top.
It will be to your interest to write for full particulars now.

TARRED FELT

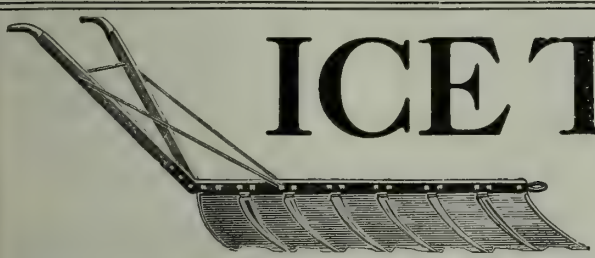
SPECIFY DOMINION BRAND

J. H. McCOMB, LIMITED Manufacturers of all kinds of Building Paper, Pitch and Coal Tar **MONTREAL**

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.



ICE TOOLS

Every Farmer, Butcher and Dairyman cuts ice. We have a tool for every use. Write for particulars and prices.

We also have a full line of Snow Plows, etc., for municipal work

ROBERT DONALDSON & SONS, Montreal

Advertising

"Advertising is the education of the public as to who you are, where you are, and what you have to offer in the way of skill, talent or commodity. The only man who should not advertise is the man who has nothing to offer the world in the way of commodity or service."—*Elbert Hubbard.*

When writing to advertisers kindly mention this paper

Atlas
10 Cent Fly Swatter

This swatter has an extra long handle — 10 inches. It is very neatly and securely bound with soft green felt — cannot mar the finest furniture. Especially adapted for parlor or drawing room use. We have made it extra strong and flexible — will outlast any now on the market.

Our 5 cent swatter is the best ever sold for a nickel. Also it has a triangular fold, permitting the insertion of your ad. if you desire.

Now is the time to place stock orders. We'll gladly quote prices and terms.

Atlas Mfg. Co.
New Haven, Conn.

Possibly you do not realize the opportunities for profitable business in the sale of the

SWEEPER-VAC.

Many Hardware Dealers

are making good sales and find that the profit is well worth while—one sale makes more, and every sale means a good profit and a satisfied customer.

Condensed or "Want" Advertisements

Those who wish to sell or buy business or stocks obtain competent help connect with satisfactory positions, or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer. RATES (payable in advance): 2c. per word first insertion, 1c. per word subsequent insertion, 5c. additional each insertion, when Box Number is required. Each figure counts as one word.

WANTED

PARTNER WANTED FOR COMMISSION business in Toronto. Prefer one who understands sheet metal and heating business. Box 243, Hardware and Metal. (3)

PAINT TRAVELLER BY WESTERN JOBbing house. Knowledge of hardware preferred. Must be hustling man who can show results. Box 244, Hardware and Metal, Winnipeg. (3)

FOR SALE

FOR SALE—RETAIL HARDWARE STORE in Montreal; well situated; exceptional opportunity. Present owner has other business. Would sell half interest only, if desired, to party capable of taking charge. Apply Box C. B. L., Hardware & Metal, Montreal. (5)

MISCELLANEOUS

THIS IS TO NOTIFY THE TRADE THAT Mr. H. P. Morgan is no longer connected with this company, and that Mr. C. H. McGibbon is now in charge of our store. We would request all firms having booked orders given through Mr. Morgan to take the matter up with us, as we cannot recognize any orders given by Mr. Morgan. (Signed) Morgan Hardware Co., Ltd., per H. E. McGill, Secretary-Treasurer. (3)

FIRE INSURANCE. INSURE IN THE HARTford. Agencies everywhere in Canada.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

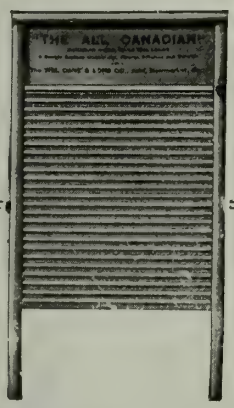
GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensom hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fensom Elevator Co., Toronto.

HARDWARE STORE BUSINESS METHODS—The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10, postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS IS the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.



COSTS LESS

than aluminum and zinc wash boards, is just as good and is more serviceable.

The All-Canadian
All-Wooden
Wash Boards

are the result of great scarcity and high price of zinc and aluminum—a price that has greatly handicapped washboard sales.

All-Canadian grown wood, Canadian-made nails, and by Canadian workmen—that's why it's all-Canadian.

The finest grained hardwood is used for rubbing surface.

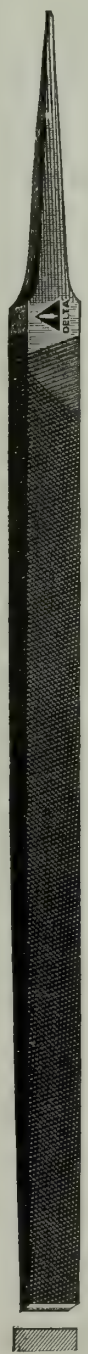
Retails at 20c and leaves a BETTER profit.

Standard zinc, glass and enamel wash boards always on hand for prompt delivery, until notice to the contrary.

The Wm. Cane & Sons Co., Limited

Makers of the New Wooden Wash Board
NEWMARKET, ONT.

The Service of this file commands a business worth while



Delta Files fairly eat the metal and they outlive other makes.

They are the only line of files from 3 to 24 inches made absolutely of crucible steel and their manufacture is guaranteed by half a century's file-making experience.

They are universal satisfaction givers. —they make re-orders double-sure.

We supply our agents with attractive display matter and circularize their vicinity for them, mentioning them as our local distributors.

Our trade-mark guarantee is on every tag.

Jobbers all sell them

KINDLY MENTION THIS PAPER WHEN WRITING TO ADVERTISERS.

A STRAIGHT TALK FROM THE MANAGER

No. 29

A SOURCE OF INSPIRATION

"I have found a vast improvement of late years in the advertising pages of Hardware and Metal," said Mr. Love, of the Love Hardware Co., London, in talking to a Hardware and Metal representative a few days ago.

"I find that the advertisements are now a real source of inspiration to me, and I can always count on getting ideas from reading the advertising pages, which are worth a good deal of money to me."

The development, which Mr. Love spoke of, has been chiefly in the direction of showing Hardware and Metal's readers how they could *sell* the goods advertised. This has meant a big change from the days when trade paper advertisements were all stentorian appeals to *buy* and *carry in stock* the products of the advertiser.

More and more, manufacturers are coming to the idea that, if a retailer sells their goods, he must of necessity *buy* more to replenish his stock. But he may sometimes be induced to buy goods which will remain on his shelves a long time for want of selling ideas to help him move them. So, Hardware and Metal's advertisements have become a source of inspiration to our readers. In fact, many dealers subscribe to Hardware and Metal largely on account of the valuable information contained in the advertising pages.

J. G. L.

"It is my opinion that for Big Game the Ross .280 Rifle is the best in the World."

B. K. Miller,
Wild Rose, Wis., U.S.A.

Mr. Miller adds:

"I have hunted and fished in various parts of the world, including British East Africa, but I have never seen a gun the equal of the Ross .280 for big game."

Hunters and expert guides wherever big game is found have learnt by experience that no sporting rifle on the market can approach the Ross .280 in power and accuracy.

The Ross .303 Sporting Models are also very popular—their accuracy, power and fine workmanship have earned them many friends.

Another good seller is the Ross .22 Cadet Rifle. It has been adopted by the Government for use by Cadet Corps and is a rifle that will meet every need of the outdoor man or boy. It is an accurate and reliable arm with sufficient power to kill any except the larger game.

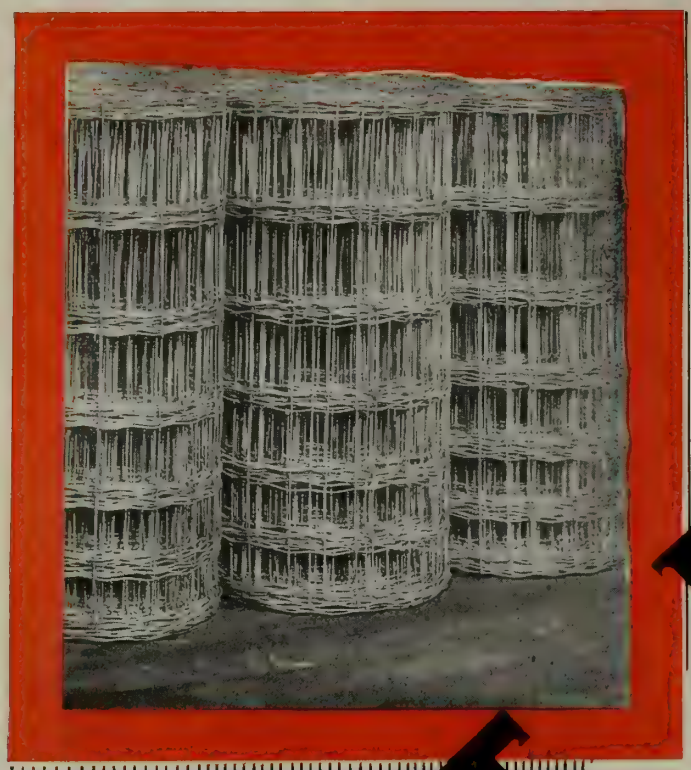
DOMINION SHEET METAL CO., Ltd.
HAMILTON, CANADA



FROST FENCE FIRST

If your territory has not a "FROST" dealer, here is your big opportunity.

We want Hardware men to realize what it means when we say that **we make our own wire.** The quality has got to be there or we are responsible. Unlike other Fence makers, we cannot excuse ourselves because the wire came from the States, etc., but we must stand behind it as to hardness, good galvanizing, and in everything that goes to make up right wire for a first-class fence. Moreover, we **do** stand behind it.

When Spelter or galvanizing is so high, what guarantee can other Fence makers give you that the wire they import has sufficient galvanizing on it to prevent rust?

THE FROST WIRE FENCE COMPANY IS THE ONLY COMPANY THAT CAN ACTUALLY CONTROL THE AMOUNT OF ZINC OR GALVANIZING ON THEIR WIRE.

There is "superiority in fences" just like anything else, and unless you look out for your customers, by handling the best line you can get, you soon lose those customers. You do not take chances when handling Frost products; because you'll get satisfied customers: the best remedy known to develop any business to the highest mark.

We manufacture: Woven Wire Fence, Galvanized Gates, Ornamental Wire and Iron Fence, Coiled Wire, Staples and Supplies, Oiled and Annealed Wire, Hay Wire and Bale Ties.

Get in touch to-day.

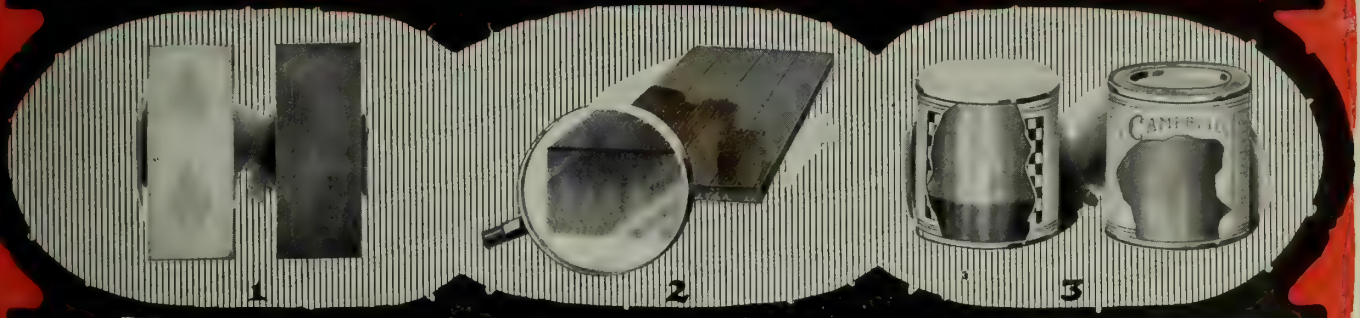
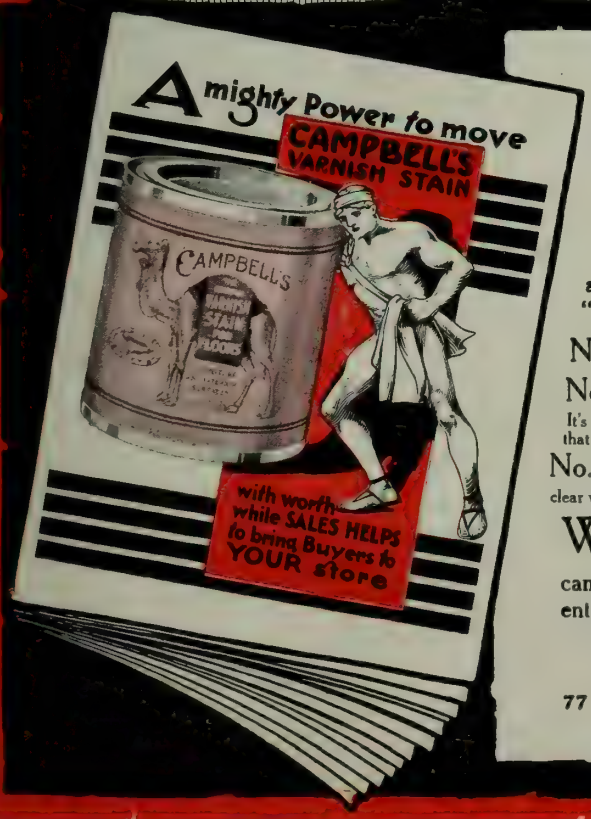
CAMPBELL'S VARNISH STAIN
THE FIRST AND THE BEST
MANUFACTURED BY
Carpenter-Morton Company
MAKERS OF FAST SELLING PAINT SPECIALTIES
77-79 SUDBURY ST. BOSTON MASS.





A Forceful Selling Campaign

DURING 1916 Campbell's Varnish Stain will have the biggest selling campaign in its history.

The following three new selling features will be advertised in large space in such well known magazines as Saturday Evening Post, Ladies' Home Journal, Good Housekeeping, Delineator and dozens of others as well known. Link your store to a "winner" by using the window and store displays we furnish free.

No. 1 Campbell's Varnish Stain dissolves grease spots. We don't have to tell you what that means. Try it for yourself and see. Realize what this means to the housewife.

No. 2 Campbell's Varnish Stain penetrates deep into the very fibre of the wood. It's there to stay. That means that you can abuse and hammer it, but it will hold its own. It's tough and durable. Your customer doesn't come back to you in a month or so to tell you that her floor or furniture looks worse than ever.

No. 3 Let a can of Campbell's Varnish Stain stand as long as you please, but there will be no sediment—no mud at the bottom that you have to stir up with a stick. It's a fine and clear varnish stain—thoroughly unified.

WRITE for a copy of our "Sales Help" book illustrated in this announcement. It gives the complete story of our selling campaign and contains many suggestions that will help increase your entire business. Write for it to-day.

BIG Ben is the biggest thing to-day in the American alarm clock industry. He has everything in his favor—quality, looks, and style. He runs on time, he rings on time, he stays on time.

Slender, massive, richly plated, he stands seven inches tall, with well-shaped distinct hands and a big broad dial easily visible in the dim morning light.

He rings just when you want and either way you want—*five straight minutes* or every other half minute *during ten minutes* unless you shut him off.

His keys are large, strong, easy to wind; his voice deep, jolly, pleasing to hear. The movement plates are bridged like on a Waltham watch— you can change both mainsprings *without taking the movement apart.* The pivots are of hard steel piano wire $\frac{22}{1000}$ of an inch thin. The escapement is a hardened steel pallet escapement—not a pin escapement like that of other alarm clocks.

We are carrying on hand a stock of Big Ben specially put up for *Canadian* trade, 6 in a carton together with a full set of Store Selling Helps, (posters and show cards.) On an order for 12 we give a solid mahogany display stand. On an order for 24 we print your name free on dials and with an order for 48 we send a striking, electric flashing sign, just the thing for your window or counter.

The minimum retail Canadian price is $3.00, and there's a $3.00 resale tag on everyone you buy.

Are You Using This Carborundum Sales Help?

WHY not let this Carborundum Razor Strop Display Hanger become your salesman? Hang it in your display window and watch your razor strop sales increase. The hanger is beautifully lithographed in eight colors and has twelve hooks from which to display razor strops. This display rack is furnished free to any dealer with the purchase of any assortment of twelve strops.

In taking your inventory, be sure that you have a good supply of Carborundum razor strops. Made from soft, velvety horsehide. The finest Carborundum powder is rolled into the corrugated side, thus giving both a sharpening and finishing strop.

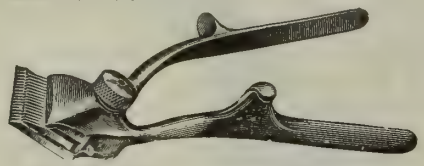
LEWIS BROS., LIMITED, MONTREAL

PRIEST'S HORSE and TOILET CLIPPERS

Made by American Shearer Mfg. Co.

present a complete line at a range of prices covering all requirements of the trade. They are all quality goods, and represent best designs and highest standards of workmanship, regardless of price.
Some styles of Toilet Clippers are illustrated below. All are heavily copper plated and polished before nickeling, thus giving a higher finish, which lasts much longer than ordinary plating. The utmost care is used in grinding and tempering the cutting plates, giving cutting qualities whose superiority may be readily demonstrated by comparison. No. 00 and No. 000 Shaver for beard and neck trimming, are clippers of the utmost lightness and refinement, not paralleled by any other American manufacturer.



STANDARD No. 0, No. 1 and No. 2.
Retailing at about $2.50. High-class barber's clipper.

No. 00 SHAVER
A light and elegant Clipper for beard and neck trimming. Retailing at about $2.25.

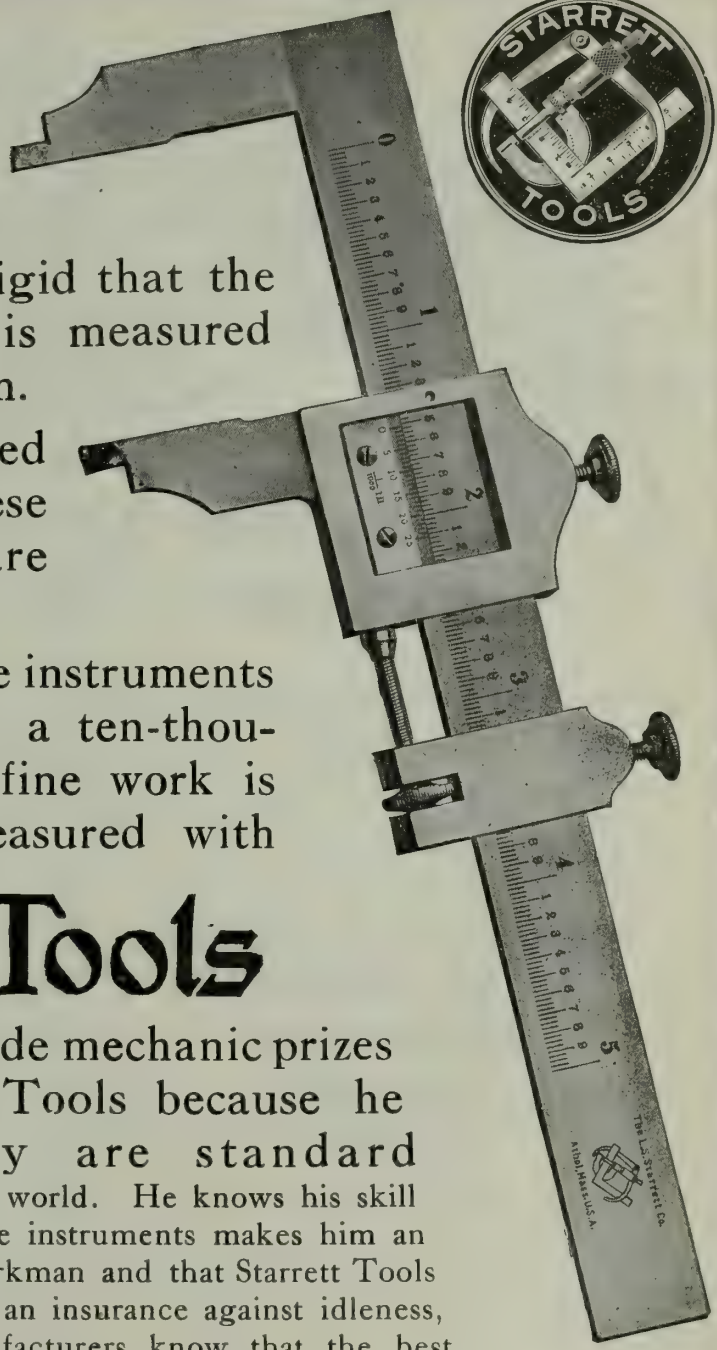
Accuracy



INSPECTION in modern factories has become so rigid that the accuracy of workmanship is measured to the thousandth of an inch.

Think of the accuracy required in the factory where these measuring instruments are made.

In the Starrett factory, where instruments are made that measure to a ten-thousandth of an inch, all the fine work is laid out—scribed and measured with

Starrett Tools

Every high-grade mechanic prizes his Starrett Tools because he knows they are standard throughout the world. He knows his skill aided by these instruments makes him an accurate workman and that Starrett Tools are almost an insurance against idleness, for manufacturers know that the best workmen use the best tools.

Starrett Tools include 2100 styles and sizes of fine instruments—steel rules, tapes, squares, levels, hack saws, calipers and dividers, micrometers, gages, speed indicators and many others.

You Keep Your Store Open

just so long as you get a quick turnover on goods with a fair margin of profit.

Nowhere else can you find a line of files that gives you such a quick turnover as the five following brands:

KEARNEY & FOOT
GREAT WESTERN
AMERICAN
ARCADE
GLOBE

(Made in Canada)

With an output representing 90% of Canada's file requirements, they may justly be termed Canada's national files.

With a continuous, never-let-up campaign educating your customers on the economy of throwing away half-used files, the demand for the "famous five" is rapidly increasing.

It only remains for you to impress upon your customers that when a file is half worn, its efficiency point has been passed. They are wasting time and losing money by its continued use.

You'll sell two files where you now sell only one. Good business for you.

Nicholson File Company
Port Hope, Ontario

The Children of Purity

Introduction:

The marriage of **Purity** and **Scientific Care,** which was celebrated at Middletown some ten years ago, was one of the greatest social events of the Iron World. The usual gloomy prophecies had been made by the old croakers who figure as friends of the family, but the young couple have disproved all these predictions, and to-day are farther than ever from the divorce court. They still reside at Armco Mills, where they began their first simple house-keeping, although their quarters have been greatly enlarged and modernized.

Four hearty and happy children have blest the union. So rapid has been their development that the family is already famous throughout the country, and echoes of their accomplishments are heard in the far corners of the world.

The eldest and best known is **Rust-Resistance,** a sturdy, two-handed young scrapper, who never comes home with anything worse than a bloody nose, and usually with hardly a scratch, while the Rust boys of Corrosion Alley are a sight to be seen.

The younger children, named Welding Quality, Enameling Property, and Electrical Conductivity, are altogether a sight to warm the heart of the anti-race-suicidist. Each one of these sturdy offspring is worthy of and will receive a chapter in this chronicle.

The American Rolling Mill Co.

AMERICAN ARMCO INGOT IRON

The trade mark ARMCO carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

Licensed Manufacturers under Patents granted to The International Metal Products Company.

TONCAN METAL

I am the Most Economical Sheet Metal

I resist rust and corrosion, consequently am far more durable than any other sheet metal made from iron ore.

I am moderate in first cost and my extreme durability makes me the most economical sheet metal in the end.

I save building owners and other users of products made from sheet metal thousands of dollars annually because of my rust and corrosion-resisting ability.

This stencil identifies me and protects the buyer against substitution:

TONCAN METAL

A few uses for Toncan Metal:

Roofing	Skylights	Tanks
Siding	Blower Systems	Culverts
Cornices	Eavestrough	Flumes
Ventilators	Conductor Pipe	Window Frames

There are many other uses.

Recommend and Furnish Toncan Metal to your trade. It brings in more business.

14 Years A Dealer But Finds No Better Fence Than PEERLESS

Read This Letter

Forestville, Ont., Jan 13, 1913

The Banwell-Hoxie Wire Fence Co.,
Hamilton, Ontario

Dear Sirs:—I have been in the fence business for the last fourteen years putting up fence for farmers and have erected as high as four thousand rods per year. I have put up a good many different makes of fence but can positively say that "The Peerless" has given the best satisfaction taking into consideration even wire, no slack wires, no wires breaking, no wires rusting, and fence holding its tension which keeps the fence tight. "Peerless Fence" that I put up six years ago with posts thirty feet apart is tight and free from rust and does not sag.

Truly yours, E. G. Hooner

He's but one of the thousands of satisfied Peerless dealers—satisfied there's no better, no more profitable, no bigger producer of return orders than Peerless Fencing. His Peerless Fence agency is one of his biggest assets. If you had it you would say the same.

Peerless Farm Fence

is made of Open Hearth steel wire—heavily galvanized in such a thorough manner that it will not flake, chip or peel off. The wires are tough, elastic and springy and will not snap or break under sudden shocks or quick atmospheric changes. The joints are securely held with the "Peerless Lock" which will successfully withstand shocks and strains and yet, it can be erected on the most hilly and uneven ground without buckling, snapping or kinking. We also build a full line of poultry fence, ornamental fence and gates.

We Offer You This Coveted Agency

If you are located in our unassigned territory, we want to offer you the selling rights for this remarkable fencing. We want to add you to our list of satisfied, money making agents. We have a very attractive agency proposition. Want it? A postal brings it. Write today—now.

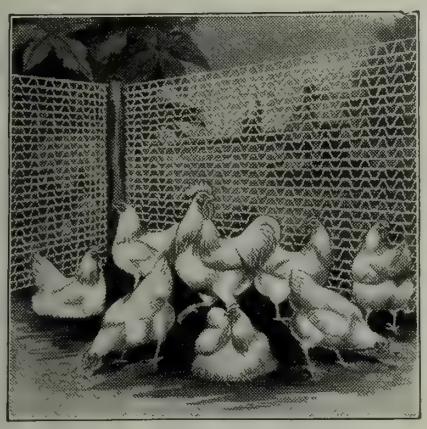
It means sure-satisfaction to customers and a good profit for dealers.

Drop a line for price.

Manufactured by

The Imperial Mfg. Company
Welland, Ontario

Our U.S. Poultry Fence is the Acme of Poultry Fences



NOTE THE POINTS OF EXCELLENCE

Built on miniature scale of farm fence interwoven with parallel wires and hinge joints so it stretches to posts straight, even and nice without buckling, bagging or sagging.

It's so stiff, it does not require top rail and base board or so many posts as old style netting.

Guaranteed 5 to 6 times as strong and at least 100 per cent. better in every way. All parallel wires are of even length and all mesh of uniform size. They can't be otherwise the way it is made.

It's not merely a substitute for old style netting. *It's something much better for the consumer and sells on sight.* It's the strongest, most sightly and best fence for the purpose yet invented.

Do not purchase Poultry Netting or Fencing until you have seen our Poultry Fencing—it will be a surprise and a revelation to you and your trade.

Those who have used our Poultry Fencing will not go back to the old style netting.

Made in heights from 12 to 72 inches, all wires 19 gauge, galvanized.

Put up in 150 ft. rolls and sold by the square foot.

Our stock is complete at present and we would advise ordering at once to guard against scarcity later on.

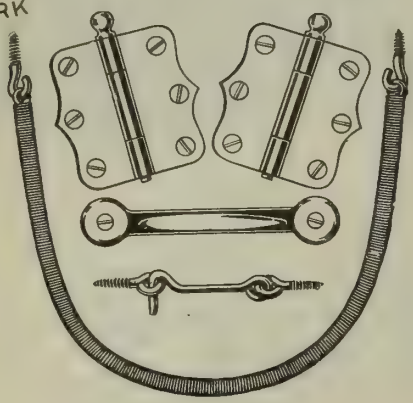
COMPLETE SETS IN CONVENIENT PACKAGES



Set No. 1750

Set No. 1750 is made up of one pair of 3x3 ornamental, loose-pin butts to screw on the surface of the door; one five-inch wrought steel pull; one high-grade No. 3 spring, of much better quality than is usually used on screen doors; one gate hook and eye. Each set is packed securely in a neat, strong, telescope carton, with screws of the proper size and finish, ready to be handed to the customer.

These sets are finished in Japan, Antique Copper, Dull Brass, or the Rust-Proof "Stanley" Sherardized finish.

A less expensive set, no 1752, is also put up with 2½ x 2½ butts, and a No. 2 Spring. It is made of good materials and is fully equal to other sets on the market.

Send in your order for Stanley Screen Hardware, and be prepared for Spring business. Write us, if your jobber cannot supply you. See page 1.

Hardware and Metal

Established 1888. TORONTO, JANUARY 22, 1916 Vol. 28. No 4

Reduction in Rates Expected

Expected That an Announcement Will Shortly be Made, of a Reduction in Rates in Workmen's Compensation Act Tariff—Will Affect Many Branches of the Hardware Trade.

IT is expected that an announcement of considerable importance to the hardware trade will shortly be made by the Workmen's Compensation Board regarding a rate reduction. Several hundred Canadian retail hardware firms, and many hardware manufacturers come within the scope of the Workmen's Compensation Act, which went into effect about a year ago, and which was fully explained by Hardware and Metal at that time.

The commission is busy at its new home in the Normal School Building, Toronto, Ont., compiling statistics which will form the basis for the current year rates. Employers are not taxed at random nor upon speculation, but according to the actual working out of the scheme. When the Act came into force the board made statements to the effect that should the tariff rate be found insufficient to meet the demands made upon the funds it would of necessity be raised before the next levy, but should it be found in excess, the rates would be lower for the next year. Hardware and Metal has reasons to believe that at the close of the first year the commission finds itself with a surplus. Accordingly a lower rate is expected. Statisticians compiling the necessary data expect to finish their work in another ten days. The rates for 1916 will then be struck.

While it is impossible at the present time to give any figures as to the new rates, it is certain that the reductions in certain classes will be of substantial amounts, and will be welcomed by the trades effected.

The first year's levy was based on statistics issued by compensation boards in the United States. In most cases the assessments were lower than those across the border and from the one year's business the rates are found still in excess of the demands made upon the commission, despite the fact that thousands of men have been employed in shell factories who formerly were engaged in less hazardous work.

Should the second year's existence go to show that still lower rates could be accepted, the levy will, as a matter of course, drop down another notch.

While the commission has been confronted with obstacles placed in its way by some, who on various grounds, objected to its inauguration, it is rapidly overcoming all criticisms and even now has the co-operation of many who at the outset were antagonistic to its inception.

Co-operation of Employer Needed

Co-operation of the employer is perhaps the commission's greatest necessity, for without it the commissioners are greatly handicapped in their endeavor to place the scheme on a smooth operating basis.

The Workman's Compensation Act is applicable to the hardware merchant in all cases where he is employing men in hazardous labor, but does not apply where clerks only are employed. Tinsmiths, plumbers and others whose work is more or less of a dangerous nature come under the protection of this act. Where, however, only one, two or three men are employed in a workshop it is optional with the proprietor whether he insure his men or not, but where more than three are employed it becomes compulsory.

The rates are based on the annual pay roll and where an employer over estimates his pay sheet when making his returns to the commission the overcharge may be deducted from the following year's assessment. In cases where the business changes ownership a refund for the unexpired term will be made.

Success has marked the first step in placing the compensation board on a proper running basis. In any line of business the first twelve months is always looked upon as the hardest milestone to pass. The Workmen's Compensation Commission is running on a purely business system. Its object is, the officers have stated, not to make money for the Government, but simply to provide for the incapacitated. All surplus moneys are held in trust funds and are placed to reserve capital. They also serve to govern the rates, which will be changed from time to time until an assessment can be reached which will meet the demands made upon the commission but will not provide for excessive reserve funds.

The board has statistics showing that large sums of money have been spent during the past year for safety devices. Efforts are being put forth to avert even trivial accidents, but even with the utmost care and with all the modern devices accidents will occur. The percentage of accidents averted by modern safety methods is, strange to say, very small, showing that the compensation commission is playing a very necessary part in providing for employees disabled while engaged at hazardous work.

Since the inauguration of the act a year ago, hardware businesses have been started in many places and others have changed proprietors. For those who are

PRIZE WINNERS ANNOUNCED NEXT WEEK

Next week's issue of Hardware and Metal will contain an announcement of the prize winners in Hardware and Metal's annual Christmas window display contest, which closed on December 31. Entries have been received from all parts of Canada, and many excellent displays have been submitted by leading hardware window trimmers. Eight cash prizes were offered. In order that window trimmers in the smaller centres would not have to compete with those in the larger centres, the contest was divided into two sections; places of 5,000 and over, and places under 5,000. The judges as in past years, are experienced men and their decision will be awaited with interest by hardware window trimmers throughout Canada, whether contestants or not. Watch for the announcement next week.

unacquainted with the workings of the commission a few of the leading points may be of interest:

How Act Works

The act divides employers of labor into two distinct classes. Those coming under the first division are those engaging men in work more or less dangerous, and come under the provision of the act while those in class two employ labor which is not looked upon as hazardous to its list of employes are exempt from provision of the act, but are subject to the payment of damages providing the injured employe is able to prove his claim. The only difference the passing of the act made to those in class two was the removal of the old safeguards which protected the employer from paying damages to injured employes, were removed. Up to the time the act went into force an employer who could prove contributory negligence on the part of the injured employe, could escape payment of damages. The fact that the employe assumed the risk when accepting employment, served as a defence. None of these shields are now applicable to the second class.

Retail hardwaremen are not included under the first head unless employing men on such work as sheet metal, plumbing, steam-fitting, or other tasks looked upon as dangerous.

All Outside Men Included

The assessment on outside work is absolute, regardless of numbers of employes.

The assessment covers only the time the employe is engaged in labor, which comes under class one. So that the levy is just to have the amount for those employed in this manner only half time. Hardware merchants not employing outside labor are barred from participating in the act. Those employing outside labor and who neglect to send in reports are subject to a fine.

The commission endeavored to notify every employer of labor in class one before the act came into force, and since then have had men throughout the Province endeavoring to locate employers who come under this heading, and who have not made a report. If neither circular letter nor representative has reached men who come under this section, it does not in any way relieve them from the obligation imposed upon the class as a whole.

The act is retroactive—in other words the payments date from the inauguration of the act, no matter when the money is received. This is necessary owing to the fact that the commission is obliged to pay compensation to all injured employes from the date the legislation went into effect. In other words the employe is insured whether the employer has paid his dues or not.

Revival of Business in Quebec Town

The Rock-Bottom of Business in the Dog Days of 1914—Complete Cessation of Business Activity as a Result of War — The Revival of Business on an Unprecedented Scale

WHEN the war broke out Lachine, Quebec, was paralyzed. It is a summer offshoot of Montreal that lived on the spendings of that city's surplus population in the hot months. In the winter things were always quiet unless the Dominion Bridge Company's plant gave employment to a modest number. The summer of 1914 found it very quiet. Its industries are in direct sympathy with those of Montreal, which in common with other manufacturing centres was beginning to feel the griping pains that go with undigested food and rapid expansion in the body economic.

The city dwellers still fluttered about lovely Lake Louise, the islands, and the other nearby beauty spots of the St. Lawrence. But there was a worried expression on the faces of the men folk as they came out by trolley and train nightly. And in the morning they had the look of men who had not slept well. Their women folk seemed content with last year's screens and failed to order lavishly as in previous years the little conveniences for their cottage households, the hammocks, the tinware and enamelware that go with hot weather and happy-go-lucky living. The children sulked and went without new fishing lines, troll spoons and other summer sporting goods.

The industry of the town was dying. The war came and killed it.

The people who had simply done without before now economized and desperately too.

The people who had economized simply left.

But Now for the Second Chapter

Since then things have changed. War orders, shells. An infusion of new blood in the business life of the community, and a mild boom as a result of a new development that has affected all lines of trade.

Those who were economizing are now spending — if not prodigally, at least wisely. Which is much better. Those who were doing without are now having. When the summer residents come, in late years the beginning of all business things, the increase of trade they bring will only cause a ripple. The big trade is already there.

The Dominion Bridge Company is paying out $270,000 each month in this town of less than fifteen thousand people, since the shell industry has arisen Phoenix-like from the ashes of the business despair of 1914. The wages of shell makers are too well known to require enlarging upon. So everyone in Lachine is riding on the new wave of prosperity. Merchants without exception admit an increasing business that approaches old ante-bellum days.

It is generally stated that there is not an empty house in town. A small matter like the size of the rents makes no difference to these affluent aides of Mars. They cannot all be housed in Lachine. The Montreal Tramway Company has added a special service of cars to carry to and fro daily these fifteen hundred high-priced wage earners who reverse the usual order and commute out instead of into their work.

A Small Building Boom

Now most of these fifteen hundred men have families in Montreal. People who experience prosperity for the first time are inclined to want to plan for homes of their own, homes close to their work. Lachine's shellmakers are no exception. The speculative builder and the builder investor have also appeared on the scene, so that that anomaly of the war, a building boomlet appears to be fairly on the way. At any rate considerable building of both a public and a private nature is planned for the spring months. This fact has made the builders' hardware line which the local dealers had come to regard as shelved for an indefinite period, a live issue. It now gives every indication of becoming one of the chief lines in this locality with the advent of spring.

Withal, the growth and improvements has been so gradual and so free from unhealthy tendencies that it impresses the unprejudiced onlooker with its worth. It affords a striking and clear cut example of the metamorphosis that Canadian trade has undergone in the past six months.

Questions to be Discussed at Convention

Advisory Board of Ontario Retail Hardware and Stove Dealers' Association in Meeting at Toronto Prepare Plans for Coming Convention—Important Matters to be Discussed—Membership Increased.

At a meeting of the advisory committee of the Ontario Retail Hardware and Stove Dealers' Association, held at the King Edward Hotel, Toronto, on Monday of this week, plans were prepared for the coming convention of the association.

The eleventh annual convention, as has been previously announced in Hardware and Metal, will be held in the banquet hall of the King Edward Hotel, Toronto, on Tuesday, Wednesday and Thursday, February 22-23-24.

The Executive and Advisory committees of the association are using every effort to make the coming convention the most practical and helpful since the organization of the association. It will be a purely retailers' convention, and will be in the hands of the members. Ample time will be allowed for a full and free discussion of all the questions introduced.

C. W. CONN, Tillsonburg, Ont.

President Ontario Retail Hardware and Stove Dealers' Association. The Association's Convention will be held at Toronto on February 22, 23 and 24.

Special Railway Rates

An arrangement has been made with the railway companies whereby special rates will be obtainable for all who desire to attend the convention.

Toronto is centrally located, and is an ideal city for convention purposes. It is easy to reach from all parts of the Province, and there is an abundance of excellent accommodation for all visitors. At the convention last year the "Question Box" sessions were probably the most interesting feature from the retailers' standpoint. The officers are planning to make the "Question Box" sessions at the coming convention, the best and most interesting in the history of the association.

Some of the Questions

Every member of the association is asked to submit one or more questions for discussion at the convention. Already a number of questions have been sent in by retailer members.

One question which, it is expected will be discussed at an early session is the "Association Service to Members" plan.

The "service plan" was introduced by Secretary Macpherson after he was appointed secretary of the association at the last convention. The service includes among other helps, the association price book, price lists, etc., which have been prepared during the past year, and which have been heartily welcomed by members of the association. Suggestions as to how the service could be improved will be asked for from members.

The Parcel Post

"Have any retailers made use of the parcel post?" is another subject that will be taken up and discussed at the convention. It is known that some members of the association have attempted to use the parcel post in expanding their trade connections. They will be asked to relate their experiences with the parcel post service and to give their views regarding the value of the parcel post to the retailer.

A great many retailers throughout the country are under the impression that the "parcel post" under the present system is of greatest benefit to the mail order houses, and is detrimental to the interests of the retail hardware trade, although the latter are large contributors to the upkeep of the parcel post system.

The discussion on the parcel post should prove one of the most interesting of the many subjects which will be discussed at the convention.

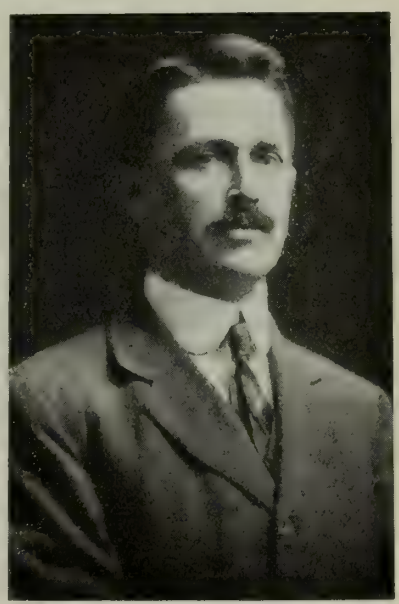
Law Governing Sale of Fire-Arms

Another question which will be discussed is the law governing the sale of fire-arms in Canada. Under the present law, revolvers cannot be sold unless a permit for the sale has been issued by a police magistrate, chief of police, or other duly qualified officer.

Any merchant who sells a revolver to a person who has not secured a permit is liable to a penalty. Since this law was passed a few years ago the sale of revolvers has fallen off to a considerable extent. Some retailers claim that the law at present works a hardship on the retailer, owing to the fact that many persons who would otherwise buy revolvers, balk at doing so when they are informed that a permit is needed.

On the other hand there are retailers who claim that the law as it stands at present is a good one, and that it prevents the sale of revolvers to many irresponsible persons. They claim that if a responsible person needs a revolver, and can give a good reason for wanting one, it is not a hard matter to secure a permit. They also claim that although the out-and-out criminal will secure a revolver, regardless of all laws, the present law prevents the sale of revolvers to many irresponsible persons, who are really not criminals, and to others who in a temporary fit of rage or drunkeness have a crazy desire for an arm with which they might do considerable harm.

This subject will be discussed from all angles, and in all probability, if a majority is in favor of repealing the present law, the association as a body will make representations to the Dominion Parliament for a repeal of the act governing the sale of fire-arms.



W. F. MACPHERSON, Prescott, Ont. Secretary, Ontario Retail Hardware and Stove Dealers' Association.

Tenders on Hardware

The officers of the association are preparing plans and specifications for a 7 or 8-roomed house, worth in the neighborhood of four thousand dollars.

Members of the association will be supplied with forms, etc., two or three weeks in advance of convention dates, and asked to tender on the hardware requirements including glass, paints, builders' hardware, tinsmithing, plumbing, etc. The tenders will be opened at the convention and a discussion will follow on the quotations sent in by the tenderers. There will undoubtedly be a wide range of prices quoted. The lists of goods needed will include lines or articles with which the members are familiar, and in this way all danger of confusion in quotations will be eliminated.

The association will furnish complete specifications for the tinsmithing and and plumbing work.

Suggested Retail Prices

The question of arranging retail prices for certain districts in Ontario will also be taken up by the convention. It is well known that in some districts the retailers' profits are badly cut on certain staple hardware lines. In other districts the retailers are enabled to secure a very fair margin of profit on all staple lines. A number of remedies for price-cutting, etc., will be suggested at the convention.

The foregoing are only a few of the many subjects which have been suggested so far. Between now and the convention dates a great many questions for the "question box" will be submitted by members of the association.

Travelers and Associate Members

One session, probably on Wednesday evening, will be set aside for travelers and associate members. At this session the travelers will have an opportunity of airing their grievances—if they have any. This session will probably be one of the most interesting of the convention as there are a great many good speakers among the knights of the grip.

The efforts of the officers to increase the membership during the past year have borne fruit with the result that one hundred new members have been added since the last convention. A great many more new members will in all probability be added before convention time.

The official convention program is now in course of preparation and will be announced shortly.

A pipe price list recently issued for use by members is shown on this page.

To Meet in Regina

Second Week in May Will See Large Number of Merchants From All Over Saskatchewan at Annual Convention of R.M.A.— Some of the Problems.

One of the principal matters to be discussed at the annual convention of Saskatchewan Retail Merchants Association to be held in Regina in May, will be the forming of a trust company, composed of or allied with the accociation, to be at the service of the members of the provincial association of retail merchants. This announcement was made by President Maybee at a banquet, in Regina recently at which the members of the provincial executive were guests of honor.

The provincial executive of the Saskachewan Retailers' Association met in the Board of Trade offices on that day, and conferred with members of the government at the Parliament Buildings in regard to legislative matters which they desire passed upon at the next sitting of the Legislature. The deputation was received by Premier Scott, Hon. Mr. Calder, Hon. Mr. Turgeon, and Hon. Mr. Bell.

A banquet was given by local retailers at which the members of the provincial executive were the principal speakers. About forty Regina retailers were present, representing every branch of trade. J. J. Polson was toastmaster. J. L. S. Hutchinson, Saskatoon, provincial treasurer, was the first speaker, and dealt chiefly with the insurance scheme. He pointed out that although the Retail Merchants' Mutual Insurance Company of Saskatchewan had only commenced to write insurance since Nov. 1st, there was $131,000 insurance in force at present. For the first year, not more than $1,000 could be taken out by merchants in the country, and not more than $2,000 by city merchants.

W. W. Cooper, of Swift Current, first vice-president, explained in a general way the work of the organization, and spoke of the great benefit to each merchant of provincial organizations such as existed in Saskatchewan.

President George A. Maybee, of Moose Jaw, spoke of the Food and Supply Bill which the merchants were endeavoring to have passed, allowing farmers to advance from their crops in the fall for the necessities of life which the merchants had advanced them.

F. E. Raymond, secretary, gave a short address on the general activities of the association and referred to the work being done by the freight claims department, which was now in splendid working order in that province.

H. D. MacPherson, second vice-president, referred to the annual convention which would be held in Regina the second week in May, when over 600 merchants from all over the province would be present. The Convention will last three days.

Keeping Track of Daily Sales and Totals

General Merchant Has Record of Cash and Credit Sales Checked Up For Each Clerk, With Totals to Date—Always Knows Where He is At—Value of the Statement

THE need for keeping track of business day by day in the smallest as well as the largest stores has been emphasized in Hardware and Metal many times. But it will bear repeating—many times more. Various forms have been suggested for help in doing this, some better adapted to the larger stores, where specialization goes on to an increasing extent. The following system in use in store of an Ontario general merchant may prove of assistance to other merchants. The merchant uses the cash register for his records of daily sales, cash and change, or this can be figured out early each morning from the sales slips or counter checks on file, collected from each clerk.

DAILY STATEMENT OF BUSINESS. DATE Oct. 1, 1915.

TOTAL No. OF CUSTOMERS.

This illustration shows how Western Ontario merchant keeps tab on each day's business, including cash and credit sales, outstanding accounts, etc.

In this store the records are taken from the "Received on Account," "Charge," "Paid Out," and "Cash Sales" transactions as recorded. These are transferred to a special form, and not only the day's results recorded, but by simple addition the business of the year is kept right up-to-date. This includes not only the sales of each clerk, but of all—cash and credit. This also lists the total credit on the books for the year to date, and so forth.

Fictitious figures have, of course, been used in the form given above. Reference to it will show clearly how it is worked out. It will be seen that on October 1st, 1915, on any date, say, Clerk "B" had thirty transactions. His total cash sales for the day were $35 and his total cash sales to date are indicated as $5,035.

Clerk "A," we will say, was absent from the store on October 1st, but up to date he had $700 cash sales. Clerk "E" had 25 transactions on that day, and sold $20 worth of goods for cash, or a total up to date of $2,020. Clerk "H" had 50 sales, selling $40 worth of goods for cash and a total of $3,040 up to date. Opposite each of these will be observed the charge sales.

In the cash sales grand total column it will be seen that the total cash sales for the day were $95, and the total cash sales from the beginning of the year up to end of that day were $10,795.

The Charge Sales' Column

Looking at the charge column, it will be seen that Clerk "B" sold $10 worth of goods on October 1st, which were charged and up to date $960. Clerk "A" sold up to date $1,177.50 worth. Clerk "E" sold $750 on October 1st and a total of $1,172.30, while Clerk "H" sold $2.20 of credit on that day and a total of $88 altogether. The grand total of the charge sales is $4,198.80.

Then in the summary it will be seen that the total sales, cash and charge to date are $14,793.80. The total cash received up to date is shown by adding the cash sales up to date and the amount received on account, making a total of $13,795. By subtracting this total from the total cash and charge sales the amount of unpaid charge sales to date is secured. The figures show that this amounts to $1,198.80. By adding $19.70, charge sales for the day, the total unpaid charge sales is secured. This is $1,218.50. By subtracting $10—the amount received on account that day—the total amount of outstanding accounts is gotten, which is $1,208.50.

The value of this statement is easily seen. Merchants using it know at the end of each day exactly where they stand. They know how much money is outstanding, how much cash they took in that day, both on account and from cash sales; how many credit sales they made; the total number of transactions, etc., etc., and, as pointed out above, the basis of the whole thing is the cash register record.

The short amount of time that it would take a retailer to get these figures should not prevent any of them from keeping this or a somewhat similar record. It may mean the difference between success and failure, because it acts as a check on indiscriminate credits and points out the way when the amount of unpaid outstanding accounts ought to be curtailed. By comparing this record with corresponding days of the previous year, the trend of business can readily be seen. If it is going behind, a greater endeavor can be used to bring it up to the mark.

St. John, N.B.—Thomas E. Perkins, for many years manager of the paint department of W. H. Thorne & Co., Ltd., wholesale and retail hardware, died suddenly on January 11 after a short illness from pneumonia. He had entered the Thorne establishment as a boy, and had been a member of the staff for thirty odd years. He was one of the most popular and highly respected men in local hardware circles. His wife and one daughter survive.

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVIII. TORONTO, JANUARY 22, 1916 No. 4

HARDWARE merchants are finding stock-taking a more troublesome task this year than at former times. All brass and steel goods, wire nails, paint—in fact almost every article of hardware—have advanced several times since last stock-taking and keep on advancing. This makes the work double what it was two years ago.

* * *

MOST merchants are taking this opportunity to re-mark their stock. Not only are they altering the sale price, but are erasing the old cost marks and putting on the advanced prices. This alone is a big job, but when it is considered that hardware lines have advanced from 10 to 300% during the past eighteen months, it is a paying task to re-mark the stock.

* * *

ONE of the oldest and most prominent figures in the Canadian paint trade passed away last week when Alexander Ramsay, president of A. Ramsay & Son Company, Montreal, expired suddenly at his home at Westmount (Montreal). Seventy-six years of age, he had spent practically all his life in Canada and his career from a young man was wrapped up in the business which, organized by his father, was so long carried on under his name. As an authority on all questions pertaining to the paint and oil business, he was known throughout Canada and his advice went far in deciding many questions of policy amongst manufacturers and dealers.

WIRE PRODUCTS TO GO HIGHER

ALL branches of the hardware trade have been following with considerable interest the upward trend in the prices of wire products. During the past few months many price advances have gone into effect, with the result that extremely high prices are now being quoted on wire nails, fencing and a great many lines of wire goods.

Prices in Canada have followed the upward trend of quotations in the United States. There is a heavy demand in the United States for wire products and all the mills are sold up for many months ahead. It has been generally expected that a further advance would take place during the present month, and although the advance has not taken place up to the time of writing, it is expected within a fortnight or so.

Some idea of conditions in the United States can be gathered from a recent report of the *American Metal Market,* which states that one of the important points in the situation is the fact that prices are bid in the export market far above the regular domestic level, and it is felt that time must force some sort of an equalization, as the gap is many dollars per ton.

Another influence is the fact that the wire mills are sold up much farther ahead than ever before in their history. It is not customary for the wire mills to be sold up as far ahead, in general, as other mills, for the reason that the product is so largely distributed through jobbers, and contracts with jobbers are limited as to time. The nominal rule in the trade is to cover the jobber 60 days ahead, but of course the time is really lengthened in various ways. With manufacturing consumers the contracts are more commonly made for six months. The contracting for the current six months is all done and a large part of the material to be used by manufacturing consumers is already specified, much of the tonnage holding over from last year, as the mills fell behind in deliveries. With the jobbers they are also behind and on this account have been able to secure protection, at less than to-day's prices, for more than the conventional 60 days.

Estimates are made in some quarters that the wire mills are at present obligated for more than six months of their prospective output, operating at full capacity.

AN $800,000,000 CROP

A CROP bulletin issued by the Census and Statistics Office on Wednesday of this week gives final returns of the most abundant harvest in the history of the Dominion. New high records are established as to quality, quantity and market values.

The earlier estimates of the Prairie Provinces have had to be revised upwards, and according to the latest figures the total value of the field crops of

Canada for 1915 is estimated at the huge total of $800,000,000. The trade of the whole Dominion has felt the good effects of the huge crop, which has been harvested, and business in nearly all branches of trade, but more particularly hardware, has shown a wonderful improvement during the past two months. As a result of the record yield of field crops and the millions of dollars which are being expended in Canada on war orders, a mild wave of prosperity is sweeping over the Dominion.

Retail hardwaremen in nearly all parts of the Dominion report that business is rapidly improving. Jobbers state that trade during December was good and January business so far is excellent. Almost without exception, hardware jobbers state that business this month will far exceed in volume the business of the corresponding month of last year.

One prominent jobbing house predicts an increase of 75% in business this month, over the business of January, 1915.

Hardware merchants in agricultural districts state that as far as volume of business is concerned, you would not know that a war was on. The outlook for spring is exceedingly bright.

A large amount of building is planned for in the agricultural communities, and during the past few weeks there has been a decided improvement in the outlook, in many of the larger cities.

APPLYING BUSINESS METHODS

THE appointment of Edward Fitzgerald as purchasing agent of the Imperial Munitions board as recently announced in HARDWARE AND METAL, will commend itself to those who favor the application of highly efficient business methods to national affairs. In the first place it means a consolidation of the machinery of two departments. Mr. Fitzgerald having been purchasing agent of general supplies for the War Office for some months, and in the second place it indicates the adoption of a system inauguarted by the Canadian Pacific Railway under the direction of Sir Thomas Shaughnessy and brought to a state of perfection recently recognized by the City of New York as second to none in the world.

There is also behind the appointment a broader significance for those who follow the placing of government contracts and the usual methods adopted. Mr. Fitzgerald, from what we know of him, may be expected to discharge his duties as though in the employ of a private corporation. For many years he has been trained in the purchasing department of the Canadian Pacific and has for some time been recognized as its actual if not nominal head of that department; he has been appointed to apply those same methods to the purchase of shells and other munitions—dealing direct with the manufacturers and buying at the actual market. The way in which he has discharged his duties in the purchase of general war supplies has been evidence that he will do so.

With such a body of efficient business men as composes the Imperial Munitions Board and with a trained purchasing specialist to operate the actual machinery, the British government may look to Canada with confidence to fulfill her duty in the hour of national need.

Those who like to speculate on the inside or individual influences in important events may refer with interest to the visit of Lord Shaughnessy to the British war office some months ago and his reticence as to his actual mission. It was then pointed out that the C. P. R. president—who it is interesting to note inaugurated the company's purchasing system—would hardly make such a trip to confirm the appointment of Mr. Fitzgerald as purchaser of general supplies as he had already commenced these duties. Of course His Lordship may merely have been looking over the ground for future excursions as a baron but there is certainly food for interesting conjecture.

NEW SHEET METAL COURSE

THE first article of a new series on practical sheet metal work, prepared especially for the readers of HARDWARE AND METAL, appears in this issue. The new course will consist of at least fifty complete articles, with illustrations. The articles are being prepared by a practical man who has had many years' experience in the sheet metal trade, and who has worked his way up from the lowest rung on the ladder. HARDWARE AND METAL has in the past presented to its readers a number of exceptionally high-class series of sheet metal problems. They have been greatly welcomed by the trade. The problems as taken up by HARDWARE AND METAL, in simplified form, are of inestimable value to every hardwareman who conducts a sheet metal department in connection with his business. Roof work, ventilation and skylight work will be taken up in the new course. The advent of the automobile has created a new phase of sheet metal work. Patterns of doors, mud guards, steps, drip pans, covers, etc., will be in considerable demand from now on. The foregoing will all be taken up in turn in the new course.

This new series has been secured at considerable expense, and is further evidence of HARDWARE AND METAL'S earnest endeavor to supply its readers with all modern and practical services available.

DOING THE best we can—without extra effort is almost a national failing. We all *know* how to do better than we are doing, but only about one in five hundred really makes his head save his heels.

* * *

MANY DEALERS who have a comparatively small turnover clear a larger margin of profit than others who sell a much larger amount in the course of a year. This is due to the fact that the one keeps profit in sight all the time and gets his margin on everything he sells, while the other frequently subordinates profit to turnover.

New Wholesale Hardware for Saskatoon

The Canadian Supply Co., Ltd., Incorporated With Capital Stock of $250,000 —Will Commence Operations About March 1 To Do Wholesale Business.

The Canadian Supply Co., Ltd., Saskatoon, Canada, is the name of a new company that has been promoted and formed by J. L. S. Hutchinson, of the Saskatoon Hardware Co. The company is a straight joint stock company, incorporated under the laws of Saskatchewan, and capitalized at $250,000. The company will be under the management of Mr. Hutchinson, who is president and managing director, and who in future will devote his entire time to the management of the new company.

Associated with Mr. Hutchinson is O. B. Manville of the Manville Hardware

J. L. S. HUTCHINSON

President and Managing Director, the Canadian Supply Co., Saskatoon, Sask. Mr. Hutchinson is also a member of the firm of the Saskatoon Hardware Co., Ltd., Saskatoon.

Co., Prince Albert, Sask., and a number of other prominent retail hardwaremen. F. E. Raymond is secretary-treasurer of the new company. The board of directors will be composed of Messrs. Hutchinson, Manville, Raymond, C. E. Phillips and W. Finley.

It is the intention of the new company to do a strictly wholesale business. The business will be conducted along conservative lines, particularly with regard to the question of credits. The warehouse of the company will be located at Saskatoon, Sask., and business operations will commence about March 1. The company already has travelers on the road soliciting orders for future delivery.

Interviewed by Hardware and Metal, Mr. Hutchinson stated that on the start the company will carry a complete line of shelf and heavy hardware, glass, paints, oils, etc., and will gradually add stock to meet the demands of the trade. The company will carry two lines of paint, one under the manufacturer's brand, and another under the company's brand.

Mr. Hutchinson stated that one of the objects of the company would be to look after the hardwareman's needs in all hardware lines, but more particularly those lines which the mail order houses sell as leaders.

Mr. Hutchinson further stated that the new company is not in the nature of a co-operative buying proposition, that would tend to disorganize trade conditions, but rather a proposition whereby the merchant who can buy for cash, will be able to take advantage of the lowest possible market prices, thus enabling him to market those goods to the consumer, so that the latter can buy goods at home to better advantage than he could elsewhere.

LEGISLATION RE NICKEL EXPORTS

Expected That Nickel Question Will be Taken Up at Session Now On

Ottawa, Ont.—It is expected that legislation regulating the export of nickel ore and nickel matte will be passed before the House adjourns. The measure will not be altogether a war measure, but rather an action to give rise to a new industry within the Dominion. The legislation will most probably take the form of an export tax, which will prohibit the millions of dollars worth of matte being shipped to New Jersey and other refining centres.

Away from the fact that under the present system a small amount of the ore may reach Germany, the refining in Canada will be a source of income to the Government and the creation of a new industry.

Zinc and copper are now being refined here, and with the demand for Canadian munitions, these two industries have already reached, it is said, very large and profitable proportions. It is stated that instead of importing about two million dollars in zinc annually, Canada is now in position to export this commodity. The same situation, it is claimed, is developing in copper.

In 1915 the exports of nickel matte amounted to nearly $7,000,000, about one-third of which found its way to Great Britain.

The Sudbury industry is controlled by the International Nickel Company, with refineries in New Jersey, where most of the Canadian nickel matte has been shipped.

VICE-PRESIDENT OF NORTHERN ELECTRIC COMPANY GOING OVERSEAS

At the outbreak of the war, Captain Sise, who was formerly connected with the Victoria Rifles, joined the Canadian Officers' Training Corps, which is affiliated with McGill University, when the McGill Auxiliary Battalion was formed.

CAPT. PAUL F. SISE

Vice-President and General Manager of the Northern Electric Company

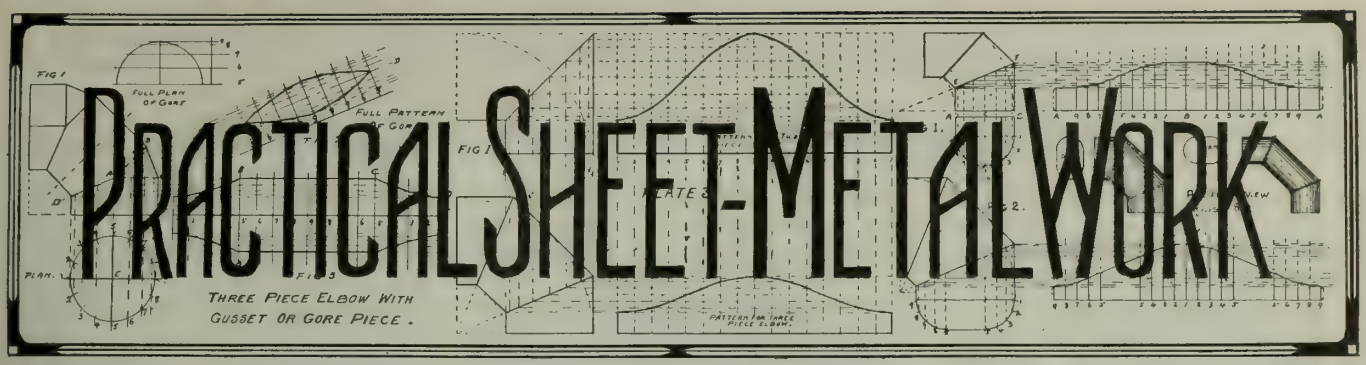
Captain Sise was in command of "D" Company, and later of "A" Company, McGill Contingent, Canadian Officers' Training Corps.

Because of the high executive position which Captain Sise held with the Northern Electric Company, and the responsibilities which such a position entails, his decision to enlist for overseas service not only sets a splendid example to his fellow countrymen, but typifies the high standard and calibre of men who are answering the call of their country in time of need.

Captain Sise was born on November 10th, 1879. He was educated at Bishops College School, Lennoxville, Que., and at McGill University, from which he graduated as B.Sc. He was one of the organizers of the University Club in Montreal, is a member of the St. James Club, and a governor of the Western Hospital

T. Eaton Co. New Branch

Saskatoon.—The T. Eaton Company will open a branch here on February 1, according to announcement made by R. C. Scrivenus, who is to be local manager.



BY THOMAS STANFIELD

WHILE the writer of this sheet metal course does not intend to overburden the student with too much geometry it is necessary to have some little knowledge of geometrical problems and theories.

One thing which is very essential in order to become a fairly successful sheet metal worker is to be able to picture in one's mind's eye the article which is required.

In sheet metal work it would be well to picture every article as something solid. For instance, note the various designs shown in plate 1. The drawing marked A in every case is the elevation. Now an elevation is the thing we see, or one side of it. It may have any number of sides, all of which may be different. But to be of value an elevation must be accompanied by a plan or number of plans. See drawings marked B.

The student should also try to train his mind to picture a perspective view. The examples marked C, show the perspective view of A and B. Perspective is the application of geometrical principles to drawing on a plane surface true resemblances or pictures of objects, as the objects appear to the eye from any given distance and situation.

Before going into these questions it will be well to be acquainted with a few of the geometrical terms and definitions in use in this particular kind of work.

A Point

A point has neither length, breadth, or thickness, it merely defines location.

A line is what might be called the connection of one point to another. It has length but not breadth. If a straight line, it is defined as the shortest distance between two given points.

A Broken Line

A broken line is realy a number of short lines. Broken lines are sometimes called dotted lines.

A Vertical Line

A vertical line is a line perpendicular to the horizon such for instance, as would be made by a line hanging from the sky, and having something attached to it.

A Horizontal Line

A horizontal line is one which would always appear parallel with the surface of an expanse of water, or with the horizon from which the word horizontal is derived.

Parallel lines are lines which throughout their whole length are equidistant from one another.

Perpendicular Lines

Perpendicular in its ordinary sense is equivalent to vertical. In geometry however, a line is perpendicular to another line when it is drawn at right angles to it.

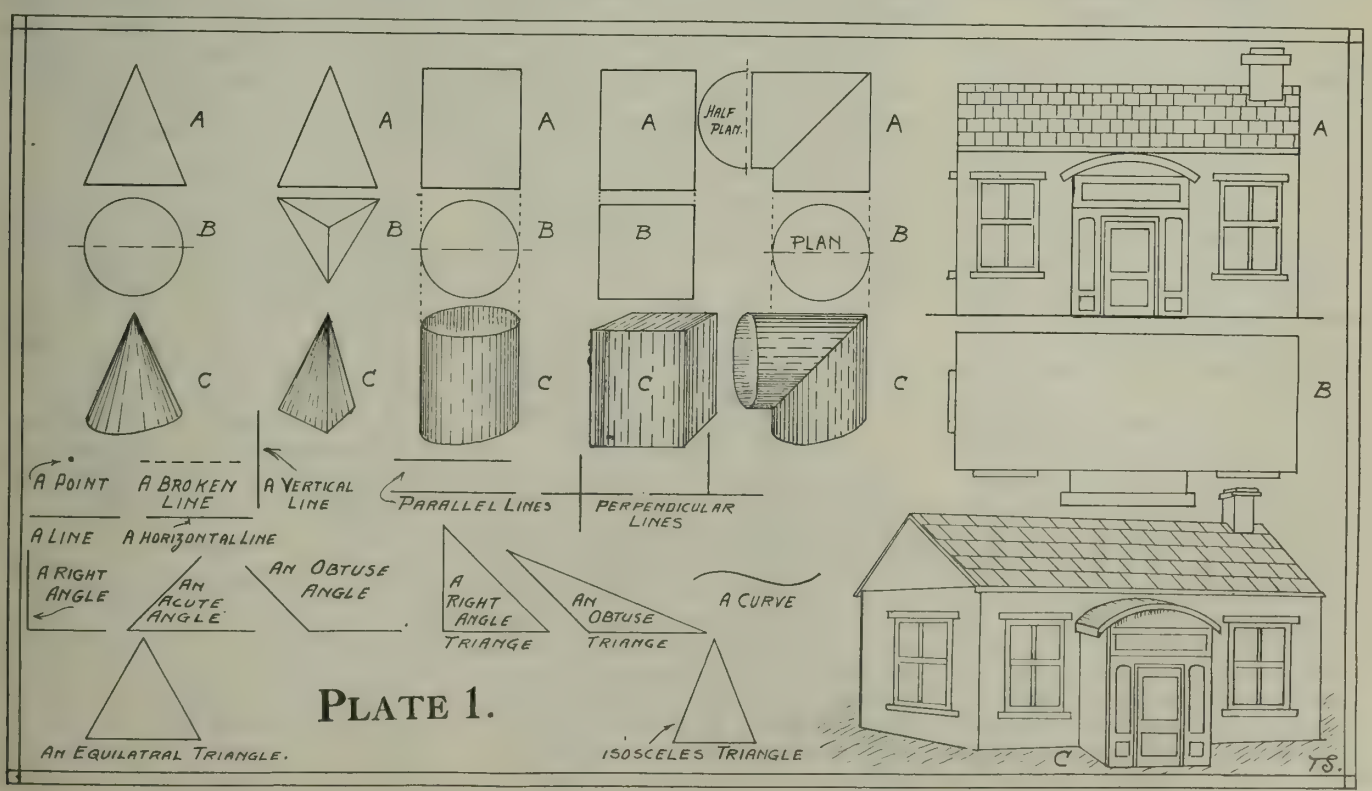
A Curve or Curved Line

A curved line is a line which differs from a straight line in that it is constantly changing in direction.

Angles

Any straight line drawn so as to meet another line will form an angle.

(Continued on page 34.)



To Prevent Germany Regaining Trade

British Trade Commissioner to New Zealand States That British Government is Formulating Plans to Maintain Empire Markets for Empire Products

THAT the plans of the British government to prevent the powers of Central Europe from regaining the trade they formerly controlled after the war are taking definite form, is stated by R. W. Dalton, British Trade Commissioner to New Zealand, who this week passed through Canada enroute from New York to Vancouver on the land "legs" of his journey from London to his colonial post. Just what the plans are has not yet been made public but they will embrace some scheme for the up-building of business between Great Britain and her colonial possessions and between the colonies themselves. Whether this drawing together of the Empire interests will depend upon the strengthening of national sentiment and open price competition or whether there will be some general plan of protective tariffs is a point upon which Mr. Dalton did not express himself definitely. However, his statement goes far to confirm the idea prevailing in Canadian trade circles that to aid the recuperation of industrial conditions after the war there will be evolved a broad and comprehensive tariff scheme to protect and encourage trade not only between Great Britain and her colonies but between all the countries of the Allied nations.

The opinion grows that upon steps to be taken between now and the end of the war will largely depend the great permanent industrial development of the nation's to-morrow. And that industrial development will mean much in the regaining of what has been lost during the conflict. The prosperity of to-day which manufacturers are enjoying is a development of war conditions purely and means not only war goods but war prices. When the campaign comes to a close the orders will cease and there will follow a general readjustment to normal trade demands; there will be a call for different goods and there will be keener competition as to price. It is looking to this day that various interests and organizations are now taking careful steps to establish market relations which will continue and prevail in the new era.

It had been the intention of Mr. Dalton to spend a short time in Canada studying conditions here but his steamer was delayed in arriving at New York and to make connections at the Pacific coast he had to make a rush trip. In an interview at New York he stated that in addition to ascertaining the needs of the country and products purchased from Germany he would endeavor to stimulate trade between Canada and New Zealand.

The New Zealand market presents good possibilities for Canadian manufacturers and steps have already been taken towards their development. As has been previously reported the Export Association of Canada has employed a representative to look after its interests in that country and has already secured some substantial orders. Also the department of Trade and Commerce has important connections.

German Trade to Cease

In an interview with the New York Journal of Commerce, Mr. Dalton referred to the favorable results which have attended the efforts of the British trade commissioners and stated that they had succeeded in considerably increasing the exchange of commodities between the colonies, although much time had been occupied with study and investigations intended rather to build for the future than to produce immediate results. Regarding the work being done at present he said:

"Though at the present moment industries in the United Kingdom are so busy on war work that they can give little, if any, time to the export trade, trade commissioners have an important work to do in preparing the way for development after the war. There seems no reason why trade which formerly went to Germany should not be diverted; in fact it is apparent that German trade with the colonies will cease.

"After the war the work of the trade commissioners will be increasingly important as it will be necessary to maintain trade in the channels which have been opened. Efforts are being made by Germany to regain the trade she has lost and it will require great vigilance to prevent her doing so directly or indirectly."

REVIVAL IN MILL SUPPLIES

Saw Mills in Western Canada are Preparing for Extensive Business, and are Buying Supplies

The large crop in Western Canada in 1915 has had an influence on the hardware trade directly, but there are many instances of its beneficial effect indirectly. For instance, the farmers being in the possession of considerable money, are planning to do considerable building this year, in fact, they will be among the largest builders in the West this year. This will result in a big demand for cheaper grades of builders' hardware. It will also mean a heavy demand for lumber.

Saw mills of the West are just now undergoing a revival unparalleled for four or five years. For a long time the lumber business has been in a sad state of affairs, but now that business is in sight, owners of saw mills are making extensive repairs, buying supplies of all kinds, especially belting, and are installing considerable new machinery. Some idea of the change that is taking place can be gauged from the fact that during the past year, only about four or five of the large saw mills in Manitoba and Saskatchewan were in operation, whereas this year there is only one as far as can be learned, which will not be operating. Besides the large mills, there will be scores, perhaps hundreds of small saw mills operated by farmers as side lines. The latter especially will result in considerable business to the hardware dealer in the shape of belting, logging chains, files, oils, saws, etc.

Investigation shows that stocks of these lines carried by hardwaremen throughout the West have been all shot to pieces during the past year, the tendency last fall being to buy only what was absolutely needed. The sale of carpenters' tools fell off considerably, and stocks are so low that if there is any building done during 1916 to amount to anything, it will be necessary for dealers to replace their stocks.

PRACTICAL SHEET METAL COURSE

(Continued from page 33.)

It may be a right angle, acute angle or obtuse angle.

If one line meets the other perpendicularly the angle so formed is called a right angle. If the angle so formed is smaller than a right angle it is called an acute angle and if larger than a right angle it is called an obtuse angle.

Triangle

A triangle is a figure bounded by three straight lines, not necessarily of equal length. If one of the angles formed by two of these lines is a right angle the triangle is called 'right-angled,' if one of the angles is obtuse, it is called 'obtuse-angled,' and if all three angles are acute it is called 'acute-angled.' If the three sides are all equal the triangle is 'equilateral,' if two sides are equal it is called 'isosceles,' if all three sides are unequal it is called 'scalene.'

Travelers Become Benedicts

J. J. Phillips, well known to the trade as Dick Phillips, who covers Saskatoon territory for the Winnipeg Paint & Glass Co., Ltd., was married recently to Miss Lock, of Winnipeg, W. S. Bate, who travels out of Moose Jaw for the same house, was married last week to Miss Bruce, of Mapinka, Man.

WHAT OTHER PAPERS SAY

GETTING DOWN TO A CASH BASIS

(From Industrial Canada)

Paradoxical as it may sound, some of the worst legislation, from the standpoint of law, ever placed upon the statute books of Saskatchewan, has proved to be best from the standpoint of results.

The Legislature of Saskatchewan is nothing if not paternal. Its constituency is made up largely of farmers, over whose interests it watches as jealously as a hen with one chicken. It looks upon the manufacturer as the farmer's traditional foe, because from the beginning of time in the West the manufacturer has sold the farmer implements on credit and has afterwards had the effrontery to ask for his money.

To protect the farmer who had thus gotten himself into the clutches of the implement maker, the Legislature has from time to time passed laws, some to make it easy for the farmer to void a contract, others to make it difficult for the manufacturer to repossess. Emboldened by success, it last year passed an act which had the effect of wiping out a great deal of security which manufacturers had taken to protect themselves against past due debts.

Some time previous to that modest piece of confiscation implement makers had begun to feel that they were pursuing a wrong policy by selling on such liberal terms of credit in the West. After the passage of the act referred to they more than felt that their policy was wrong—they knew it. Suiting their actions to their convictions, therefore, they decided upon a change of policy. Commencing 1916 they will not only be more careful whom they sell to, but will demand of even the most favored purchaser a larger cash payment and shorter terms on the balance. Eventually they will hope to put the business on a strictly cash basis.

After all, why shouldn't farmers (perhaps it would be better to say why shouldn't some farmers) pay cash for their implements? When they go to buy a motor car they have to pay cash, and they do it without complaining. The money they spend on that motor car is money that their implements have enabled them to earn, yet like as not they will buy the car for cash before they have the implements paid for.

There's no denying the fact that credit is a necessity to some farmers, and that without credit the West would never have been what it is to-day. But there's no denying the alternative and hardly less important fact that the generous credits given by implement manufacturers throughout the West have encouraged the farmers in very bad habits.

Those habits will never be corrected by statutes of the kind that Saskatchewan passed in 1915, but they can and will be corrected by the measures of self-defence which these same statutes are now forcing manufacturers to take.

* * *

ADVANCING WAGES

(From Buffalo Express)

Three years ago the United States Steel Corporation voluntarily increased the wages of its employes. Another increase of 10 per cent. has just been announced. This will add, it is estimated, about $15,000,000 to the annual payroll, as against about $12,000,000 added by the last increase. The difference is caused mainly by the larger number of men employed by the corporation. There are now about 240,000 on the books, as against 229,000 in 1913. In 1914 the number had dropped to less than 180,000 with the slump in business. A year ago the directors were considering whether they would better not decrease wages, so dull was business, but they decided that the wise thing to do would be to pass the dividend on the common stock. It is certain that the great majority of holders of common stock of the corporation could better do without dividends than the workers could do without wages.

It remains to be seen what effect this increase will have on wages in the so-called independent plants and on wages in general in the big industries. A number of the independent steel companies already are hampered by strikes, while the indications are that more demands are to come. The increase by the United States Steel Corporation naturally will be taken by workers in the iron and steel industry as the basis for their demands. They will say that if this corporation can afford to increase wages, their employers can. Judging from the reports of the business that is being done by the independent companies, it is not apparent that the employers will have very forceful arguments to the contrary.

* * *

TAIL-TWISTING

(From New York Commercial)

Twisting the British lion's tail is still the favorite pastime of some American politicians, a few of whom have seats in the United States Senate. In the discussion of our international relations some of them seem to forget that we are bound by one of the so-called Bryan treaties to submit to arbitration all disputes with Great Britain and not to declare war within one year after making a protest. If this treaty is anything more than the now proverbial "scrap of paper" some of this tail-twisting is out of place.

One Senator, who is usually fair and broad-minded, recently said that we gave to Great Britain the same voice in the control of the Panama Canal that we ourselves exercise, and that we have thereby submitted to a violation of the Monroe Doctrine. Before we started to construct the Canal we made a new treaty with Great Britain to get rid of the Ashburnham treaty, but the new treaty gives Great Britain no more to say about the Panama Canal than China or Norway possess. It is open to all on equal terms, but the United States Government has the sole power and right to fix canal tolls and other terms. The only limitation imposed on us is to treat all alike.

It is the height of folly to say or do anything that will create ill-feeling. In such a war as this all the belligerents and most of the neutrals are on edge. We should maintain our rights with firmness and dignity, but no man in public office, be he President, Senator or Representative, should pour oil on the flames by inconsistent words. We have avoided a break with the Teutonic Powers who cannot help or hurt us much while the war lasts and the Allied fleets dominate the seas. It would be folly to quarrel unnecessarily with other Powers that are buying more from us than we ever before sold, and who could deflect their purchases to others and cripple our foreign trade by simply withdrawing their ships from our ports. We have gained far more than we have lost as things stand. Had Germany been able to keep her warships at sea we would be selling little to those who are taking the bulk of our exports. We have chosen to take the easiest way in dealing with the belligerents so far, and it is to be hoped that Congress will not indulge in too much tail-twisting for political effect on the coming elections.

* * *

AN IMPERATIVE DUTY

(The Financial Post.)

Two points of the utmost importance to the Dominion were dealt with by Mr. Gooderham, the vice-president of the Bank of Toronto, at the recent annual meeting, and they had reference to the increase of our exports and limiting the issue of Dominion notes to limits strictly set by the needs of commerce. The Financial Post is very glad to direct its readers to a study of Mr. Gooderham's remarks, as they will do much to offset the effect of the glib economic heresies to plausibly disseminated by some influential newspapers. After indicating the extent of Canada's resources, Mr. Gooderham states that "To assist in increasing exports from the above sources, is, for the bank, an imperative duty." It is, however, for the public to do its part in placing the banks in a position to do for the country what is the national wish that it should do.

What the banks can do in keeping the wheels of commerce moving, as well as our armies in training and in the field, is limited by the resources the public place at their disposal. Banks, like human beings, have their limitations, as thus so well accentuated by Mr. Gooderham:

"Our next most important duty as bankers is to aid the Government in financing. There is a limit, of course, beyond which we cannot go. Our resources are limited. We can only lend the surplus that depositors provide, and for this we must look to the individuals composing our population. The Banks have not yet arrived at the stage where they can undertake to provide all the capital that is required for the development of our natural resources. The country must continue to borrow abroad, in such markets as are open to it, such sums as may be required for future developments. Our banking deposits are not equal to so great a task, and they must not be unduly depleted so as to lessen our working capital.

"Neither can we weaken our financial standing by relying upon increased issues of Dominion Government currency. Our currency, whether of Bank notes or Dominion Government notes, should, in its practical working, be limited to what the country requires for its daily needs in enabling transfers of commodities to be easily and conveniently carried out. Anything beyond that should be provided for by fixed capital.

"The Banks will, therefore, be dependent upon the continued increase in deposits to enable them to continue to aid in financing the large requirements ahead of us, and the necessity is thus laid upon every one to share in this."

The above is but an extract and our readers will find it well worth while perusing the full text of Mr. Gooderham's remarks. He possesses the gift of avoiding technical language in clearly dealing with a subject not as well understood as it ought to be.

* * *

WINTER BUILDING

(From the Heating and Ventilating Magazine)

With "Winter Building" as a slogan, a campaign has been started to encourage building as an all-year-round proposition. The point is made that the dropping off of general building activity during the cold weather is due more to force of habit than to any more substantial cause. In support of this statement opinions have been obtained from architects and manufacturers of building material, indicating that the architects are as anxious for more winter building as the building supply manufacturers. A manufacturer of asbestos sheathing paper and of materials used in the installation of heating plants wrote that "without doubt an increase in winter building would give improved conditions to all material houses," and endorsed the proposal to influence the architects and builders toward a wider activity during the cold season.

Two manufacturers, while personally endorsing the plan, believed the old bug-a-boo, "there always has been a dull season and there will be one," and added, "the opinion seems to be that the bulk of small building will be held up during the cold weather, however desirable it may be to extend it." The consensus of opinion, however, was to the effect that any manufacturer entering on such a campaign would benefit the architect and contractor, as well as the owner.

One of the most interesting points, from the standpoint of the heating engineer, is a statement regarding the effect of summer dampness on the interior woodwork of buildings. It was claimed, for instance, that the liability of the woodwork to shrink or swell in the winter time is far less than in summer, when the comparatively high moisture content of the air has the effect of swelling such woodwork, with the result that when the cold weather comes, accompanied by the lack of

(Continued on page 46)

EVENTS IN THE TRADE

Removed to New Building

The Canadian Eveready Works, flashlights and batteries, have removed to the new Purman Building, 263-265-267 Adelaide street west, Toronto, Ont.

Small Fire

Hamilton, Ont.—The E. T. Wright Company's premises were damaged by fire to the extent of $500 on January 18th.

Business Changes

Orangeville, Ont.—S. A. McCartney, hardware and novelty merchant, has sold his stock to Fred Faulkner.

Carman, Man.—W. C. Hemenway, hardware merchant, has sold his stock to S. J. Staples & Son.

To Locate in Regina

Regina.—The city's negotiations with the Imperial Oil Company, to locate a refinery here, are practically closed.

The company, it is expected, will erect a $500,000 refinery with storage tanks throughout the country to enable them to meet the increasing demands for gasoline.

Other cities in Western Canada were considered by the oil company for the location of their proposed new plant.

James McInvish will be district manager.

New Firms

Montreal, Que.—J. A. Normandin has opened up his hardware specialty store at 994 Rue St. Denis, Montreal, and established a complete electric and a sporting goods line. He plans with the spring to have a full line of auto accessories.

Personal

D. J. Hutchinson has been appointed traveller for the Cushman Motor Works of Canada, Ltd., 288 Princess Street, Winnipeg, and will call on the trade during the next few weeks with the Wagner hardware specialties and Cushman lightweight engines.

Geo. H. Williamson, of the Miller-Morse Hardware Co., Winnipeg, is severing his connection on February 1 to join the staff of the Merrick-Anderson Co. Mr. Williamson will take charge of the catalogue and advertising department of the latter firm.

H. V. Morse, of the Morse Hardware & Lumber Co., Swan River, Man., was a recent visitor in Winnipeg.

C. W. Hartman, hardware merchant, Midland, Ont., was recently elected to the school board.

A. J. Wright, hardware merchant, Glencoe, Ont., was recently elected as councillor.

T. Dafoe, hardware merchant, was recently elected as councillor.

A. M. Towe, London, Ont., representing Pinchin, Johnson & Co., of Canada, Toronto, is making a trip through Western Canada in the interests of the firm he represents.

C. W. Conn, Tillsonburg, Ont., president Ontario Retail Hardware & Stove Dealers' Association; W. F. Macpherson, Prescott, Ont., secretary, and H. Occomore, Guelph, Ont., attended a meeting of the Advisory Committee of the association held at the King Edward Hotel, Toronto, during the week.

R. C. Misson, manager Montreal branch of the Sherwin-Williams Co., of Canada, Ltd., and W. J. Chambers, chief chemist of the company, were visitors at the company's Toronto branch this week.

J. R. Cote, of the Walkerville Hardyare Co., Walkerville, Ont., was a business visitor in Toronto during the week. Mr. Cote spoke optimistically regarding the future business outlook in the Walkerville districts.

Mr. Brownlee of Brownlee & Atkinson, hardware merchants, Unionville, Ont., has been elected reeve of the municipality. Mr. Brownlee, who is 29 years old, is one of the youngest hardware merchants holding a position of this kind.

Death of John Hall

The death occurred recently at St. Louis, Mo., of John Hall, the veteran sales manager of the Simmons Hardware Co., St. Louis, Mo. Mr. Hall suffered for a long period from a painful illness, brought on by Bright's disease.

Mr. Hall had a wide circle of friends among the hardware fraternity in Canada, who will regret to hear of his death.

Winnipeg Notes

Geo. Germain, of Germain Bros., Tugaske, Sask., passed through Winnipeg last week on his way to Altona, where he spent the week-end with his brother.

R. C. Black, of Hewitt & Black, Ltd., Medicine Hat, Alta., passed through Winnipeg last week on his way East.

Walter Bate has joined the sales staff of Merrick-Anderson Co., Winnipeg, and will represent them in South-Western Saskatchewan.

Geo. A. Merrick, of Merrick-Anderson Co., Winnipeg, is leaving for an extended trip to California. He will be accompanied by Jos. A. Merrick, who expects to return to Winnipeg shortly.

Frank Brunell, of La Fleche, Sask., has been in the city on a buying trip.

T. Greenside, of Fleming, Sask., is in town this week, calling on the jobbers.

Mr. E. C. Fawcett, of Stoughton, is in town, placing his orders for spring. Mr. Fawcett has recently joined the ranks of the benedicts.

Cleveland Stone Annual

Stockholders of the Cleveland Stone Co., recently elected the following directorate: Commodore George H. Worthington, J. H. Wade, E. A. Merritt, Gen. George A. Garretson, L. A. Murfey, William G. Dietz, Andrew Squire, former Judge W. B. Sanders, H. W. Caldwell, J. R. Miller and C. W. Walters. The board elected the following official staff: Mr. Walters, president; Mr. Wade and Mr. Caldwell, vice-presidents; Mr. Miller, secretary-treasurer, and A. V. Brown, assistant secretary. It was stated at the meeting that the outlook for business is very good with the only fly in the ointment the possibility that steel mills will be hard put to deliver sufficient structural, thus holding back other industries.

A Correction

On page 38 of last week's issue of Hardware and Metal, it was stated in error that A. M. Smith, of the McClary Mfg. Co., London, Ont., had been elected president, Canadian Hardware Manufacturers' Exhibitors' Association. The item should have stated that Mr. Smith had been elected president of The Canadian Stove Manufacturers' Association. Adam Taylor, of the Taylor-Forbes Co., Guelph, Ont., is president of the Canadian Hardware Manufacturers' Exhibitors' Association. The latter organization will hold a hardware exhibition at London, Ont., in June. Hardware and Metal regrets the error, and inserts this explanation in order to correct any misunderstandings which may have resulted from the item which appeared last week.—Editor.

Death of Alexander Ramsay

Death Came Suddenly to the President of A. Ramsay & Son Co., Montreal—Developed and Gave Important Position to Paint and Oil Company

Montreal, Que.—Alexander Ramsay, president of A. Ramsay & Son Company, died suddenly at his home, 495 Argyle Avenue, Westmount, early Friday morning, January 14. Mr. Ramsay had spent the day at his office on Thursday, and was apparently in perfect health when he reached home. Early Friday morning he experienced some distress, called one of his sons, and then sank rapidly. Major F. S. Patch, his son-in-law, was called, but the doctor's efforts were unavailing.

Mr. Ramsay was born in Glasgow, Scotland, 76 years ago, was educated in Montreal, and began his business career in the paint and oil house established by his father. When his father died in 1867, Mr. Ramsay became sole proprietor, eventually incorporating the business under the title of A. Ramsay & Son Company. Under his direction the business was largely increased, and the house has long been one of the best known in its line in the Dominion.

Mr. Ramsay was a member of the Montreal Board of Trade, the Royal Montreal and Beaconsfield Golf Clubs, the Heather and Caledonia Curling Clubs, and was past president of the Royal Caledonia Curling Club of Scotland. He was a justice of the peace, and has been a councillor of Westmount. He was highly respected for his integrity as a business man.

In his earlier days Mr. Ramsay served as an officer in the Royal Guards, and also in the cavalry, and was called out at the time of the Fenian Raid.

In 1868 Mr. Ramsay married Miss Lydia Clark, daughter of the late James Clark, of Bloomfield, Ont. He is survived by his widow, three sons and two daughters: A. Frank Ramsay, W. A. Ramsay, W. B. Ramsay, Mrs. F. S. Patch, and Miss Lydia Ramsay, who is nursing in Cannes, France.

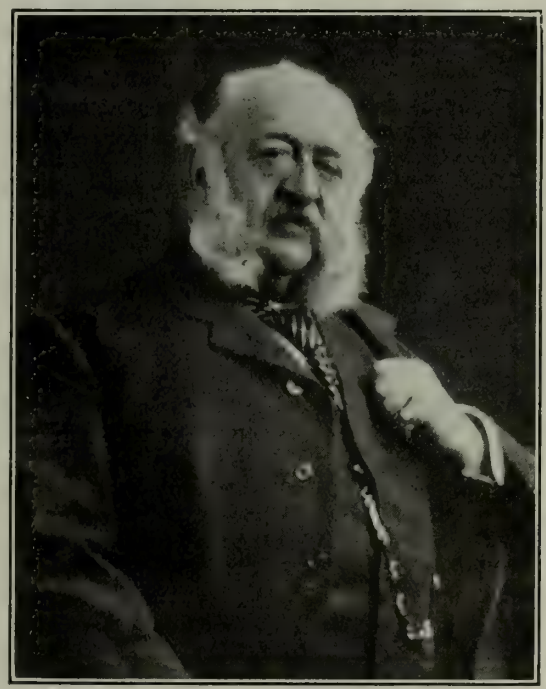
The funeral of the late Mr. Ramsay was held on Saturday afternoon, Jan. 15. There were many beautiful floral tributes. A large number of well known business men, prominent in the paint and hardware trades, attended the funeral.

R. W. Ashcroft Joins the United States Rubber Company

R. W. Ashcroft who for some time filled the position of manager of publicity for the Canadian Consolidated Rubber and associated companies, has accepted an appointment to a similar office for the United States Rubber Company of New York. Mr. Ashcroft's ability as a publicity manager, has several times been given signal recognition, the most recent honor being the second prize of $500 cash in the competition for ideas and suggestions conducted by the Rice Leaders of the World Association in which the best publicity experts in the United States took part.

Taken On New Agencies

Toronto, Ont.—T. Mortimer, manufacturers' agent, 64 Wellington Street E., Toronto, has taken on the agency for Canada of the Camillus Cutlery Co., Camillus, N.Y., manufacturers of pocket knives, and also the agency for the Atlas Shear Co., Bridgeport, Conn., manufacturers of cast shears and ladies' scissors.



LATE ALEXANDER RAMSAY

Montreal, Que.—Saunders & Wainwright, St. Nicholas Building, announce that they have been appointed Eastern Canadian agents for the Robeson Cutlery Co., of Rochester, N.Y. The Robeson Cutlery Co. manufacture a complete line of pocket cutlery.

Obituary

Port Hope, Ont.—The death took place here of Richard Dunn, who for many years carried on a tinsmithing and plumbing business.

To Add Auto Accessories

Robinson & Co., Ltd., Main and Portage Avenues, Winnipeg, Man., one of the large department stores of that city, opened a sporting goods department a few weeks before Christmas, and met with such success, they are considering the addition of a number of new lines, including automobile accessories, guns and ammunition, and fishing tackle. J. E. Smyth, who was formerly connected with a business in Norwood, Man., is in charge of this department.

C. A. L. Wilson, manager of the hardware department of Robinson Co., Ltd., Winnipeg, will leave shortly for a buying trip in the East, and will be away several weeks.

Try to Grow Hemp

Calgary, Alta.—Extensive experiments in the growing of hemp for binder twine and cordage will be undertaken this year in the three provinces, Alberta, Saskatchewan, and Manitoba. The information was given out at the Canadian Pacific Industrial Department.

"Millions of dollars have been expended in the Canadian West for binder twine," said John F. Sweeting, Industrial Commissioner, "and if hemp can be properly grown here, it would mean a saving of that sum to Canadian industry."

Mr. Sweeting explained that experiments in a high-grade hemp, the seed of which was imported from Kentucky, were made in growing last season, but that owing to the fact that most of it got hailed out, the results of the experiments had not been a satisfactory test. The growing of hemp in the experiments of the coming season will be made in the three Western prairie provinces for the purpose of ascertaining which provincial climate is best adapted to the growing of hemp, what qualities are produced in the product in the various climates, and which are the most advantageous.

National Cash Register Company Get Dominion Charter

The Canadian Gazette under its heading "New Charters," states that the National Cash Register Company have received a million-dollar charter.

Since the erection of its huge works in Toronto the Canadian branch has been fostered by the mother industry at Dayton, Ohio. There will be practically no change in the management under the new charter. H. J. Daly, who was manager of the Canadian branch, becomes managing director of the new corporation; W. J. Irvine is assistant manager; C. H. Rooke, office manager, and W. L. Tobias, factory superintendant.

The entire $1,000,000 capital is paid up.

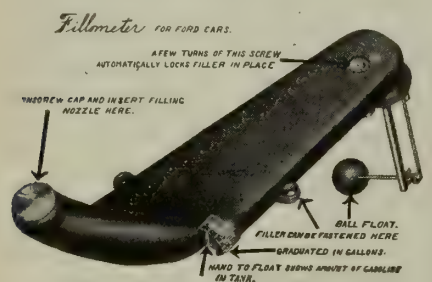
J. A. Howse, Strassburg, Sask., has purchased the stock of Marshall & Elliott. The latter firm has been in business about a year.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

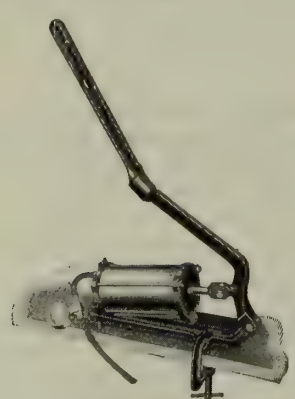
FILLOMETER FOR FORD CARS

The Apex Electric Manufacturing Company, 1410 West 9th street, Chicago, Ill., are placing on the market an appli-



Fillometer for Ford Cars

ance for filling Ford car gasoline tanks without, it is claimed, necessitating the removal of the front seat. The fillometer is an iron casting, finished in baked black enamel. It is said to be neat in appearance and when once fitted to the tank need never be removed. It is fitted with a gauge which can be easily read from the driver's seat. To fill the tank all that is necessary is to remove a cap from the outer end of the fillometer and insert filling nozzle. The shipping weight of the fillometer is ten pounds. The makers claim that the device is a great convenience, particularly in stormy weather.

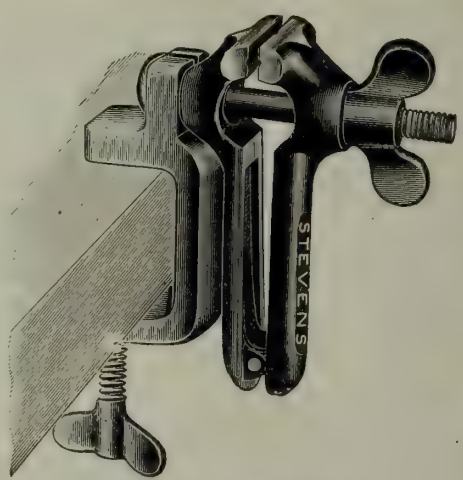


Yankee Auto Pump

The Apex Company have also placed on the market a new motor car pump. The manufacturers claim it to be the only pump a woman can handle. It is equipped with a gauge and can be folded to fit in the tool kit. It operates by means of a lever.

COMBINATION HAND VISE

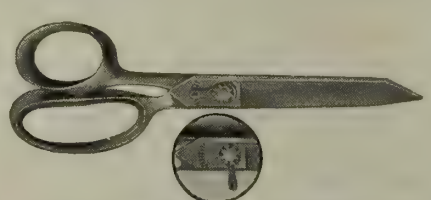
A new hand vise especially adapted for motorists and the repair man is being placed on the market by Stevens & Co., 375 Broadway, New York, N.Y. It is made so that it can be fixed in a moment to the running board, or removed in a few seconds. The vise is made of drop forged steel four inches over all, jaws extra hardened, 1⅛ inches wide and opening 1⅝ inches. The tension of the jaws is automatically maintained by a small flat spring concealed in the handle. A large wing nut permits setting the work tight with little effort.



Combination Hand Vise

AUTOMATICALLY ADJUSTED SHEAR

Shears without a screw, which can be automatically adjusted by a lock-nut and lever, without the aid of tools, simply using the thumbs and fingers, have recently been placed on the market by the H. Clauss Mfg. Co., Fremont, Ohio. They state that these shears have been so perfected that the bolt and the lock-nut, as shown in the accompanying illustration, hold as firmly as the old screw-bolt and at the same time can be adjusted at will for light or heavy cutting by moving



Automatically Adjusted Shear

the lever to the left or right. The adjusting features of the lock-nut, it is said, take up any wear of the bolt head so that the shears are always in trim for use. Another feature of this Improved Lock-Nut Shear is said to be the prevention of interference of children and others with the adjustment, by setting the lever and blades in the proper position and closing the blades, thus locking the shears at the bolt. Prices are about the same as that of first-class screw-bolt shears with a slight additional charge for royalty and the adjustment.

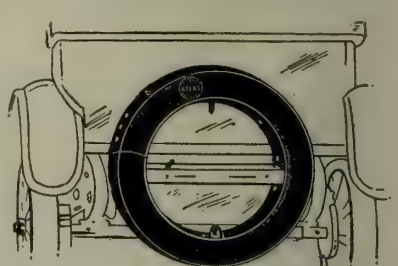
"ATLAS" TIRE COVERS

The Atlas Specialty Company, 217-221 North Michigan avenue, Chicago, Ill., are starting the manufacture of holder and rim tire covers made in flexible black enamelled duck. These covers run in various sizes to accommodate the different size tires. The cost ranges, according to size.

The same firm is turning out "Nu-covering" for auto tops. "Nu-covering" takes the place of old and shabby cloth

Nu-covering for Autos.

tops. The old cloth is removed, and the frame re-covered with "Nu-covering," giving the car top an entirely fresh ap-



Atlas Tire Cover

pearance. "Nu-covering" consists of roof, quarters, backstays and back curtain with celluloid light, and is made of 32-ounce rubber. All fasteners and trimmings are furnished.

The company also make Atlas side curtains for Ford cars. Side curtains are sometimes lost. Atlas curtains are claimed to be made of standard Ford equipment.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

The Markets at a Glance

ALTHOUGH the prices of many hardware lines are now abnormally high, the outlook is that further advances will take place in the near future. Owing to the present condition of the markets as outlined in the reports which follow, hardware buyers have to exercise extreme caution when purchasing certain lines which rapidly run into money and are at present abnormally high in price. This week, like almost every week during the past few months, has its budget of important price changes. There is considerable strength in the primary metal markets. There is a shortage of many iron and steel products. Among the many price changes this week are advances on Manila and sisal rope, African hemp, sash cord. Bolts, nuts, drills, copper rivets, boiler plates, pipe fittings, sash weights, washers, wringers, washing machines, butts. Many other lines have advanced in price during the week. Higher prices are expected in the near future on ready-mixed paints, screws, files, roofing and other lines. January business, so far, has been excellent. Most jobbers report that business so far in 1916 is considerably ahead of business during the corresponding period of last year.

MONTREAL

MONTREAL, Jan. 20.—With the continued upward movement of the iron and steel markets and the products and manufactures of these metals, and with the travellers actively pushing their spring campaigns, the booking for the coming season is assuming large proportions. And not only are the bookings heavy but there is a brisk movements of general goods,—with staples predominating,—for immediate delivery. This indicates that the trade is restoring its faith in the future and perhaps even doing something in the way of speculating on price movements. Altogether the business being transacted is very much better than during the same period of last year.

There are certain indications that the situation in the hardware trade is becoming rather an awkward one. On the one hand there is the continued upward movement of the market with prospects that it will continue and on the other hand there is the fact that prices are already abnormally high and that a reaction is a possibility. Should the war continue for a year or so there will undoubtedly be a shortage in many lines, in fact wholesalers do not see where they are going to meet demands. But should there be any important change such as the development of prospects of an early peace—there would undobtedly be a reaction because the present position of the various markets is abnormally high.

Generally speaking the outlook is that advances are to continue—there is nothing else in sight—but the rising level puts the retailer in a position where he must exercise caution in the extent of his purchases and not put in stocks out of proportion to his capital. The retailer who protects himself is the one who makes good profits but there may be such a thing as over-doing it.

The advances this week include black sheets, Canada plates, pipe, barb and other galvanized wires, nuts, drills, bar, refined, horse shoe and Norway iron; mild, band, sleigh shoe, domestic, machinery, tire, toe calk, and spring steel; copper rivets, boiler plates, boiler tubes, sash weights, pipe fittings, iron-washers, stoves and furnaces and old materials.

Higher prices are expected in the near future on: sheets, pipe, nails, bolts, screws, roofing, files, and wringers as well as manufactures of iron and steel generally. Metals have been comparatively quiet although generally firm; tin is quoted fractionally higher.

Tin Slightly Higher.—The tin situaction locally is fractionally higher and very firm. The influence of the London market, where there has been an increase for spot and a decline for futures, appears to dominate, and New York is also half a cent up. New York understands that all shipments during January from the East Indies must come via London and, on arrival at the latter port, there will be permits issued for trans-shipment to America. Should the British government feel that their home security for the supply of tin is impaired they would probably hold supplies. Montreal quotation: 46½c-47c — very firm.

Spelter is Firmer.—While the local situation as regards spelter is unchanged, so far as quotations are concerned, the market is firmer on the influences of advances scored in New York. However, the American situation is comparatively quiet at writing, following a flurry brought on by the tie-up in the railroad situation. New York looks for the quietness to continue for a few days with the possibility of slightly earlier quotations, with the embargo on shipping reducing actual consumption and thus acting as a market boomerang. Montreal quotation: 22c-22½c—firm.

Lead Steady and Quiet. — The lead market is practically unchanged, with the American Trust maintaining the advance recorded a couple of weeks ago and second hands and independents making offerings from 5c to 10c below. London has recently shown a recovery following, the dip caused by the government regulation of trading, and New York has been somewhat firmer on this influence. Montreal quotation: 8c-8½c —steady.

Copper Somewhat Firmer.—An advance of half a cent since last report is indicated in the quotations on the American market and this has had the effect of making the situation somewhat firmer here, although there is no actual change in the quotations. So far as the Eastern States are concerned an important factor has been the recent action of the New Haven railroad in declaring an embargo against certain freight shipments as the result of a congestion of traffic. This has already been responsible for the closing down of several plants. Montreal quotation: 27c-27½c —firm.

Antimony.—There is little change in the situation as concerns antimony and the quotations remain unchanged. American markets are fractionally higher on a revival of a certain business interest which has been lacking for some time; however, futures are still weak and irregular. Montreal quotation: 45c, steady.

Solder is Firm.—With a slightly higher market for tin the situation in solder is firm on the advance recently made. Quotations remain as at last report, but there is a tendency to move prices nearer to the top of the range. Montreal quotations: Half-and-half (strictly) 29c-30c and Half-and-half (commercial) 27c-28c.

Aluminum.—There is very little interest in the aluminum market, as the continued high price keeps it above the level where it attracts attention for normal commercial purposes. Prices locally, although largely nominal, have

been without change for some time and there are no developments in sight for the immediate future. Montreal quotation: 68c—nominal.

Little Change in Steel.—There is little or no change in the general outlook in the steel and iron situation. Advances in the different products and manufactures of the metals continue from time to time, and, with a continuation of heavy booking and lack of assurance as to future supplies, the trade is endeavoring to figure out where the market is going. On the one hand, should the war continue for a considerable period, there will undoubtedly be a serious shortage of goods and materials if not an actual famine, while on the other hand a sudden development which would relieve the tension — such as indications of an early peace— would probably cause a collapse which would be extremely dangerous to those who are buying heavily on the advance on speculation. All indications are that there will be further advances in nearly all these lines and the end is not in sight, but considerable judgment should be exercised in view of the fact that quotations are already abnormally high.

Galvanised Sheets.—While there has been no general change on galvanised sheets since th. advance of last week, there have been some readjustments made with the result that present quotations now appear as follows:

B.W. Gauge	Queen's Head	Fleur de Lis	Gorbal's Best
16	$....	$....	$5 50
16-20	6 40	6 15	....
18-20	....	....	5 70
22	....	....	5 95
22-24	6 50	6 30	....
24	....	....	6 50
26	6 75	6 45	6 75
28	7 00	6 75	7 00

	Premier	Apollo Colborne	Crown
14	$5 40	$5 40	$....
16	5 20	5 40	5 80
18-20	5 80	5 60	5 80
22-24	6 00	5 70	6 00
26	6 25	5 80	6 25
28	6 50	6 30	6 50
10¾ oz.	6 75	6 50	....

Black Sheets.—There have been some further adjustments in the situation as regards black sheets. In addition to the general advance last week which was followed by the bulk of the wholesale houses, there are certain jobbers who have a list of their own in which they made adjustments to cover gauges of which they have greater supplies on hand than others. To illustrate this the two lists given by a leading wholesale firm and a leading metal dealer are given as follows:

10 gauge	$3 50	$3 50
12 gauge	3 50	3 60
14 gauge	3 50	3 35
16 gauge	3 25	3 40
18-20 gauge	3 25	3 55
22-24 gauge	3 25	3 65
26 gauge	3 15	3 70
28 gauge	3 55	3 80

Canada Plates—Some further advances and adjustments have been made with regard to Canada plates—ordinary, bright and galvanised. On the ordinary there is now a spread of 30c while on polished there is an increase of 25c. On galvanised there is an advance of 25c to 50c in addition to the increase of 25c referred to last week. The situation continues very firm with further price changes in an upward direction probable in the near future. Quotations are now as follows:

Ordinary, 52 sheets	$4 00
All bright, 52 sheets	5 25

	Apollo	Galvanized Crown	Gorbals
18x24x52	$ 6 25	$6 25	$6 50
60	6 50	6 50	6 75
20x28x47	6 75	6 75	7 00
20x28x94	13 50	13 50	14 00

The Pipe Situation.—As yet there has been no official advance on pipe prices but it is expected on the advices from manufacturers that the increase will go into effect sometime in the next week and that both black and galvanised products will be concerned. The following list which was readjusted last week by one local house to indicate the advance likely is, therefore, of interest although some reports indicate that the advance will be more emphatic.

NEW DISCOUNTS ON BOLTS AND NUTS

Applying to Standard Lists.

	%
Carriage Bolts ($1.00 list), ⅜ in. dia. and smaller	57½
Carriage Bolts ($1.00 list), 7-16 in. dia. and larger	42½
Machine Bolts, ⅜⅜ in. dia. and smaller	57½
Machine Bolts, 7-16 in. dia. and larger	47½
Sleigh Shoe Bolts, ⅜ in. diam. and smaller	47½
Sleigh Shoe Bolts, 7-16 in. dia. and larger	42½
Coach and Lag Screws	65
Skein Bolts	60
Square Head Blank Bolts	47½
Bolt Ends	47½
Plow Bolts	47½
Elevator Bolts	47½
Fancy Head Bolts	40
Shaft Bolts ($3.00 list)	40
Step Bolts, large head ($3.00 list)	40
Whiffletree Bolt	40
Nuts, square	3 c off list
Nuts, hexagon	3¼c off list

Terms: 2 per cent. off 30 days from date of shipments, London, Montreal, Toronto, Hamilton.

Buttweld Size	Per 100 feet Black	Galv.
¼ in. and ⅜ in.	$ 2 46	$ 3 87

9 in.	.....	.....
10 in. x 32 lbs. per ft.	118 40	187 20
10 in. x 40 lbs. per ft.	152 44	240 92

Metal Products. — The advances on different products of various metals such as copper bars, wire and sheets; brass springs, rods and tubes and lead pipe and sheets, referred to last week, have all been absorbed on a firm market which promises to be well maintained until there is some material reaction in the metals themselves.

Galvanised Wire.—A further advance of 55c on barb is an indication of what has happened in the galvanised wire market this week. This makes barb $4.50, plain, twist $5.10, No. 9 plain galvanised $4.00 and No. 9 coil spring $4.05; No. 12 plain galvanised is $4.15 and No. 13 plain galvanised $4.25. In view of this advance there are indications that nails may go higher and there has been considerable booking of the latter.

Advance on Nuts.—Higher quotations are now in order on nuts. The square are now 3c off list as compared with 3¼c and the hexagon now 3¼c off list as compared with 3½c. The bolt list is very firm and higher prices are being looked for.

Drills are Higher. — Changes in the discounts on drills have been made. Wood drills are quoted 30% off as compared with 42½%; straight shank drills and paper shank drills, up to 1½, 62½% off as compared with 65% and paper shank, larger than 1½, 20% off; bit stock drills are 65 and 5% off. This is another of the many lines which are being affected by the higher markets for steel.

Iron and Steel. — There is another general advance throughout many of the items in the iron and steel list. This comes as the result of the rising cost of raw materials. The new prices compared with those prevailing for the past couple of weeks. are as follows:

	Old.	New.
Common bar, per 100 lbs.	$2 35	$2 45
Refined iron, per 100 lbs.	2 60	2 70
Horseshoe iron, per 100 lbs.	2 60	2 70
Norway iron	5 75	2 85
Mild steel	2 70	2 80
Band steel	2 70	2 80
Sleigh shoe steel	2 70	2 80
Domestic	2 70	2 80
Reeled machinery steel	3 30	3 50
Tire steel	2 80	2 90
Toe calk steel	3 60	3 70
Spring steel	3 35	3 50

Copper Rivets Big Advance.—A very important advance has been made on copper rivets, which is of particular interest as it follows several previous changes in an upward direction. As compared with a discount of 15 per cent, rivets (with the usual proportion of burrs) are now net list, while burrrs, which were formerly net, are 20 per cent. advance.

Boiler Plates.—The advance on boiler plates which has been predicted for some weeks has gone into effect. The increase is 20c all round on the following items (new quotations given) :

Plates, ¼ to ½ inch, per 100 lbs.	$2 95
Heads, per 100 lbs.	3 20
Tank plates, 3-16 inch	3 20

Boiler Tubes Also.—Boiler tubes have followed in the wake of pipe in the upward movement. Advances have been made throughout the list from $1.00 to $2.00, according to size. The following are the new quotations:

100 ft., 1½ in.	$15 40
100 ft., 2 in.	11 00
100 ft., 2¼ in.	12 12
100 ft., 2½ in.	14 15
100 ft., 3 in.	14 60
100 ft., 3½ in.	17 85
100 ft., 4 in.	22 80

Sash Weights. — The upward movement of iron has effected sash weights, both solid and sectional. The advance is from 30c on solid, to 15c to 30c sec-

tional. The new quotations are as follows:

Sectional, 1 lb., per 100 lbs.	$2 40
Sectional, ½ lb., per 100 lbs.	2 40
Solid, 3 to 30 lbs., per cwt.	1 90

Fittings.—There has been an advance on iron pipe fittings in sympathy with the general movement in raw materials. The discount on Canadian malleable is now 35% as compared with 37½% formerly.

Rope Advances.—Rope has advanced in price and the following prices are now in effect: Pure Manila, 17½c base; British Manila, 15c base; African hemp, 15c base; Sesal, 12¾c base.

Screw to Advance.—An important advance on screws has been made in the American market and the Canadian market may be expected to follow this example. One forecast is that the increase will be as much as the previous changes have been, which would mean about 20 per cent.

Roofing to Advance.—The prediction is made on good authority that there are to be higher prices shortly for different roofing materials. There have already been some advances in this market.

Files to Go Up.—An advance on files is being talked of, one forecast being that it will be about 10 per cent. This is another of the changes following the rise of steel.

Iron Washers Higher.—A change in the discount of iron washers has been announced, the allowance now being 42½ per cent as compared with 25 per cent. formerly.

Advance on Stoves and Furnaces.—Stove dealers report that there has been a general advance of 5 per cent. on their different products. This affects practically the whole line of stoves, heaters and furnaces and is the direct result of the rising market for raw materials, iron and steel being important factors in the manufacture of such products.

Wringers.—Higher quotations on wringers are expected immediately. The present discount to the trade is 20 per cent. off list and it is expected that there will be a considerable reduction in this.

Brass Butts.—There has been a general readjustment of the discounts on brass butts made by several firms. In some cases this covers advances and in others slight reductions; however the general effect is upward.

Old Materials.—Further advances on old materials are being made from time to time. This week tea lead, heavy lead, heavy zinc and composition turnings are affected. New quotations follow:

Tea lead, pack	5c
Tea lead, chest	5c
Heavy lead	5¾c
Heavy zinc	13¼c
Composition turnings	11¾c

TORONTO

TORONTO, Ont., Jan. 20.—The general situation in the hardware market is much the same as last week. Considering the conditions prevailing, business is satisfactory and the outlook favorable. Financial conditions are much improved, and there is a feeling of confidence in the trade, which is indicated by the increased volume of business in general hardware lines.

Price Changes.—The upward tendency in prices continues, and there are no indications of more settled conditions. There are a number of price changes to note this week, and advances in a number of lines are looked for. The iron, steel and metal markets are strong, and higher prices for many hardware lines will no doubt be the result. Higher prices have been announced for copper rivets and burrs, brass wire, washing machines, wringers, game traps, Manila and sisal rope, carriage bolts, hand steel, sleigh, shoe and domestic steel, lap-welded boiler tubes, sash cord and barrel churns. Among the products which may be expected to advance in the near future are the following: Wrought iron and galvanized pipe iron rivets, boiler plates, seamless boiler tubes, copper and tinware, galvanized and black sheets, scrap copper, brass and zinc, cotton waste, carpet felt roofing, wire nails, clay picks and mattocks.

Iron and Steel.—The situation in the iron and steel trade is unchanged, and the mills continue working at top pressure on both domestic and foreign business. The consumption of steel products is getting ahead of the producing capacity of the mills, and deliveries are getting behind with no prospect of any immediate improvement. The scarcity of steel is becoming more serious and the situation is becoming acute owing to the heavy demand of steel for munitions.

The upward tendency in prices continues, and the market is very strong. The steady advance in prices in the American market is affecting the home market, and as there is no indication of any recession in the States, higher prices may be expected here. Steel bars have advanced, and are now quoted at 3c, while bar iron is unchanged at 2.60c per pound, although higher prices are looked for in the near future. Band steel is higher at 2.80c per pound.

The steel market in the States is strong, and prices are very firm, but with few changes. The freight congestion in New York is gradually being relieved, and it is reported that the railroads may lift the embargo on export shipments shortly. The strikes at the Youngstown iron and steel plants have disturbed the trade, as there is a possibility of similar trouble in other districts. The heavy demand for steel bars for export shipment continues, and deliveries are being deferred from four to seven months. Inquiries for heavy tonnages of steel bars have been received by the mills, but deliveries are so backward that few contracts have been closed. Steel bars are being quoted at 1.85c Pittsburgh, and nearby deliveries are being quoted as high as $2.25c to 2.50c. The market for billets is very strong, with a tendency to higher prices. Bessemer, open-hearth billets have advanced, but forging billets are unchanged. Wire rods have advanced to $42 f.o.b. Pittsburg.

The ferro-manganese situation has become acute, and prices have advanced to $125 per ton at tidewater. Increased difficulties in the transportation of manganese ore from India, on account of the possible trouble at the Suez Canal, is believed to be the reason for the advance. The British Government has requested all American manufacturers using ferro-manganese to dispose of their products containing this material only to Great Britain and her Allies.

Pig Iron.—The situation is unchanged. The demand for steel making pig iron continues heavy. It is reported that the British Government propose to fix a maximum price on Cleveland pig iron, but this market will hardly be affected, as none of this iron is being imported at the present time. Prices of Hamilton and Victoria brands are very firm and unchanged.

Old Materials.—The scrap copper market is very strong, and prices of all grades have advanced 50c to $1 per 100 lbs. No. 1 machine composition and turnings have also advanced, as well as brass clippings and turnings. The situation as regards wrought and steel scrap is unchanged, the embargo on the export of these materials being still in force. The lead market is strong, and prices of tea and heavy lead are a little higher. Scrap zinc has advanced 50c per 100 lbs. Interests in the West have requested the Government to establish a low rate on scrap iron from points in the West to the mills in the East. The market for scrap iron has hitherto been in the States, but this has been shut off by the war embargo, and shippers are anxious to find a new market in the Eastern provinces, particularly in Ontario. The matter is being considered.

Machine Tools.—The demand for machine tools recently has been much lighter, and business consequently is not so active as a few months since. Small parts for shells, such as primers and fuses, etc., are urgently required, as the output of these parts is considerably less than shell cases, and fixed ammunition only is being shipped to Europe. Makers of shell parts are very busy, and there is a fair demand for equipment for turning them out. Deliveries are still backward from plants in the States, as machine tool makers are well booked up, and labor troubles are also causing serious delay in production. A number of inquiries have been sent out to American machine tool makers, but not much business has been closed on account of late delivery. Canadian machine tool builders are very busy, and have as much work on hand as they can conveniently take care of.

Metals.—The general situation in the metal market is unchanged. There is considerable strength in the primary markets, and prices are being held at high levels. The copper market is strong and higher, but business is a little quieter. The tin market at New York is unsettled on account of the difference of opinion in the trade as regard the effect of the British Government's policy to keep a good supply of metal in England. The situation in the lead market re-

sembles that of copper, as the British Government evidently intend to regulate quantities sold and to fix maximum prices. The spelter market is quiet and unchanged, while antimony and aluminum are both being quoted at last week's figures.

Copper Higher.—The market is strong and higher. No statistics regarding the copper position are available, but it is generally thought that the production is being entirely taken up. There is a very heavy consumption of copper, and the position is as strong as ever. Local prices have advanced ½c, and copper is being quoted at 26½c per pound.

Tin.—The market is firmer, with an improvement in London. The New York market is unsettled, as there is a difference of opinion in London in the trade as to the effect of the British Government's policy in keeping a good supply of metal in England. Quotations are unchanged and nominal at 48c per pound.

Spelter Advances.—The market is firm and prices a little higher. There is a good demand for spot and early deliveries, and indications point to higher prices. Spelter has advanced 1c locally, and is now quoted at 21½c per pound.

Lead.—The market is dull and prices unchanged. It is reported that the British Government intend to regulate quantities of lead sold and also to fix maximum prices. Local quotations are unchanged at 7½c per pound.

Antimony.—The market is firm and unchanged. There is a scarcity of spot antimony, and the future supply appears uncertain. The situation is unchanged, and quotations are nominal at 40c per pound.

Aluminum.—The situation is unchanged and the market is holding firm. Supplies are scarce, but the demand continues heavy. Local quotations are unchanged at 68c per pound.

Solder.—The market is firm and unchanged at the higher levels announced last week.

Galvanized Sheets.—The market is very firm at last week's advance. Both black and galvanized sheets are being sold on the local market below cost of importation. This condition cannot continue, as profits are not enough to make the business worth while. Stocks are light, so resale prices will have to be based on manufacturers' costs, which means that a considerable advance in sheets will have to be made. Conditions in the trade are so uncertain that many manufacturers of galvanized sheets have withdrawn from the market. Sheet mills are operating at maximum capacity, although the galvanizing departments of most plants are not producing more than 50 per cent. of their normal output.

Black Sheets.—The market is strong and higher prices are looked for. The sheet makers are very busy, and deliveries are getting more backward than ever, being deferred anywhere from 6 to 8 weeks. Prices on black and blue annealed sheets are advancing steadily in the States, which will, of course, affect this market.

Skate Screws.—For the convenience of the trade and consumer, skate screws are being put up in boxes and cartons in the following form: There are 16 oval bright screws, ⅜ in. x 16g., and 8 screws of the same type, ⅝ in. x 6g., contained in one box, which is enough for one pair of skates, and 12 boxes in one carton. The price is 3c per box, or 36c per carton.

Bolts and Nuts Advance.—The steady advance in cost of raw materials has caused makers of carriage and machine bolts, etc., to again revise their discounts, making the new prices about 2½ per cent. higher than formerly. The new discounts are given in panel.

Copper Rivets Up.—The steady advance in copper has resulted in another advance in copper rivets. Copper rivets, with the usual proportion of burrs, are now net list, and copper burrs only are list plus 20 per cent.

Iron Rivets.—It is expected in the trade that an advance will be announced shortly on iron rivets. The present discount is 60 per cent.

Fence Wire.—Although no firm resale price on galvanized and barb and plain galvanized wire is current for Ontario, prices given below, which are for Montreal, might be of interest to the trade generally. There is no doubt that prices for Ontario will be advanced to approximately the same figures:

Barb	$4 50
No. 9 coil spring	4 05
No. 12 coil spring	4 20
No. 6-8, plain galv.	4 45
No. 9, plain galv.	4 00

Game Traps Advance.—Game traps have advanced about 10 per cent., and are now quoted at the following discounts:

New Victor	67½ p.c.
Jump	60 and 5 p.c
H. & N.	55 p.c.
Newhouse	35 p.c.

Washing Machines Higher.—Prices of washing machines and wringers have been advanced 5 per cent., the new discounts being as follows: Washing machines 20 per cent., and wringers 15 per cent. off.

Picks and Mattocks.—Makers of clay picks and mattocks have advanced prices on these lines, and an advance by the jobbers is looked for immediately.

Rope Advances.—Higher prices for rope have been predicted in Hardware and Metal for some time on account of the increase in cost of raw materials and high freight rates. The change affects Manila, sisal, African hemp and lath yarn, and the advance ranges from 1¼c to 1½c. The American market has advanced correspondingly. The new prices are as follows: Pure Manila, 17½c; British Manila, 15c; African hemp, 15c; sisal, 12¾c; single lath yarn, 12c, and double lath yarn, 12½c. These are base prices for ⅝ in. and larger.

Pipe.—Higher prices for wrought iron and galvanized pipe are expected any time on account of the steady advance in cost of raw materials. Prices have recently advanced in the States, where the market is very strong.

Wire Nails.—The market is very strong and higher prices for wire nails are looked for. Wire nails are being quoted at $3.05 per keg base. Cut nails are firm at $3 per keg base.

Lead Pipe.—The market is firm at the advance announced last week. Business is quiet, but the pig lead market is strong.

Brass Wire Advance.—Higher prices have been made on brass wire, which is now net list.

Sash Cord Advance.—Sash cord has advanced 2c per pound, and is now quoted at the following prices: No. 6, 32½c; No. 7, 31½c; and No. 8 and upwards, 31c per pound.

Churns Advance.—Barrel churns have advanced 2½ per cent., and the new discounts are as follows: Toronto, Hamilton, Fergus, London and St. Mary's, 37½ per cent.; Ottawa, Kingston and Montreal, 35 per cent.

Waste.—The expected advance in cotton waste has been postponed, but a new and higher price list may be issued any time.

Kitchen Utensils.—Prices are very firm, and dealers report good business in wares. There is no improvement in the situation with regard to all raw materials, and higher prices for copper, tin and galvanized wares are expected.

LONDON

LONDON, Ont., Jan. 20.—For this time of year business in London is good. Most of the hardware merchants have completed their stock-taking, the results of which, in the majority of cases, have been very satisfactory. On account of the advancing prices and threatened shortages in many lines, hardware stores are preparing to take early delivery on spring goods.

Several price changes have taken effect during the past week. Some lines which advanced in the first week of the year have taken further advances. Linseed oil, for instance, has taken its third advance, the last one being 9 cents per gallon. The new prices are:

	Raw	Boiled
1 to 2 bbls.	$1.09	$1.12
3 to 5 bbls.	1.08	1.11
6 to 9 bbls.	1.06	1.09

Turpentine.—Turpentine remains at last week's prices:

	Per Imp. gal.
1 barrel	87c
2 to 4 bbls.	86c
5 galons	94c

Bolts have taken another advance of 5 per cent., the new prices being shown in separate panel elsewhere in this issue.

Most Canadian makes of hand-saws have advanced 10 per cent. during the past week. Shurley & Dietrich are now subject to discount of 30 per cent. instead of 35 per cent. Pruning, compass and back-saws have a discount now of

35 per cent. in place of 40 per cent. of last week.

Galvanized clothes line wire has advanced again, this week's price being:

No. 19 .... $3.75 per 1000 ft.
No. 18 .... $4.15 per 1000 ft.

Copper rivets are now subject to net list prices, an advance of 20 per cent. On copper burrs 20 per cent. is now added to list prices, an advance predicted by Hardware and Metal. Eureka sap spiles, 600 M, are now 65 cents per 100.

Stewart horse clippers remain at $6.94 each. Chicago sheep shearing machines are now $9 each. Chicago sheep and horse clippers combined are $14.25 each. Sheep shearing attachments for Stewart horse clipping machine are now $7.13 each.

Price of nails remains unchanged. Wire nails, $3.05 base; cut nails $3.15 base.

Fence wire also remains same as last week, the prices being:

Barb	$3 55
No. 9 plain galvanized	3 20
No. 12 plain galvanized	3 35
No. 13 plain galvanized	3 45
No. 9 coil spring	3 25
No. 10 O. & A.	3 31
No. 11 O. & A.	3 37
No. 12 O. & A.	3 45
No. 14 hay baling	3 55

Bright fence staples remain at $3.35 per keg and 25-pound boxes at $3.60 per 100 pounds. Galvanized fence staples are $4.20 per keg and $4.45 per 100 lbs. in 25-lb. boxes.

There have been some changes in the price of rope, the new quotations being:

Pure manila	17½c lb.
British manila	15c lb.
African hemp	15c lb.
Sisal	11½c lb.
Deep sea line	27c lb.
3-16 in. cotton	25c lb.
¼ in. cotton	24c lb.
Sash	31½c lb.

Poultry netting is still quoted at 30 per cent. discount.

Screen wire remains at $1.70 per 100 square feet.

The discounts on harvest tools are 40 and 12½ per cent.

The present discounts on spades and shovels remains at:

1st, 50 and 10 per cent.; 2nd, 50 per cent.; 4th, 40 per cent.

Taylor-Forbes lawn mowers are subject to discounts of 50 and 12½ per cent.

Lead in ton lots is $10.70 per 100 lbs. and in less than ton lots is $11 per 100 lbs., same as last week.

Glass remains unchanged: single diamond, 30 per cent.; double diamond, 30 per cent.; cut lights, net list.

Solder is now sold at 25¾ cents per pound for half-and-half.

Wrought iron washers have discount now of 42½ per cent.

WINNIPEG

WINNIPEG, Jan. 20, 1915.—The latest reports from the various jobbers indicate that business so far this year has been good, and they are very busy at the present time taking care of shipments of goods from the manufacturer, and loading cars for the farthest Western points.

Many Price Changes

There are several price changes to report this week and a list is given below of the various lines affected. It would appear that various jobbers have been selling a large percentage of their goods based on prices prevailing early last year, and as no new contracts can be made within a reasonable figure, adjustments of their selling prices have been necessary. On that account it will be found that invoices going through from now no will carry advances in nearly every line into which steel of any kind enters the manufacture.

Bolts Higher.—The new discount on bolts of various kinds are as follows:—Carriage bolts ⅜ in. and smaller 47½%; 7-16 and laıger 37½%. Sleigh shoe bolts ⅜ and smaller 37½%; 7-16 and larger 32½%; Coach screws 52½%; tire bolts 62½%; square and hexagon nuts, case lots 1 cent from list, small lots net list.

Copper iron rivets and burrs are now quoted: No. 8, 21c per lb.; No. 10, 22c per lb. Coppered iron rivets No. 8, 16c per lb.; coppered iron burrs No. 8 and No. 10, 27c per pound. No. 12 is quoted at 31c per pound.

Linseed Oil Higher.—Linseed oil is very firm at the advanced prices and even higher prices are expected in some quarters. Raw linseed oil in single barrels is quoted at $1.11 per gallon, and boiled at $1.14 per gallon. For 5 gallon cans, an extra charge of 5 cents per gallon is made.

New Prices on Wire.—New and higher prices have been issued on galvanised wire, coppered wire and other lines.

Galvanised wire is now quoted as follows:

No. 8, $4.75 per 100 lbs.; No. 10, $4.85 per 100 lbs.; No. 11, $5.00 per 100 lbs.; No. 13, $4.50 per 100 lbs.; No. 14, $5.50 per 100 lbs.; No. 15, $6.00 per 100 lbs.; No. 16, $6.50 per 100 lbs.; No. 18, $7.00 per 100 lbs.

Coppered Spring Wire is quoted as follows: No 9, $5.65 per 100 lbs.; No. 10, $5.75 per 100 lbs.; No. 12, $5.90 per 100 lbs.

Lines of Fence Wire.—Quotations on other lines of wire for Winnipeg and Ft. William are as follows:—

	Wpg. Spool	Ft. Wm. Spool
Lyman barb wire, gal., 4 pt.	$3 55	$3 30
Ptd., 4 pt.	2 95	2 70
Glidden barb wire, gal., 2 pt.	3 40	3 15
Baker barb wire, gal., 2 pt.	3 35	3 05
	Per 100 lbs.	Per 100 lbs.
Plain gal. wire, No. 9 Ga.	$3 90	$3 60
No. 12 Ga.	4 10	3 80
Coiled gal. wire, No. 9 Ga.	3 95	3 65
No. 12 Ga.	4 15	3 85
Barb wire, catch weights	4 20	3 90
Fence staples	3 75	3 35

Wire and Cut Nails.—Wire nails are quoted at $3.65 per keg, and cut nails at $3.75 base. A discount of 50% is now quoted on carriage rivets, wagon box rivets, section rivets, block iron rivets.

Ship spikes are quoted at $4.50 base. track spikes are quoted as follows: 9-16 by 5½ at $4.25 per lbs.; ½ by 4 and 4½ at $4.40 per 100 lbs.; ⅜ by 3, 3½ and 4 at $4.60 per 100 lbs.

Tinners and Annealed Wire.—The following quotations are now in effect on tinners and annealed wire:

	Per 100 lbs.
Annealed Wire—	
8-9 gauge	$3 70
10 gauge	3 76
11 gauge	3 82
12 gauge	3 90
13 gauge	4 00
14 gauge	4 10
15 gauge	4 25
16 gauge	4 40
Tinners' Bright Wire—	Per 100 lbs.
3-9 gauge	$4 00
10 gauge	4 06
11 gauge	4 12
12 gauge	4 20
13 gauge	4 30
14 gauge	4 40
15 gauge	4 55
16 gauge	4 70

Stone pipe wire 18 and 19 gauge is quoted at 6c per pound.

Other Lines Affected.—Among other lines affected by price changes this week are the following with the new price:

Lead pipe, coils	$10 90 per 100 lbs.
Less than coils	11 90 per 100 lbs.
Bright Screw Hooks, M	55% off list
Bright Sq. Corner Hooks, M	55% off list
Bright Screw Eyes, M	45% off list
Gate Hooks and Eyes, M	55% off list
Black Sheet Iron—	Per 100 lbs.
10 gauge	$4 05
12 gauge	4 05
14 gauge	4 00
16 gauge	4 00
18 gauge	4 25
20 gauge	4 25
22 gauge	4 25
24 gauge	4 25
26 gauge	4 35
28 gauge	4 50
Galv. Sheet Iron	Per 100 lbs.
16 gauge	$5 35
18 gauge	5 50
20 gauge	5 50
22 gauge	5 70
24 gauge	5 80
26 gauge	6 20
28 gauge	6 50
10¾ gauge	6 75

MONTREAL BOARD OF TRADE OFFICERS

The following officers of the Montreal Board of Trade have been elected by acclamation:

President, H. B. Walker; 1st vice-president, Zeph Hebert; 2nd vice-president, Anson McKim; treasurer, P. D. Gordon.

Council—Geo. J. Crowdy, W. A. Black, W. A. Coates, W. G. M. Shepherd, George Sumner, J. F. N. Dougall, A. H. Dalrymple, E. Goff Penny, A. F. C. Ross, T. W. Bole, A. R. Doble and George Ly-

Board of Arbitration—C. B. Esdaile, W. W. Crowdy, W. W. Craig, James Carruthers, J. R. Binning, Joseph Quintal, George F. Benson, Alfred J. Bryce, Norman White, W. H. D. Miller, E. S. Jaques, A. George Burton and R. J. Dale.

WEEKLY PAINT DEPARTMENT

Activity in Window Glass Industry

United States Now World's Chief Producer—Higher Prices of Raw Materials and Labor Will, It is Claimed, Advance Prices in Near Future —Statement Made by a Broker.

PRACTICALLY the entire demand of the world for window glass has since the outbreak of the war been thrown upon the United States Glass Manufacturers.

The supply from Belgium, France and England has been almost entirely cut off. American manufacturers report that the demand for glass has grown rapidly during the past month, and that the long-expected upward-swing in the glass market has started. Manufacturers are predicting an advance in their prices in the near future, which they claim is fully warranted by the increased cost of many materials used in making and packing glass. Soda ash, one of the principal basic chemicals, has advanced from 200 to 250 per cent.. Nails used for packing purposes have advanced in cost from 75 per cent. Lumber, boxes, chemicals and a number of other raw materials have largely increased in cost.

Canadian dealers are depending almost entirely on the United States for supplies. Owing to the falling-off in the building trades during the past two years the demand for glass in Canada has not been as heavy as in some of the former years when the building trades were booming. Nevertheless, Canada is a large user of window glass at all times.

The duty on colorless window glass imported from the United States into Canada is 12½ per cent., plus 7½ per cent. war tax.

The president of a large brokerage company at Pittsburgh, dealing extensively in window glass, recently made a statement to the effect that American glass manufacturers would have an exceptionally busy year during 1916. He stated in part as follows:

"Nineteen hundred and sixteen promises to be the banner year in the history of window glass making. During the last quarter of 1915 the demand was very brisk and the market firm with a constantly increasing request for prompt shipments and gradual improvement in the volume placed. This applies both to the domestic and foreign market and there is every indication that the product of the window glass plants will be taken for the next six months at least as rapidly as it is manufactured.

"Neither jobbers nor manufacturers have any stocks worth mentioning in their warehouses and aside from the glass that is daily going into actual consumption it would require at least 2,000,000 boxes of glass to replenish stocks in the warehouses of the large and small jobbers, sash houses and others who are purchasers of large quantities of window glass, but even this quantity is making no allowance for factories replenishing their own badly broken stocks. Therefore, the home demand for the first half of 1916 will be in no sense speculative, but will be to take care of actual consumption and the replenishing of greatly depleted assortments.

"From the present indications the buying of glass in 1916 will exceed the purchases of 1915 or 1914 by at least 25 per cent. and perhaps the increase will reach 33 per cent. This very large demand will naturally have an effect on the price, and window glass has been one of the products that has not varied in price to any extent for the past three years. The fact that it is going to command a much higher price at an early date has not been overlooked by those who are intimately acquainted with the industry.

"In addition to the large demand, the other reasons for increased prices are the large advances in raw material, box lumber, nails, chemicals, labor and fuel. There is a marked scarcity of skilled labor—not enough to man all of the hand-operated plants and in some instances some of the machine operated plants are likewise badly crippled.

"The foreign situation is such as to contribute to the prosperity of the American manufacturers, as there is practically no glass being produced in Belgium or France and in very reduced quantities in England and some of the other countries which are attempting to operate a very limited percentage of their glass factories. The American manufacturers are now called upon to furnish glass for all parts of the world, and if foreign shipping was conducted along normal lines the export trade would be tremendous.

"As it is, factories have many orders that cannot be shipped, owing to inability to secure steamer space, and the handling of this business depends largely upon the ocean transportation companies being able to move the freight. If these steamship companies offer relief there will be new records made in shipments to the world's markets. These conditions are pretty generally known to the alert American jobber, as is evidenced by the large orders that are now being placed, anticipating a market shortage a little later on in the season.

Factories are practically contracted ahead until March 1, and it may be a question of securing service in a very short time rather than, to delay buying while negotiating for prices. This is a most unusual condition in the window glass industry, and everyone connected with the trade has been a little slow in awakening to the great movement that is now well under way.

"To summarize I would add that the largest movement the industry has known in the last 20 years is now in full swing."

SPONTANEOUS IGNITION OF OILY MATERIALS

Demonstration Showed Clearly the Spontaneous Combustion Produced By Oily Rags or Waste Left Lying Around, or Even Left in Containers

It is generally known that oily rags, oil soaked waste and similar materials will heat and take fire spontaneously, and that numerous fires have originated in this manner and knowing this fact, and the importance it is to the condition where this very condition is bound to exist, tests were conducted at the convention of the sales staff of S. F. Bowser & Co., to show just how dangerous this condition is and the time required to cause all the materials to ignite.

All drying oils will oxidize and heat when brought into direct contact with some fiber over and through which it

There's never a complaint with JAMIESON'S PAINT

Its quality is complaint-proof.

Its working qualities are complaint-proof.

Its finish and durability are complaint-proof.

Its price, profit and proposition are very attractive.

SELL TO A MAN ONCE AND HIS ORDER IS SURE TO REPEAT

Drop a line for our proposition.

R. C. JAMIESON & CO., Limited, MONTREAL, CANADA

ESTABLISHED 1858

Owning and Operating P. D. DODS & CO., LIMITED

Branches at 48 Colborne St., Toronto, Ont., and 167 Pender St. West, Vancouver, B.C.

can spread. This condition is generally found in any paint oil room where the spilled oil is taken up by means of rags or waste, which are then thrown carelessly into a heap on the floor under the bench, and in a corner or in an out of the way place. In fact, even the dripping from the faucet is caught on a ball of waste placed on the floor under the drips, and the man who fires anyone caught with his lighted pipe or cigarette in this room, very often thinks nothing of the oil soaked waste on the floor which is a hundred times more dangerous.

The following conditions were followed out in making this test and may be made by any who has in mind any doubt as to the results. Waste to the amount of ¼ pound was taken as a basis of all tests, the oil used, ¼ pint the ball of waste was thrown into a chamber where the temperature was held at 120 degs. Fahr., and the results noted. The temperatures given were taken by means of a thermometer inserted into the ball of waste after the oil had been evenly distributed over the waste, the oil soaked part being inside the ball.

Boiled Linseed Oil.

Amount of oil	¼ pint
Cotton waste	¼ lbs.
Temperature of chamber	120° Fahr.
Temp. of oil at start	80° Fahr.

Results.

Hours	
½	85° Fhr.
1	92° Fahr.
1½	99° Fahr.
2	140° Fahr.
2½	310° Fahr. (smoke here)
3	392° Fahr.
3½	464° Fahr. (perf't ignition)

Boiled Linseed Oil and Turpentine, equal parts.

Boiled linseed oil	⅛ pt.	¼ Pint
Turpentine	⅛ pt.	
Cotton waste		¼ lb.
Temperature of chamber		120° Fahr.
Temperature of oil at start		80° Fahr.

Results.

Hours	
½	90° Fahr.
1	130° Fahr.
1½	240° Fahr.
2	360° Fahr.
2½	430° Fahr.
3	630° Fahr. (perf't ignition)

Pure turpentine showed a rise in temperature of 27 degrees in five hours.

Hard oil finish showed a rise in temperature of 137 degrees in five hours.

Paint thinned with turpentine showed a rise in temperature of 38 degrees in five hours.

Paint thinned with linseed oil (see Boiled Linseed Oil Table.)

(Signed) H. H. HINKLE, Chemist.

WEEKLY PAINT MARKETS

(Continued from page 48.)

country. In some cases prices have been withdrawn, but the prices given below are generally being quoted in Toronto.

	Raw.	Boiled.
1 to 2 barrels	$1.09	$1.12 per gal.
3 to 5 barrels	1.08	1.11 per gal.
6 to 9 barrels	1.06	1.09 per gal.

Turpentine.—The market is firm and prices unchanged. There is no change in the situation in Savannah, but considerable difficulty is being experienced locally in getting shipments through from the South on account of the freight congestion at New York. The railroads running into New York recently placed an embargo on export shipments on account of the congestion in their yards. The latest advices, however, indicate that the situation is being relieved, so the trouble may soon be removed. Stocks are low locally and business is quiet. The following prices are being quoted in Toronto: 1-barrel lots, 87c; 2 to 4-barrel lots, 86c; and 5-gallon lots, 95c per Imperial gallon.

Mixed Paints.—The opinion is generally held in the trade that ready mixed paints are due for an advance. It is of course well known that all the materials used in making of mixed paints have increased in cost considerably during the last few months. The recent advance in white lead and high cost of linseed oil have not improved the situation but have increased the possibility of higher prices for mixed paints. There is no doubt that present prices are too low considering the cost of the various ingredients.

Glass. — The glass manufacturers in the States control the situation there and recently raised their prices. Owing to the advances in the States, another advance here is anticipated in the near future and buyers would be well advised to cover for their requirements at an early date. There is little or no possibility of cheaper glass while the war lasts as practically all the glass being imported with Canada is made in the States and most manufacturers are operating their plants at capacity and are likely to be doing so during that period.

Gasoline Advances.—Higher prices for gasoline, freely predicted in Hardware and Metal, have materialized. Gasoline has advanced 1c, and is now quoted at 28½c per gallon. The situation is unchanged, and it is generally expected that gasoline will reach a still higher level.

There is a shortage of crude oil, which is caused in part by a diminished supply, and also on account of the constantly increasing demand for gasoline. Benzine has also advanced 1c, and is now quoted at 28c per gallon.

Arsenate of Lead.—The new prices for arsenate of lead are given in the panel shown elsewhere.

Putty.—The market is firm at the recent advance. The following prices are being quoted for standard putty in less than ton lots:

	Per 100 lbs.
Bulk, in casks	$2.65
Bulk, in 100-lb. drums	2.85
Bulk, in 25-lb. drums	2.95
Bladders, in barrels	3.25

Pure putty, 70c per 100 lbs. advance.

A Little Late

A hardware dealer in the January 7th issue of a Swan River, Man. newspaper, informs the public that "Christmas is near, and no doubt you will be looking for useful presents." That man must have been too busy to change his copy.

CATALOGUES AND BOOKLETS

Carborundum Co. Calendar

The Carborundum Co., Niagara Falls, N.Y., 1916 calendar, like those of previous years is exceptionally attractive. The view shown, brings to mind the beauties of the upper rapids of Niagara. It is the view taken from the third sister island, one of the three sister islands, so called after the daughters of General Whitney, who were the first women to take a trip across the three sister islands long before bridges were built from Goat Island. The view as shown on the calendar is the result of considerable effort. A series of twenty-two views were taken from various points on the third sister island. Of the twenty-two views taken twelve were selected, fitted together so skilfully as to defy detection and from the one big picture the half tone plate was made.

New Shear Catalogue

The W. H. Compton Shear Company, Newark, N.J., have just issued a 56-page catalogue. Some of the lines illustrated are auto pocket sizes, ball bearing shears, right and left hand bankers' shears, barbers' shears, bent trimmers, button-hole scissors, button-hole cutters, desk snipes, embroidery scissors, electricians' scissors, fetlock shears, ladies' scissors, tinners' snips, manicure and nail scissors, straight trimmers, tailors' shears and various other lines.

The Compton Company will forward copy of the catalogue on receipt of name and address.

New Refrigerator Catalogue

The Astoria Company has issued their 1916 catalogue and also a 12-page folder showing the new designs in Astor and Astoria ice boxes and refrigerators. The catalogue has 24 pages and shows cuts of the "Astoria De Lux" refrigerator in French grey finish; the "Ash Astoria" in golden oak finish, and also a number of other lines manufactured by the Astoria Company, Peru, Indiana, from whom a copy of the catalogue and folder may be obtained on request.

WINTER BUILDING

(Continued from page 35.)

moisture in artificially heated air, it is a common experience to find such woodwork shrunken, resulting in the appearance of cracks and apertures which seriously affect the heating requirements. It is a fact that the "loosely constructed" building very often figures in the calculations of the heating engineer and it might be profitable to determine whether a house constructed in the winter time is any "tighter" than a similar one built in warm weather.

As one writer points out, the delays incident to the completion of a building in the winter, with its cold weather and storms, are unavoidable, and this is a point that would have great weight in certain localities. But there are other sections, and they include portions of the country where the average winter temperature is well above the freezing point, as well as being busy business centers, where more winter building could be carried on to advantage, and in these sections the campaign may easily have important results.

Pumps that Carry Good Will

Dealers that sell McDougall's "Aremacdee" Hand or Motor Metal Force or Lift Pumps give their customers lasting satisfaction.

Every pump sold stays sold—gives the dealer no trouble.

They are metal — hand-fitted valves — air-tight — strong — lasting.

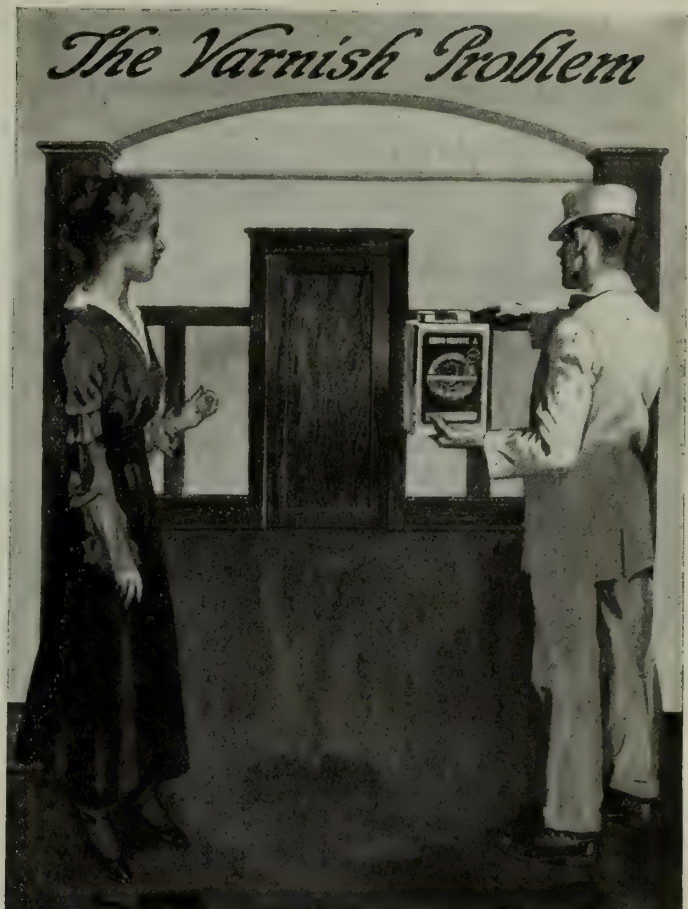
The big catalogue tells you exactly what the line is—get it for the asking.

WRITE

The R. McDougall Co.,

LIMITED

GALT, CANADA



THERE are no real varnish problems for the experienced dealer. He knows that if varnishes are made right they will act right and give complete satisfaction if used under the right conditions. In other words, varnishes are consistently good, or consistently bad or indifferent.

This knowledge of varnish values enables the dealer to give useful advice and service to such customers as need it.

You can adopt no surer way of increasing the volume of your varnish business than by making a leader of Berry Brothers' products, which are always high grade, uniform and dependable.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Jan. 20.—There is no improvement in the situation as regards ready mixed paints; in fact with oil continuing its upward movement the outlook is increasingly serious. The stage where advances on the present market were warranted has been long passed and the opinion of the makers is that whether the change comes in a week, a month or four months it is nevertheless certain. Further it will probably be a substantial advance unless there is a radical change in the market tendencies and no such change can now be foreseen. The fact that it is in the middle of a season's campaign is the chief factor in delaying advances while the present abnormal quotations act as a curb in making increases because of the tendency of higher prices to restrict consumption.

The new year has now come into strides in a business way and manufacturers report that the booking for spring business is very brisk. It is evident that the advancing prices of the different commodities entering into the manufacture of mixed lines have been noted and appreciated by the trade as evidences of higher prices to come. This can be easily understood when the recent movements of oil, lead, turpentine and zinc are considered while the shortage of colors and chemicals is generally appreciated.

Oil Continues Up.—The upward movement of linseed oil continues. Not only are there increases this week on spot supplies but the outlook for futures shows similar advances. However, there have been general readjustments to the new conditions and so far as the trade is concerned the quotations are more settled at the new high figures than they have been for some time. In the prices heard there is a spread of about 3c but this is not remarkable considering the violence of the recent movements and compares with last week's situation when some houses had withdrawn their prices altogether. The figures are running from $1.03 and $1.06 for raw and boiled respectively to $1.06 and $1.09. Generally the higher quotations are favored on the following basis:

	Raw.	Boiled.
1 to 2 barrels	$1 06	$1 09
3 to 5 barrels	1 05	1 08
6 to 9 barrels	1 04	1 07

White Lead.—There has been no further change in the white lead situation but the market is very firm and on the position of pig and dry white an advance of at least 25c on the present quotation is fully warranted. However, the high position of the market no doubt interferes with consumption and for this reason advances are made with considerable reluctance. The quotations are:

Five ton lots	$10 25
Single ton lots	10 55
Less than ton lots	10 85

Gasoline and Benzine.—A further advance of 1c all round for gasoline and benzine will be in effect by the time this report reaches the trade. The gasoline situation is a very interesting one at the present time and reports from the American market indicate that advances are to continue with more or less rapidity for some time to come. Some predictions of 40 cent gasoline are being heard. The movement appears to be the result of the increasing consumption being greater than the production. Quotations in this market are:

Gasoline, in barrels	28c
Gasoline, in drums	26½c
Gasoline, tank wagon	26c

Benzine 1c lower.

1916 PRICES ON ARSENATE OF LEAD

The following new prices have been issued on arsenate of lead for Toronto, Montreal, London and Hamilton.

Dry

1 lb. container	33½c	lb.
5 lb. "	29½c	"
10 lb. "	27½c	"
25 lb. "	24 c	"
100 lb. "	22½c	"

Paste

1 lb.	$0.19
2 lbs.	18
5 lbs.	.12
12½ lbs.	.11½
25 lbs.	.11
50 lbs.	.10½
100 lbs.	9.75
200 lbs.	9.60
Bbls.	9.00

Turpentine.—In the turpentine market the majority of the jobbers have this week made an advance of 2c per gallon. The bulk of the business passing appears to be on a basis of 84 cents although there are some figures under this. The usual allowances are being made on quantities.

Putty.—The putty market is firm on the recent advances which covered 15 cents on commercial and 25c on pure products. The movement of stocks is very slow, however, the seasonable dullness being accentuated by the higher prices, which having been forecast for some months on the high cost of transporting whiting, were generally discounted by the trade.

Paris Green.—New prices on Paris Green may be later than usual this season owing to the very unsettled state of the market for chemicals. Higher quotations are being looked for. On the present New York basis the quotation there would be around 33c on single pounds which gives some idea of the prevailing tendency.

TORONTO

TORONTO, Ont., Jan. 20.—The linseed oil situation and the possibility of higher prices for ready-mixed paint are the principal items of interest in the trade just now. Although oil has stopped for the meantime at the high level reached last week, the general consensus of opinion is that prices will go higher still. This appears to be quite possible, as there is no improvement in the seed situation, and there is no expectation for the immediate future of any relief from outside in the shape of imported seed.

With regard to ready-mixed paints, manufacturers claim that there is no money in it with the present high cost of materials, the situation having been made considerably more difficult by the recent advance in white lead and linseed oil. Taking everything into consideration, higher prices for mixed paints are practically assured. Business, generally speaking, is quiet, although some nice orders have been booked for spring delivery, and the outlook for the country trade is bright.

Linseed Oil.—There is no change in the oil situation, and prices have been fairly well maintained at the high level of $1.09 and $1.12 reached last week. The market, however, is very strong, and the feeling in the trade is that oil will go still higher before the market breaks. The flax seed situation has not improved, and seed is quoted at $2.26 to $2.27 at Winnipeg. As the price of oil is now based on the price of seed, it is a question of how long will this condition last, as there appears to be less probability of seed declining than oil. Opinion differs as to the amount of oil the grinders have in stock made from cheaper seed. The present price of seed is not at all attractive to the grinders, but if seed remains at the present level for any length of time they may be forced to buy, in which case oil may be held at the present level, or even higher. The demand now is light, and quotations are largely nominal. The possibility of Argentine seed being imported is discounted by the difficulty of obtaining tonnage and abnormal freight rates, although it is reported that some Argentine seed has been shipped to Europe, and that American interests have bought seed from that

(Continued on page 46.)

B. FIVE FEATURES B.
That Attest Its Excellence

Covering Capacity

BRANDRAM'S B. B. GENUINE WHITE LEAD will cover the maximum amount of surface, 100 lbs. thinned with 5 gallons of Pure Linseed Oil, covering 4,500 square feet, one coat over primed wood, giving a thoroughly covered surface.

Ease of Working

BRANDRAM'S B. B. GENUINE WHITE LEAD works out under the brush easily and freely, saving time and giving the best results.

Protective Power

BRANDRAM'S B. B. GENUINE WHITE LEAD when properly applied will not peel, check or crack. It wears away gradually and after its long life, leaves the building in a good condition to receive a fresh coat of paint.

Properly Proportioned

BRANDRAM'S B. B. GENUINE WHITE LEAD is regulated to contain exactly the proper amount of carbonate of lead to hydrate of lead, giving an even texture paint with large covering properties.

Whiteness

BRANDRAM'S B. B. GENUINE WHITE LEAD is the whitest heavy-bodied white lead known, and gives the most beautiful finish of any white lead yet produced.

These five features commend B. B. to both the dealer and the consumer and account for its rapidly increasing sale in Canada.

BRANDRAM-HENDERSON LIMITED

Montreal Halifax St. John Toronto Winnipeg

Current Market Quotations

These prices are for such quantities as are usually ordered by retail dealers. Large buyers can frequently make purchases at better prices.

McCASKEY

"THE NAME BEHIND THE SYSTEM"

After seven prosperous years, during which we have manufactured the McCaskey Account Register and the famous "Surety" carbon coated sales books as well as carbon leaf pads, in Canada, under the name of the

Dominion Register Company, Limited,

we have decided to act on the many suggestions received from our customers and travelers by linking up our name and product.

Therefore, without in any way affecting the personnel or standing of our company, we have decided to adopt the name,

McCASKEY SYSTEMS LIMITED,

to take the place of our former name, and trust that our thousands of customers (whom we take this opportunity of thanking for their patronage) will "remember us," and that those who have not traded with us will give us a chance to serve them.

McCASKEY SYSTEMS LIMITED

(Formerly DOMINION REGISTER CO., LIMITED)

Toronto, Canada

In our new plant **235-245 Carlaw Ave.**

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

The Aylmer Superior Lever Lift Pump

fitted for hand use. Has close revolving top and handle bearer, full six-inch stroke, wood handle, and is easy working.
This style of lever and fulcrum has several advantages over the ordinary style. Having short stroke, the power is greater, making it work easier. The handle, being wood, they are not so liable to break in frosty weather. Readily converted into a Windmill Pump.
Built for long duty under severe service.
A good profit-maker.
Aylmer Pump and Scale Company, Limited
Aylmer, Ont., Canada.

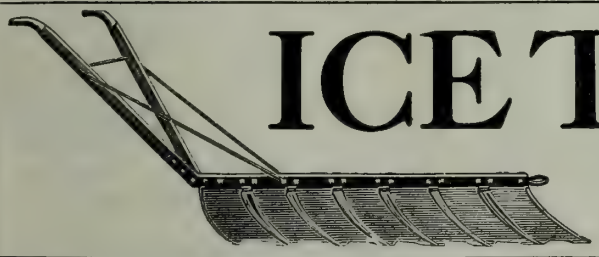
THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.



ICE TOOLS

Every Farmer, Butcher and Dairyman cuts ice. We have a tool for every use. Write for particulars and prices.

We also have a full line of Snow Plows, etc., for municipal work

ROBERT DONALDSON & SONS, Montreal

Keep these saws where men can see them and you will sell cross-cuts because the Lumber Jack knows which is the easiest and fastest cutting saw.

Condensed or "Want" Advertisements

Those who wish to sell or buy business or stocks, obtain competent help, connect with satisfactory positions, or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer. RATES (payable in advance): 2c per word first insertion, 1c per word subsequent insertion, 5c. additional each insertion, when Box Number is required. Each figure counts as one word.

WANTED

TINSMITH WANTED—MUST BE GOOD IN all branches. Permanent situation. C. F. Fawcett, Tweed, Ont. (4)

CLERK WANTED FOR STORE HANDLING hardware, paints, oils and glass. Only one with at least three years' experience. State salary expected. A. Ballantyne, Brantford, Ont.

EXPERIENCED HARDWARE CLERK WANTS situation as manager. Married. Protestant, and can get best of references. State salary. West of Winnipeg preferred. Box 245, Hardware and Metal. (4)

FOR SALE

FOR SALE—RETAIL HARDWARE STORE in Montreal; well situated; exceptional opportunity. Present owner has other business. Would sell half interest only, if desired, to party capable of taking charge. Apply Box C. B. L., Hardware & Metal, Montreal. (5)

MISCELLANEOUS

THIS IS TO NOTIFY THE TRADE THAT Mr. H. P. Morgan is no longer connected with this company, and that Mr. C. H. McGibbon is now in charge of our store. We would request all firms having booked orders given through Mr. Morgan to take the matter up with us, as we cannot recognize any orders given by Mr. Morgan. (Signed) Morgan Hardware Co., Ltd., per H. E. McGill, Secretary-Treasurer. (3)

FIRE INSURANCE. INSURE IN THE HARTford. Agencies everywhere in Canada.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fenson hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fenson Elevator Co., Toronto.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10, postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS IS the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

A STRAIGHT TALK FROM THE MANAGER

No. 30

Saving Money

IN speaking to a Hardware and Metal representative a few days ago, C. F. Fawcett of Tweed, Ont., spoke enthusiastically about Hardware and Metal's Market Service.

"I have saved money every time I have followed your advice," he declared "and there were times when I didn't follow it that I lost money."

Mr. Fawcett has been subscribing to Hardware and Metal for many years and so did his father before him.

* * * * * *

Here is the acid test of a trade paper's value to the field it covers. Has it enabled its subscribers to earn or to save real money as a result of the information given in its advertising and editorial pages?

There are hundreds of Hardware and Metal's subscribers who have been on our list continuously for upwards of 30 years. Let that fact speak for the quality of the service rendered by Hardware and Metal.

J. G. L.

The Ross Rifle Co.
has contracts to give out

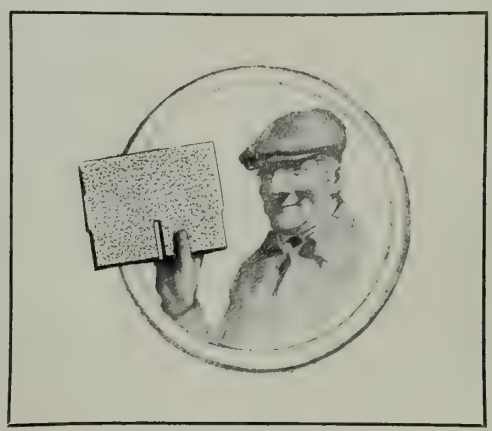
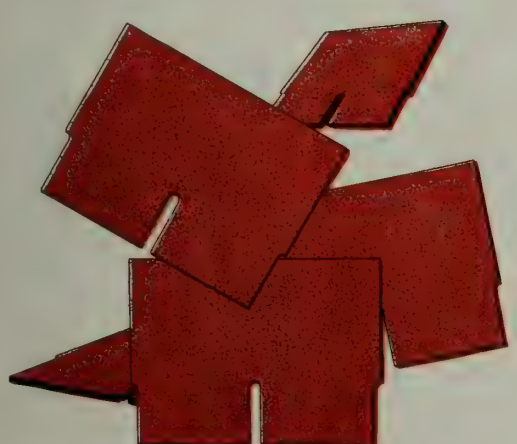
The Greatest Roofing Development of the Century

Thousands of homes will be roofed this Spring with



NEPONSET
"Twin"
SHINGLES

They are more attractive than wooden shingles or metal. Made in handsome shades of green and red. They resist fire — won't rust — blow off and are most economical to use.



NEPONSET TWIN SHINGLE
Two shingles in one—fewer cracks and nail holes.
Permanent Red and Green colors.
Real crushed slate surface.
Put up in convenient size bundles.

There's a good profit and a quick turnover for the dealer who handles them.

Only one hardware dealer in each town will be given the agency.

Send for our Agency Proposition

This is to be the most prosperous year ever for the Dealer who handles the Neponset line.

Stanley Tools

A New Stanley Tool

Masons' Six-Glass Plumb and Level

These Levels have two Level Glasses and four Plumb Glasses so arranged that no matter how the tool is taken up, one or more of them are available with which to level or plumb.

Each Glass is set solid in a metal case, which case is screwed into the level stock—a very much more satisfactory arrangement than were the glasses set directly into the wood.

Each Level and Plumb Glass is protected on both sides of the stock by a glass disc which serves not only to protect the glass from breakage, but keeps dirt and moisture from the openings.

Made in two lengths, 42 and 48 inches long:

		Per Doz.
No. 47	42 In. Long 6 Proved Glasses	$36.00

The

UNIVERSAL Lunch Box

No. 20 Tan Finish. Brass Trimmings.
No. 320 Black Finish. Nickeled Trimmings

FOR THOSE WHO EAT LUNCHEON AWAY FROM HOME

The man or woman in the shop, in the office, in the open—the child in school—the motorist and all others who desire the comforts of a home-cooked meal.

Each UNIVERSAL Lunch Box is equipped with a UNIVERSAL Vacuum Bottle which is guaranteed to keep liquids hot for twenty-four hours or cold for seventy-two hours. A feature of this bottle is the metal spring bottle container and shock absorber which hold the glass filler firmly in place and reduce the possibility of breakage to a minimum.

Another feature of great importance is the free circulation of air through the box when closed. This is made possible by a number of air vents in the top and sides. This constant circulation of air keeps the food fresh and wholesome and the lunch box sweet and clean.

UNIVERSAL Lunch Boxes are attractive in appearance and strong and durable in construction—built to stand long and severe usage. Made of heavy tin finished either in black or brown. Nos. 20 and 320 have two additional aluminum food trays, 4⅜ inches square by 1¾ inches deep.

UNIVERSAL

LEWISITE PREPARED ROOFING

is backed up by LEWIS BROS., LIMITED

There is Satisfaction and Money in Every Square.

"LEWISITE"

Roofing has a Saturant and Coating entirely different from the tarry substance used on cheap roofings, and which causes them to dry out, crack and disintegrate.

"LEWISITE"

Roofing is One Solid, Flexible Sheet, not several sheets stuck together; consequently it lays flat on the Roof. It has no laps to separate and "blister" up.

"LEWISITE"

Roofing will give better service than ordinary roofing because it is made of better materials. It will afford security and protection to your property.

"LEWISITE"

Roofing is cheaper than shingles and easier to lay, making a Better and More Permanent Roof.

It also resists fire and is unharmed by acid or alkali fumes that would destroy many roofings in a short time.

Supplied in 1, 2 and 3 ply with cement and nails.

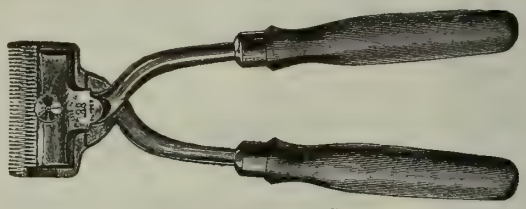
LEWIS BROS., LIMITED, MONTREAL

PRIEST'S HORSE and TOILET CLIPPERS

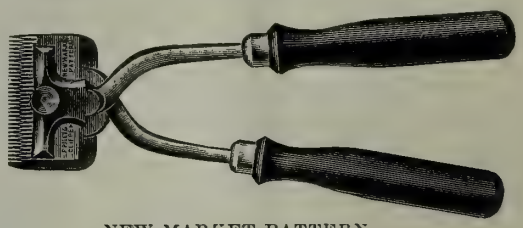
Made by American Shearer Mfg. Co.

present a complete line at a range of prices covering all requirements of the trade. They are all quality goods, and represent best designs and highest standards of workmanship, regardless of price.

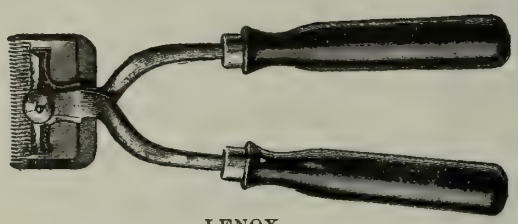
Some styles of hand Horse Clippers are illustrated below. All handles are heavy malleables, with threaded shanks, to keep the wood handles from pulling off. Spring tension on the adjusting nuts insures perfect contact at both ends of the cutting plates. Plates are perfectly ground and designed to cut hair, not break it off by main force.



BALL BEARING
Retailing at about $2.50.



NEW MARKET PATTERN
Retailing at about $1.75



LENOX
Retailing at about $1.50

If you are not familiar with these goods, send for samples and compare them with others.

If a Customer Walked Into Your Store

and asked for a file, what would you give him?

Any one of the following five will ensure his future custom:

KEARNEY & FOOT
GREAT WESTERN
AMERICAN
ARCADE
GLOBE

(Made in Canada)

They are Canada's favorites—controlling 90 per cent. of the demand.

Millions are used yearly, and the demand is increasing. Due, in a large measure to our educative advertising campaign—teaching your customers the economy of discarding a file when it has reached its "inefficient" point.

Remind your customers that after a certain point in the life of a file, time is wasted in its use, and the work suffers.

We're helping you. It only remains for you to stock the files with the big demand.

Plymouth Policy

Our first ad

shows the stress laid, even in the earliest year of the business, upon the policy which governs the manufacture of Plymouth Cordage—"highest quality only."

It is well to know that we have always had such a policy. It makes you feel certain that the same policy will be continued.

In the light of our growth this course is obviously the profitable one for us to follow. And the greater service which it enables us to render to those who sell or use our goods likewise makes it the natural one.

At no time have we seen any reason for changing this policy. Instead, we receive proof every day that "highest quality" is the only quality worth sticking to in cordage—whether you make it, sell it or use it.

The Maytag Multi-Motor Washer

Announcement Extraordinary!

What the Maytag Multi-Motor Washer Will Do.

It operates the washer and wringer. It will operate the sewing machine, churn, cream separator, food chopper—or any group of small machines—that do not require more than ½ H.P.

Now Ready! Something entirely new! Looks good—"makes good"—sells on sight! Every woman wants one! No competition! Only Multi-Motor Washer on the market!

In short, Mr. Dealer, what has hitherto been considered impossible in washing machine manufacture has been achieved in the Maytag Multi-Motor Washer.

The secret is in the light, powerful, compact little motor that is mounted right on the washer—burns gasoline, kerosene, gas or alcohol. Guaranteed for THREE YEARS.

The Maytag Multi-Motor Washer is breaking all sales records for us, so it MUST be selling fast for our dealers.

The price fits the moderate purse, but puts a generous profit in your pocket. GET SOME OF THIS GOOD BUSINESS. Be the FIRST one to supply the demand in your town.

Now, listen! Some live, progressive dealer in your territory is going to make **BIG MONEY** handling the Maytag Multi-Motor Washer—and it might as well be **YOU.**

You positively **CAN** sell this washer and, if you don't, your competitor will—and pocket the profits. Remember, the proof of progressiveness is showing new things **FIRST.** This Washer is the same as our regular Power Washer we have sold for years, except that it has attached under the tub a ½ horse-power, 2-cycle air-cooled engine.

HARDWARE AND METAL

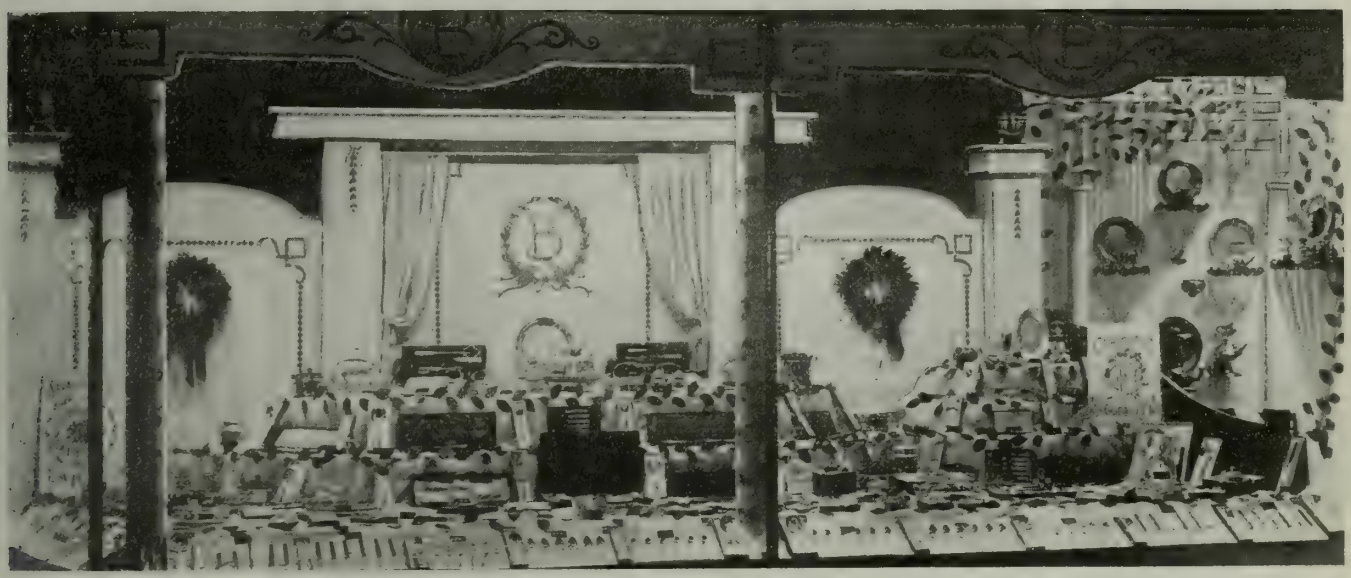
Canada's Only Weekly Hardware Paper

Vol. 30 TORONTO, JANUARY 29, 1916 No. 5

Awards in Christmas Window Contest



First Prize Window, for places over 5,000 population, arranged by Chas. Byford, for the Bond Hardware Co., Guelph, Ont. A complete description is given in the article which follows.

THE showing of window displays in Hardware and Metal's annual Christmas window display which closed on Dec. 31, was a very representative one. Displays were submitted from many of the largest hardware stores in Canada. On the other hand it was very interesting to note the large number of displays from the smaller towns—places under 5,000 population. This is probably one of the most significant and satisfactory features of the contest, showing that hardwaremen in the smaller places are to-day exhibiting a greater interest in window trimming than they ever have in the past.

The annual window display contest of Hardware and Metal, has for many years past been a big annual event in Canadian hardware window trimming circles, but the 1915 contest was, from the standpoint of the small town merchants, the largest and most successful ever held.

Quite a number of contestants had entered this year for the first time. A number of others who in previous years, had been annual contestants, were missing this year owing to the fact that they have enlisted for active service.

The quality of the displays entered was uniformly high, and the judges had considerable difficulty in picking the winners.

THE PRIZE WINNERS

PLACES OVER 5,000

1st Prize—Chas. H. Byford, c/o Bond Hardware Co., Guelph, Ont.

2nd Prize—Sumner Co., Moncton, N. B.

3rd Prize—P. E. Hughes, c/o D. H. Douglas, Chatham, Ont.

4th Prize—A. E. Stephens, c/o J. H. Ashdown Hardware Co., Calgary, Alta.

PLACES UNDER 5,000

1st Prize—John F. Bingham, c/o G. A. Binns, Newmarket, Ont.

2nd Prize—D. A. Smith, c/o Day Hardware Co., Red Deer, Alta.

3rd Prize—H. Lendon, Leamington, Ont.

4th Prize—F. L. Deacon, c/o Geo. Taylor Hardware Co., Cochrane, Ont.

In accordance with past custom, two contests were conducted. One was for stores located in places of 5,000 and over. The other was for places under 5,000 population. No restrictions were set upon the style of display or the goods used in the arrangement, except that each window had to be arranged with goods for the Christmas trade. The prizes are as follows: Places of 5,000 and over, first prize $10; second prize, $5; third prize, $3; fourth prize, $2; Places of under 5,000 population, first prize, $10; second prize, $5; third prize, $3; fourth prize, $2.

Honorable Mention

In addition to the prize winners, whose names appear in the accompanying panel, the judges decided that the following were entitled to honorable mention: Albert D. Buchanan, c/o F. W. Jeffrey & Sons, Midland, Ont.; R. Thornhill, c/o P. Hymmen Co., Berlin, Ont.; Chas, M. Harrison, c/o S. B. McClung & Co., Trenton, Ont.; Howard Furnace Co., Toronto; Chas. Harvey, c/o Barton & Fisher, Port Arthur, Ont.; Harry Armstrong, c/o H. H. Otton & Son, Barrie, Ont.; S. Mc-

First Prize Window, for places under 5,000 population, arranged by Jno. F. Bingham, for Binns Hardware, Newmarket, Ont. A description of the window is given in the accompanying article.

Intyre, c/o Wm. Black, Durham, Ont.; Rutherford & Kaiser, Simcoe, Ont.

The two first prize winning displays are reproduced and described here. The other prize winners will be featured in future issues of Hardware and Metal.

The second prize winning display for places over 5,000, that of the Sumner Co., of Moncton, N.B., was an especially creditable one and worthy of special mention. Great care and skill was shown by the window trimmer in arranging a display that had two excellent qualities, attractiveness and selling force. This display will be shown in an early issue of Hardware and Metal.

The second prize winner in places under 5,000, was D. A. Smith, c/o Day Hardware Co., Red Deer, Alta. Mr. Smith's display was very attractive. A good display of Christmas goods was shown. One feature, however, which detracted from the value of the window display, was the absence of price cards, although the articles shown were such as would lend themselves readily to price-ticketing, and should, according to the opinion of most leading window trimming authorities, have price tickets or cards. This display will also appear in an early issue of Hardware and Metal.

First Prize Winner in Larger Places

The first prize winning window arranged by Chas. Byford for the Bond Hardware Co., Guelph, Ont., is shown in one of the accompanying illustrations.

A close examination of the display, which is of necessity, shown here in greatly reduced form, discloses many decidedly interesting and practical features. A good background is one of the chief essentials in a good hardware display, especially a Christmas window display. The background in this window display, although inexpensive to prepare, provided a splendid setting for a display of goods such as was shown.

The background was made of wall board supported by four square pillars. The pillars were finished in white, edged with gold. The two centre pillars were six inches higher than the pillars on the ends. The cross piece running from the centre pillars, and supporting a handsome fern in a brass jardiniere, was ten feet in length.

The wall board panels between the pillars were finished in pale blue wall finish, stencilled in gold. On the centre panel appeared a large B, representing "Bond," surrounded by a wreath stencilled in gold. The draped curtains on either side were cream color. On the other two panels were two attractive holly wreaths.

The valance around the top of the window near the plate glass was made of cream material, stencilled in gold. All the stencils used in the display were designed and cut out by Mr. Byford.

The pillars or supports which form part of the window construction, and are shown in the illustration were neatly wrapped with decorated paper.

The end of the window, which is an exceptionally long one, was neatly trimmed and decorated with lattice work, pleated materials, etc. Neatly arranged individual shelves or supports were used to display trays, silver tea services, spirit lamps and kettles, etc.

The foregoing description deals almost entirely with the portion of the window that is not sold but which gives tone to the goods that are offered for sale.

On the floor of the window, and on the raised steps in the background, were the many lines which were offered as gift suggestions.

The raised section was arranged in step formation, from boxes. White cheesecloth was used for a cover for the steps and floor. The edges of the steps were decorated with holly garlands.

Immediately in the foreground appear-

ed a neat arrangement of silver plated table cutlery including tea, dessert and table spoons, desert and table forks and knives, meat forks, fruit spoons, pie servers, sugar shells, etc.

On the floor of the window appeared a splendid array of silver plated ware in cases, casseroles, pie dishes, bakers, etc.

On the steps larger articles were shown, and included carvers in cases, pearl handled goods in cases, biscuit jars, casseroles, bean dishes, tea services, butter dishes, fruit baskets, bread trays, butter and pickle dishes and other articles.

A neat price ticket showing the prices in plain figures appeared on every article.

Two large and appropriate show cards were used, one in each end of the window.

One card bore the following message: "Select Your Christmas Gifts Early." The other read as follows: "Christmas Gift Suggestions." The cards although inexpensive were very neat and dignified, and acted as salesmen, who in a quiet manner reminded the onlooker that the time for buying Christmas gifts had arrived and that the display had been arranged for the Christmas shopper.

The combination of colors, white, pale blue and gold used in preparing the decorations, gave a delicate and tasteful effect that was particularly appropriate for the class of goods on display.

Owing to the size of the window the photographer had considerable difficulty in securing a photograph of the entire display. The accompanying illustration is considerably smaller than the photograph submitted in the contest.

First Prize Winner in Smaller Places

The first prize winner in towns under 5,000, was awarded to John F. Bingham, who submitted a display from Binn's Hardware, Newmarket, Ont.

In arranging this display of "Santa Claus Headquarters," the window trimmer exhibited a marked degree of ingenuity. Considerable skill is required to make an attractive display of such goods as are shown in the Binn's window.

The background in this display, was not as attractive as some of the others submitted in the contest, but the general layout of the goods on display, and the fact that price tickets were used freely, were factors that influenced the judges when making the award.

In this window a wide range of Christmas hardware was shown.

There was no evidence of overcrowding. The price tickets were neat. The whole lay-out of the display was one that would attract and hold attention.

The floor near the front of the window was used for displaying such lines as silver-plated ware, steel table cutlery, case goods, safety razors, hones, carvers, trays, child sets, electric grills, disc stoves, and other lines.

The raised portion towards the back of the window was devoted chiefly to the display of Christmas toys of various kinds, interspersed with such articles as thermos bottles, electric flashlights, electric hand lanterns, etc.

The end wall of the window was used as a display space for such practical gifts as carpet sweepers, razor strops, rifles, trays, etc.

Shears were displayed on the star shown on the end wall, while razors were displayed in a crescent display board. A skate display board occupied a prominent place towards the back of the window.

The background, although unsuitable for small classes of displays, was alright in this case, owing to the particular nature of the articles displayed.

The background was made of wall board, trimmed with green cloth and tinsel, also festoons of holly leaves. The lattice work on the doors was of silver and gold tinsel.

Behind the lattice door, was a life size figure of Santa Claus.

Behind the figure of Santa Claus, and easily discernible through the lattice doors were a number of evergreen trees. The sky could also be seen, and was made of greyish blue paper with stars and moon of yellow paper pasted over cut-outs. The background was one that attracted the attention of hundreds of kiddies as well as grown-ups.

Automobile Accessories are Hardware

American Hardware Manufacturers' Association Secured Views of Auto Accessory Manufacturers, and Also of Wholesale Hardware Distributor — Nearly all Believe That Proper Channel of Distribution is Through Hardware Trade

THOSE in close touch with the various branches of the hardware trade in both Canada and the United States know that during the past two or three years a new "hardware department" auto accessories, has developed with amazing rapidity. The automobile industry has developed more rapidly than any other industry of recent years, and with the development of the automobile industry came the development of the automobile accessory business.

Remarkable Growth

The growth of the latter has been so remarkable, and of such proportions that the question of distribution has received a great deal of attention from leading trade papers, retailers, wholesalers and manufacturers. During the early stages of the development of the auto accessory industry, the bulk of the business passed through the hands of garage owners, but as the industry grew it became evident that better methods of distribution were needed, that the proper channel of distribution for the auto accessory manufacturers was through the hardware trade rather than the garage.

The result has been that during the past two or three years the hardware trade has secured a good grip on the automobile accessory business. It is quite evident from the manner in which the hardware trade is taking up the new line, that in a few years time the great bulk of the accessory business will be transacted through hardware stores.

Manufacturers Favor Hardware Trade

That automobile accessory manufacturers want to do business with hardware wholesalers, and that the latter are anxious to do business with manufacturers of automobile accessories is clearly evident from correspondence which has passed between the manufacturers, wholesalers and the American Hardware Manufacturers Association.

The American Hardware Manufactures Association has recognized the importance of the auto accessory industry. The result has been that a good number of accessory manufactures have joined the Association.

The association recently wrote to wholesale hardware distributors and to auto accessory manufacturers, asking the former how far they were going into the accessory business, and asking the accessory manufacturers how far they were already seeking to market their goods in the hardware trade.

The replies were most illuminative. Judging by the replies received it is quite evident that the auto accessory manufacturers want to do business through the hardware trade. It is also evident that the hardware distributors want to

(Continued on page 31.)

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVIII. TORONTO, JANUARY 29, 1916 No. 5

A SIGNIFICANT FEATURE

ONE of the most significant and pleasing features in connection with HARDWARE AND METAL'S annual window display contest, the results of which appear in this issue, was the large number of entries from the smaller towns throughout the Dominion. With each succeeding contest, HARDWARE AND METAL has noted the increased interest which has been taken by small town merchants. The results of the 1915 contests clearly show that there is a constantly growing interest in window display work in the smaller places.

At one time there were many people who had the idea that window displays were only for the large cities. Ideas along this line have changed, and to-day many exceptionally attractive and creditable displays appear each week in the small town stores throughout the Dominion. To-day you seldom see a small town hardware store, in Canada, that has not a modern store front, fitted up with a plate glass show window. HARDWARE AND METAL recognizes the importance of the small town merchant, and in the annual Christmas window display contest allots four cash prizes for distribution to firms in towns under 5,000 population. And in this connection it will be interesting to many of our readers to know that from carefully compiled statistics, it has been shown that 63% of Canada's population resides in community centres of 5,000 and under, and in the adjacent rural communities.

PUSHING THE SLOW-PAYS

IT is to be hoped that most retail hardwaremen have their book accounts in good shape at the present time. The giving of credit was greatly curtailed during the year 1915, with the result that on the whole the retail hardware trade of the Dominion is in splendid condition, financially. Most retailers are able to meet all obligations in a very satisfactory manner. It is not out of place, however, to urge those who still have on their books accounts against slow-pay customers, to go after collections in a thorough manner.

The trouble with most merchants who have not proven successful in the matter of collecting from slow-pays is that they have followed a certain system rigidly and woodenly. They send out the same letters to everyone, stereotyped forms which proceed by gradual stages from courteous reminder to stern threat. They never think to change them to suit individual cases. The debtor may be a man on whom threats would have no other effect than to strengthen his obstinacy and render his resolution not to pay adamantive. Nevertheless, the form letter, threatened suit, goes out.

Slow-pay customers differ as widely as people of any other class. There are obstinate and timorous, crafty and guileless, honest and dishonest debtors.

The many ramifications of human nature are found in full in this class. Is it any wonder, then, that the merchant, who tries to collect from every one of them, in the same way, is going to get left in a great majority of cases?

In the case of some debtors who are apparently hopeless cases, it is a good plan to use the forms supplied by retail merchants' associations. Very often payment or part payment of accounts can be secured by this method.

MANY PRICE CHANGES

PRICES of many hardware lines are still on the upgrade and HARDWARE AND METAL'S market reports in this issue contain the usual heavy weekly budget of price changes mostly in an upward direction.

It is quite evident that there is still a great deal to be done in the way of price adjustments, as a result of the unparalleled conditions which exist in the steel market, and also, as a result of many other unusual conditions which have developed as a result of the war. Retailers should be careful in their buying and study the hardware and paint markets carefully. This does not mean that retailers should buy too sparingly, but rather that they should not overload as a day of reckoning must come as regards the present costs of many abnormally high products. On the other hand, the fact should not be lost sight of

that many manufacturers of hardware and paint lines have had considerable difficulty in securing supplies of raw materials. In many cases the costs of raw materials have increased several hundred per cent. since the outbreak of the war, and manufacturers have been forced to increase their selling prices, in order to take care of increasing costs of production.

Last week HARDWARE AND METAL pointed out that "the stage where advances were warranted in paints had been long since passed" and that "whether the change comes in a week, a month or four months, it is nevertheless certain." This week HARDWARE AND METAL announces that prices on mixed paints have been advanced to take effect on March 1. Thus the prediction was borne out within the week and the advance goes into effect in a month.

And attention might be called to the fact that for weeks the retailer has been regularly advised that an increase was the only logical outcome of the upward movement of raw materials. Further, we may be permitted to call attention to the fact that HARDWARE AND METAL has made many predictions in other departments of the markets recently which proved an advantage to those who acted upon them.

PREVENTING BUNK SCHEMES

THE trading stamp fight now going on in the United States is being followed with interest by the American retail hardware trade. Prominent American papers have several times recently referred to the manner in which the operations of trading stamp companies have been curtailed in Canada.

An American contemporary in referring to the operations of trading stamp companies in the United States, says in part:

"The Land of the Free and the Home of the Brave is so free and so brave that many forms of bunk which Canada will not suffer are permitted to flourish here like the green bay tree, among them the green trading stamp. This condition will probably continue until Congress is induced to take drastic action and substitute a carefully devised federal law for the numerous existing State statutes, the majority of which are undoubtedly unconstitutional."

HARDWARE AND METAL has on several occasions during the past two or three years directed the attention of retailers to the provisions of the Trading Stamp Act. For the benefit of new subscribers, or any who are not acquainted with the provisions of the Trading Stamp Act, a short summary of the provisions is given here: In 1905 there was passed by the House of Commons, what was commonly known as the Trading Stamp Act. This was really an amendment to the Criminal Code of 1892, respecting trading stamps, coupons, etc., and was brought about largely by the efforts of the Retail Merchants' Association at that time.

The expression "trading stamps" includes any form of receipt, coupon, premium ticket or other device given by the merchant to the customer, and which represents a discount on the price of goods bought or a premium given to a customer. A coupon is not legal (1) When it does not show upon its face the place of its delivery; (2) When it does not show the merchantable value thereof; (3) When it is not redeemable at any time. The third and last is probably the most important because it is the one on which the law is most frequently broken. It shows that in order to come within the provisions of the law, the coupon, receipt, etc., must be redeemable at any time—not when $20 or $30 worth are secured—not when five, ten or twenty blue or red tickets are secured—not when the merchant wishes,—but now, or at any time at the wish of the customer. It should also be remembered that it is necessary to show the merchantable value of each receipt or coupon. Anyone infringing on the regulations of the Act is liable to a six months' imprisonment, and to a fine not exceeding $200. Section 4 of the Act also provides a penalty for everyone, who being a purchaser of goods from a merchant or dealer in goods, directly or indirectly receives or takes trading stamps from the vendor of such goods or his employee or agent. It can be seen, therefore, that any merchant conducting a contest where a coupon or other device is given away and which is not redeemable for its full value at any time is not acting within the provisions of the law, unless the contest is entirely free. If the customer has to purchase a certain quantity of goods to secure the guess, the contest is not legal. The idea of the Act is to prevent schemes whereby the public thinks it is getting something for nothing, when it is really paying indirectly for whatever may be secured.

TO TAX MAIL ORDER HOUSES

NEWS comes from Winnipeg that under the terms of a bill to amend the Corporation Taxation Act, the Provincial Government will tax all mail order businesses in Manitoba, including that of Toronto companies, and will increase the taxation of express companies, and street railway companies. The measure, not yet approved by the Cabinet, is designed to tax all commercial and mercantile concerns, wholesale or retail, doing business by mail.

While the ins and outs of this measure are not at hand, there is to be seen here a very radical step and one that from the standpoint of the big catalogue houses will not be very well relished. A few years ago there was an agitation in Ontario among certain merchants to put through a bill taxing mail order houses, but nothing came of it. However, if the Manitoba bill goes through, this agitation will likely be revived and will probably be taken up by other provinces.

How to Keep Correct Set of Books

This Contributes Not Only to the Only Safe Basis for Success, But is Required to Preserve Credit—Counter Checks, Ledger, Journal, Cash Book and Other Forms Explained

Published by special arrangement with Fred. W. Lambert, official auditor to R.M.A. of Canada in Manitoba.

DURING the past year and more Hardware and Metal has urged repeatedly, the need for knowing exactly the financial details of one's business. When trade was exceptionally buoyant as in 1912 and most of 1913 the profits were produced almost automatically. As it was put frequently, "Any one could make money." Now it is different. The testing time came and the man whose bookkeeping was at fault, and who did not have his business, sales, purchases and expenses analyzed sufficiently to discover the weak spots, found it hard to meet the storm. A set of books for the average retail business is not expensive, and where the merchant does not feel capable of installing these himself a local auditor could be secured for a comparatively small outlay. The books themselves are supplied by a number of firms in Canada and frequently are turned out by local job plants.

The books suggested by Mr. Lambert are:

1. Counter Check Books;
2. Cash Book;
3. Purchase Journal;
4. General Journal;
5. Ledgers: (a) Customer's Ledger (Loose Leaf), (b) Purchase Ledger (Loose leaf), or both (a) and (b) may be kept in same ledger; (c) Private ledger (small bound book);
6. Bills payable book;
7. Monthly Satements in duplicate.

Counter Checks

The first form to be considered is a counter check book. These are usually numbered from 1 to 50, and each clerk should use only the one allotted to him. These books and each check are usually numbered according to the numbers of the clerks, 3, 4, 5, 6, 7, etc., or each clerk can write down his own number on each check to identify himself with the sale. In no case should one of the slips be destroyed, all should be in order for the business office.

These books are used for 1, cash sales (where no register is kept); 2. charging goods to customers; 3. recording produce purchased from customers; 4. recording goods returned by customers, and, 5. recording amount paid on account by customers.

"It is essential," warns the auditor, "that all purchases made by the proprietor of the business from his own store should be treated as if he were a customer, in order to obtain accurate results."

The Cash Book (Form 1)

The cash book, a form of which is shown, is used for all cash receipts and disbursements.

1. Ledger column is used for all payments made by your credit customers which are entered individually and posted to the customer's credit in the ledger.

2. The total daily cash sales to be written up here and the grand total of this column to be credited to the Merchandise Account in the Private Ledger at the end of the month.

3. A record of all cash purchases to be kept daily and a total to be entered in this column and in the same operation this amount to be divided up and placed in columns 7, 8 or 9; this of course depends on the nature of the purchases.

4. This column is used solely for deposits in the Bank. Using the above columns the cash is evenly balanced in the following manner." Add columns 1 and 2, deduct 3, and also the amount reserved for change, which leaves the amount for deposit in the bank.

5. Consists of all payments by cheque to the wholesalers, which are charged to their individual accounts in the Purchase Ledger.

6. All cheques are entered here in numerical order, being credited 5,7,8, or 9 according to the nature of the transaction. Also payments on account of drafts by the bank.

7. This column is used for cash purchase of merchandise, also purchases made by cheque, when it is not deemed advisable to open an account in the Purchase Ledger, in the event of your only doing business with that concern occasionally.

8. General Expenses is an account to which all expenses are charged when there is no account open to which to

Value of a Reliable Bookkeeping System

By Fred W. Lambert

Before you can borrow money from a Bank you must submit a Financial Statement showing your Assets and your Liabilities.

Before you can obtain a line of credit from a Wholesale House you have got to submit a similar statement.

The Bankers and the Wholesalers, before doing business with you, obtain a report from the Mercantile Agencies, who ask you to supply them with a Financial Statement showing what you are worth.

The Credit Men's Association are asking you to do the same thing.

If the Banker is to lend you money and the Wholesaler lend you goods and trust you to pay these loans back, it is reasonable that you should trust them to the extent of supplying them with a statement showing how you stand, but you cannot supply a correct statement unless you keep a proper set of books. If you supply an incorrect statement for the purpose of obtaining credit—whether of cash or of goods—you are liable to imprisonment.

If you do not keep a proper set of books you cannot possibly tell whether you are making or losing money. The want of this knowledge is the direct cause of a large number of Retailers going out of business. It is very easy to keep a simple set of books. In order to show you how simple it is, we are publishing this pamphlet.

If you are not keeping a proper set of books you are being discriminated against on that account by the Banker and the Wholesaler. You cannot afford to have your credit impaired in this way, in addition to being ignorant of where you stand financially.

Suggested Forms for Exact Bookkeeping

Detailed Description of Each is Given in Article

CASH BOOK

			1	2	3	4				5	6	7	8	9
Date	Description	Folio	Ledger Cr.	Cash Sales	Petty Cash		Bank Dr.	Date	Description	Folio	Ledger Dr.	Bank Cr.	Mdse.	General Expense	Sundries

Form No. 3

PURCHASE JOURNAL

			1	2	3	4	5	6					
Date	Description		Invoice	Amount	Mdse.	General Expense	Stable Expense	Sundries					

SHEET No. ..... **LEDGER** **ACCOUNT No.** .....

NAME .....

ADDRESS .....

	Date	Description	Folio	Debits	Credits	Dr. or Cr.	Balance	

BILLS PAYABLE

No.	Date	On Whose Account	Address	Interest or Discount	Amount	Ledger Folio	Dated	Terms	Date														Date Accepted	Where Payable	By Whom Drawn	Remarks
									Year	Jan.	Feb.	Mch.	Apl.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec				

MONTHLY STATEMENT

Date	Articles	Folio	Credit Amount	Debit Amount	Total

post a certain item, and includes often Office Supplies which are being used up from day to day and are not considered an asset.

9. The term "Sundries" includes all accounts other than those found in either the Customers' or Purchase Ledger which are not accommodated with a particular column in the Cash Book in order to economize space. It is most important to know what the barn is costing monthly in feed, shoeing and general repairs, and an account should be opened in the Private Ledger for this item. All items in this column should be posted individually. The totals of all the Debit columns should agree with the totals of all credit columns in the Cash Book, with the exception of the total column 3, (Petty Cash) which is used for balancing the cash for deposit in the bank only, as this amount has already been charged under the different headings of Merchandise, General Expenses, etc., on the dates of disbursement. Column 6 should be deducted from column 4 at the end of each month, and by adding the amount of the cheques which have not been presented for payment at the Bank, this amount agrees with the amount at your credit in the Bank Pass Book.

* * *

FORM NO. 2—PURCHASE JOURNAL

After checking the invoices from the different wholesales, manufacturers, etc., to see that quantity and price are correct, they should be taken monthly, placed in alphabetical order, also in order of date, and entered in col. 1, the total purchase from each to be extended to col. 2. This amount is then posted to the credit of the individual amount in the purchase ledger.

The total of col. 2 equals the sum total of cols. 3, 4, 5 and 6, which consist of the different purchases made, charged to the correct accounts. These columns are posted to the debit of the different impersonal accounts in total at end of each month in the private ledger.

* * *

GENERAL JOURNAL

This is used, 1. for the closing out of the financial year; 2. For the charging in one total of all goods returned by customers to the merchandise account. and for crediting the individual accounts in the customers' ledger; 3. For treating discounts earned and paid in a similar manner; 4 For putting through entries which need an explanation, such as errors on posting to the wrong account, also returns to wholesalers manufacturers, etc.

* * *

CUSTOMERS' AND PURCHASE LEDGER—3

Both these books may consist of bank ruling, showing the debit, credit and balance columns; the total of the former furnishes the amount owing by customers; and the latter the amount owing to the different jobbers, etc., covering a given period.

* * *

(C)—Private Ledger

This book contains the different impersonal accounts, merchandise, furniture and fixtures. the private account of the proprietor, profit and loss account; wages, real estate holdings; in fact, all accounts which are not to be found in either the customers' or purchase ledger.

* * *

BILLS PAYABLE BOOK—FORM 4

When a merchant accepts a draft or mails a promissory note to a creditor, it is essential to keep a memorandum of this transaction so that the bill may be attended to at maturity. A stock form such as shown in No. 5 will answer this purpose, but instead of using this as part of your bookkeeping system, it will simplify matters a great deal to treat this book as a memorandum book only, from which no posting is done.

* * *

MONTHLY STATEMENTS—FORM 5

These statements are in duplicate. The original states the name of the proprietor and the kind of business he is conducting: the ordinary statement form with duplicate blank attached.

Place this statement next to the customers' account in the ledger, and post daily from the check slips until the end of the month; recapitulate the total debits at that time on all the accounts placing this sheet at the end of all the duplicate statements which are transferred to a binder kept especially for that purpose. The total amount of these debits should agree with the recapitulation of the counter checks, as stated in the description of form No. 1. The balance owing from the previous month is then inserted at the top of the statement, and both the account in the ledger and the statement are credited with the purchase price of the merchandise returned, taken from the general journal. After giving credit on the statement for all monies paid during that month, it is ready to be mailed to your customer. The total sales for the month taken from the recapitulation sheet mentioned above are then credited to the merchandise account in the private ledger.

To the merchant it may appear superfluous to recapitulate both the charge slips and the debits on the monthly statement, but by doing so it will be ascertained immediately whether any charges to a customer's account have been omitted or not, as an error is often made, necessitating a total loss to the merchant.

TRIAL BALANCE

The above term and that of financial statement are often confused and therefore, some enlightenment on this subject may be of assistance. A trial balance should be taken off at the end of every month, and is arrived at in the following manner—it proves that all entries have been made on the right side of the account, and is the initial step in preparing the financial statement:

1. Cash on hand.
2. Cash on hand as per cash book.
3. Total amount owing by customers as per ledger.
4. Total amount owing to your creditors, as per purchase ledger.
5. Balance of each individual account in private ledger. The total debits should equal the total credits for the trial balance to be correct.

* * *

FINANCIAL STATEMENT

This statement is prepared from the trial balance in the following manner:

1.—Trading Account

Put on one side the stock on hand at the commencement of a certain period. Add to this the total purchases from that date to the time the next inventory is taken.

On the other side put the total sales for the period elapsed between the date of the inventories.

Add to this the amount of the new inventory.

Deduct one total from the other, and the result will be the gross profit.

2.—Profit and Loss

Numerate all expense accounts found in the private ledger on the debit side. Bring forward the gross profit from trading account and place some on the credit side. Also enumerate any of the expense accounts in the private ledger that may have a credit balance. The difference between the debit and credit sides will furnish you with either your net profit or net loss.

Assets and Liabilities

Assets will consist of (a) Cash on hand; (b) Cash in bank; (c) Balance as per customer's ledger; (d) Stock as per inventory; (e) All accounts on debit side in private ledger other than expense account.

Liabilities will consist of (a) Amount owing to creditors; (b) Capital at commencement of period; (c) Net profit for period.

Every item mentioned in the trial balance is utilized in some manner in the financial statement.

Automobile Accessories are Hardware

Continued from page 25

do business with the manufacturers of automobile accessories.

Extracts from some of the replies are here appended:—

From Automobile Accessory Manufacturers.

A manufacturer whose name is not mentioned for obvious reasons says:

"We have always been of the opinion that the garage is not the most desirable outlet for the requirements of an automobile owner, and many of the supply stores are about in the same class. We certainly believe that as a class the hardware merchants are a better credit risk than the garage or the accessories dealer. But there is another point which is of very great importance, namely, the question of price cutting, whether between the jobber and the dealer or between the dealer and the consumer. We are strongly of the opinion that the legitimate hardware jobber or dealer is more worthy of confidence in this respect.

Selling to Hardware Jobbers

"We are selling to a number of hardware jobbers in different sections of the country, and we have been told by some of them that they desire to go more and more into the accessory line, but are going slowly on account of the price-cutting tendencies of the supply jobbers. At the same time, we must add that a considerable number of the accessory jobbers and dealers are apparently as strongly opposed to this practice as the hardware men.

"Regarding inquiry as to whether we wish to extend our business in the direction of the hardware trade, we would say that we should be very glad to see the jobber and dealer go in strongly for accessories. It appears to us that already the tide is setting in that direction and that it will gain strength in the next two or three years. Such is our fervent hope and prayer."

Hardware Trade a Desirable Field

Another Writes.

"We have always considered the hardware trade a most desirable field to cultivate and at present dispose of our product to some extent through this medium. Our experience in dealing with hardware jobbers and dealers has been entirely satisfactory and we shall be glad to extend our business in this direction whenever possible. Our efforts have always been toward maintaining standard price schedules and we feel that prices are less likely to be cut by established hardware houses than by unreliable low rated, exclusive accessory concerns."

The great importance of the subject to the average accessory manufacturer is indicated in this, from another correspondent:

"We note that you would like expressions from accessory manufacturers in regard to the hardware trade. The writter advanced the idea about four or five years ago when there were but a limited number of hardware men handling auto accessories, that the logical place for accessory business was in the hardware stores.

Alright Financially

"In the first place the biggest percentage of them are financially alright. It is not a mushroom business—the average hardware man has been in business in his town or city for years, and through fair dealings has built up a good trade. He is a good business man and a merchandizer, and the average hardware jobber has an organization that is bound to make a success of nearly everything that he takes up. They discount their bills, and what is better, they sell the goods—in fact they have everything that makes the account an A No. 1 account from the manufacturers' standpoint.

This was the writer's theory a number of years ago, as above stated, and I believe we were one of the first accessory concerns to go after that business. The writer personally called on nearly all of the bigger hardware jobbers over the United States for a number of years, and we kept after them with the result that in the last two years about eighty per cent. of our business has been done through the hardware jobbers. And the nicest part of it is, we have never lost one cent on our hardware accounts, which is really remarkable owing to the above statement that eighty per cent. of our business has been done with them."

Hardwaremen Big Buyers

Another writes:

"We have found that a good percentage of the hardware jobbers are very slow and careful in taking on automobile accessories, but when they are once satisfied that the article is alright and that there are sales possibilities, they buy and sell in bigger quantities than any of the accessory jobbers. Therefore, unless the manufacturer understands the situation, he is liable to misjudge the possibilities in checking over the first year's business with the hardware jobbers. We have never received but a small amount of business from any hardware jobber in the first year, but after the first, and in some cases even the second season, he has always come to the front strong."

Another says:

"We feel as you do, that the hardware dealer is the legitimate party to carry automobile supplies as they have the proper facilities for displaying and pushing the sale of same. There are, of course, many garages with a satisfactory credit rating and who have nice display rooms and clerks to look after them but this is not as general as with the hardware merchant."

Hardware Trade Natural Channel

Another writes in the same vein:

"We quite agree with you that the natural channel for the sale of automobile accessories would be through the regular hardware trade, and our idea is that eventually it will narrow down to the hardware jobber or dealer and there will be a very small stock if any carried by the average garage."

Other interesting paragraphs are quoted at random from several letters:

"We feel the automobile accessory business will eventually fall to the hardware dealers throughout the country, and will be glad to do anything possible we can to help you bring about this result."

"The hardware jobber and the retail hardware merchants are the logical distributors for automobile accessories. It fits in with the hardware line better than it does with any other line. The man who sells automobiles, and those who do automobile repairing, are usually not the type of men that will make a success of selling small merchandise. Most of them are not sufficiently drilled in system and thoroughness, and then so many are of a type that does not inspire confidence."

ALLIES PURCHASING AGENTS

The Trade and Commerce Department, Ottawa, has published the following list of purchasing agents for military purposes for the allied Governments:

International Purchasing Commission, India House, Kingsway, London, Eng.

French.—Hudson Bay Co., 56 McGill Street, Montreal; Captain Lafoulloux, Hotel Brevort, New York; Direction de l'Intendance Ministere de la Guerre, Bordeaux, France; M. De la Chaume, 28 Broadway, Westminster, London.

Russian.—Col. N. Golejewski, Military Attache, Room 904, Flatiron Building, New York City, N.Y.

WHAT OTHER PAPERS SAY

INGENIOUS COLLECTION SCHEME

From American Artisan

A very ingenious plan has been evolved by the merchants of Hot Springs, Arkansas, through which it is hoped to transform delinquent debtors into profitable customers.

Briefly the plan is this: To have persons who are in debt to more than one concern call at the office of the merchants' association, give the names of their creditors, together with the amounts owed to the various dealers and then give a blanket note covering the entire indebtedness, thus wiping their slates clean. The debtors will then be required to make weekly or monthly payments on the note according to their ability, such payments to be prorated to the creditors until all the accounts are paid.

Whether this plan will work out successfully depends to a very large extent upon the man who is in charge of the collection bureau, for he is, of course, the one who must make it his business to secure the blanket notes and induce the debtors to agree to make the aforesaid payments, as well as to make certain that the payments are kept up.

The plan should work out well where the collection manager is tactful and yet aggressive enough to convince the delinquent debtor that it is to his advantage to "get square with the world."

One of the difficulties that must be overcome will, of course, be that of inducing the debtor to come to the association office and give a list of his debts, but this problem might be solved by having the dealers furnish lists of their accounts to the collection manager whose duty it would then be to call upon the debtors and make suitable arrangements with them.

Taking the plan as a whole, American Artisan is rather inclined to view it with favor. At any rate, it offers a means of solution for the great evil of loose credit management which is altogether too prevalent among retailers of all classes.

STEEL PRODUCTION AND MOVEMENT THE PROBLEM

From American Metal Market

The problem of the steel maker for 1916 will not be a problem of markets or orders. The real problems will be in the manufacturing and transportation departments. The mills have the orders, at good prices, and questions as to the market, in the future, refer to a time so far ahead, and with so much to do meanwhile, that they have become relatively unimportant.

What the steel producer or the steel fabricator faces is a question of securing full production from his equipment, and of getting the product shipped to destination. There are serious problems with respect to various raw materials, coke, ferromanganese and other alloys and the various innumberable supplies which ordinarily take care of themselves, but at a time like this are each of signal importance.

The matter of labor is a very serious one, and one that promises to grow more serious as the year wears on. Relief that no serious labor shortage developed last year, as was feared, has lately given way to a realization that there is now a labor shortage. Production has not been seriously interfered with as yet, but at plants where there have been very short strikes, it has developed that all the men have not come back. Enough to make a noticeable difference found other jobs at once, in a surprisingly short space of time, and are staying in the other jobs. Immigration is practically shut off. The United States has accumulated a deficit in population up to date, with respect to the movement of people into and out of the country, of just about one million, as set forth in detail in these columns recently. The deficiency of course accumulates from month to month. The situation has been growing more important through the winter, and it is obvious that the advent of spring and the resumption of much outdoor work will make a very decided difference.

The problems of the steel maker would not be counted in full by referring only to raw materials and labor. Transportation has become a serious matter already, not merely of raw materials, but of finished product. Car shortages at steel mills are growing and there is no prospect of any great relief. There was reported a net surplus of 47,000 freight cars for the beginning of this month, but the steel industry sees none of that. The breaking up of the congestion in the east should release many cars, but on the other hand the weather thus far has not been nearly as bad as is to be expected, and some cold snaps may freeze up the transportation situation to a very serious extent any time in the next two months. With traffic requirements growing on all hands it is likely that transportation will be a very serious matter for the steel industry all year.

* * *

EXPECTS 40-CENT GASOLINE

From New York American

"Gasoline prices will continue to advance; it would not be surprising if first-grade gasoline was quoted at 40 cents per gallon within a short time." So Harry F. Sinclair, millionaire oil man, declared recently.

"There is really a scarcity of oil at this time," added Sinclair. "Unless new fields are opened within a year or so, there may be an oil famine. The output of all the old fields is decreasing gradually, while the demand for gasoline is increasing every day.

"The Oklahoma oil fields, which are the largest in the world, show an average daily decrease of 25,000 in comparison with the output of a year ago. A barrel of oil averages 42 gallons of oil, or 21 gallons of gasoline.

"This means that the average yearly decrease in gasoline production in Oklahoma alone is 1,916,250,000 gallons.

"Other fields have been affected the same way as Oklahoma, and probably the average decrease in the gasoline output from all the fields in the United States is close to 3,000,000,000 gallons yearly."

"Has the cost of production increased?" Sinclair was asked.

"Not appreciably," was the answer.

"Why, then, should the price be advanced?" Sinclair laughed and said:

"Oh, well, if you've got something to sell that everybody wants, you get the highest price you want for it, don't you? That's the way in the oil business."

* * *

STATISTICS OF COPPER PRODUCTION

From Engineering and Mining Journal

There is more or less talk about what was shown by the statistics of copper production in 1915, the changes in stocks from beginning to end of the year, etc. A good deal of misapprehension is arising from this, for the statistics are in no wise so complete as supposed and do not warrant the deductions that are being made.

In fact, the statistical reports made so far for 1915 include only a statement of the production of crude copper by the smelter of North America, a statement of the supply of crude copper available to American refiners and a statement (partly estimated and partly based on surmise) of the world's production of copper.

There was no statement of the production by American refiners and none of the stock on hand at refineries either at the beginning or the end of 1915. Anything purporting to be such data is not so, but was guesswork and probably far out of the way.

The world's production of copper in 1915 was given by the Journal as about 1,061,000 metric tons. That figure included guesses for Bolivia, Russia, Germany, Africa, Spain and Portugal, and the minor countries, these being credited with a total of 140,000 tons. However, that figure may be 7 or 8 per cent. too high or too low without affecting the grand total by more than 1 per cent.

For the present, therefore, the estimate of 1,061,000 metric tons of crude copper produced by smelters in 1915 is near enough. It is about 127,000 tons more than was produced in 1914, about 55,000 tons more than in 1913, and about 41,000 tons more than in 1912. However, the rate of production at the end of 1915 was doubtless much higher than the average for the year, which included three months of curtailed operation.

At the end of 1915 the electrolytic refining capacity of the United States was nominally 1,827,000,000 lbs. per annum, excluding the small capacity for refining Lake copper. Estimating an ability to use this to the extent of 95%, the monthly output of eletrolytic copper would be about 143,000,000 lbs. Reckoning a production of Lake copper of about 23,000,000 lbs. per month and of casting about 4,000,000, the total would be about 170,000,000 lbs., but that figure is probably a little too high. The highest monthly production of refined copper in the United States previous to 1915 was about 145,000,000 lbs.

As for the stock of copper at refineries, the quantity at the end of 1915 was probably less than at the beginning of the year. The behavior of the market during the last month has indicated that it was relatively small—too small to provide the market with the balance wheel that it ought to have.

* * *

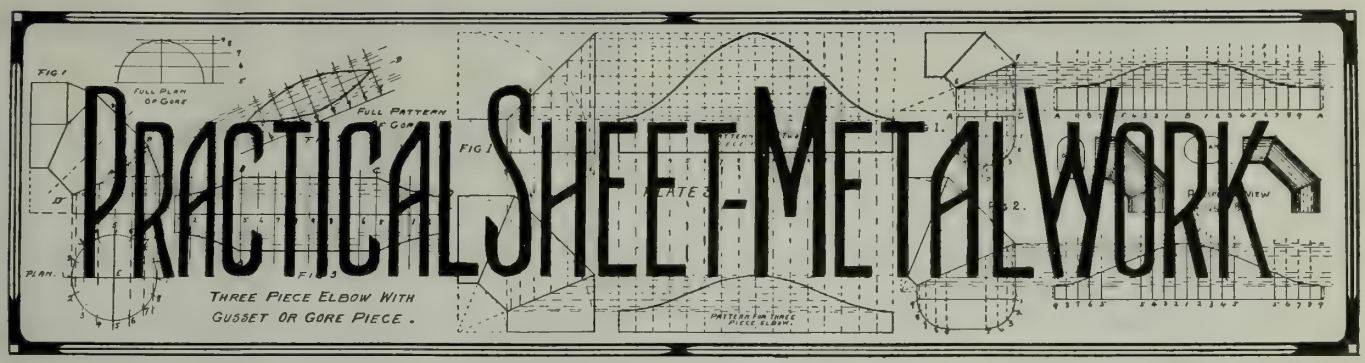
RAILROADS TO BLAME

From American Metal Market

The railroads are to blame for allowing the present blockade in the east to develop. For many years they have freely made use of the embargo insisting upon it as one of their rights to place embargoes, and forcing shippers to admit the propriety of the embargo when the railroad deems one necessary. There is no one to regulate these matters but the railroads. It certainly is nobody else's fault that the railroads have become tangled up. The consignees do the best they can, and shippers have nothing to do but ship goods if they have the goods and the orders. It is purely the business of the railroads. They have been placing their embargoes altogether too late. The stitch in time might possibly have righted matters entirely by now, yet the condition to-day is worse than ever.

The trouble, of course, was caused by the enormous export movement. Who suffers? Not the foreign buyers, who are receiving their goods as fast as the vessels engaged can carry them. In the steel industry the mills do not suffer particularly, for there is such a heavy demand that when steel cannot be shipped to one quarter there are other quarters anxious to have the extra material. The sufferers for whom there will be the most sympathy are the steel consumers of New England, who are deprived of their steel. They did not cause the export movement. It is none of their business, yet the export goods have been allowed to block the tracks and shut off their material.

It was the duty of the railroads to take as drastic measures as necessary. The railroads know from day to day where their cars are and how they are moving. We say "the railroads" but use the term only in the indefinite sense. The information is in railroad possession, but evidently six weeks ago it was not before the eyes of responsible men who could see and think. It could not have been co-ordinated and brought together before those who would have brains to judge and courage to act.



BY THOMAS STANFIELD

THE following is a continuation of the definitions and terms, which it is necessary to understand before entering upon the actual development of patterns.

Quadrilaterals

A quadrilateral is a plane figure bounded by four straight sides not necessarily the same length, nor need any of them be parallel to each other.

Trapezium

A trapezium is a four-sided figure, no two of which sides are necessarily the same length, though it is usual to restrict the term "trapezium," to a quadrilateral which has two of its sides parallel.

A Rhombus

A rhombus is a four-sided figure having all its sides equal in length, and its opposite sides parallel but its angles are not right angles.

A Square

A square is a four-sided figure which has all four sides equal in length and its angles all right angles.

A Parallelogram

A parallelogram is a four-sided figure having its opposite side parallel and consequently equal. This term is usually applied to a figure the length of which is greater than its breadth. If all it angles are right angles, the figure is then called a rectangle.

A Circle

A circle is a plane figure consisting of one line which is called the circumference and is such that all lines drawn form a certain point within the circle to the circumference are of equal length. This point is called the centre, and any line so drawn is called a radius of the circle.

A Diameter

The diameter of a circle is a straight line drawn through the centre of the circle and terminated both ways by the circumference.

A Semicircle

A diameter divides the circle into two equal parts, each of which is a semicircle.

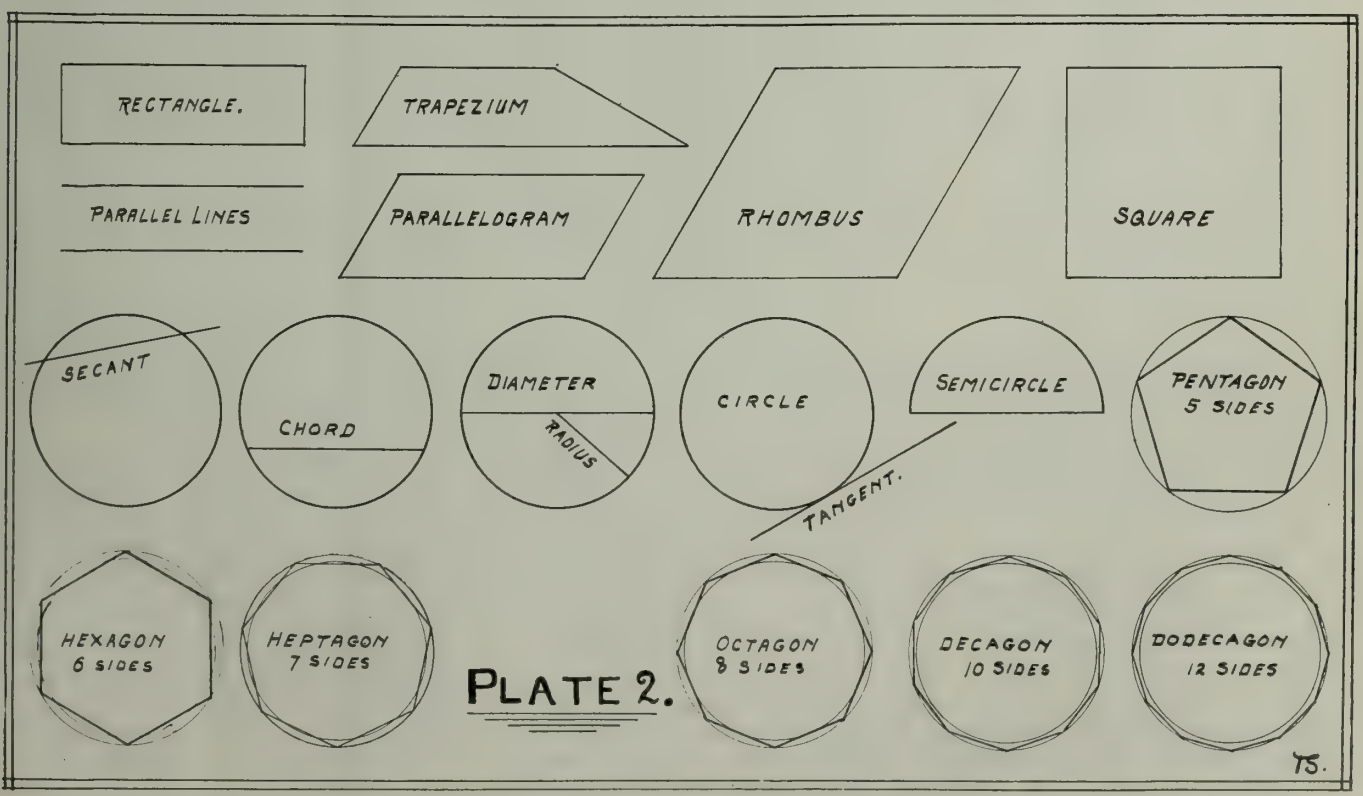
Note.—The words 'plane figure' are used in these articles to denote a figure which can be drawn on a plane or level surface.

A Polygon

A polygon is a many-angled (and consequently a many-sided) plane figure, bounded by straight lines, and is used particularly in referring to figures having more than four sides.

A pentagon is a plane figure having

(Continued on page 46.)



EVENTS IN THE TRADE

Catalogues Wanted

Harry Parsons, who is opening a hardware store in Orillia, Ont., in the near future, asks manufacturers of hardware and household hardware lines to forward catalogues with prices.

Fire Losses

Hamilton, Ont.—Fire badly gutted the premises of Kent, Garvin & Co., 18 Catherine street, north, dealers in builders' hardware and supplies, mantles, paints, etc. The rear portion of the store was practically destroyed. It is thought that the fire was due to spontaneous combustion, which occurred close to a number of oil cans.

Industrial Notes

Redcliff, Alta.—The Dominion Glass Co. will make an extension and install a plant for making lamp glasses.

Ottawa, Ont.—The Ottawa Brass Mfg. Co., are considering the erection of an addition to their factory.

Pembroke, Ont.—The Pembroke Iron Works have taken over the Lee Manufacturing Co., and will make stoves.

Hardwaremen Enlist at Owen Sound

Owen Sound, Ont.—The hardware merchants of Owen Sound will be well represented at the front. The following have enlisted with the 147th Battalion now recruiting in Owen Sound:—Colin McLean, of the Creeper & Griffin sales staff; Walter Puffer, of the T. I. Thompson sales staff; J. B. Morrison, of Christie Bros. Co. staff; Webster Butchart, of R. B. Butchart Bros. staff.

Winnipeg Notes

E. E. Lyday, general manager of The Maytag Co., Winnipeg, was a visitor in Minneapolis, the early part of this week.

H. S. Seaman, credit manager of Clare Bros. Western, Ltd., Winnipeg, spoke on "The Credit Men's Clearing House" before the Winnipeg Y.M.C.A. last week.

Business Changes

Liberty, Sask.—Smith & Duncan, hardware merchants, have dissolved partnership. H. F. Smith will continue the business.

Dunnville, Ont.—Haney & Pringle, dealers in stoves and tinware, has been dissolved. F. F. Haney will carry on the business.

Woodstock, Ont.—J. Y. Smiley, hardware dealer, Woodstock, Ont., has taken into partnership his son Lorne Carlyle Smiley. The new firm name is J. Y. Smiley & Son.

Personal

C. Worden, hardware merchant of Rouleau, Sask., is spending a month visiting friends and relatives in the East.

Alex. W. Fisher, of the Myers Hardware Co., Stratford, Ont., has been elected chairman of the Stratford Public School Board.

H. H. Vaughan, vice-president of the Montreal Ammunition Co., has been elected a director and a vice-president of the Dominion Bridge Co., Lachine, Que., to fill the vacancy caused by the retirement of C. B. Gordon from the Board.

The Hardwaremen's Honor Roll

Lieut. G. N. Phillips, hardware merchant, Cornwall, Ont., has enlisted for overseas service.

Archie Stethhem, manager Wells Hardware Co., Fort Frances, has been given a commission on the staff of 141st Battalion, with the rank of major. For some years Mr. Stethem was on the staff of Wells & Emmerson, Port Arthur.

Sergt. Charles Morrison, who prior to enlisting, was employed with the Marshell-Wells Hardware Co., Winnipeg, has been awarded the distinguished service medal.

The death occurred from wounds of Private Leslie G. Seely, who prior to enlisting was on the staff of T. McAvity & Sons, St. John, N.B.

New Firms

W. W. D. Young, who a few years ago conducted a hardware store in Selkirk, Man., but gave it up to take a position with the Government, is returning to Selkirk, and has built a new store near the site of his old one, which was destroyed by fire since he retired from it. Mr. Young will put in a full line of general hardware, paints, oils, glass, etc. He will also add a tin shop and metal working department.

Frank D. Lyman has taken over the railway and supply department of the business of John Millen & Sons, Montreal, as from January 1, 1916. Mr. Lyman has been manager of this department since its inception some nine years ago, and purposes conducting same on his own behalf along practically similar lines as heretofore. Meantime the new firm name will be Frank D. Lyman, but as soon as a Dominion charter has been granted, Lyman & Lyman, Ltd., will be the business title. The head office and warehouse will be located at 323 St. James Street, Montreal, while a branch will be established at 90 Adelaide Street, Toronto. Stocks will be carried at both addresses.

Presentation to Hardwareman

Halifax, N.S.—To receive the felicitations of his associates and to be presented by them with a silver-mounted cane was the happy experience of Alpin J. Grant recently. It was Mr. Grant's golden jubilee in the hardware business and representatives of all the hardware houses in the city were present to tender their regards and wish him many more years of successful life.

The meeting of the Halifax Hardware Association was held in the Board of Trade rooms and was presided over by Major Simmonds, Major Simmonds spoke most feelingly of the high regard in which Mr. Grant was held by his associates. The presentation was made by Gavin Stairs, of Stairs, Son & Morrow.

In replying, Mr. Grant spoke generally of the history of the hardware business during the past fifty years. He entered the hardware business in Pictou, 1866. In 1870 he came to Halifax and joined the staff of Fraser, Reynolds & Co., Upper Water street. Later he entered the employ of George E. Smith & Co., and finally went into business with his uncle, Alpin Grant.

The cane was a very fine one. The engraving on the silver handle was: "Alpin J. Grant, from the Halifax Hardware Association, 1866-1916."

New Incorporations

The Canadian Bronze Powder Works, Ltd., have been incorporated at Ottawa, with a capital of $500,000, to manufacture bronze powders and other materials at Montreal. Incorporators: R. E. Thorne, E. Coughlan, and T. B. Gould, all of Montreal.

The McCooe Rail Anchor Co. has been incorporated at Toronto, with a capital of $40,000, to manufacture mechanical devices of all kinds. Head office at Toronto, D. McCooe, and J. J. Beck, all of Toronto, Ont.

The Precision Tool & Machine Co., has been incorporated at Ottawa, with a capital of $50,000, to manufacture machinery of all kinds, particulary gauges, tools, arms and munitions, etc. The head office is at Montreal, and the incorporators are John J. Meagher, Henry N. Chauvin and James E. Conlin, all of Montreal.

The De Sales Mfg. Co., has been incorporated at Ottawa, with a capital of $10,000, to manufacture cloth, jute and cotton bags, etc. Head office is at Montreal, and the incorporators are Jacob Y. Fortier, A. Wilfred Muhlstock, and J. Charles Duhamel, all of Montreal.

The Algoma Rolling Stock Co. has been incorporated at Toronto, with a capital of $40,000, to manufacture locomotives, cars, rolling stock, etc. Head office at Toronto, Ont. Incorporators: T. Gibson, A. Taylor and J. Gibson, all of Toronto.

The Sable River Copper Co. has been incorporated at Toronto, with a capital of $100,000, to acquire and develop mineral lands and deposits. Head office at Toronto. Incorporators: J. M. Godfrey. T. N. Phelan, and J. E. Corcoran, all of Toronto.

The Garland Manufacturing Co. has been incorporated at Toronto, with a capital of $100,000, to manufacture all kinds of machinery and tools, etc. Head office at Hamilton, Ont. Incorporators: F. Smoke, J. Grayson Smith, and N. Sinclair, all of Toronto.

LETTERS TO THE EDITOR

These columns are open to contributions upon any topic of interest to the trade, it being understood that the views expressed are those of the contributors, and do not necessarily imply editorial indorsement. Names of contributors will be withheld, if desired, but name of writer must accompany correspondence as an evidence of good faith.

WESTERN CANADA RETAILER REPLIES

Mr. Editor,—In your Dec. 25 number of Hardware and Metal, an article appeared on page 31 under heading of "Mail Order Houses Busy," it said in part: "What appears to be needed is more co-operation between the merchants and farmers, etc." Whoever wrote the article must be anything but conversant with the cause of the prosperity of the mail order house and the failure of retailers. Anybody with country business experience, knows that the farmer don't send his money away because he don't like the hardwareman or because he has no use for his wife, "NO SIR," he sends his money away because he pays less money for his goods (and who can blame him). If the wholesalers and manufacturers will supply goods to the retailer at the same price as the mail order house pays for them, I can guarantee that the farmer will buy at home and at better prices than by sending his money away. The trouble with the retailer is the buying, and not in the selling. The writer asks in the article, "What is the retailer doing about this?" He should ask, "What is the jobber doing about this?" Especially this last year when the price of raw materials was going up, they kept raising the prices on manufactured goods until the prices quoted in the catalogue houses were way below the jobbers' prices.

What is really needed is that the jobbers and manufacturers wake up to the fact that it would pay them better in the long run to spend some of their energies in trying to compete with catalogue houses, instead of spending it playing the markets.

A RETAILER.

Twenty Years Ago
In the Hardware Trade

The following items were taken from the issue of Hardware and Metal, of Jan. 25, 1896:—

"The members of the young and enthusiastic Iron and Hardware Association of St. John, N.B., held their annual dinner on Thursday evening last, and it was a most successful affair. W. H. Thorne was in the chair. The vice chair was occupied by Thomas McAvity, who had on his right Jospeh Henderson of Halifax, and Henry Moulden of Guelph, on his left. The others present were: A. T. Thorne, T. C. Lee, T. Bell, Geo. McDonald, John McAvity, Geo. McAvity, James H. McAvity, F. E. Caine, E. Perkins, R. B. Emerson, W. M. Jarvis, W. S. Fisher, Geo. Weldon, H. C. Coates, M. Kerr, M. E. Agar, R. Connors, J. Keefe, Geo. Ketchum, J. Macintyre, W. L. Hamm, L. Nase, W. O. Purdy, T. B. Robinson, J. C. Robertson, A. N. Rowan, J. J. Barry, H. A. Drury."

A number of those who attended the dinner, referred to in the foregoing, are still actively engaged in the hardware trade. Others have passed to their reward.

At the annual meeting of the association for 1916, held in St. John, N.B., during the early part of the present month, it was decided to forego the annual dinner and devote the amount of money which it would cost to the Canadian Patriotic Fund.

* * *

"At the meeting of the Board of Trade, Toronto, on Tuesday, Edward Gurney, was elected as 1st vice-president."

The above refers to Edward Gurney, president of the Gurney Foundry Co., Toronto. Mr. Gurney still takes an active interest in the business of the firm of which he is president.

HARDWARE LETTER BOX

The Joy Range

Lumsden Trading Co., Ltd., Lumsden, Sask.—Will you be good enough to let us know who manufactures the Joy range, and also if they have a Western representative?

The Canadian Ventilating and Heating Co., Ltd., of Owen Sound, Ont., are the manufacturers, and they are represented in Winnipeg by Christie Bros., 521 Henry Avenue.—Ed.

Manufacturers of Electric Heaters

T. A. Cowan, Brantford, Ont.—Will you kindly give us the names of makers of electric heaters?

Canadian General Electric Co., Ltd., Toronto, Ont.

Northern Electric Co., Ltd., Toronto, Ont.

National Electric Heating Co., Ltd., Toronto, Ont.

Hot Point Electric Heating Co., Toronto, Ont.

Hughes Electric Co., Toronto, Ont.

Canadian Westinghouse Co., Ltd., Hamilton, Ont.

Renfrew Electric Co., Renfrew, Ont.

The Moffat Stove Co., Weston, Ont.—Ed.

Metal Rings for Crown Sealers and Schram Tops

The Angell Hardware Store, New Denver, B.C.—Will you please let us know where we can get the metal rings for crown sealer jars and also the Schram tops?

Dominion Glass Co., Limited, Toronto, Ont.—Ed.

Makers of High Oven Ranges

Walter S. Fairweather, Sussex, N.B.—Can you inform me of stove manufacturers in Canada making the high oven range?

The only firm we know of at the present time is Clare Bros. Co., Ltd., of Preston, Ont.—Ed.

Burman's Power Clippers

J. E. Scriven, Tilbury, Ont.—Could you give us the name of the party who handles the Burman power clipper?

B. & S. H. Thompson & Co., Montreal, Que.—Ed.

What the Canada Paint Trade-Mark Means to You

IF You are THE Exclusive Canada Paint Agent in Your District---

the C. P. on each can means chemically pure and is your assurance that you are selling the best paint that can be made.

The C. P. this year is backed up by a co-operative selling service such as you never thought possible. This complete service is bound to bring you a good share of the paint business in your locality.

Look over your stock now and make sure that you have ordered the "full line." The demand is coming and you must be ready when the "first shot" is fired in the big consumer campaign.

The Canada Paint Co., Limited

560 WILLIAM STREET, ∴ MONTREAL

"Get Out and Get Under"

IF You are Not an Exclusive Canada Paint Agent

a letter of inquiry to our Sales Department will bring you a story full of pleasant surprises, that will prove a revelation to you as to the part played by a real selling service in moving goods from your shelves.

Our 1916 plan is the most comprehensive and far-reaching ever put in operation by a Canadian Paint Manufacturer. One or two suggestions will help you to realize its bigness.

Our Rural Consumer Campaign will reach practically every possible user of paint outside the small towns—not once but several times.

Our Small Town and City Consumer Campaign will be just as thorough and many of your own customers will be convinced of the economy of using Canada Paint.

If you are interested, ask us to give you the complete story. Time is short, so you must speak quick.

The Canada Paint Co., Limited

560 WILLIAM STREET, ∴ MONTREAL

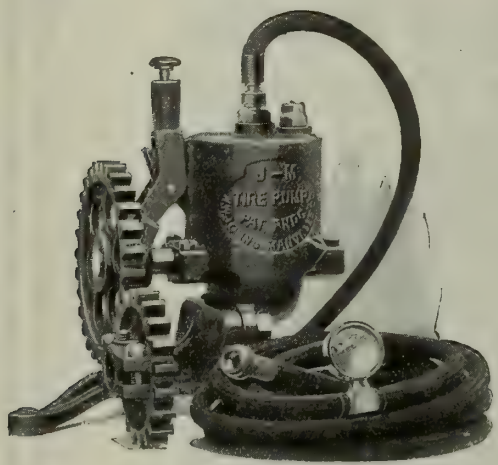
To-day is "the day" to "Get Out and Get Under"

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

J-M TIRE PUMP

The Canadian W. H. Johns-Manville Company, Toronto, Canada has placed an engine-driven tire pump on the market. The pump is described as a simple arrangement consisting of the engine, a line of tubing, a pressure gauge and the connecting gear to the engine. The pump operates by simply turning a lever. The pressure gauge indicates when sufficient air has been forced into the tire.



J-M Tire Pump

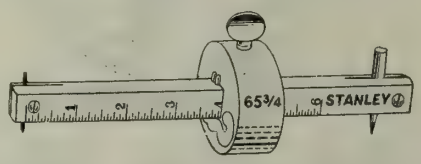
The makers claim that a tire 30 by 3½ inches may be inflated in less than a minute and that a tire 34 by 4 inches in 2½ minutes. The complete pump weighs 4½ pounds and has been called the J-M pump.

It is claimed by the makers that the pump will quickly pay for itself in tire repairs. They say that 90 per cent. of the tire troubles are caused by tires not being properly inflated, a point overcome by using the J-M pump.

* * *

STANLEY WOOD WORKING GAUGE

The Stanley Rule and Level Company, New Britain, Conn., U.S.A., is making a boxwood gauge the thumb screw of which is made of brass and the bar is protected by a brass shoe between the bar and the head. The head is oval in form and a brass plate is set in the face to prevent wear. In one end of the bar a tempered steel marking point is inserted. In the other end is a pencil. This is a new feature and the makers state will be found very convenient. Both marking point and pencil are held secure by screws and can be adjusted for length and readily removed for sharpening. The bar is 8¼ inches long and is



Stanley Wood Marking Gauge

graduated in 16ths of inches for 6 inches from the point.

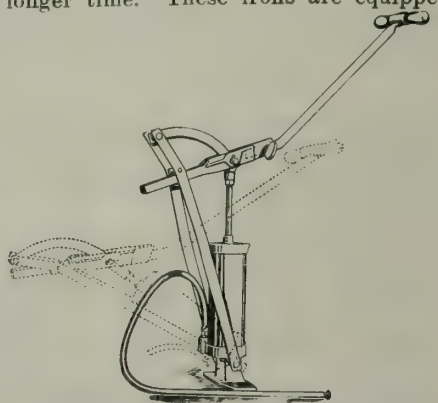
* * *

ASBESTOS LINED SAD IRONS

The W. H. Howell Company, Geneva, Ill., U.S.A., are manufacturers of an asbestos-lined sad iron, which they claim is very superior in many ways. The body is said to be a solid casting upon which is placed a cast iron cover fastened at both ends. Inside the cover is a layer of asbestos, which is claimed to keep the heat in the lower portion of the iron. The asbestos is said to leave an air space which insulates the upper part of the iron, thus, heating the iron, the

Howell Sad Irons

manufacturers claim, becomes much quicker and the iron retains the heat a longer time. These irons are equipped



Jenson Tire Pump

with Harper handles, which are said to be shaped to fit the hand. The frame is said to be one piece stamped from solid steel and the wood handle is said to be uniformly cool. The handle is removable in a similar way to the handles of ordinary sad irons.

The same firm is making the Jenson tire pump. This pump operates by a level system, and is claimed by the Howell Company to be so simple that a boy or woman can use it. They claim it to be very durable, will not leak and that it will inflate 90 pounds pressure with 75 per cent. less effort than the ordinary pump inflates 65 pounds pressure.

* * *

Hamr-Handl Screw Driver

HAMMER HANDLE SCREW DRIVER

The Crescent Tool Company, Jamestown, N. Y., U.S.A. has placed on the market a new screw driver and hammer combined. The handle of the screw driver acts as the head for the hammer and is held in position for either screw driver handle or hammer head by means of a strong spring.

This combination hammer and screw driver requires display, being an entirely new device. The Crescent Company has a very attractive card for counter or window display which will be sent to any hardware merchant upon request. The size of the display board is 13 by 10 inches and weighs 2½ pounds mounted with the tools.

An attractive 6 page circular has been issued by The Stanley Works, New Britain, Conn., describing the Stanley wrought steel set No. 1776-J1. for garage doors. The circular is suitable for counter distribution or may be enclosed with letters or invoices. A supply of the circulars will be sent to any dealer on request giving quantity desired.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

The Markets at a Glance

Business with hardware jobbers continues brisk, and retailers are still booking freely for spring delivery. The metal markets are still very firm. Steel mills are all busy and in some cases are turning down business. Many price changes have taken place during the week, nearly all in an upward direction. Among the lines which have advanced during the week are brass and bronze screws, galvanized iron pipe, picks, wringers, washing machines, brass wire, game traps, batteries, vises, auto tires, glaziers' points, churns, washboards, white lead in oil. The predicted advance in paint prices is due on March 1, details appear in the paint market reports. Further advances on many lines are predicted for the near future. The linseed oil market is unsettled.

MONTREAL

MONTREAL, Jan. 28th. — There have been no developments and no improvement in the situation regarding products and manufactures of iron and steel. Dealers state that mills are still refusing orders and that the shortage is becoming more acute as time passes without assurance of future supplies. However, there are certain evidences that the upward movement of prices may have worked itself out to some extent. The advances this week are not so important or so widespread as they have been recently and there are indications of a more normal buying spirit in the trade. This would appear to be the logical result of a heavy buying and booking movement on a rapidly advancing market. As dealers get their wants covered the demand becomes less active and even though there may be no improvement as regards the outlook for supplies price advances are not so frequent. This state of business becomes naturally accentuated by the discouragement to consumption offered by abnormally high prices and unsettled conditions.

Business continues very satisfactory and January will make a good showing. Indications are that with stock taking completed many retailers are sorting up for spring business and immediate as well as deferred deliveries are good. However, there seems to be an absence of the speculative spirit which was in evidence until recently as the result of the rising markets.

In the metals there has been more activity than for some weeks with higher prices for lead and spelter, copper strong and tin very firm, The outlook is for some further advances in this department. Brass products appear to be particularly strong with several important increases reported.

Advances during the week include: black sheets, wrought iron pipe (black and galvanized), toe calks, brass wire, brass and bronze screws, escutcheon pins, rope, batteries, vises, automobile tires, wringers, washers, churns, washboards, sash cord etc. There is a trifling decline in light tee and strap hinges and higher prices on game traps are expected by next week.

Tin is Very Firm.—Although there has been no general change in quotations on tin, the market is very strong and there are prospects of higher prices. The chief influence appears to be the American market, as usual, and New York shows an advance of 1¼ cents since last report. However, recently New York has in turn reflected the conditions at London. In connection with this market it is pointed out that insurance rates for the Suez route have recently declined 5 per cent. from the high point established, which is taken as a sign that there is an improvement regarding the submarine menace in the Mediterranean. Montreal quotation: 46½c- 47c—firm.

Spelter is Up.—Stronger outside markets, to which reference has been made in these reports, has resulted in a rise of 1c on the local quotations for spelter. New York shows an increase of slightly over ½c in two weeks. New York has been leading London on this last movement but the latter has recently begun to take notice and fall in line, with the result that, after a short quiet period following the advance, American dealers have again begun to make inquiries. Montreal quotation: 23c-23½c—steady.

Lead Again Advances. — On the strength of a further increase in the quotations of the American Trust there has been an advance of ¼c in the local lead market. New York is now quoting 20c above last report and the advance is generally maintained by independents and second hands; at some points in the Western States, however, the Trust basis is being slightly shaded. Producers take the stand that they have little lead to offer and that their production is practically sold out for some time to come; weather conditions are restricting production to some extent and the strength of the London market continues as an influence. Montreal quotation: 8¼c-8½—firm.

Copper is Very Strong.—No general changes have taken place in the local copper market but there has been added strength noted in the position of the metal. New York is quoting a full 2 cents above last writing which would indicate that there will shortly be an advance here. London is supplying the chief influence despite the efforts being made there to regulate prices. New York states that outside offerings of copper seem to have almost entirely disappeared; producers claim that they are short. Montreal quotations 27c-27½c—very strong.

Antimony is Firmer.—Situation in the local antimony market is unchanged with a firmer tendency, if anything, in evidence. Supplies for early delivery are somewhat scarce but sellers are showing an eagerness to meet buyers on January and February shipments from China and Japan at slight concessions in price. New York quotations are ½ cent higher than at last report. Montreal quotation: 45c—steady.

Aluminum, Zinc.—There is practically no change in the market as affecting aluminum and zinc. The former continues nominal at 68c with business in very narrow channels and zinc is 27½c in casks and half a cent higher for part casks.

Solder is Firm.—With tin in a stronger position the local quotations for solder are firm although generally unchanged. The Montreal prices: Commercial half-and-half 27c to 28c and strictly half-and-half 29c to 30c.

No Improvement in Steel.—Although wrought iron pipe is about the only important item in the list of products of iron and steel showing an advance this week, there are a number of adjustments throughout the higher manufactures. Dealers in metals state that they can see no improvement in the situation as yet and that there is nothing in sight but adjustment of prices to higher levels from time to time as stocks on hand move out. At the same time the steady rise in prices is likely to have its own effect as it goes along. Buying has been pretty heavy and when the trade generally becomes supplied the increases in price are likely to come more slowly, particularly in view of the fact that industrial dullness in many lines coupled with abnormally high prices will logi-

cally have its effect upon consumption. The American markets for iron and steel continue very strong, and advance of $2.00 a ton on wire being one of the most recent developments. Canadian dealers report that conditions in regard to orders show no improvement and the mills evidently would rather not consider offers. The situation in boiler tubes is particularly bad.

Black Sheets.—There have been still further adjustments in the situation in black sheets, the changes being in an upward direction. The basis of the market as set by dealers in metal products remains as at last writing but a number of whalesalers have made an increase of 25c to effect an adjustment to the level referred to. This is illustrated by the two following lists, one from a wholesale house and the other from a metal dealer:

10 gauge	$3 75	$3 50
12 gauge	3 75	3 60
14 gauge	3 75	3 35
16 gauge	3 50	3 40
18-20 gauge	3 50	3 55
22-24 gauge	3 60	3 65
26 gauge	3 70	3 70
28 gauge	3 80	3 80

Canada Plates.—Canada plates, bright and galvanized, and galvanized sheets are all firm on the recent advances. Predictions are being made that there will be further advances but there are indications that these will not be so rapid as they have been during the past few weeks. It is evidently being appreciated that the market is in a pretty high position. The minimum of $3.70 for ordinary Canada plates has been dropped.

Advance on Pipe.—There is a general advance in effect on black and galvanized wrought iron pipe. This is the result of new lists by the makers on the strength of advancing raw material. For black pipe, both buttweld and lapweld, the new prices are as forecast in the last two reports in these columns. For the galvanized, however, the increase is greater. Adjustments on the galvanized lapweld are not available at writing but they will be in proportion to those on the buttweld.

Buttweld Size	Per 100 feet Black	Galv.
¼ in. and ⅜ in.	$ 2 46	$ 4 17
½ in.	3 06	4 80
¾ in.	3 57	5 92
1 in.	5 27	8 76
1¼ in.	7 13	11 85
1½ in.	8 53	14 16
2 in.	11 47	19 06
2½ in.	18 14	30 14
3 in.	23 72	39 41
3½ in.	28 52	47 38
4 in.	33 79	56 14

Boiler Tubes.—Boiler tubes are very firm on the higher prices announced last week. In fact dealers state that prices are practically what they might want to ask, although advantage is not being taken of the shortage to enchance values. Deliveries are being deferred eighteen to twenty weeks and there are prospects of a serious shortage if there is no improvement in this connection in the near future.

Toe Calks Higher. — An advance of about 20 per cent. on toe calks is an important development which indicates the effect of the advance in iron and steel on products of these metals.

Wire.—There are changes in the quotations for steel wire this week but the market is very firm and likely to go higher. A report from the United States to the effect that there has been an increase of $2.00 the ton in quotations in that market is an indication of the position of these products.

Brass wire has been again advanced, the increase being from 12½ to 15%.

Hinges Adjusted. — Still another change has taken place in the prices for tee and strap hinges. The heavy hinges do not appear to be affected but the light are now on the following net basis, which is slightly lower than before:

3 in., doz. prs.	$0.35	$0.35
4 in., doz. prs.	0 42	0 39
5 in., doz. prs.	0 50	0 41
6 in., doz. prs.	0 60	0 53
8 in., doz prs.	0 88	0 63
10 in., doz. prs.	1 23	0 84
12 in., doz. prs.	2 10	1 58
14 in., doz. prs.	....	1 93

The discounts on the set lists are 33 1-3 per cent. on the heavy tee and strap and 65 per cent. on the light tee and strap.

Brass Screws Higher.—In the upward movement of brass and the manufactures thereof brass and bronze screws have been materially affected. On flat head brass the discount is now 50 as against 67½ per cent.; **on round head brass the** change is from 60 to 47½ per cent; on flat head bronze the new is 45 and the old 57½ per cent. and on round head bronze the allowance is 42½ as against 52½ per cent.

Escutcheon Pins.—The rise in brass values is also responsible for a big drop in the discount allowed on escutcheon pins. This discount is now only 15 per cent., whereas it was formerly 40 per cent.

Advances on Rope.—Still another change has taken place in the rope market, pure Manila being advanced another cent. Difficulty in securing raw materials is given as the reason for the increase in prices. Local figures are now as follows:

	Per lb. base
Pure Manila	18½c
British Manila	15½c
African hemp	15½c
Sisal	12½c
Single lath yarn	12c
Double lath yarn	12½c

Game Traps.—Intimation has been received by local dealers that there will be an advance on game traps. Up to the present time the details as to the changes in Montreal quotations to the trade have not been announced.

Batteries. — Higher prices are being charged for dry batteries. One wholesale house quotes Black Cat batteries at 28½c, the former figure being 27½c.

Vises Going Higher.—Vises are one of the many lines being affected by the rising market for iron and steel. One local wholesale house has this week advanced its line about 10 per cent.

Automobile Tires.—A prominent rubber company makes the announcement of important advances on automobile tires. These changes which went into effect on the 18th of January are from 10 per cent. to 25 per cent. according to the size and classification of the tire.

Wringers, Washers, Churns.—New discounts have this week been established in the local market on wringers, churns and washing machines. On wringers the former discount of 20 per cent. has been changed to 15 per cent.; on washing machines the new discount is 20 per cent. as compared with 25 per cent. and on churns the new allowance is 35 per cent. as against 37½ per cent.

Wash Boards.—Higher prices are now in force on practically all lines of wash boards, the glass being an exception. The new quotations include the following:

Pony	$1.75-up	25c
Improved Globe	$3.85-up	70c
Jubilee	$4.25-up	60c

Sash Cord.—New prices are now in force with the local wholesalers on sash cord, as follows: Numbers 8 to 12 31c; number 7, 31½c and number 6, 32½c

Stoves.—With the winter season well advanced and the summer still far off there is a dullness in the stove trade. Unseasonably mild weather throughout January seems to have accentuated these conditions. However, dealers report that the season has been a fairly good one under the prevailing conditions.

Utensils.—A good business in kitchen utensils is reported with a particularly strong demand for enamelware.

Old Materials.—Quotations on practically all kinds of scrap metal continue very strong and the recent advances are well maintained. The only change this week is an advance of heavy lead from 5¾ to 6c.

Glaziers Points.—The rising cost of zinc and steel has been affecting glazier points. One wholesale house reports a recent advance from 13c to 16c per pound for the coated.

TORONTO

TORONTO, Ont., Jan. 27.—Conditions in the hardware market continue favorable, and business is fairly active. The mild weather has affected the demand for some goods, but, generally speaking, there is a good movement in staple lines. There is still some hand-to-mouth buying, but the prospect of higher prices for many hardware lines has stimulated business, and there is an increasing tendency to buy in larger quantities. In view of the advancing prices and the possibility of a shortage in many lines, jobbers are laying in heavier stocks in order to be in a position to meet the demand which is anticipated. Business prospects are good, and there is a more optimistic feeling in the trade, but at the same time there is a considerable uncertainty as to what may develop in the market owing to the steady advance in prices and expected shortage of some lines. There is no improvement in the iron and steel situation, and scarcity of raw materials is a matter of concern to manufacturers. Take one line alone, that of galvanized wire. This product is becoming very difficult to obtain, and there is every indication of a serious shortage in the near future. We understand that one large wire manufacturing concern in Canada has refused to quote prices for

the last six months of the year, which is an indication of how wire products will be affected.

Price Changes.—The market continues in an unsettled condition owing to the steady advance in prices, practically all lines being at one time or another affected. The advances are due entirely to increased cost of raw materials, and in many cases a scarcity helps to affect the situation. Price changes this week have been made in cotton wiping waste, wood screws, machine screws, oakum, Manila and African hemp ropes, lead sheets, boiler plates, wrought iron pipe, brass butts, clay picks and mattocks, machinists' tools, chilled shot, soldering coppers, castor oil, etc. Higher prices for many other lines are looked for, particularly wire nails, as wire rods are advancing and wire nails cannot be produced at their present price with rods at the level now prevailing. Higher prices for copper, tin and galvanized wares are also looked for, as all raw materials are advancing. The ingot metal market is strong, and particularly copper, which is expected to go still higher. The continued strength in the metal market will undoubtedly affect many lines of hardware.

Iron and Steel.—Conditions in the iron and steel market are unchanged. The mills are working at capacity, and are making every effort to take care of the demand. Deliveries, however, are getting behind, and higher prices are looked for in iron and steel bars, and also steel products in general. The abnormal conditions in the steel trade are directly affecting the hardware market. The scarcity of steel is causing serious inconvenience to manufacturers, while in addition the steady advance in prices is reflected in many lines of hardware.

The high-speed tool steel situation is unchanged, and prices still range around $3 per pound. The demand is not quite so heavy, but enough to keep the mills working to capacity. Shipments from the States are coming in slowly, and deliveries are very backward, owing to the heavy demand there. Some steel is coming through from England, but all exports are controlled by the British Government, and the requirements of British and French munition plants is taking up almost the entire production.

The steel market in the States continues very strong, and prices of bars, plates and shapes have advanced to $2 per 100 pounds. The Pennsylvania Railroad has removed the embargo on export shipments to New York under certain conditions, but the embargo to New England points is still on. Although the situation has been relieved, shipments to Eastern Canada are still affected. The mills are sold up for three or four months, and deliveries are getting more backward than ever. The demand for steel bars continues decidedly heavy, large contracts having been received for rounds for shells. The heavy demand for billets continues, but prices are unchanged. Wire rods have advanced $3, and are now being quoted at $45 per ton Pittsburgh.

Pig Iron.—The pig iron market is a little quieter, but the situation is unchanged. Lake Superior charcoal iron has advanced 50c, and is now quoted at $19.75 per ton Chicago. Hamilton and Victoria are unchanged.

NEW DISCOUNTS ON SCREWS

Further advances have taken place in the price of some lines of wood screws. Those affected by the latest advance are brass and bronze screws. The discounts now in effect at Montreal, Toronto, Hamilton and London are as follows:

Flat head, bright ....85% off list.
Oval head, bright .... 80% off lits.
Round head, bright ....80% off list.
Flat head, brass ....50% off list.
Oval head, brass ......47½% off list.
Round head, brass......47½% off list.
Flat head, bronze ......57½% off list.
Oval head, bronze ....42½% off list.
Round head, bronze ....42½% off list.
Terms 2% 30 days.

Old Material.—The embargo on shipments of wrought and steel scrap is still on, and will most probably remain in force. The Dominion Government has been asked by interests in the West to establish lower rates on cast iron scrap to the steel plants in the East. The market for this material has hitherto been in the States, but this has been shut off by an embargo. The present freight rate is practically equivalent to the cost of the scrap. The market is firm with higher prices for scrap zinc, lead, copper and composition. Heavy melting steel is weaker and has declined. Fair business is reported, the principal demand being for copper.

NEW PRICES ON PIPE

The following prices on iron pipe are now in affect at Toronto, London, Hamilton, and Montreal:

Standard Buttweld Pipe

Size, Inches	⅛	¼	⅜	½	¾	1	1¼	1½	2	2½	3	3½	4
Black	3.00	2.52	2.52	3.15	3.68	5.44	7.36	8.80	11.84	18.72	24.48	29.44	34.88
Galvanized	3.75	4.23	4.23	4.89	6.04	8.93	12.08	14.44	19.43	30.71	40.16	48.30	57.23

Standard Lapweld Pipe

Size, Ins	2	2½	3	3½	4	4½	5	6	7	8L	8	9	10L	10
Black . ..	13.32	19.31	25.25	30.36	35.97	45.72	53.28	69.12	92.82	97.50	112.30	134.60	124.80	160.70
Galv. . ..	20.91	31.30	40.93	49.22	58.32	71.76	83.62	108.50	146.40	153.80	177.10	212.20	196.80	253.40

Terms 2% 30 days.

Machine Tools.—Conditions in the machine tool market show little change. The demand for shell-making equipment has fallen off considerably, but some nice orders have been taken for smaller tools for making shell parts. For the next few months this end of the shell industry promises to be very active, as there is a good demand for shell parts, as the production of shell cases has got ahead of the capacity for completing their deliveries, for machine tool markets in the States are still backward, as the domestic demand there has improved considerably.

Metal Market.—The market is considerably stronger, and prices are higher for a number of metals, including copper, tin, spelter and lead. The higher prices are due to strength in the primary markets, the situation in London being the principal cause. Prices of copper, although higher, are really nominal owing to the difference between the price a buyer can be found at different tonnages. Tin is higher in London, the market being apparently influenced by the strong copper and lead market. A strong demand for spot and nearly spelter caused an advance in the market, which is firm. An advance of $4 a ton in lead at New York has been made by the "Trust," although outside lots have been disposed of at lower figures. Antimony and aluminum are both unchanged, while solder is firm at last week's prices.

Copper.—The market continues strong and higher. The enormous consumption of copper is absorbing the entire production, hence the position is a very strong one. The demand is unprecedented, and will most probably increase during the year; higher prices are, therefore, anticipated. The market at present is largely nominal, as the range of prices varies according to tonnage. Locally copper has advanced 1c, and is quoted at 27½c per pound.

Tin.—The market is strong in sympathy with the other markets and higher in London. The demand for tin is light, and the trade is apparently well supplied with spot and early delivery metal. Tin has advanced, and is being quoted locally at 48c per pound.

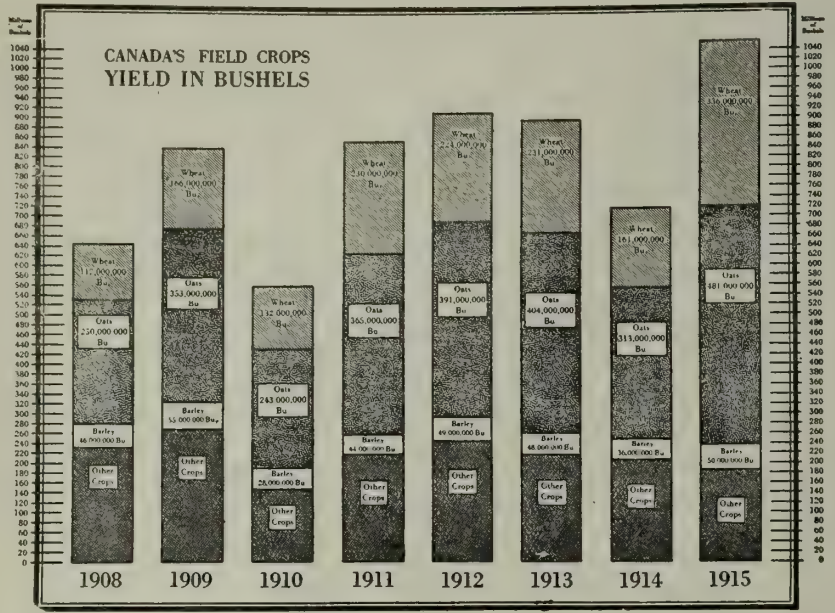
Spelter.—The market is strong and higher. There is a heavy demand for spelter, for all deliveries up to July, and a scarcity of spot metal. In the local market, spelter has advanced ½c, and is quoted at 22c per pound.

Lead.—The "Trust" have advanced lead $4 per ton, making the price 6.10c New York. The market is firm, but the outside market is a little below the "Trust" price. Lead is now quoted at 8c per pound, representing an advance of 1c.

Antimony.—The market is firm at unchanged prices for spot and early deliveries. The situation is unchanged and prices nominal at 40c per pound.

Aluminum.—The market is firm and the situation unchanged. Aluminum is quoted at 68c per pound.

Solders.—Prices are firm and unchanged, although the strength in the



With the tremendous grain yield, as shown by the 1915 *section of above chart, Canada is particularly well situated at present time. Chart is taken from Greenshields & Co.'s monthly review.*

tin market may affect solders. Prevailing prices are given in the current market quotations.

Boiler Plates Advance.—Prices of boiler plates have been climbing steadily for some time, and a new high level has been reached. This is due to the extraordinary situation in the steel market in the States, where prices have been advancing and steel getting scarcer, which has resulted in a very strong market for plates. Plates, ¼in. to ½ in., are now quoted at $3, heads at $3.20, and tank plates at $3.30 per 100 pounds.

Wrought Iron Pipe Up.—Higher prices for wrought iron pipe, predicted by Hardware and Metal, have been announced, the advance covering both black and galvanized pipe. Black pipe has advanced one point and galvanized pipe two points. The market has been very firm for some time, and prices recently advanced in the States due to the high cost of raw materials. The new schedule is given in the panel.

Wood Screws Advance.—The last change in prices of wood screws affected only bright screws. On January 22 manufacturers issued new discounts for brass and bronze wood screws, bright screws remaining at the old discount of 85 per cent. off list. The new discounts are given in the panel, and represent an advance of 33 1-3% for brass and 31¼% for bronze wood screws.

Machine Screws Higher.—On account of the increase in cost of raw materials, price of machine screws have had to be revised, and in some cases increased. The new discounts are as follows:—Flat and round head steel, 35 per cent.; fillister head steel, 25 per cent.; flat and round head brass, 12½ per cent.; and fillister head brass, 5 per cent.

Lead Sheets Higher.—The steady advance in the pig lead market has resulted in higher prices for lead sheets, which are now being quoted as follows:—Sheets, 3-lb., $10; 3½-lb., $9.75, and 4 to 6-lb., $9.75 per sq. ft.

Black Sheets.—The local market is very firm, due to steady advance in price and heavy demand for black sheets in the States. Deliveries are getting more backward than ever, and some mills are not anxious to book additional tonnages for first quarter delivery. Higher prices for black sheets in the near future are looked for.

Galvanized Sheets.—The market is very firm at the higher prices announced last week, but conditions in the trade are very unsettled. The increasing cost of steel, the scarcity of acid, high cost of labor, and advance in production costs generally, are diminishing the margin of profit on sheets for the manufacturers. Under prevailing conditions higher prices are very probable.

Wire Nails Firm.—The market continues very strong, and higher prices for wire nails are looked for in the near future. Wire rods are increasing in cost almost weekly, and with rods at the present level there is no profit in nails. Wire nails are unchanged at $3.05 base, and cut nails at $3 per keg.

Wire.—All products, composed wholly or partially of galvanized wire, are expected to advance. Galvanized wire is very difficult to procure, and there is a probability of a serious shortage in the near future. Prices have been withdrawn for some time, and makers have been only quoting on application. It is said that makers of galvanized wire are refusing to quote prices for the second half of this year.

Clay Picks Advance.—An advance of approximately 50c per dozen has been made in clay picks and mattocks. The change was foreshadowed in the last issue of Hardware and Metal.

Shot Higher.—The new price on chilled shot is $1.50 per 100 pounds, as against the old price of $1.25.

Rope Advances Again.—The strength of the rope is shown by another advance in Manila and African hemp ropes. Pure Manila has advanced 1½c, and is quoted at 18½, while British Manila and African hemp have advanced ½c, and both quoted at 15½c per pound, ⅝ in. basis and larger. Stocks of Manila in the hands of importers are very light. High freight rates and scarcity of tonnage are also factors in increasing the cost of Manila fibre. The same conditions are affecting the hemp market. Prices of sisal are unchanged this week, but the market is strong and ocean freight rates from Mexico are increasing. There has been no change made in lath yarns and other lines listed.

Brass Butts.—A new discount of 7½ per cent. off list has been issued for brass butts.

Plumbers' Supplies Higher.—Certain lines of plumbers' supplies have advanced 5% and include enameled bath tubs, urinals and wash basins.

Lead Pipe.—The market is very firm and prices unchanged, although there is a possibility of an advance if the present high level in the pig lead market is maintained. Lead pipe is quoted at 10½c, and waste pipe at 11½c per pound.

Kitchen Utensils.—There is no change in the situation, and it is generally expected that prices of copper, tin and galvanized wares will have to be advanced on account of steady advance in all raw materials. Iron, steel, copper, tin and spelter are at considerably higher levels since the last change in the prices of ware; cost of production has, therefore, gone up.

Jute Packing Weaker.—Conditions in market for these particular lines have caused a slight decline, and fine jute is now being quoted 10½c, and coarse sewer packing at 8½c per pound in coil lots.

Soldering Coppers Up.—Owing to the increased cost of copper, manufacturers of soldering coppers have raised their prices. Soldering coppers have advanced 2c per pound, and are now quoted at 37c per pound base.

Oakum Advances.—Higher prices for all lines of oakum, except plumbers' and English navy, have been announced, the advance being due to the increase in cost of raw material. The new prices which went into effect on January 24, range from ¼c to 1¼c higher, according to grade, and are as follows:—Best (American), 12c; U. S. Navy (American), 11¼c; new hemp (English), 8¾c; U. S. Navy (English), 7½c per pound. Navy (English) at 6c and plumbers' at 5c per pound are unchanged.

Waste Up Again.—The market continues very unsettled, and manufacturers of cotton waste have again advanced prices on account of the increase in cost and scarcity of raw material. The change affects all the white and two

lines of colored wiping waste only, prices of wool packing waste and washed cotton wipers and the other lines of colored wiping waste are unchanged. On the lines affected the prices are ¼c to 1¾c higher, according to grade. All prices are subject to change without notice, and another advance is looked for in the near future.

Castor Oil Shortage.—Castor oil is now practically unobtainable in case lots. This product is obtained from England, where the demand absorbs almost the entire production. Castor oil is quoted at 33c per pound, but prices are nominal.

LONDON

LONDON, Ont., Jan. 27, 1915.—Prices of many hardware lines are still mounting upwards, with prospects of still further advances. Business continues good, and retailers are buying freely, but carefully.

Following the advance reported in Hardware and Metal, Toronto and Montreal reports last week, Manila and African hemp rope have advanced in price. New discounts have been issued on washing machines, wringers and barrel churns.

Clay picks and pick mattocks have advanced. New prices are in effect on game traps. Brass and bronze screws have advanced in price. Black and galvanized iron pipe have again advanced.

Linseed oil has declined 6c per gallon.

The predicted advance on ready-mixed paints is scheduled to take place on March 1. Advances, ranging from 10c to 20c per gallon, will probably go into effect. White lead in oil has again advanced 25c per 100 lbs.

Fence Wire Higher.—An advance of 20c per 100 lbs. has taken place in galvanized fence wire, and the new prices are as follows:—Barb, $3.75 per 100 lbs.; No. 9 galvanized, $3.40 per 100 lbs.; No. 12 galvanized, $3.55 per 100 lbs.; No. 13 galvanized, $3.65 per 100 lbs.; No. 9 coil spring, $3.45 per 100 lbs. O and A wire remains unchanged at the following prices:—No. 10, $3.31 per 100 lbs.; No. 11, $3.37 per 100 lbs.; No. 12, $3.45 per 100 lbs.; No. 14, hay baling wire, $3.55 per 100 lbs.

Nails are Firm.—Wire nails are still quoted at $3.05 base. The market is firm, and in some quarters even higher prices are expected. Cut nails are quoted at $3.15 base.

Rope Goes Higher.—Pure Manila rope has advanced 1c per pound, and is now quoted at 18½c base. British Manila has advanced ½c per pound, and is quoted locally at 15½c per lb. base. African hemp has also advanced 1c per pound, and is quoted at 15½c per pound. Sisal remains at 12½c per pound. Cotton rope, 3-16 in. is quoted at 25c per lb.; ¼ in. and larger at 24c per lb.

Three and four-ply cotton twine are quoted at 29c and 32c per pound respectively.

Picks Advance.—A new price, representing an advance, has been issued on clay picks as follows:—5-6 lb., $4.05 doz.; 6-7 lb., $4.40 per doz.; 7-8 lb., $4.70 per doz. Pick mattocks are quoted at $5.35 per doz.

Screws Advance.—Brass and bronze screws have advanced in price, and the new discounts are shown in a panel elsewhere in the market reports. Bright screws have not been affected by the latest advance.

Pipe Again Advances.—Still another advance has taken place in the price of black and galvanized iron pipe. This advance has been predicted by Hardware and Metal for some time past. New prices are shown in the panel elsewhere in the market reports.

New Price on Game Traps.—New discounts have been issued on game traps as follows:—Victor, 67½ per cent.; Jump, 60-5 per cent.; Hawley & Norton, 55 per cent.; Newhouse, 35 per cent.

Wringers are Higher.—Clothes wringers are now quoted at 15 per cent. discount, instead of 20 per cent., as formerly. Washing machines are also higher, and are now quoted at 20 per cent. off list.

Barrel churns are quoted at 37½ per cent. off list.

Quotations on Other Lines.—Present quotations on a number of other lines are as follows:—Castor oil firm, at 25c per pound; poultry netting, 2-inch mesh, 30 per cent.; painted screen cloth, 100 ft. rolls, $1.70 per 100 sq. ft.; 50 ft. rolls, $1.75 per 100 sq. ft.; harvest tools, 40-12½ per cent. off list. Spades and shovels are quoted as follows:—1sts, 50-10 per cent.; 2nds, 50 per cent.; 4ths, 40 per cent. Malleable fittings are now quoted at 30-5 per cent. off list.

Linseed Oil Lower.—A sudden and sharp decline has taken place in linseed oil quotations. Quotations are 6c per gallon less than last week, and are now as follows:—Boiled oil, 1-2 bbls., $1.05 per gal.; 3 to 5 bbls., $1.05 per gal.; 6-9 bbls., $1 per gal. Raw linseed oil, 1-2 bbls., $1.06 per gal.; 3 to 5 bbls., $1.05 per gal.; 6-9 bbls., $1.03 per gal.

Turpentine remains unchanged at 87c per Imperial gallon in single barrel lots, and 86c per gallon in 2 to 4 bbl. lots. Five-gallon lots are quoted at 94c per Imperial gallon.

Paints to go Higher.—A general advance is scheduled to take place in ready-mixed paints on March 1. All orders at present prices must be accompanied by specifications.

The advances will range from 10c to 20c per gallon.

Plumbers' Supplies Higher.—An advance of 5 per cent. has taken place on enameled baths, urinals, wash basins, etc. All brass and copper goods are very firm. Lead pipe is also firm owing to the recent strength exhibited in the lead market.

White Lead Goes Higher.—White lead in oil has again advanced 25c per 100 lbs. Pure lead is now quoted at $10.95 per 100 lbs. in ton lots, and $11.25 per 100 lbs. in less than ton lots.

WINNIPEG

WINNIPEG, Jan. 28.—In looking over the first month's business for 1916, the jobbers seem to feel that a very satisfactory showing has been made, and everything is now in readiness for handling big business during the next two or three months. There is no doubt that retailers' stocks throughout the country must be very low, and for this reason jobbers expect that the volume of business will be correspondingly greater to make up for this condition. During the past year nearly every jobber has handled as many orders as they did formerly, but the quantities stipulated on the orders were comparatively small. There is one point jobbers would emphasize to the retailer, and that is the necessity of carrying a good stock at all times of staple articles. Jobbers are finding it increasingly difficult to get supplies from the manufacturers, and the only way the retailer can be reasonably sure of supplying his customers is to order his goods as far in advance of the actual demand as possible. This enables the jobbers to take care of orders at the proper time, and ship them complete.

Many Price Changes.—There have been a great number of price changes during the past week, and some lines have taken further advances over those noted last week, while others have been revised more than once within the last two or three days. It would seem very difficult to make any predictions as to what future prices will be. Following is given a memo of the lines affected.

Cordage Advances.—The long expected advance in the price on the various grades of rope is noted herewith, and these prices are not guaranteed for any length of time

Sisal rope	13½c per lb. base
British Man. rope	16½c base
African hemp rope	16½c base
Pure Man. rope	20c base

Revised prices have again been made on bar iron and the various grades of steel, which are noted herewith.

Bar iron	$3.25 per 100 lb. base
Band iron	3.50 "
Mild steel	3.50 "
Sleigh shoe steel	3.50 "
Tire steel	3.65 "
Spring steel	4.00 "
Common plow steel	5.50 "
Crucible plow steel	6.60 "
Angle iron	3.75 "
Machinery steel	4.50 "
Toe calk steel	4.50 base
Do., ¼ and 5-16	5.50 per 100 lbs.

White Lead Advances.—White lead has also taken an advance along with turpentine, and the following are prevailing prices for these items.

	In small lots 100 lbs.	Ton lots.
White Lead—		
Dec., pure	$11.60	$11.30
Elephant	11.90	11.60
Dec. Special	10.60	10.30
Linseed Oil—		Per gal.
Raw		$1.11
Boiled		1.14
(In smaller quantities add 5c per gal.)		
Turpentine		91c gal.
Turpentine, in small quantities		96c gal.

Copper Rivets and Burrs.—As might be expected new prices have been made on copper rivets and burrs, and also coppered iron rivets and burrs. It is

(Continued on page 46.)

WEEKLY PAINT DEPARTMENT

Sell Paint During Winter Months

How a Merchant Kept Up His Paint Sales During a Dull Season—Found That There was a Demand for Paint for Interiors of Factories —Effort Produces Results.

THERE are many lines of business in which the seasons and the weather play a very important part, and in which it is hard to do anything out of season, or with adverse weather to contend with.

The paint business is one that is affected to some extent by the seasons and weather changes.

During the winter months certain classes of painting, especially outside work cannot be undertaken. Some merchants regard the winter season as a quiet season in the paint trade, and on that account relax their selling efforts, with the result that sales of paint are made only to a comparatively few customers.

However, there are many hardware merchants who question the wisdom of allowing the paint department to lag during the winter months. True, the merchant cannot expect to do as much business in paints during the winter as he can during the spring and summer months, but it should be possible to make the paint department produce a good profit during the winter months.

In almost every community you will find at least one merchant who is doing a good volume of paint business during the cold weather season.

An authority writing in a contemporary a short time ago, told how a dealer has cunningly and with infinite pains so developed certain lines of business which come in their best volume during the winter months that he finds his store almost as busy when the snow is flying as when the mercury is ranging in the hectic nineties. The thing has not come about by any happen-so; this dealer has actually devoted thought and work to it, and he has got it down to a fine point. He doesn't mind telling about it, either, so that it is fair enough to pass the good word along.

Selling Paints the Year Round

As a matter of fact, after he once got the idea into his own head that he might as well sell paints and varnishes and finishes the year around, he found that to a large extent it was simply a matter of attitude; that when he kept up his selling work, and kept on trying to sell goods in his paint stock in spite of the calendar, customers assumed an attitude of responsiveness, and could thus be induced to buy as they needed, without thinking about the date, was the first valuable discovery that he made, although it did not surprise him as much as one might suppose, inasmuch as he had a sort of idea that this might be the case.

People Will Buy in Winter

Then, after proving to his own considerable satisfaction that people really would buy paint in the winter if they needed it, and were asked to do so, he proceeded to look around exhaustively, for the purpose of finding out just what lines might be sold to the best advantage during the months when outside work is impossible, and who would buy those lines. These two considerations, of course, went rather closely together, and he worked upon them together, with the result that in the course of a few seasons—not in fifteen minutes, or anything like that—he found out that certain lines of paints and finishes, especially the latter, could be disposed of in good sized lots right through the winter.

Selling to Factories

It is violating no confidence to state that one of the most profitable lines of this description was, and is, that consisting of goods used by large manufacturers in painting the interiors of their plants. The paint man discovered, in the course of his investigations, that many large concerns handle such work regularly, on a fairly considerable scale, and that they are in the habit of doing it at times when it will interfere least with the usual operations of the plant. This is good business, and the paint man realized it.

Therefore, he made it his business to find out about those plants in which late fall and winter, or any part of them, are likely to prove dull, and then went after their inside painting business, or, rather, the business of selling them the goods which they required for their inside painting. It was cheap paint, most of it, because big manufacturing plants do not usually decorate their concrete interiors with expensive finishes—it is unnecessary. But, at the same time, the orders came in good sized chunks, after they got started, and that was what this particular dealer wanted.

Similar to this line was that of paints for use on machinery. This went in much smaller quantities, of course, but it moved, especially to those manufacturers of the class referred to, who found a part of the winter season sufficiently open to give time and opportunity for painting work. And the dealer got this, regularly, for the simple reason that he was about the first man in his locality to make a real effort to land the business at the proper time. He went after it vigorously, because he thought well of his idea, which is one of the reasons men with ideas generally succeed—they dislike the idea of proving to themselves, not to mention others, that they were wrong.

These, and other lines which it is perhaps unnecessary to mention and describe in detail, comprised some of the larger business which the dealer landed for his winter work, but they were not by any means all of the business which he rounded up to keep him and his force busy during the months. He valued small orders as much for the winter season as for the summer, if not more so, and he made correspondingly active efforts to get them. Must it be added that he succeeded? At any rate, he did; more especially in view of the fact that he had a pretty good list of regular household customers, carefully cultivated and built up during all of the years he had been in business.

Yes, it can be done. There is undoubtedly something to work against when the paint man decides to have a year-round business. He can't keep things running during the winter with as little effort as can the grocer or the coal man, but he needs the money just as much as they do, which is at least one reason why he should make an effort to get it. The effort, if intelligently made and carried out and followed up, will produce results in nearly every case; and that puts it right up to every dealer who does not actually prefer the hibernation process.

THE BRISTLES CAN'T COME OUT

QUALITY

is always a pre-eminent feature in

"STEEL GRIP"

PAINT AND VARNISH **BRUSHES**

The favorable reputation which they bear is due largely to this, and the advantage of the "Bristle Tight" feature adds considerably to their popularity.

They are guaranteed—this relieves the dealer of responsibility. He knows that every "Steel Grip" customer is bound to get satisfaction—and is therefore a safe line for the dealer to recommend.

PRACTICAL SHEET METAL WORK

(Continued from page 33.)

five sides and consequently five angles. If all the sides are equal it is called a regular pentagon.

A hexagon is a plane figure consisting of six sides and six angles.

A heptagon is a plane figure consisting of seven sides and seven angles.

An octagon is a plane figure consisting of eight sides and eight angles.

A decagon is a plane figure consisting of ten sides and ten angles.

And a dodecagon is a polygon with twelve sides.

A Tangent

A tangent is a straight line which while touching the circumference of a circle, does not cut the circle, the point at which a tangent touches the circle is termed the point of tangency or contact.

A Chord

A chord is a straight line which joins the extreme points of an arc, or rather a straight line drawn across a circle which does not touch the centre of the circle and does not intersect it.

A Secant

A secant is a straight line very similar to that of a chord except that it cuts or intersects the circle at two points.

Plate 2 shows figures described in this article, which, if the student will draw by the use of simply a rule and pair of compasses, will be found of great benefit.

The next article will show how the various figures may be developed.

(Continued in next issue.)

WEEKLY PAINT MARKETS

(Continued from page 48.)

the final prices will be decided and based on conditions prevailing in the market at the time:—Ordinary colors, 10c; porch floor paint, 10c; inside floor paint, 10c; and flat wall paint, 10c; white paint, 15c per gal.

Higher prices for mixed paints have been predicted in Hardware and Metal for some time, as it was obvious that manufacturers would be obliged to take this step owing to the high cost of all raw materials. What the actual advance will be when the final decision is made depends upon the state of the market at that time, but present indications point to higher prices for raw materials than prevail at present.

White Lead Again Advances.—White lead advanced 50c per 100 lbs. last week, but owing to the unusual strength of the pig lead market, manufacturers have decided to make another advance of 25c, which is now in effect. Since the advance was made, the "Trust" have advanced pig lead from 5.90c to 6.10c New York. It will thus be concluded that the white lead market is very firm. Pure white lead is now quoted at $10.95 per 100 pounds in ton lots, with 30c per 100 lbs. advance for less than ton lots.

Glaziers' Points.—The high cost of zinc has caused a revision in prices of glaziers' points. Zinc-coated are now quoted at 16c per pound, and prices of pure zinc points have been withdrawn.

Gasoline.—The situation in the oil market is unchanged. There is a heavy demand for gasoline, which will increase in the spring. There is no improvement in the crude oil market, so indications point to higher prices for gasoline in the near future. Gasoline is quoted at 28½c, and benzine at 28c per gallon.

Glass.—The market is very firm, but the demand is light. The high cost of sheet glass leaves only a small margin of profit for jobbers, and a change in discounts is expected.

Putty.—The market is quiet, but prices are firm, as cost of raw materials is high. The following prices are being quoted for standard putty in less than ton lots:

	Per 100 lbs.
Bulk, in casks	$2.65
Bulk, in 100-lb. drums	2.85
Bulk, in 25-lb. drums	2.95
Bladders, in barrels	3.25

Pure putty, 70c per 100 lbs. advance.

WEEKLY HARDWARE MARKETS

(Continued from page 43.)

more than likely that these prices will stand for some little time, but the uncertainty of the copper market makes this questionable.

PRATT & LAMBERT SALESMEN'S MEETINGS

District sales meetings were held during the week of January 3rd-8th, at the New York, Chicago and Buffalo offices of Pratt & Lambert, Inc. On Tuesday, Jan. 4th, a meeting was held at the New York office, winding up with a banquet at the Vanderbilt Hotel, Tuesday night. On Wednesday and Thursday meetings were held at the Buffalo office, with a banquet at the Iroquois Hotel, Wednesday night. On Friday and Saturday meetings were held at the Chicago office, with a banquet at the Chicago Athletic Club.

New ideas for the sale of Pratt & Lambert Products were advanced to the men. New goods which Pratt & Lambert will put on the market were explained, and the selling plans to be followed were thoroughly discussed.

ON ADVERTISING

The advertiser is the man who is proud of his goods, wants people to meet them and can safely make particular statements about them. He is necessarily a man who believes that any healthy thing, his business included, must grow in order to exist, that to stand still is to decay, and that since the value of advertising has been recognized and utilized by his competitors he must also use that instrument if he would live.

PUBLIC AND HIGH PRICES

Merchants in all branches of business are not meeting with the same opposition to advancing prices as encountered some months ago. The general public is becoming educated to the fact that conditions under which the manufacturer, the wholesaler, and the retailer find themselves compels advance after advance, especially in hardware lines.

Twenty per cent., a third or even an advance of fifty per cent. over prices of a year ago are now taken as a matter of course. As one dealer said a few days ago it is easier to add fifty cents to a dollar saw than it was to add half a cent to a pound of nails.

Price cutting is not so keen now, the constant advances prohibit the slashing of prices.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Jan. 25.—The long predicted advance in ready-mixed paints was announced this week. For months the upward movement of the chief ingredients which go into the manufacture of paint products has been such that there was no other course but to increase prices. Manufacturers would have liked to defer action until the present campaign had been completed, but the recent movement of oil and lead on top of previous high prices for these commodities as well as zinc and turpentine, not to mention colors, forced an immediate decision. However, the increase does not go into effect until the 1st of March, and this will give an opportunity to retailers who have not yet had an opportunity to place their spring orders to do so at the old level.

Generally speaking, the advance amounts to 10c a gallon on colors and 15c a gallon on whites. These do not nearly cover the increase in the cost of raw materials. This may be judged from the following comparison of prices at the outbreak of the war and at the present time:

	Start of war.	At present.
Linseed oil, raw	$0.60	$1.06
Linseed oil, boiled	0.63	1.09
Lead	8.20	10.80
Turpentine	0.67	0.84
Zinc	0.07	0.27½

White Lead Goes Higher.—A further advance on white lead of 25c brings the basis to $10.80 for ton lots, with 30c added for smaller orders. It was stated a week ago that such an increase in the price was warranted by the position of the markets for pig lead and oil. It might now be pointed out that even with this advance the market is very firm, and still higher prices are warranted by another increase of 20c in the quotation for pig by the American Trust; however, the upward movement of oil seems to have been checked for the time being, although the advances are being well maintained. The high cost of lead is one of the important factors in the read-mixed market.

Linseed Oil.—The upward movement of flax appears to have been checked for the time being at least, and the quotations for oil are firmly maintained at the level of last report. Demand is not heavy at such prices, and the tendency is to make advances as slowly as possible, with the hope of a reaction. Should flax continue at the present high level, and there have been few indications of a decline, the outlook is that still higher prices for oil will be charged. On the other hand, it may be taken that the crushers will be prompt in following any reactionary movement in order to encourage business. Some quotations of $1.03 and $1.06 for raw and boiled respectively are heard, but $1.06 and $1.09 represent the general basis for single barrel lots.

Gasoline and Benzine.—Recent advances on gasoline are being firmly maintained, and the basis for wood barrels is now 29c. The movement is not heavy at this season, but there are indications that orders placed on the present basis will forestall higher prices. The situation in the United States is that production is not keeping pace with consumption and unusually high prices are being looked for. Locally the prediction is made that quotations will advance another cent within a fortnight. The local market basis follows:

Gasoline, in barrels 28c
Gasoline, in drums 26½c
Gasoline, tank wagon 26c
Benzine 1c lower.

Turpentine.—There has been little change in the turpentine market, and the advances made last week are generally firmly maintained. Quotations indicate that the bulk of the business is being done on a single barrel basis of 84c, but there are some quotations of 82c still heard.

Glass.—Although the business being done in glass is comparatively small, the market is very strong. Owing to difficulty in securing certain raw materials in the form of chemicals required in the process of manufacture, American makers are advancing prices, and as Canada will be ruled by the American situation while the war lasts, higher prices in this market are being anticipated.

Oils.—The rise in prices for machine oils has been 1c to 2c. However, this has not applied to the majority of brands known in the trade, but rather represents the change in minimum quotations on heavy bulk business. Castor oil has risen materially, the present quotation being 28c.

TORONTO

TORONTO, Ont., Jan. 27.—The most interesting features in the paint market this week are the linseed oil situation, another advance in white lead in oil, and the proposed higher prices for ready-mixed paints. The oil situation is difficult to gauge correctly, but although the market was very firm until quite recently, the recession in prices by some grinders was not altogether unexpected. The advance in white lead, following on the higher prices announced last week, is the result of the unusual strength in the pig lead market. The proposed higher prices for mixed paints are tentative, and may be further increased on March 1. An advance in mixed paints has been expected for some time, as raw materials have increased in cost considerably. The advance will affect ordinary colors, porch floor inside floor, flat wall paints and sundries. The city trade is quiet, but spring bookings are satisfactory, some nice orders having been taken. Collections have improved.

Linseed Oil.—The market is weaker but the prices generally being quoted locally are unchanged. Oil has however, been offered at considerably lower prices probably with a view of stimulating business which has created an interesting situation. The price of flax seed is a few points lower in Winnipeg but not sufficient to affect the price of oil to any great extent. It is reported that some seed has been released from the elevators which was no doubt purchased some time ago when seed was considerably cheaper. This may have the effect of depressing prices temporarily but it is believed in some quarters that the position of linseed oil is a strong one and that any recession in prices will be followed by a reaction to higher level. The possibility of importing Argentine seed is largely discounted by the scarcity of tonnage and high freight rates. The following prices for linseed oil are generally being quoted in Toronto but two firms are quoting oil 9 cents under those figures.

	Raw.	Boiled.
1 to 2 barrels	$1.09	$1.12 per gal.
3 to 5 barrels	1.08	1.11 per gal.
6 to 9 barrels	1.06	1.09 per gal.

Turpentine.—The market is stationary, and there is no change in the situation. The demand is light in the South, and quotations at Savannah are unchanged. Stocks of turpentine are light locally, and there is very little demand. Resins are firmer, ordinary quality having advanced 20c per barrel. The following prices are being quoted in Toronto:—1-barrel lots, 87c; 2 to 4-barrel lots, 86c; 5 gal. lots, 95c per Imperial gal.

Mixed Paints to Advance.—Manufacturers of ready-mixed paints have decided to revise prices, but the new schedule will not likely go into effect until March 1st. All orders booked before that date must be accompanied by complete specifications. The following advances are tentative, and are subject to further revision on that date, when

Handle your Oils and Gasoline with the

WAYNE PUMP

IT PREVENTS WASTE DUE TO EVAPORATION, LEAKAGE AND SPILLING, AND MAKES THESE GOODS MORE PROFITABLE.

It saves time and labor, as there is no constant filling and handling of measuring cups, and does away with dust and unpleasantness. **Throws a pint, quart, half-gallon or gallon, and measures exactly.**
Works easily, and when not in use can be securely locked. Gears are completely housed. All parts are accurately machined and thoroughly tested, and are interchangeable.
If you are interested in a clean, safe, money-saving way of handling oils and gasolines, jot down a line for full particulars on the Wayne System NOW.

Eastern Agents: C. F. Hohlstein, 1016 New Birks Bldg., Montreal, P.Q.
Distributors for Canada: National Equipment Co., Ltd., No. 1 Wabash Ave., Toronto, Ont.
Western Agents: D. J. Austin, 273½ Portage Ave., Winnipeg, Man.
A. H. N. Kennedy, 415 Fifth St. A., Medicine Hat, Alta

THE WAYNE OIL TANK AND PUMP COMPANY

WOODSTOCK, ONT.

A class of brush that gets the best class of painters

MEAKINS BRUSHES ARE THE CHOICE OF THE WIDE-EXPERIENCED PAINTERS BECAUSE THERE ARE NO FALLING BRISTLES TO ANNOY AND DELAY, AND THERE IS JUST THE RIGHT AMOUNT OF FLEXIBILITY TO MAKE THEM EASILY MANIPULATED.

Their service is your guarantee of satisfied customers and re-orders.

Send for our catalogue — and then order from your jobber.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

LEWIS BROS., LIMITED Montreal

The Aylmer Superior Lever Lift Pump

fitted for hand use. Has close revolving top and handle bearer, full six-inch stroke, wood handle, and is easy working.

This style of lever and fulcrum has several advantages over the ordinary style. Having short stroke, the power is greater, making it work easier. The handle, being wood, they are not so liable to break in frosty weather. Readily converted into a Windmill Pump.

Built for long duty under severe service.

A good profit-maker.

Aylmer Pump and Scale Company, Limited
Aylmer, Ont., Canada.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

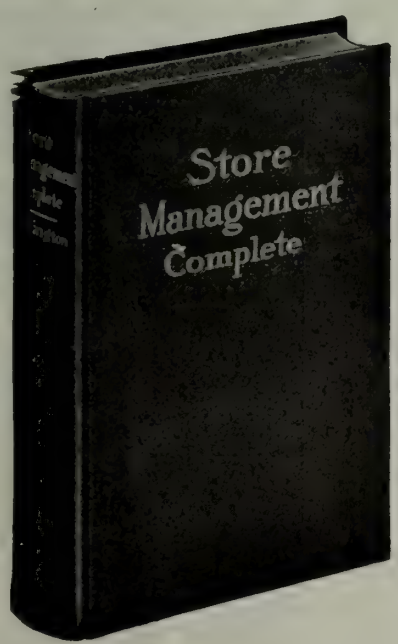
ICE TOOLS

Every Farmer, Butcher and Dairyman cuts ice. We have a tool for every use. Write for particulars and prices.

We also have a full line of Snow Plows, etc., for municipal work

ROBERT DONALDSON & SONS, Montreal

ARE YOU THE MAN AT THE HELM?



Are you running your ship of business along the shortest and safest course to the harbor of success? Or are you going a roundabout way, scratching and scraping along the rocks of loss and failure.

Get in the right course, be on the lookout for new thoughts, ideas, schemes, etc., and you will have a successful run.

STORE MANAGEMENT COMPLETE

is a guide that will show you how to get the maximum trade and profit out of your business. This book is written by Frank Farrington (a companion book to "Retail Advertising Complete"). It tells all about the management of a store. The following is a synopsis of one of the chapters:

CHAPTER V.—THE STORE POLICY—What it should be to hold trade. The money-back plan. Taking back goods. Meeting cut rates. Selling remnants. Delivery goods. Substitution. Handling telephone calls. Courtesy. Rebating railroad fare. Courtesy to customers.

"Store Management—Complete" is bound in cloth, contains 272 pages, 16 full-page illustrations, and 13 chapters. $1.00 brings this book to you postpaid. Money refunded within 10 days if not satisfactory.

NICKEL

SHOT—High and Low Carbon
INGOTS—Two Sizes 25 lb., 50 lb.
Electrolytic Nickel 99.80%

Prime Metals for the manufacture of Nickel Steel, German Silver, Anodes, and all remelting purposes. Our Nickel is produced as rods, sheets, strip stock, wire and tubes.

MONEL METAL

We are Sole Producers of this natural, stronger than steel, non-corrodible alloy. Manufactured forms are rods, flats, castings, tubes, sheets, strip stock and wire. Ask for descriptive booklet.

Send inquiries direct to us.

THE INTERNATIONAL NICKEL COMPANY
43 Exchange Place, New York.

LONDON HIGH GRADE BAR IRON

We have economical and correct methods of production, which means that you get bar iron that is absolutely reliable in toughness, strength and workability at the lowest prices.
The consignments you receive from time to time are the same through and through.
Carry a stock for your customers—a splendid profit awaits you. If you prefer we can ship direct from mill.

London Rolling Mills Co., Limited, London, Canada

Sales Agents:
Manitoba, Bissett & Webb, Limited, Winnipeg; British Columbia, McPherson & Teetzel, Vancouver.

KINDLY MENTION THIS PAPER WHEN ANSWERING ADVERTISEMENTS.

SEPARATE SEALED TENDERS, addressed to the undersigned, will be received at this office until 4.00 P.M., on Tuesday, February 15, 1916, for the supply of: "Brooms and Brushes," "Chain," "Coal," "Hardware," "Hose," "Oils and Greases," "Packing," "Paint and Paint Oils," "Manilla Rope," "Wire Rope," and "Steam Pipe, Valves and Fittings," for the requirements of the Departmental Dredging Plant in Ontario and Quebec during the fiscal year 1916-17.

Each tender must be sent in a separate envelope and endorsed: "Tender for Hardware, Ontario and Quebec," "Tender for Chain, Ontario and Quebec," etc., etc., as the case may be.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures. These forms can be obtained at the Department of Public Works, Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, for amount stated in form of tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the contract. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,

R. C. DESROCHERS,
Secretary.

Department of Public Works,
Ottawa, January 21, 1916.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.—90556.

DID YOU EVER USE A

SWEEPER-VAC.

Get one and try it. You will then be convinced of its good qualities and will be able to make many sales. It's better than a power machine and as easy to run as an ordinary carpet sweeper.

Condensed or "Want" Advertisements

Those who wish to sell or buy business or stocks, obtain competent help, connect with satisfactory positions, or secure aid in starting new enterprises, should not fail to use the Want Ad. Advertisement Page of HARDWARE AND METAL. It is the central market place of the hardware trade throughout Canada. There is always someone somewhere looking for just such proposition as you have to offer. RATES (payable in advance): 2c per word first insertion, 1c per word subsequent insertion, 5c. additional each insertion, when Box Number is required. Each figure counts as one word.

WANTED

HARDWARE SALESMAN—GOOD JOB FOR live man. Send references. Cochrane Hardware, Limited, Sault Ste. Marie, Ont. (5)

2 EXPERIENCED TINSMITHS. 1 EXPERIenced Plumber. Cochrane Hardware, Limited, Sault Ste. Marie, Ont. (5)

WANTED—A SOBER, INDUSTRIOUS HARDware clerk with excellent experience; that can guarantee results; wants position as manager of retail hardware store; in the west preferred; can furnish A.1. references. State salary. Box 246, Hardware and Metal. (6)

A THOROUGHLY EXPERIENCED HARDware salesman wants position as travelling salesman for a reliable hardware firm. Sober and industrious. Can furnish best of references. Box 247, Hardware and Metal. (6)

SALESMEN WANTED—ENERGETIC TRAVeller to handle our lines on commission in the provinces of Quebec and British Columbia. St. Mary's Wood Specialty Co., Limited, St. Mary's, Ont. (5)

FOR SALE

FOR SALE—RETAIL HARDWARE STORE in Montreal; well situated; exceptional opportunity. Present owner has other business. Would sell half interest only, if desired, to party capable of taking charge. Apply Box C. B. L., Hardware & Metal, Montreal. (5)

FOR SALE — HARDWARE BUSINESS IN southern Saskatchewan, on Soo line. Best wheat growing district. Town having five elevators and large trading territory. Present owner wishes to leave for family reasons. Apply to Box 248, Hardware and Metal. (12)

MISCELLANEOUS

FIRE INSURANCE. INSURE IN THE HARTford. Agencies everywhere in Canada.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Limited. Supplied by the trade throughout Canada. (tf)

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

ADDING TYPEWRITERS WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314, Stair Building, Toronto.

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fenson hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B." Otis-Fenson Elevator Co., Toronto.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10, postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS IS the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

COSTS LESS

than aluminum and zinc wash boards, is just as good and is more serviceable.

The All-Canadian
All-Wooden
Wash Boards

are the result of great scarcity and high price of zinc and aluminum—a price that has greatly handicapped washboard sales.

All-Canadian grown wood, Canadian-made nails, and by Canadian workmen—that's why it's all-Canadian.

The finest grained hardwood is used for rubbing surface.

Retails at 20c and leaves a BETTER profit.

Standard zinc, glass and enamel wash boards always on hand for prompt delivery, until notice to the contrary.

The Wm. Cane & Sons Co., Limited

Makers of the New Wooden Wash Board
NEWMARKET, ONT.

The Man Behind the

"Delta" File

is well satisfied with his file production and service.

He is a satisfied customer and a booster of the store that sells them.

The "Delta" will put you in line for a big increase in file sales, and the connection you build up by supplying Deltas regularly will greatly assist you in the sale of other mill supplies.

The "Delta" bit makes quicker stock removal and easier filing and its quality and temper mean longer active service. Our claims are based on the result of exhaustive working tests against other makes.

There is a shape and size for every requirement.

We supply our agents with effective display and circular matter.

Be a Delta Agent now. You'll find it exceedingly profitable.

Write for full details.

When writing to advertisers kindly mention this paper

A Straight Talk From the Manager

No. 31—"Keeping Up To Snuff"

One of the reasons why Hardware and Metal is constantly improving its service to subscribers and advertisers, is that a Staff Conference is held every Monday morning at ten o'clock, to discuss the previous week's issue in detail.

No subscriber could be more critical than the different members of the staff who endeavor to point out features which might have been changed to advantage. Everybody is keyed up to discover some way of making Hardware and Metal still more valuable to the Canadian hardware trade. Naturally, these conferences have been a most important element, in keeping Hardware and Metal "up to snuff."

Perhaps you could make use of the Conference idea in your own store. Suppose you hold it weekly, the day after Hardware and Metal reaches you. Take up the important news, discuss the latest selling suggestions, and run over the advertising pages to impress upon your staff how the different bits of information can be used to increase your profits.

J. G. L.

"Well, gentlemen, I take off my hat to you,—

such a beautifully made rifle and such shooting I never expected to see. . . Up to 800 yards I could hit anything I shot at . . I killed a big bull, over 500 yards away, and did it so easy . . . The 'Ross' is good enough for me. . . . It has a nice balance, is light and has a nice feel to it. I will say to anyone who is looking for the best thing in rifles, get a Ross .280 and you will never be disappointed."

Jas. L. McLaughlin,
Hunter and Guide,
Valley, Wyoming.

Professional hunters and guides the world over agree with Mr. McLaughlin in his appreciation, and the ever-growing demand for the Ross .280 proves that they are right.

The Ross .280 using the Ross .280 Sporting Cartridge with its copper tube Expanding Bullet (patented) is one of the most accurate, powerful and reliable rifles on the market. Every dealer should have it on his shelves.

The Ross .303 Sporting Models also give excellent results and the trajectory is as low as that of almost any of the high power rifles sold. The popular prices of these models—$25.00 and up—make them general favourites.

The Government having selected the Ross .22 Cadet Rifle as the official arm for the Cadet organizations—there is an added incentive for dealers to stock this most popular small rifle.

For catalogue, discounts, etc., address

DOMINION SHEET METAL CO., Ltd.
HAMILTON, CANADA

First Come, First Served!

The most effective advertising broadside that can possibly be directed at Canadian hardwaremen is a front or back cover advertisement in Hardware and Metal.

Nearly every hardware merchant in Canada is a paid subscriber to Hardware and Metal. Every subscriber must heed the advertisements on the front and back cover. Indeed, he cannot escape them.

There are still a few dates open for front and back covers in 1916. *The first front cover open is May 20th, and the first back cover open is June 10th.* Each date is being allotted to the firm whose order first reaches our Toronto office, and already several firms have ordered a little too late.

Write to-day for list of open dates and full particulars.

(JOBBERS EVERYWHERE)

The Children of Purity

Rust-Resistance, Welding Quality, Enameling Property and Electrical Conductivity are the children of PURITY and SCIENTIFIC CARE in iron manufacture.

Chapter I

RUST-RESISTANCE

The intricate theory of metallurgical science and the hard practical experience of numberless users of iron and steel agree absolutely as to one basic truth—**Durable Iron Must Be Homogeneous**—or as nearly as may be of the same substance and structure throughout.

There are two causes of difference between various points on the surface of an iron or steel sheet, and therefore of rapid rusting—

First: Impurities or variations of substance.

Second: Physical Unevenness or variations of structure.

The way to get rid of the first is to make the substance just as nearly as possible *all iron,* that is by securing the highest *Purity.* In Armco (American Ingot) Iron the total of impurities is never more than, and usually *much less than one-sixth of one per cent.*

Physical differences are reduced to a minimum by Scientific Care in every process of manufacture, and by the unfailing rejection of all bars and sheets which do not measure up to an exacting standard. In the making of Armco Iron every process from the open hearth to the shipping platform is guarded with scrupulous care, and minutely defective bars and sheets are sent back to the furnace like small-pox suspects to a detention hospital.

This is "The Iron That's Made To Last."

The American Rolling Mill Co.

AMERICAN ARMCO INGOT IRON

The trade mark ARMCO carries the assurance that iron bearing that mark is manufactured by The American Rolling Mill Company with the skill, intelligence and fidelity associated with its products, and hence can be depended upon to possess in the highest degree the merit claimed for it.

Licensed Manufacturers under Patents granted to The International Metal Products Company.

What the Maytag Multi-Motor Washer Will Do.

It operates the washer and wringer. It will operate the sewing machine, churn, cream separator, food chopper—or any group of small machines—that do not require more than ½ H.P.

Now Ready! Something entirely new! Looks good—"makes good"—sells on sight! Every woman wants one! No competition! Only Multi-Motor Washer on the market!

In short, Mr. Dealer, what has hitherto been considered impossible in washing machine manufacture has been achieved in the Maytag Multi-Motor Washer.

The secret is in the light, powerful, compact little motor that is mounted right on the washer—burns gasoline, kerosene, gas or alcohol. Guaranteed for THREE YEARS.

The Maytag Multi-Motor Washer is breaking all sales records for us, so it MUST be selling fast for our dealers.

The price fits the moderate purse, but puts a generous profit in your pocket. GET SOME OF THIS GOOD BUSINESS. Be the FIRST one to supply the demand in your town.

Now, listen! Some live, progressive dealer in your territory is going to make **BIG MONEY** handling the Maytag Multi-Motor Washer—and it might as well be **YOU.**

You positively **CAN** sell this washer and, if you don't, your competitor will—and pocket the profits. Remember, the proof of progressiveness is showing new things **FIRST.** This Washer is the same as our regular Power Washer we have sold for years, except that it has attached under the tub a ½ horse-power, 2-cycle air-cooled engine.

I am the Most Economical Sheet Metal

I resist rust and corrosion, consequently am far more durable than any other sheet metal made from iron ore.

I am moderate in first cost and my extreme durability makes me the most economical sheet metal in the end.

I save building owners and other users of products made from sheet metal thousands of dollars annually because of my rust and corrosion-resisting ability..

This stencil identifies me and protects the buyer against substitution:

TONCAN METAL

A few uses for Toncan Metal:

Roofing	Skylights	Tanks
Siding	Blower Systems	Culverts
Cornices	Eavestrough	Flumes
Ventilators	Conductor Pipe	Window Frames

There are many other uses.

Recommend and Furnish Toncan Metal to your trade. It brings in more business.

Automatic Pistol Points on Which the COLT Excels

ACCURACY: The COLT Automatic is a perfectly balanced, easy-shooting, hard-hitting pistol.

QUICKNESS: The COLT Automatic is ready for instant use. "The COLT fires the first shot first."

SAFETY: The COLT is automatically locked against unintentional discharge. You must GRIP THE GRIP and purposely pull the trigger to make a COLT let go. "You can't forget to make a COLT safe."

CONFIDENCE: The COLT feels right, acts right and, because it is automatically safe, it is an antidote for fear in the hands of gun-shy men or women.

PRESTIGE: The COLT was adopted by the U.S. Army and Navy because of its "marked superiority to any other known pistol." Show the COLT Automatic, explain it, and the COLT will sell itself.

When you recommend COLT FIRE ARMS you increase your customer's confidence in YOU.

Colt's Patent Fire Arms Mfg. Co., Hartford, Connecticut, U.S.A.

or A. MACFARLANE & CO., Coristine Building, MONTREAL

Bissell Carpet Sweeper Co.

TO THE TRADE:

It is just possible that optimism and looking into the future hopefully has become a habit with us but we can say, with all sincerity, that as far as our own line is concerned we have seldom made a trade prediction that has not been fully borne out by results. We do not claim to be prophets, but, based upon solid facts and experience from year to year, we feel that it does not require the wisdom of prophecy to foresee, with reasonable accuracy, what the new year promises in the way of business.

In our previous New Year's Greeting to our customers, based upon conditions as we saw them at that time, we expressed the confident belief that 1915 would be a prosperous year and that we expected to do a good business ourselves. We are gratified to be able to say that we have just closed one of the largest and most satisfactory years in our history and so we feel that, with money plenty and the most abundant crop yield recorded for 1915, with railroad profits increasing—thus encouraging large purchases for equipment, with our manufacturing institutions taxed to their capacities to fill orders, we can reasonably predict that 1916 will show even a greater measure of prosperity for this country than we enjoyed during the past year.

We have greatly increased our facilities during the year 1915, and are therefore equipped to materially increase our business during the year 1916, and with a line of carpet sweepers and hand propelled vacuum cleaners, admittedly in a class by themselves in all the essential points of design, finish, salability and profit-paying qualities to the dealer, we feel confident that 1916 will record one of the largest year's business in our history. Our advertising will be more extensive than ever and the fullest co-operation will be given to our customers to help the sale of our goods.

To our many customers, to whom we are indebted for the satisfactory year's business we have just closed, we extend our sincere thanks, and wish them a prosperous New Year.

Yours truly,

BISSELL CARPET SWEEPER CO.

Grand Rapids, Mich., 1916

DO YOU KNOW WHAT

SIMMS SET IN RUBBER

STAMPED ON A BRUSH MEANS?

Are they just words of an indefinite meaning, or do they tell you that the invention of the "Set in Rubber" process was the greatest single event in the history of brushmaking?

That it gives to the public a brush that can be used in anything in which a brush should be used without in any way affecting the composition that holds the bristles in the ferrule?

That turpentine, grease, crude oil, linseed oil, paraffine, alcohol, amyl acetate, tar, carbon tetrachloride, hot water, kalsomine, paint removers, or anything else in which a brush is ever used, has no more effect on the setting than a dewdrop on a prairie fire?

THAT SIMMS ARE THE ONLY SET IN RUBBER BRUSHES

MADE IN CANADA?

That the methods used in the making of these brushes are the development of over thirty years of careful study and experiment in the setting of brushes in rubber?

That the machinery used represents the investment of many thousands of dollars?

That they are made in a modern reinforced concrete building, the finest building in the world, exclusively used in the making of brushes?

That the makers are specially trained in the art of making real brushes?

That the bristles in them are far superior to the "Just as Good" kind?

That they are absolutely guaranteed by a firm of international reputation, to hold the bristles in the ferrule for ever?

These and many others are the things that Simms' "Set in Rubber" brushes represent. Keep them in your mind when buying brushes; it's money in your pocket.

The Prize-Winning Rods

Window Poster, Window Cut-out and Metal Sign FREE to all Fishing Tackle Dealers.

To every dealer who handles "BRISTOL" Steel Fishing Rods and who will agree to actually use this costly "BRISTOL" Advertising Outfit, we will send free, prepaid, one very remarkable four-foot window poster, showing one of the most beautiful big trout pictures ever produced. This poster is so striking that no fisherman could pass your window without stopping to look at it.

Also FREE—One window cut-out, reproduced from one of our most striking twelve-color calendars.

Also FREE—One three-color steel sign for placing in the front of the window or near a display rack of "BRISTOL" Rods, or on top of the counter.

These three advertisements should be a permanent part of every "BRISTOL" Dealer's equipment for increasing his sales.

THE ONLY CONDITION THAT WE REQUIRE BEFORE WE SEND YOU this expensive advertising outfit, FREE, is that you tell us the kind (catalogue numbers of) and the approximate quantity of "BRISTOL" Rods that you have already purchased for this season.

When we say in our advertising "BRISTOL RODS" we do not mean all of the steel rods made by the Horton Mfg. Company. We mean only the Rods with the trade-mark name "BRISTOL" stamped on the handle. We do not mean "Rainbow" or "Luckie" Rods. Please get this distinction clearly in mind so that you will not be confused or confuse your customers.

Write to-day, enclosing coupon, for the above Free Outfit.

Vol. 30 TORONTO, FEBRUARY 5, 1916 No. 6

War Affects Ammunition Industry

Explanation of Unusual Conditions Which Prevail in the Ammunition Business — Why Price-Cutting Has Been More or Less Prevalent—Shortage of Machines—The Future Outlook

THE whole situation as regards the present and future stocks, output, trend of prices etc. of both rifle cartridges and shot paper shells is so intricately interwoven with the war and so utterly dependent on the outcome of it, that this article must be a diagnosis rather than a prognosis of the case.

In the first place all of the materials that go into the making of cartridges and paper shot shells have increased from one hundred to five hundred per cent. since the outbreak of war and yet the chief difficulty in the way of production to-day is not the price of raw material but the scarcity of it. The material can be had, orders are accepted by the metal companies but rarely with any assurance of prompt deliveries, manufacturers are forced to snap up lots as they are offered without quibbling, when orders are placed ahead it is with the understanding that there is some risk of not getting the deliveries as promised.

Scarcity of Brass

In the case of brass there is a very noticeable scarcity. The mine production of the copper and zinc that go to make this article is fairly prolific but the smelters and refiners are restricting the output of the finished product. Copper has advanced from 11½c in Aug. 1914 to 24½c of to-day and zinc from 4½c to 18c in the same period of time.

In the case of the priming charge, fulminate of mercury is the chief ingredient and this vital article advanced from $70 to $146 a flask over the period of the war, up to early January. Then it jumped to $200 a flask.

The aluminum that for the sake of velocity goes into the tip of the Mark VII. cartridge used by the British forces and the nickel of the cupro-nickel jacket of the bullet have likewise climbed this war ladder. In the case of paper shot shells the great scarcity of dyes and of paper stocks has added both a scarcity and a higher price to even

The above excellent window display appeared in the Mills Hardware Co. King Street store, Hamilton, Ont. Shrapnel shells in the various processes of manufacture, shown in the background, proved an attractive feature.

this non metallic article that goes into cartridge production. Everything else in the manufacture of shot shells from the copper primer to the lead pellets is included in the cartridge problem.

Scarcity of Cartridge Machines

In the primary markets there are even now forecasts of thirty-cent copper continually cropping up. But possibly the greatest difficulty of all lies in the scarcity of cartridge machines of any type, skilled cartridge men or ordinary machinists. If the war should finish tomorrow there would be factory equipment for five times as many cartridges as normal demand would care for. The normal peace demand of the world could be supplied from this continent. At the present moment, because of the absorption into the war industry of all shell-making machinery, it is necessary for manufacturers to order months ahead of their wants.

Orders Going A-begging

As a result of the abnormal conditions, orders are going a-begging. Some manufacturers are giving the right-of-way to Government orders on the plea of patriotism. Others are passing up the numerous Government contracts in order that they may better care for the domestic field. In spite of high prices and a real scarcity of material, this last condition could not prevail if the equipment bogey could be overcome in a reasonable length of time. So the present indications are that production has reached its limit unless demand as a result of war conditions so greatly increases that expansion becomes of vital necessity—all of which is possible, even though improbable.

The 7½ per cent war tax particularly effects the ammunition industry in Canada. The great bulk of the raw material comes from the United States.

The wholesalers usually carry long stocks ahead. In some cases these antebellum stocks at the lower prices are not yet exhausted, which explains the price-cutting that appears from time to time.

Increase in Rifle Shooting

Even our domestic consumption in this line has increased with the war. The demand for shotgun shells in the East last fall was just fair, and in the West it fell down greatly during the shooting season. But the great increase of rifle shooting counter-balanced and exceeded this loss, serious as it was. War economy and the absence of the younger element in the army accounted for the first. A great wave of patriotism that took the form of patriotic rifle clubs accounted for the latter. This condition still exists, and is on the increase. So we are faced by a rising market, abnormal demand, scarcity of material, and an actual shortage of production equipment and a good demand assured for the future.

Although present equipment can care for the normal demand as we knew it in the past five times over, the normal demand of the future will be on a scale hitherto unknown to us. We will have amongst us some hundreds of thousands of men who have learned the full value of rifle shooting.

The Government will have a very large number of rifles to dispose of at very marked down prices. This situation arose some years ago in the disposal of old Sniders and Martini-Henrys. There will be the biggest revival of shooting that the world has ever seen for purely sport, training and patriotic purposes. Tens of thousands of men will avail themselves of the opportunity of picking up a first-class sporting rifle cheaply.

This sale of cheap army rifles will undoubtedly mean a big increase in the sale of new rifles and ammunition and accessories for them as the result of the working of a well known natural law. It is the same law that makes the buyer of this year's low price motor car develop into a hankerer for next year's more expensive model of another make. So it is with shooting which some men deny themselves on account of the outlay for a rifle. So this new development in the trade however will introduce rifles to men who hitherto had no idea of using them.

All the chances appear to be in favor of an increase in present prices, and even greater scarcity of material.

The last raise in American ammunition occurred several months ago. Since then the price of raw material has advanced enormously, but without a corresponding advance in the finished product there.

That advance, when it does come, will be reflected here. Such activity is always duplicated here when, as in this case, our chief source of material supply lies across the border. So it appears that things may get worse before they get better. The chance of a decrease is very slight, and covering arrangements are probably the safest course.

As an anti-climax to this condition it is noticeable that manufacturers, in direct opposition to their usual annual course, have neglected to guarantee that their present prices will hold good.

Proposed Mail Order Tax

An Important Bill to be Discussed by Manitoba Legislature—Retail Merchants' Association There Actively Interested—Half of One Per Cent. on Turnover Suggested—Opposition From Some Farmers

Special from our Western Representative

RETAILERS all over Canada, and especially those in Manitoba, will be interested in a bill which will be brought down shortly in the Manitoba Legislature, providing for the taxation of all mail order houses located in that Province. Brief mention was made of this in last week's issue.

The Bill is in the form of an amendment to the Corporation Taxation Act, and was framed first as a means of securing additional revenue, and secondly, to meet the demands of country merchants, who have complained bitterly in the last few weeks that mail order competition was becoming intolerable in Western Canada, and that it was only fair that the large city firms doing business through the mails, should bear their share of taxation.

Recently, deputations of country merchants, led by the provincial secretary of the Retail Merchants Association, have waited upon the Government, and urged their claims. The Provincial Secretary of Manitoba, on the look-out for new fields from which to secure revenue, saw in the mail order houses a likely source, and the new measure, if it goes through, will net the Manitoba Government approximately $100,000 a year. Incidentally, the same Bill provides for the taxation of street railways, express companies and banks.

It is a little early to speak of this measure, the Bill itself not having yet left the hands of the printer. The western editor of Canadian Grocer was, however, able to secure one or two interest-

ing details from the deputy-minister, W. J. Ptolemy, who framed the Bill. The measure defines the term, "mail order business" as including all commercial concerns, wholesale or retail, that distribute to the consumer at large a catalogue, price list, book or pamphlet setting forth the different articles for sale. It makes no difference what class of goods or trade is involved.

Sixteen M.O. Houses in Manitoba

In conversation with our western editor, Mr. Ptolemy said he understood there were sixteen mail order houses doing business in Manitoba, whose head offices were located within the Province. He stated that while the exact taxation had not been definitely fixed, he thought it would amount to possibly half of one per cent. on their turnover; in other words, for every hundred dollars worth of goods sold, the mail order houses would pay the Government fifty cents. This tax would be levied on catalogue prices, without considering cost of freight and other charges.

A Huge Turnover

Mr. Ptolemy was unable to give any exact information as to the turnover of mail order houses in Manitoba. He had had one or two estimates made, but the figures supplied were so enormous, he could not believe them to be correct. At any rate, he expected the revenue from taxes on mail order houses alone would amount to close on $100,000. To secure that amount, the turnover of mail order houses in that Province would require to be $20,000,000.

It was suggested to Mr. Ptolemy that if the Bill provided for the taxation of all houses going direct to the consumer, irrespective of the class of merchandise sold, it would concern more than sixteen houses. There are hundreds of firms in Manitoba selling direct to the consumer; take for example firms selling agricultural machinery and all sorts of specialties used on the farm. It would not be surprising if special provisions were made in certain cases. It is certain that strong opposition will be encountered from these firms before the Bill receives the approval of the Legislative Council.

There is one serious drawback to the measure which will militate against its success unless support is secured from other Western Provinces, and from the Ontario Government. It is only possible for the Manitoba Government to impose a tax upon mail order houses located right in the Province, whereas probably as much business is being done in Manitoba by mail order houses located in other Provinces. When this was drawn to Mr. Ptolemy's attention, he replied that they could see no possible chance of touching mail order houses whose headquarters were outside of Manitoba. They had this advantage though; they could impose a tax on business done by Manitoba houses outside the Province. It was for Ontario and Quebec, and the other Western Provinces, he said, to take advantage of business done by houses located in their territories, and he had good reason for stating that the Government of Saskatchewan would follow Manitoba. He did not think Ontario and Alberta would be long in imposing a mail order tax too. The latter information was given by Mr. Ptolemy in reply to a suggestion from our representative that the Bill might have the effect of driving mail order houses away from Winnipeg into some other Province, where they could continue to do business in Manitoba unmolested.

Only recently several of the largest mail order houses have established branches in Saskatchewan, and the rest would soon follow suit. Only the passing of similar legislature by adjoining provinces would overcome this difficulty.

R.M.A. Responsible

J. H. Curle, secretary of the Retail Merchants' Association, outlined to the western representative what steps had been taken to achieve this result.

The first step was in this way. In October last, the Winnipeg branch was negotiating with the city to have the business tax abolished or adjusted. At this time considerable data was gathered, showing the amount of taxes paid in Winnipeg by the various professions and businesses.

These tables showed to the satisfaction of the retailers that they were paying taxes out of all proportion to those being paid by wholesalers, the professions, and the mail order houses.

This prompted them to agitate with the Manitoba Government to impose a tax on mail order houses. Preparations were made in camera by the executive, not even the members being acquainted with what was going on.

When the Provincial Treasurer was approached, the deputation of retail merchants went armed with the figures they had compiled to maintain that the mail order houses were doing an enormous business in the Province, yet were not paying an equal share of taxes.

Several arguments were used. Taxes, it was pointed out, were usually based on two things, first on privileges granted, for which a license tax was imposed, and secondly, some other form of tax, gauged by the ability to pay.

Retailers Carried Farmers

The Government was also told that retail merchants had carried the farmers, thus helping towards their prosperity, as well as that of the Province. The farmer in many cases, they claimed, had shown ingratitude by neglecting to pay the dealer, and by sending his cash through the mails.

Another argument advanced, was that the development of the mail order houses affected the growth of the town, and was detrimental to the farmer himself. A case in point was given. In a certain Manitoba town, the merchants were not as aggressive as in other places, thus allowing the mail order houses to capture a goodly portion of their trade with ease. It had been noted that land in that district, as a result, brought a lower figure than in towns where merchants were more efficient, giving better service, and buying in the best possible markets.

Farmers Oppose Bill

As already stated, the Provincial Treasurer was sympathetic, resulting in the Bill as outlined above. The measure is not yet on the Statutes, and there are some who declare it never will be. Already the farmers, through one of their big organizations, have opposed the Bill strongly, declaring that if it passed, the cost of merchandise to the farmer would be increased unduly.

All sorts of difficulties are cropping up, and all sorts of questions being asked. "What is to be done with the small dealer who issues a catalogue to his customers?" is a question often heard. It is understood that a provision will be made exempting all firms doing a business less than $20,000 annually through the mails.

In the meantime, the Manitoba Retail Merchants' Association are backing up their case, and are confident of success. They declare they have been reasonable in their demands, and have tried throughout to be as just as possible with their big competitors.

The following letter has been addressed to other branches of the R.M.A., in order to keep them posted on what is being accomplished in Manitoba:

Winnipeg, Jan. 27, 1916.

T. J. Corley, Esq., Secretary the Retail Merchants' Association of Canada, Inc., Vancouver, B.C.

Dear Sir, Re Mail Order Houses:

I am sending under separate cover a copy of an article on proposed legislation, which will require a tax to be paid on the business turnover of mail order houses.

Our Executive felt that you would be interested, and that you might feel disposed to follow the lead of Manitoba in this respect.

We are of the opinion that the country merchants are not getting away to a fair start, if their competitors are not required to pay a fair share of the taxes to the Provincial or Federal Government.

Accessories Featured at Motor Show

Importance of Auto Accessory Industry Demonstrated at Montreal Motor Show—Many Splendid Exhibits by Accessory Manufacturers and Wholesalers — Description of Displays.

UNDER the auspices of the Montreal Automobile Trade Association, the Montreal Motor Show was held in Montreal last week. Incidentally it is the only motor show being held this year in the British Empire.

As an instance of the great growth of the automobile accessory line that has so closely followed the development of the motor industry, may be mentioned the fact that most of the exhibitors present had some sort of an exhibit of accessories and the entire floor space of seven firms was given over entirely to this growing branch of the rapidly increasing automobile industry—a certain enough indication from well-informed quarters of the important part this line plays in the automobile and associated trades.

Previous to the opening ceremonies, on the night of the 22nd a dinner was given by the president and directors of the association to their guests of honor at the Engineers' Club. Piquancy was added to the occasion by the presence of A. A. Dandurand, who brought the first horseless vehicle into Montreal eighteen years ago.

The shareholders of the organization include practically all of the manufacturers and selling concerns of automobiles doing business in the Dominion, and naturally the shareholders are all exhibitors. The exhibits shown cover the entire range of automobile manufacturing as it is to-day, and are well worthy an industry that in so short a time has attained fourth place in the list of North American manufactures, and that will this year produce over one million cars in its 450 factories in Canada and the States.

Seventy-seven cars and trucks were shown by forty-five exhibitors, to say nothing of a vast range of accessories. Their devotion to the principles of the newer salesmanship was shown by these dealers who issue trade tickets to their prospective customers in order that they may attend the motor show and compare all makes before settling on one. This requires confidence of a high order in one's goods.

All ranges of purse and taste may be satisfied in these exhibits, which, however, naturally incline to the tasteful and the artistic in the furnishings and accessories of the cars.

These displays served to call the attention to the vast number of accessory articles that go hand-in-hand with the automobile trade, and that must follow it in the vast volume of their sales. One firm offered a particularly good display of accessories, and did it in such a manner that they lost none of their punch in the presentation. One make of oil was advertised by the forcing of the oil through large glass tube letters that spelt that name. The oil was kept constantly in circulation, invited inspection, and held the attention by the unique quality of the ad. Another firm advertised puncture-proof tires by hanging from one that sat on a bed of sharp nail points a collection of bars of lead, proof positive of the invulnerability of the goods to puncture. The attention was further directed to this fact by the simple announcement in large letters on an attached card: "The weight of this lead is 1,140 lbs." Display boards showed off to advantage the various accessory tools and etceteras. Another board offered a comprehensive survey of some of the raw material that entered into the manufacture of the tires.

Considerable taste was shown by all the exhibitors in their selection of the articles displayed in relation to the manner of the display. Boards were invariably given over to the small parts and tools that would show up well on the dark background of green baize, and that appealed solely for their utility.

The display boards were invariably covered with baize. The more decorative articles were in all cases in handsome show cases, of glass on all sides, and on the shelves as well, so that the highly-polished nickel and brass work of the accessories fairly scintillated in the reflection of the light from clocks and horns and whistles.

Small display cases were given over completely to repairing outfit and material. In all cases these less attractive goods were kept separate from the others. Tins of cement of all sizes and shapes, universal valve insides, tapes and rubber goods suitable for any class of puncture, were all shown, with the tools necessary for rubber repairs.

View at the Montreal Motor Show. Exhibit is by a hardware firm, Larivière, Inc.

One company showed a tasteful line of accessories that were well set off by the tasteful background of counters draped in orange cloth, with lines of black tape along the edges and the whole festooned with automobile tire chains.

Another exhibit showed tires that were labelled "Millenium Tires." The very title arrested the most casual onlooker for a closer inspection by the vivid appeal to the imagination contained in the title.

The advertisement of one exhibitor read: "Important," in large letters, and under that the body of the appeal, which reads: "Whether you own a Ford or a ten thousand dollar car, you will always find in our establishment a complete stock of the up-to-date accessories,

View in Auto Acecssory Section at Monteral Motor Show.

with the assurance of getting the very best service obtainable."

Made Fifty Sales

One Exhibitor described how he had made fifty sales of a large and important accessory by carefully selecting five hundred names for his mailing list and sending them good live copy with a punch to it. He then followed up stubbornly and refused to be shaken off with the result mentioned.

Oils were shown in a great variety of brands, sizes and quality. Emphasis was laid on the trade getting qualities of this line and in the ease with which it and gasoline may be used as catches and feeders for other trade.

Storage batteries are entering more largely into display features for demonstration purposes and they are quite largely featured at this year's show. It is explained by exhibitors that this line may be used to great advantage by dealers as a service proposition and that it is becoming an increasingly important factor in the accessory line. Unlike most accessory lines it must have some attention while in the shelf. It must be charged at intervals but this can be done with ease by a man who has had some experience and by the aid of a small charging outfit.

The importance of the accessories line is agreed upon by all concerned to have been vastly underestimated in the past. At this motor show some exhibits were given over entirely to this line. In the cities shops are springing up that indulge in only one or two or three specialty lines and that make this one of them.

It was particularly noticeable that even amidst this costly collection of motor cars, designed to meet every demand of luxury and of artistic appearance that the accessories outshone them in richness of appearance and general attractiveness from the view point of the onlooker.

WHEELS TURN THE YEAR ROUND

Motor Cars Are Now Used in Winter as Well as in Summer and Accessories Are All-Year Round Sellers.

THERE was a time when the motor car business and the automobile accessories business were looked upon as one season lines. The car was deemed a summer vehicle and only a summer convenience. But that was in the infancy of the motor car. Times have changed and the motor has become more developed. The necessity for winter cars has been the mother of many an invention and now the automobile is a summer and winter convenience.

The fact of the motor car having wheels gave the impression that its use extended from the spring till fall. And that was all that was expected at the start. Then inventors tried their hand at rigging up sleighs which could be propelled in some way which would take the place of horses, but their efforts accomplished little. Wheels were said to be for dry roads and sleighs for ice and snow. Now the runners have been forgotten and the wheels turn all the year around. Some may say that this winter idea is applicable only in the cities. This is not so, the farmer has learned that he can make use of his machine in the cold weather and when the sleighing is good just the same as in the summer time. The wheels with the corrugated tire or with chains carry the car safely over the ice and snow whether it is in the city or in rural parts.

Modern inventions have brought the car into the commercial world. The truck is needed in the winter quite as much as in the summer and the man who buys a car to help him in his business needs its assistance in both winter and summer

The closed in top, the non freezing liquid for the radiator, the electric heaters, the spark plug made especially for cold weather, these and a hundred other improvements and inventions have extended the usefulness of the motor to twelve months in the year.

Now it is every day that the hardwareman can sell accessories. This department is not "dead" six months in the year—its "alive" to the live merchant and farmers profits which at the outset were not to be had.

The manufacturers this last year or two have helped to keep the accessories business going in the winter by their co-operation with the dealer. Thousands of dollars have been expended on advertising accessories for use in cold weather. All this has helped create sales, sales which are profitable.

AMENDMENT OF PROHIBITED EXPORTS

The Governor-General in Council has ordered as follows: His Royal Highness the Governor-General in Council, under and in virtue of the provisions of sections 242 and 291 of The Customs Act, is pleased to order, and it is hereby ordered as follows:—The exportation of the following goods is hereby prohibited to all destinations abroad other than the United Kingdom, British possessions and protectorates, viz.: Cod oil and other fish oils; mother liquor, containing potash, the product of sugar beets; rags of cotton and rags of cotton and wool mixed.

HARDWARE & METAL

CANADA'S ONLY WEEKLY HARDWARE PAPER

Vol. XXVIII. TORONTO, FEBRUARY 5, 1916 No. 6

BRIEFS

REMEMBER the Convention dates, Feb. 22, 23, 24.

* * *

EVERY HARDWARE merchant should keep a complete set of books.

* * *

THE TREND of the hardware business is towards new kinds of goods and new forms of service. Consumption is enlarged by creative effort that means more comfort and convenience to the public.

* * *

THE PROGRAM for the hardware Convention, announced elsewhere in this issue, is one of unusual and practical interest. There will be good, live discussions on topics of vital interest to the hardware trade.

* * *

HARDWARE AND METAL'S market reports this week announce many important price changes. The merchant who will be in the best position to do business during the coming spring rush, is the one who is now closely studying the market conditions and buying at the most favorable opportunity.

THE LAW vs. NO BOOKS

ACCORDING to a recent decision of the Appellate Division of the Supreme Court, there is no protection for creditors against a trader who, apparently defrauds his creditors and covers up his transactions by failure to keep books of account.

In June, 1915, a Toronto merchant (not in the hardware business) made an assignment for the benefit of creditors, to the Canadian Credit Mens' Association. The merchant had been conducting three large stores in Toronto, having commenced business in August, 1914, with one store. Subsequently he branched out and in January, 1915, issued a statement covering his affairs up to December 31, 1914, in which he showed a surplus of $8,900. The statement of the assignee, prepared at the time of the assignment, five months later showed a deficit in the business of $18,800, making a total loss for the five months of $27,700. The trade liabilities amounted to approximately $75,000.

No record of receipts and disbursements was to be found and the merchant admitted under oath when examined for discovery that no books had been kept. He admitted that it was necessary for any business man to keep books and that it was impossible to tell the progress made unless books were kept, and he was quite unable to explain the very serious discrepancy in his assets. Under the circumstances a warrant was sworn out by the secretary-treasurer of the Canadian Credit Mens' Association, and he was arrested, charged under the provisions of Section 417, Sub-section (c) of the Criminal Code, which reads as follows:—

"Everyone is guilty of an indictable offence and liable to a fine of eight hundred dollars and to one year's imprisonment who, being a trader and indebted to an amount exceeding one thousand dollars, is unable to pay his creditors in full, and has not, for five years next before such inability, kept such books of account as, according to the usual course of any trade or business in which he may have been engaged, are necessary to exhibit or explain his transactions, unless he be able to account for his losses to the satisfaction of the court or judge and to show that the absence of such books was not intended to defraud his creditors."

The case was tried before Judge ———, and a conviction registered. The merchant's counsel, however, requested an opportunity to appeal, contending that the Statute did not apply to the prisoner, in view of the fact that he had not been in business five years. The Judge granted a stated case. The case was argued in the Appellate Court and the conviction quashed. The Chief Justice, in giving judgment, said that the language used in the section was very indefinite and whatever may have been the intention of the legislators, the language employed was not sufficiently clear to cover a trader unless he had been in business five years.

It is the intention of the Credit Mens' Association to take the matter up with the Minister of Justice in an endeavor to secure an amendment to the Statute covering this highly important point and in this connection they deserve the support of all business men. Every merchant should keep a complete set of books. He not only owes it to his creditors, but also to himself and his family. If a merchant does not keep a

proper set of books, he cannot honestly tell whether or not he is making money. Many retailers have been forced out of business through loose handling of business affairs, and neglect in not having a complete bookkeeping system. Few retail merchants will object to any legislation which the credit men may secure to make it imperative that books of account should be kept. The merchant who conducts his business on a sound and legitimate basis has nothing to fear.

In last week's issue of HARDWARE AND METAL there appears an article telling in detail how to keep a correct set of books. Suggested forms for exact bookkeeping are also shown.

UPWARD FLIGHT OF GASOLINE PRICES

THERE have recently been some important advances in the prices of gasoline and benzine—and the outlook is that there will be others. Down in New York and Chicago they are talking of retail prices of 30 and even as high as 40 cents a gallon; quotations in Canada would be proportionately higher. However, although there has been no marked improvement in the market conditions recently, the upward movement appears to have been somewhat checked and the deferring of famine conditions seems to have created a more optimistic outlook. Gasoline in Canada to-day is within 1½ cents per gallon of being double the price in effect seven months ago.

The trouble with the gasoline market is the old one of supply and demand. The broadening scope of the field of utility for the motor has been accompanied by a consumption of the power developing liquid which has grown faster than has the production of the raw material. Under such conditions a rise in value is the logical conclusion; where such a rise will end is problematical.

Reports from the United States are that the total production of gasoline in 1915 was slightly in excess of 1914 but that in spite of this there was an absolute falling off of 50,000 barrels per day during the last six months as compared with the first half of the year. When, in view of these figures, it is considered that there are 2,500,000 automobiles in use in the United States alone and about 1,000,000 being planned for market this year, to say nothing, of gas engines, farm tractors and motor boats it can be readily understood that the future must be regarded with a certain amount of apprehension as to price possibilities.

At the same time it is pointed out that such an increase as there was in the first part of 1915 came almost wholly from fields which yield heavy oils from which the percentage of gasoline is small, while, on the other hand, attention is called to the fact that the great Cushing pool in Oklahoma, rich in gasoline values, decreased from 300,000 barrels per day in May to less than 100,000 barrels a day in December.

The general situation is that while the statistics show that there was a considerable increase in the production of crude petroleum, there was a larger proportion than usual of it which had not high gasoline producing qualities while there was a very large increase in the consumption. Thus while manufacturers commenced the year 1915 with quite large stocks of the finished product, the opening of 1916 finds that not only has the consumption come up to production but that the reserve supplies have been seriously depleted.

THE MOTOR SHOW AND ACCESSORIES

THE Motor Show held last week at Montreal, serves to call the attention of the trade to a rapidly expanding business. Attention is being directed more particularly to the fast-growing accessory field that is constantly being added to by new inventions and the improvement of old ones.

Manufacturers and jobbers in this line profess to see in the hardwareman, especially in the rural districts, the logical distribution of their goods. In this view HARDWARE AND METAL concurs. It is pointed out that the distributor in the past has been too often a type of garage owner who started business with little capital other than a confidence in himself.

The jobbers and manufacturers now seek to replace this type of man by business houses of established integrity. It is in this need of theirs that a real opportunity exists for Canadian hardwaremen to capture a fast-growing industry that is as yet, in spite of its size, only in its infancy.

DISTINCTIVE STAMP NEEDED

THERE is so much similarity between the new three-cent stamp and the regular two-cent stamp that either may readily be taken for the other. The new stamp has merely the figure "1" to distinguish it. From a public standpoint this is very unsatisfactory and should receive immediate attention.

The delay in issuing a three-cent. stamp after the changes in postal rates came into effect, was credited to the International Postal Union requirements. Samples of new stamps are required by the Union before the stamps are offered to the public. It was to avoid these requirements that Canadian letters for out-of-town delivery required two stamps until the present three-cent issue came into vogue. The present three-cent stamp, being so closely akin in appearance to the two-cent stamp, escaped the Postal Union demands.

While this is an appreciable improvement over the former method of using two stamps, it could be greatly improved by being a distinctive color, just as the three-cent stamp was distinctive eighteen years ago when the cost of mailing letters was the same as it is to-day.

WHAT OTHER PAPERS SAY

PETER TUMBLEDOWN IN BUSINESS

From The Hardware Bulletin

For years a popular farm paper has editorially featured a familiar character bearing the significant name of Peter Tumbledown. He is supposed to be a farmer, but we are sure that he is also "keeping" a hardware store.

This type, in fact, is altogether too common in the retail business. It is composed of two classes.

One had no previous experience, but has decided to break into business and "take it easy."

The other is made up of men who for one reason or another have gone to seed.

In the stores of either class you will find piles of unopened trade papers, running back into last year.

Such stores generally look rather run down at the heel, but the suggestions of the traveling salesman and the ideas, hit upon by a chance glance in a trade paper, come to naught with the proprietors.

"Might do for some places, but won't work here," they say.

If a competitor makes good with these same ideas their comment is "Bull headed luck."

Such dealers will generally tell you that the associations are no good. Sometimes they join for the insurance and never attend a convention, but these are surest of all that the associations have no real value to the retailer.

It is from such merchants that those who make it a business to knock the local stores select their so-called "typical retailer."

The Peter Tumbledown kind of retailer has been so much in the public eye, and has antagonized so many consumers by his peculiar merchandising that the larger class, who are doing business in a craftsmanlike way, are more or less injured by it.

This demoralizing element in the retail trade could be greatly minimized if manufacturers and jobbers were not so ready to gamble on the chances of these amateur merchants.

A good share of the failures come from this class, and yet we know of such merchants with very little cash back of them buying sizable stocks of goods and setting up in business without a dollar in real money.

All this may have to adjust itself, but manufacturer, jobber and retailer will have less loss and trade demoralization to withstand when more attention is paid to the financial and business ability of those who would become merchants.

* * *

WHAT THE INVENTORY DISCLOSED

From Credit Men's Bulletin

A retailer, in discussing his affairs with a creditor in whom he had every confidence, dropped the remark that he could not understand why his profits did not respond to his increased business. It ought, he said, to have given him a better bank balance, and made it easier than heretofore to meet his accounts as they fell due.

"The inventory ought to answer these questions, and more, too," said the creditor. "Have you taken an inventory lately?"

The retailer admitted he had been a little slack in this matter, and also perhaps had never analyzed his inventory figures to get the full value out of them. He promised himself and his creditor friend to get at the inventory immediately.

What was the result? In the first place his inventory revealed that his stock had increased at a much more rapid rate than his business. During his first year he had done a business of $25,000 on a stock never larger than $7,000. True, he had increased the amount of sales to $30,000, but had done it on a stock nearly twice as large, or $12,000. Thus, while his volume of business increased 20 per cent., his stock in hand had increased by 71 per cent.

But this was not all he made out of his inventory. He discovered that his expenses had jumped up to 20 per cent. of his gross sales, and that he had been making a substantial error in calculating his profits on the cost of goods instead of the selling price. Now he understands the ideal which his creditor set before him—to do a maximum business with a minimum of investment, which he sees is practically an impossibility except an inventory be taken frequently.

* * *

WHAT IT COSTS TO BE INDEPENDENT

From American Artisan

There is more than one way of missing profits in the retail hardware business—or for that matter in any retail, wholesale or manufacturing business—but one of the most common ways of doing so, and still less considered, is that of assuming an imaginary independence.

Here we have for instance a hardware dealer. He doesn't get along very well with the other hardwaremen in his town. In fact, he has nothing to do with them and yields them only the barest imitation of a nod when he meets them on the street. He tries to make capital of the fact that he is "independent," "doesn't belong to the Association and therefore isn't bound by agreements as to prices, etc."

He carries fire insurance. Being the sort of man he is, it is quite probable that he wouldn't carry any, because, as he says, "he doesn't believe in cooperation"—and what else is fire insurance? But he has to carry fire insurance, because no wholesaler or manufacturer would extend him a line of credit if he didn't.

So he buys the most costly fire insurance he can find—because he "simply won't have any one dictate to him as to how he shall run his business"—meaning that he isn't willing to work with any other hardware dealer for their common good. He buys the "old time" fire insurance and pays premiums that are from 25 to 100 per cent. higher than is necessary.

In the report of the Pacific Northwest Hardware Mutual Fire Insurance Company, which is affiliated with the hardware dealers' association in that section, a number of instances are shown where members have saved in policy premiums for fire insurance on their stocks all the way from one to two hundred dollars a year.

This saving is a direct net profit—and the "independent" hardware dealer, by assuming his attitude of being "wiser," just passes up this opportunity of saving each year several times the small amount he is required to pay in membership dues to the state organization.

There are many other ways in which the "independent" dealer misses direct profits, and probably there will always be some of these "independent" hardware dealers, for it seems a providence of the powers that be that there must always be a certain percentage of foolish folk to make this world uncomfortable to live in.

* * *

READING TRADE PUBLICATIONS DESIRABLE

From The Credit Men's Journal

The value of knowing trade conditions throughout the territory in which his firm is doing business is of the greatest benefit and value to the credit man.

There are many methods by which this data can be gathered, but few equal in value the careful scrutiny of the commercial pages of up-to-date newspapers, the trade press, and the bulletins issued by the different departments of the Dominion, as well as the Provincial Governments.

The question of time to consult these mediums is one that is of prime consideration to the average man in charge of a credit department. The multitudinous duties that fall to this end of most businesses make the leisure hour for concentrated thought very difficult to get. But it should be got. Where the press of details keeps a man's mind constantly engaged, his ability to develop new policies, to initiate new movements, to improve his department and all departments of his house is impaired. Time for thought, for studying of conditions, methods, improvements, etc., is just as essential in all realms of commercial life as in scholastic circles, and the best equipped man is the man who takes the time to think out the problems, to study new policies and to concentrate his mind on the needs and requirements of his business for tomorrow, as well as the needs of the immediate hour.

* * *

GAINING OUR FREEDOM

From Montreal Star

Mightily encouraging are the accumulating evidences of the industrial emancipation of this country. The latest of these is an Ottawa despatch to a New York paper predicting the establishment in Canada within a short time of facilities for refining millions of dollars' worth of nickel matte from Sudbury, every pound of which has hitherto been shipped in a raw state to New Jersey and there refined.

It has long been one of the economic anomalies of this country that the finished products of many of the raw materials which we produce in greatest abundance and of the finest quality have to be brought back in a finished state and paid for by the Canadian consumer, with the cost of transportation and frequently of duty added to that of manufacture. Similarly Australia, although one of the greatest wool producing countries on earth, has until recently imported by far the greater part of her woollen textiles.

But our sister dominion, like ourselves, has been jolted out of this easy going method by the war. Her supplies of wool cloths being seriously interfered with, she has begun the task of providing for her own needs from the overflowing stores of raw material at hand.

If the war is doing nothing else for us, it is teaching us to be more self-reliant, more willing to "take a chance" on doing for ourselves many things which we have hitherto paid others to do for us.

* * *

EDUCATIONAL SALESMANSHIP

(From American Paint and Oil Dealer.)

It is an axiom in the retail world that higher prices of any commodity mean a slackened demand. When eggs are forty cents a dozen Mrs. Consumer makes three of the ovoids do the work ordinarily done by a dozen. When butter is "up" the size of the chunk you get at the restaurant is "down." But this condition applies to the realm of paint and varnish least of all. It applies not at all when the retailer is fully alive to the situation.

Paint prices are up. How can you, Mr. "A. P. O. Do-er," offset the tendency to reduce purchases on the part of your customers?

The answer is—"Educational Salesmanship." And it's a simple proposition.

The increased price which you must get now for your paint and varnish will amount to very little on the total bill of any painting job. Three-fourths of the cost of the job is for labor. Suppose that the material costs 10 per cent. more. The increase of 10 per cent. on material amounts to an increase of only 2½ per cent. on the cost of the entire job. For instance, if a job cost $100 two years ago the increased cost of materials now, on a ten per cent. basis, would make that same job cost $102.50 to-day.

Would that $2.50 added cost really prevent any sane property owner from preserving and beautifying his home?

Think it over. And then use it in your business.

Making Show Cards Doubly Attractive

By Using Illustrations Taken From Advertisements in Hardware and Metal, Show Card Writers Have Overcome a Former Difficulty—Three Attractive Show Card Suggestions.

By T. O. CRAWFORD

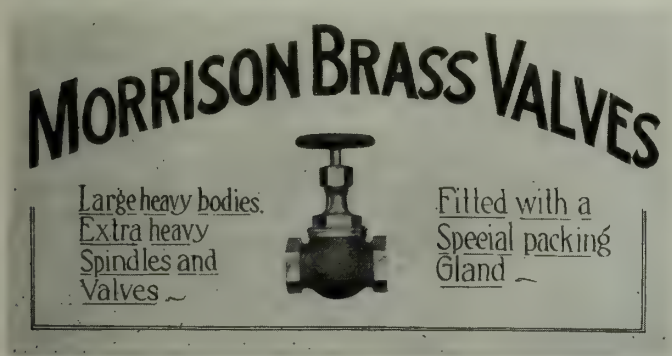
THE three show card suggestions shown on this page are good examples of cards which may be prepared with a minimum of labor and expense.

The illustrations used in preparing the cards have been taken from advertisements which have appeared in the advertising pages of recent issues of Hardware and Metal. The lettering can be easily executed by any clerk or window-trimmer who is willing to devote a little time and care to this portion of the work.

The cards, when completed, can be used a great many times, if they are properly cared for. They will prove very useful for window or interior displays, or with special displays of the goods featured on the cards.

A number of attractive illustrations appear in every issue of Hardware and Metal. Some of the illustrations may be used in preparing show cards for immediate use. Others can be prepared now and used at later dates.

The month of February is usually a quiet one in the hardware store. Window trimmers have plenty of spare time which they could use to advantage in preparing window cards, etc., for use later on when the spring rush commences.



The illustration used in preparing the above show-card suggestion was taken from an advertisement which recently apeared in Hardware and Metal.

How to Make Cards

The illustrations used in preparing the paint card shown on this page were taken from advertisements which appeared on pages 36 and 37 of the January 29 issue of Hardware and Metal.

The illustration of the painter was cut from the advertisement and squared off at the bottom. The figure was then pasted on a sheet of plain white cardboard measuring 12 by 18 inches. The C. P. Trade mark was also cut from the advertisement and pasted on the card, in the position shown in the reproduction.

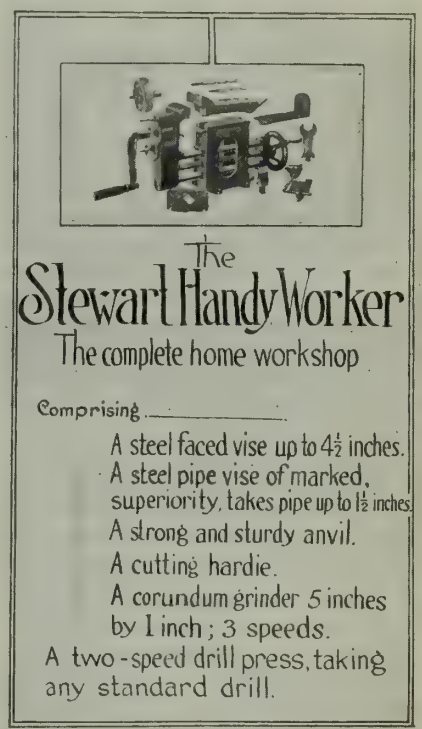
The lettering of the first line of words, "The Canada Paint Trade Mark," is outline work. The letters were first outlined with a stub pen and then filled in with a small brush. The wording of the second and third lines was done with a No. 2 round writing pen. The wording "Ask for color card," on the bottom line was done with a stub pen. The latter pen was also used for ruling purposes.

A card of this kind is particularly appropriate for paint window displays, or for the purpose of attracting attention in the paint department.

The "Morrison Brass Valves," card measured 11 by 21 inches. The illustration was taken from an advertisement which appeared on page 10 of the Jan. 22 issue of Hardware and Metal.

Heavy black lettering was used for the heading on this card. The lettering is known to cardwriters as brush stroke block. A No. 6 red sable brush was used for doing the work on the heading. A No. 2½ round writing brush was used for the balance of the lettering. The illustration of a globe valve stands out prominently on the card. The illustration was first cut from the advertisement. It was then centred on the card and applied with a thick white paste. On the original the illustration, even at close range, looks as though it was printed on the show card and only by a close examination is it possible to detect that the illustration has been pasted on. The ruling on this card was done with a stub pen.

The illustration used in preparing the "Stewart Handy Worker Card" was taken from an advertisement which appeared on page 11 of the Jan. 29 issue of Hardware and Metal.



The illustration used in preparing the above show-card suggestion was taken from an advertisement which recently appeared in Hardware and Metal.

The illustration used in preparing the above show-card suggestion was taken from an advertisement which recently appeared in Hardware and Metal.

EVENTS IN THE TRADE

Salesmen's Convention

Fergus, Ont.—Beatty Bros., Ltd., sales staff, last week, held their annual convention at the head office here.

Represents Sheffield Firm

John B. Keeble, of Ronuk, Limited, 53 Yonge Street, Toronto, has been appointed representative for Canada for Thos. Ellin & Co., Ltd., Sylvester Works, Sheffield, England, manufacturers of table and pocket cutlery, scissors, razors, spoons and forks, electro-plate, joiners' tools, etc. Mr. Keeble will carry a complete line of samples.

Winnipeg Bonspiel

Among the Winnipeg manufacturers who have taken space at the Home Products Exhibition, held in connection with the forthcoming bonspiel, are Sherwin-Williams, Ltd.; G. F. Stephens & Co., Ltd.; the Winnipeg Paint and Glass Co., and a large number representing other lines.

New Western Manager

The James Smart Mfg. Co., Ltd., announce the appointment of William P. Millar, as manager of their Winnipeg Branch, in succession to the late William Sutherland. Mr. Millar was formerly manager of the stove and furnace department, and has an intimate knowledge of all branches of the business; he has also had several years business experience in the Northwest, and is fully informed on Western trade conditions and requirements. One Winnipeg branch is now located in the Cockshutt Building, Corner Princess St. and Alexander Avenue, Winnipeg.

Obituary

Winnipeg, Man.—The death occurred here of William Sutherland, for many years manager of the Winnipeg branch of the James Smart Mfg. Co. The late Mr. Sutherland was an old-time hardwareman. He was for some time in the retail hardware business at Brockville, Ont, after which he was for several years buyer for the James Smart Mfg. Co. of that place. Some twelve or fifteen years ago Mr. Sutherland was transferred to Winnipeg as Western manager, having charge of all territory from the head of the Great Lakes to the Pacific Coast. The late Mr. Sutherland had a wide circle of friends in the Western hardware trade, gained through his many years' association with the trade.

Hardwaremen Elected to Board of Trade Offices

Blake L. Booth, Welland, Ont., has been elected vice-president of the Board of Trade.

C. C. Cole, of Cole & McMurray, Niagara Falls, Ont., has been elected president of the Board of Trade.

C. F. R. Taylor, of Taylor Bros., Carleton Place, Ont., has been elected secretary of the Board of Trade.

D. Findlay, of Findlay Bros., Carleton Place, Ont., has been elected to the council of the Board of Trade.

Jas. S. Neil, Fredericton, N.B., has been elected president of the Board of Trade.

F. J. Cragg, of Cragg Bros., Halifax, has been elected to the council of the Board of Trade.

Galvin L. Stairs, Halifax, N.S., has been elected to the council of the Board of Trade.

J. D. MacDonald, manager, Calgary Paint and Glass Co., Calgary, Alta., has been elected to the council of the Board of Trade.

Industrial

Toronto, Ont.—The Canada Metal Co. have been granted a permit to build a $4,000 shot-tower at their factory on Fraser avenue.

London, Ont.—The Perkins Gasoline Engine Co., or Mishawaka, Ind., have started operations at their plant recently established here.

Toronto, Ont.—The Canada Pipe & Steel Co. ask permit to make a substantial addition to their machine shop on Atlantic avenue.

Toronto, Ont.—The Dunlop Tire and Rubber Co. have made application for a permit to build an addition to their factory on Booth avenue.

Gananoque, Ont.—The Steel Company of Canada have taken over factory of the Gananoque Bolt Co., and will install a drop forging equipment.

Toronto, Ont.—The Universal Tool Steel Co. will construct a one-storey brick addition to its plant on Dufferin street. Estimated cost, $7,000.

Windsor, Ont.—The Universal Stove & Furnace Co., contemplate erecting a plant here or in Walkerville.

Death of A. B. McColl

Toronto, Ont.—The death took place at his residence, 289 Carlton Street, on January 29, of Angus B. McColl, founder of McColl Bros. & Co., Toronto. He had been suffering from hardening of the arteries and heart trouble for the past eight or nine months, and recently paralysis set in.

Mr. McColl's illness was aggravated by the absence of his son, Major E. L. McColl, who went to the front with the first contingent of Canadian Artillery, and who is now in France.

For years Mr. McColl was a member of the Board of Trade, St. Andrew's, Caledonia, and Freemason societies.

The late Mr. McColl was born in Kimelfort, Argyleshire, Scotland, in 1834, and when about ten years of age came to Canada with his parents. For some years Mr. McColl conducted a seed and nursery business at London, Ont.

In 1878 he moved to Toronto, where he founded the lubricating oil business, which through his efforts grew to be one of the largest private oil companies in Canada. As the business developed, he took into partnership his younger brother and the firm became McColl Bros.

New Incorporations

The Prescott Mfg. Co., has been incorporated at Ottawa, with a capital of $200,000, to manufacture all kinds of abrasive wheels, etc., at Prescott, Ont.

The Perfection Tire & Motor Co. has been incorporated at Toronto, with a capital of $1,500,000, to manufacture automobiles and accessories, at Hamilton, Ont.

The Granville Vulcanizing Co. has been incorporated at Victoria, B.C., with a capital of $10,000, to carry on business at Vancouver, B.C.

Munitions and Machinery Co. has been incorporated with a capital of $100,000, to manufacture munitions at Sorel, Que.

The Canadian Meter Co. has been incorporated at Ottawa, with a capital of $200,000, to manufacture meters of every description, also all kinds of measuring devices for water, gas and electricity, etc. Head office is at Hamilton, Ont.

The Chalmers Motor Co., of Canada, Ltd., has been incorporated at Ottawa, with a capital of $100,000, to manufac-

ture motor cars at Windsor, Ont. Incorporators: Hugh Chalmers, Clarence A. Pfeffer and S. H. Humphrey, all of Detroit, Mich.

Canadian Steelwork, Ltd., has been incorporated at Ottawa, with a capital of $5,000, to manufacture structural steel, etc., at Welland, Ont. Incorporators are: R. W. Knight and J. A. Cowan, of Welland, Ont.; also F. R. Schneider, of of Pittsburgh, Pa.

Wilson Munitions, Ltd., has been incorporated at Ottawa, with a capital of $50,000, to carry on business as mechanical engineers and build all kinds of machinery and munitions. The head office is at Toronto.

Western Canada Notes

F. C. Carmen is travelling in Western Canada in the interests of the Interstate Novelty Co., Toronto, and the Cauada Dry Cell Co., Winnipeg.

Chas. Wood, sec.-treasurer of the Prairie City Oil Co., Ltd., Somerset Block, Winnipeg, has been at the Pacific Coast for a vacation, staying there several weeks.

L. R. Baker, manager of Canada Dry Cells, Ltd., Winnipeg, who has been with Mrs. Baker on a business and pleasure trip throughout the East for the past month, has returned to Winnipeg.

The 1916 directory for Winnipeg issued last week shows that there are 45 people in that city who were in the directory 45 years ago. Among the names noticed is that of J. H. Ashdown of the J. H. Ashdown Hardware Co.

Beatty Bros. who have an office in Winnipeg, sent their western travellers for a convention to be held at head quarters in Fergus, Ont. Those present from the West were Alfred Wylie, W. A. Johnson, Winnipeg; W. J. Calvert, Russell, Man.; E. V. Wigle, Moose Jaw, Sask.; C. J. Ottman, Saskatoon, Sask.; and J. K. Craig, Calgary.

Personal

D. Mistele, hardware merchant, Rodney, Ont., while taking stock last week had the misfortune to have a heavy case of galvanized iron fall on him, breaking two bones in his left leg below the knee.

J. C. Love, of the Love Hardware Co., London, Ont., underwent an operation in a Hamilton hospital this week.

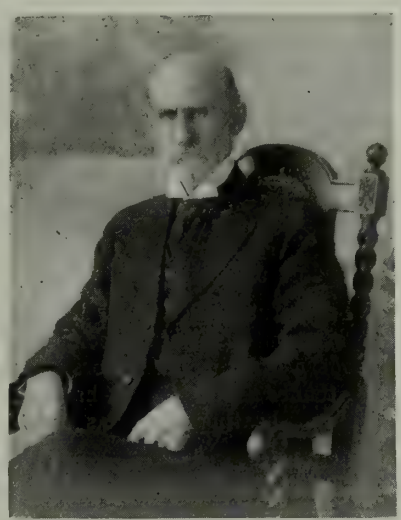
Dave Crothers, for the past year with J. A. Brownlee & Co., London, Ont., and prior to that time with the Geo. Taylor Hardware Co., Cochrane, has been appointed manager of Harry Parson's new hardware store at Orillia.

J. H. Plummer for the past six years president of the Dominion Steel Corporation has retired from the active management of the company in order to take an extended holiday in Europe for the benefit of his health.

Mark Workman, a prominent financier of Montreal, Que., has been appointed president of the Dominion Steel Corporation in succession to J. H. Plummer who has resigned.

L. M. White, manager of the accessory department of Wood, Vallance & Leggat, Vancouver, was in Winnipeg last week conferring with the manager of the auto accessory department there regarding plans for the coming year.

Major J. C. Gillespie, formerly buyer for Wood, Vallance, Ltd., Winnipeg, and one of the best known hardwaremen in Western Canada, has been home on leave from Shorncliffe, England, and



WILLIAM P. MILLAR

Manager Winnipeg Branch The James Smart Mfg. Co.

is assisting Colonel Cantile in mobilizing the new 179th Battalion.

W. F. Bilger, for a number of years connected with the advertising department of the T. Eaton Company will undertake the duties of advertising manager of the Canadian Consolidated Rubber company, succeeding R. W. Ashcroft who takes a similar position with the United States Rubber company.

NEW COLT OFFICIALS

Samuel M. Stone was elected a vice-president and Harold D. Fairweather was appointed assistant treasurer of the Colt's Patent Fire Arms Manufacturing Company at the January meeting of the directors.

Mr. Stone has been sales manager for the Company for a long period. By his election the Company has three vice-presidents. Colonel William C. Skinner is first vice-president and chairman of the board of directors and Frank C. Nichols is also a vice-president.

Mr. Fairweather has been connected with the Company's bookkeeping department for several years.

HARDWAREMAN TAKES OLD CARS IN EXCHANGE

Motor car accessories are becoming more and more hardware lines. The garage, the car owner finds, is not always the most advantageous place to deal and that the hardware merchant supplies his needs to a nicety. The automobile is also being successfully handled by the same men. W. Walker & Son, hardware merchants, Yonge St., Toronto, for instance, are dealing both in motor cars and accessories. Their choice of cars being two popular low-priced motors.

Though the automobile season has not yet opened, Walkers have met with considerable success with this enterprise, and have already placed several cars this year.

One of the main features of selling cars is that the purchaser will naturally start buying his oils, greases, gasoline, tools, etc., from the same merchant, creating almost daily business for the hardware man.

The method used by some merchants to secure prospective automobile buyers is to find out who are trying to dispose of old cars. Invariably these people are selling with the object of getting a more up-to-date motor. A sale is often effected by helping the prospective buyer to dispose of his present machine or to buy it from him, allowing the figure agreed upon to apply on the purchase price of the new automobile. This plan is followed by Walkers and they state it has been found to be very successful.

CATALOGUES AND BOOKLETS

Issued Calendar

The Dominion Gypsum Co., Ltd., 510 Electric Railway Chambers, Winnipeg, put out a handsome calendar the beginning of the year, which they would be glad to forward to anyone interested in wall plaster, lime or cement.

F. E. Myers & Bro. Calendar

F. E. Myers & Bro., Ashland, Ohio, have issued a 1916 calendar. As in previous years, the calendar, in poster style, features the products of the company, and can be used as a ready reference. Hardwaremen who have not yet received the calendar will be supplied upon request.

Convention Programme Announced

Many Important Matters to be Dealt With—All Have an Important Bearing on Hardware Trade—Price Maintenance and Price-Cutting Tactics Will be Discussed Freely

THE program for the Ontario Retail Hardware and Stove Dealers' Association to be held in Toronto on Feb. 22, 23 and 24, is announced in a panel in this issue.

Reference to the program indicates that a number of questions of considerable importance to the retail hardware trade will be discussed by the members of the association. In addition to the subjects referred to in the program there will be many others taken up at the question box sessions. A good question box session is one of the most interesting and practical features of a hardware convention.

Discussion of Price Maintenance

The question of price maintenance, and how to avoid the cutting of prices below the legitimate profit line, is a subject that will create a great deal of interest among all present at the convention.

"Price maintenance" is always a real live subject when it is being discussed by retailers. Price-cutting below the legitimate profit line is one of the evils of the retail business, and any preventive measures which may be instituted will prove helpful to the retail trade in general. Only by getting together and co-operating can the retailers hope to rid themselves of the price cutting evil. The low prices quoted by mail order houses, and department stores for leaders, will also be discussed and remedies suggested for overcoming this class of undesirable competition.

Consideration of Firearms Legislation

The law at present prohibits the sale of revolvers or air guns to all except those who have secured a permit from a duly authorized officer of the peace. Some retailers feel that the present law is unfair, while others support the law. The question will be threshed out at the convention.

Workmen's Compensation Act

The working of the Workmen's Compensation Act in relation to members of the hardware association, will also be taken up in detail. At last year's convention an official of the Workmen's Compensation Commission addressed the convention and explained the workings of the Act.

Hardware and Metal announced two weeks ago that there would be in the near future a reduction in the rates charged in connection with the Workmen's Compensation Act. This news was welcomed by a great many retail hardware firms who come under the provisions of the Act.

Question Box for Associate Members

The question box session for associate members, on Wednesday evening, should prove one of the livest sessions of the convention. Since the last convention a large number of travelers have joined as associate members of the association, and they will have an opportunity of taking part in the discussion on Wednesday evening.

Tenders on Hardware, Etc.

In the near future Secretary Macpherson will send out plans and specifications for a modern dwelling. Members will be asked to tender seperately, on hardware, tinsmithing, heating, etc., as per the sample specifications. The tenders will be opened at the morning meeting on Thursday, and there will in all probability, be considerable difference in the prices quoted by various members. This feature should be one of the most interesting of the many to be taken up at the convention. The idea of asking for tenders, was carried out in a small way at last year's convention, and proved so interesting that the officers of the association decided to take the subject up in a large way at the 1916 meeting.

Plans and specifications will be prepared in such a manner that there should be no confusion over the grades or numbers of the items on which prices are called for.

Proper Installation of Hot Air Heating

The discussion on how to properly instal hot air heating systems, should bring out many new ideas of inestimable value to all retailers who instal heating

King Edward Hotel, Toronto, Conven tion Headquarters on Feb. 22, 23. 24.

systems. The question is one that will interest many members of the association. "How to prepare estimates for the installation of heating systems," is another subject that will be followed with interest by all retailers interested in the heating business.

Increasing Trade Through Parcel Post

Ways and means to make the parcel post of more use to retailers in increasing their trade will be discussed at the Thursday morning session. Some members of the association have tried a number of times to secure business by using the parcel post. They will probably relate their experiences at this session.

Increasing Service to Members

The additions to the "Service to Members," during the past year, have been favorably received by the trade. It is proposed to introduce a number of new features and it is expected that members attending the convention will have a number of good suggestions to offer.

Special arrangements will be made with the railways for transportation. Details will be announced in the very near future.

PROPOSED MAIL ORDER TAX

(Continued from page 33.)

We recognize that our members should be assisted in the adoption of up-to-date business methods, and that our associations should go as far as possible in assisting them to finding the best possible market in which to buy their goods.

While efficiency is a favorite term used by the wholesaler in telling the retailer how he should conduct his business, nevertheless we think that after he has started on equal terms with the mail order house, as to taxation, he will find that the cost of the goods will be a very important factor in determining just how well he will be able to meet competition.

I invite any suggestions that you may have to offer in handling this great question.

J. H. CURLE.
Secretary.

DISCARDED CREDIT SYSTEM

Red Deer, Alta.—The Day Hardware Co., is swinging into line on the strictly cash basis. The trend of modern business methods demands the elimination of all sources of waste and inefficiency, and the Day Hardware Co. believe that the credit system is one prolific cause of increasing the high cost of living.

Hardware Convention Program

The eleventh annual convention of the Ontario Retail Hardware and Stove Dealers' Association will be held at the King Edward Hotel, Toronto, on Tuesday, Wednesday and Thursday, February 22, 23, 24. The program follows:

(TUESDAY)

1 P.M.
Meeting of Advisory Board.

7 P.M.
Meeting of Executive Committee and Appointment of Convention Committees.
Reception and Registration of Members

(WEDNESDAY)

9 A. M.
Registration of Members and Distribution of Badges in Convention Offices—Second Floor King Edward Hotel.

10 A. M.
Opening Session of Convention in Banquet Hall—King Edward Hotel—Open to Members and Associate Members.
Reception of Visitors to Convention Including Honorary Members and Trade Representatives. Short Addresses.
President's Address.
Report of Executive and Advisory Committees.
Secretary's Report.
Treasurer's and Auditors' Reports.

2 P. M.
Members' Meeting—Report of Secretary on "Service to Members"—Discussion as to Extension and Improvements in Service.
Discussion on Price Maintenance and how to avoid cutting of prices below legitimate profit line.
Consideration of present law regarding sale of firearms and ammunition, and it's effect on the hardware dealer.
Consideration of working of Workmen's Compensation Act in Relation to our members.
Receiving Reports of Committees.

8 P. M.
To be devoted to Question Box, and consideration of Trade Problems—Open to Travellers and Associate Members. (Free and Easy.)

(THURSDAY)

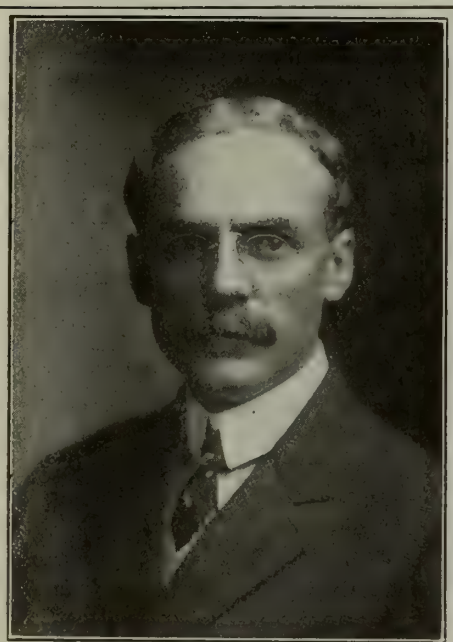
9 A. M.
Receiving Reports of Committees—Consideration of Tenders on Hardware, Tinsmithing and Heating as per sample specifications furnished, and discussion on same.
Discussion on Proper System of Installation of Hot Air Heating Systems—and how to prepare estimates for same.
Consideration of Methods to Increase Trade Through use of Parcel Post.
Question Box Session.

(THURSDAY)

2 P. M.
Election of Officers.
New Business.
Question Box.

The Martin-Senour Company, Limited, enter upon a new era of progress and expansion

General view of Montreal Paint and Varnish Plants of the Martin-Senour Co., Limited.



Z. E. MARTIN
President of the Martin-Senour Co., Limited

Mr. Martin is Canadian-born, his parents being United Empire Loyalists who migrated to Canada at the time of the American Revolution, locating near Knowlton, Que., where Mr. Martin was born and lived on a farm until eighteen years of age.

After graduating from Knowlton Academy he went to Chicago, and there joined the Sales Staff of the Company which was then known as the Senour Mfg. Co.

This was the beginning of a successful career in the paint business, and his sterling worth brought him rapid advancement from salesman to sales manager, to vice-president, and finally to president of the company, which then became known as The Martin-Senour Co.

Under his able direction the company made wonderful progress, and when looking for new fields to conquer, he naturally turned to the place of his birth, creating The Martin-Senour Co., Limited, of Canada, a venture which has since been crowned with signal success.

Mr. Martin is thoroughly versed in every department of the business. He is Past President of The Paint Manufacturers Association of the United States, and his large acquaintance with the Paint trade extends from coast to coast. He has many close friends in and out of the Trade, and a warm spot in his big heart for his native country, the Dominion of Canada.

A Ten-Year Résumé of Wonderful Development of a Splendid Canadian Paint and Varnish Industry

IT is just ten years ago that the Martin-Senour Co., Limited, broke ground in Canada, and at that time the most optimistic could scarcely have foreseen the wonderful progress and development which has taken place during this short decade of years.

The Martin-Senour Co. had previous to that period occupied a prominent place among the leading manufacturers of paints and varnishes in the United States. Mr. Z. E. Martin, the president of the company, under whose direction the company had made marked progress, being a Canadian by birth, naturally turned his eyes to his native country for new fields to conquer. In January, 1906, the Canadian company was organized, and the business of the Wm. Hill Co., of Montreal, jobbers and retailers of paints and painters' supplies, was purchased. Mr. Hill's connec-

W. H. GERKE
Vice-President and Managing Director of the Martin-Senour Co., Limited

Mr. W. H. Gerke has the ideal requirements for the position he fills, and the special brand of paint knowledge which he possesses has been gained from years of actual experience among the mills and the mixers, the color room and laboratory of a paint factory.

Twenty-six years ago he started at the bottom of the ladder in the factory of The Senour Mfg. Co., Chicago—a lad with a big ideal and a determination to win. He gradually worked his way through every department, and endeavouring to master every detail of the business, he studied Chemistry and the scientific side of paint making at Night Courses at the Lewis Institute of Technology, from which he graduated.

Later he became Foreman in the various departments, and finally Superintendent over the entire Chicago Factory, and was sent to Montreal to organize the Martin-Senour Co., Limited, which was done in such a thorough manner that he was given the full management of the Canadian business.

The splendid past and still more promising future of this Organization is a monument to his ability and business acumen.

Mr. Gerke was born and reared in the City of Chicago, and has become a naturalized Canadian since associating himself with his Company's interests here. He is thoroughly likeable and well liked, having a host of friends in and out of the trade.

One of the rows of mills of the most modern type where the paint pigment is ground to impalpable fineness.

tion with the paint industry of Eastern Canada is well known and dates back to the early sixties, when paints were prepared by means of a hand muller as they were required on the job. Liquid or prepared paints were in those days almost unknown. Mr. Hill retained active interest in the Martin-Senour Company, and only retired in August of last year after a long and honored business career.

After disposing of the stock and assets of the Wm. Hill Co., the Martin-Senour Co., Limited, established a factory located on Inspector Street, Montreal, where the manufacture of the principal lines was carried on, and those on which the sale was limited were for the time being imported into Canada from the Chicago factory. In July, 1909, these premises were found to be too small, and the factory was moved to larger quarters at Mount Royal Avenue and Drolet Street, where about double the old floor space was available. Here the manufacture of the complete line of Martin-Senour paints, stains, enamels, fillers, etc., was carried on. Since that time on, all the products of the company have been "Made in Canada." In March, 1910, the opening was announced of a branch warehouse at Toronto, situated at 215 Victoria Street, where a large stock of goods could be carried at all seasons to adequately serve a fast growing Ontario trade. In 1912 the assets of the Maritime Paint and Varnish Co., of Halifax, who were then jobbing Martin-Senour products, were purchased, and the business is now conducted as a branch distributing warehouse for the Maritime Provinces and Newfoundland. In the same year about an acre of ground was purchased and a new and up-to-date varnish factory was immediately erected. In 1913, owing to the tremendous growth of the business west of Fort William, a factory was erected in the City of Winnipeg, in order to relieve the Montreal plant, which was being worked to its capacity limit, and also enabling the company to render better service to the dealer agents in the Prairie Provinces.

In 1914, just prior to the beginning of the war, plans were completed for the erection of an entirely new and up-to-date paint factory at Greenshields Avenue and Beaumont Street, on the site of the varnish factory. Despite the war and the unsettled conditions and business uncertainty, these plans were gone ahead with, and a few months ago the company moved into their fine, new, modern manufacturing home, where the floor space is more than double that of the two factories previously occupied. The situation is ideal, train sidings running right to the buildings, where raw materials can be brought in with the minimum amount of handling and car lots loaded out with despatch for distribution.

The new plant is a modern, fire-proof structure of cement, brick and mill construction, and is equipped with the most modern paint-making machinery. Every facility for the successful carrying on of the immense business the company now

Sectional view of the Tinting Department, showing some of the tanks used for mixing the various shades required.

Store room and Packing Department, where thousands of gallons of manufactured products are kept ready for prompt shipment.

J. A. NAUD

Mr. J. A. Naud has had a long and successful experience in the Paint business in Canada, having been Manager of the Wm. Hill Co. before its absorption by The Martin-Senour Co., Limited. He took an active part in the organization of the latter Company here, and is the pioneer of the Canadian Staff. To Mr. Naud's energy and aggressiveness must go a large share of the credit for the splendid position the company now occupies in the Paint and Varnish field.

Being a native of the good old Province of Quebec, his attention has been particularly directed to the development of the business in Montreal City and vicinity and his home Province. Mr. Naud is a hustler who never ceases to hustle. His enthusiasm is infectious, and Dealer Agents and their employees who have the pleasure of his acquaintance certainly benefit from his aggressive example.

Mr. Naud is a strong co-operator with the extensive trade he comes in contact with, and is well known and favorably thought of by his many friends, who wish for him all the good things he so richly deserves.

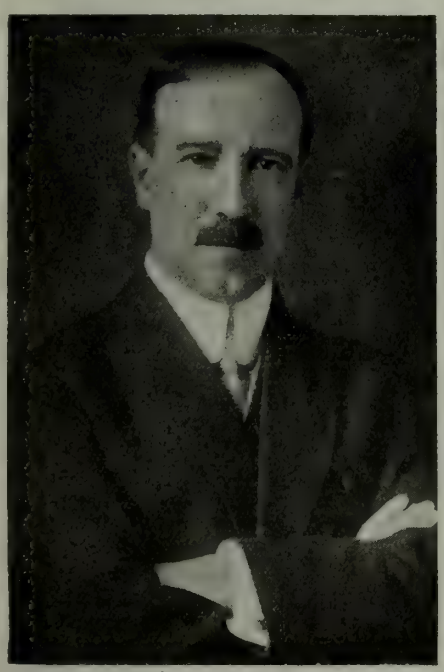
controls is here in operation. Each department is in charge of experts, who through years of experience and scientific training are enabled to turn out products, each guaranteed to best serve the purpose for which they are made. This absolute and unfaltering policy to produce the highest quality possible in each and every product largely accounts for the success the company has attained and the placing of Martin-Senour products first in the esteem of the Canadian paint consumer.

The Martin-Senour Co. were the pioneers in Pure Paint making in the United States and Canada, and 100% Pure has become a household word. To-day Martin-Senour products are sold in almost every city, town, village and rural community from the Atlantic to the Pacific, by thousands of satisfied dealer-agents, who find pleasure and profit in handling the line. Many of them count the exclusive agency for these products to be one of the most valuable assets of their business, and feel that by having people attracted to their store for Martin-Senour goods it has meant increased trade in all their other lines. They have found 100% Pure Paint to be the one paint good enough to be in demand in lage sizes, and large quantities, for large jobs, thus displacing the unprofitable sales of lead and oil. On account of its great spreading and wearing qualities, it has been standardized for use by many of the largest paint consumers and users in the country, and is specified by architects for highest class work.

Fast following 100% Pure in favor comes such products as Senours Floor Paint, which is known as the oldest and most reliable floor paint on the market. Neu-Tone, the beautiful flat interior finish

Partial view of Lead and Putty Department, where immense chasers turn out many tons daily.

A row of ageing tanks in the varnish plant where high-grade varnishes are stored.



A. T. BLACK

A. T. Black is eminently fitted for the position which he holds as Manager of the Sales Promotion Department of the Martin-Senour Co., Limited. This embraces the supervision of the sales and advertising departments.

Those of the Martin-Senour Dealer Agents who are personally acquainted with Mr. Black are fully aware of his earnestness and sincerity, and of the fact that his efforts are untiring in their behalf. Although his occupation of the position has only extended over about two years, his previous experience on the travelling staff of the company has made him well acquainted with those various forms of publicity and sales help which are of the greatest value to the Dealer Agent.

Previous to his connection with the Martin-Senour Co., Mr. Black held an important position with the Bond Hardware Company, of Guelph, Ont. The experience he gained while engaged in the capacity of a retailer is now of immense value to him in solving the problems of retailing paint and in working up plans whereby the sales of Martin-Senour products will be increased and the Dealer Agent benefited.

Mr. Black's department is maintained mainly with the object of increasing sales not to but through the Dealer Agent. The co-operation of this department is perhaps the most important feature of the Martin-Senour Agency, excluding, of course, the quality and completeness of the line.

with the soft, velvety effect so pleasing and restful to the eye. Martin's White Enamel, (the Enamel de Luxe.) Wood-Lac, the stain of fame. Concre-Tone a product which is springing prominently into use for decorating and protecting brick, cement and stucco buildings inside and outside. Red School House Paint, for Barns and outbuildings. Marble-Ite the floor finish with the money back guarantee, which dries with bone-line hardness and will not scratch white under the hardest wear.

These are but a few of the leading lines manufactured.

The Martin-Senour Co. also manufacture a full line of Marine and Submarine Paints, Varnishes and Compositions. Bredell's Compositions which are used by the largest navies and steamship companies in the world are manufactured exclusively in Canada by the Martin-Senour Co.

Already, this fine new manufacturing plant is being found none too large and every inch of room is being utilized to keep up the supply for an ever increasing demand on all these and other high class products.

Quality in products has been the first essential, but in support of this quality the Martin-Senour Co. have been most aggressive and consistent advertisers. Sales Promotion work of the strongest kind is in operation to make the Martin-Senour line the easiest and most profitable for the dealer agent to sell. It has been particularly noticeable during the past year when many manufacturers have curtailed their advertising, sales help and co-operation to such an extent as to almost handicap the dealer, that Martin-Senour paints and varnishes were more strongly advertised than ever

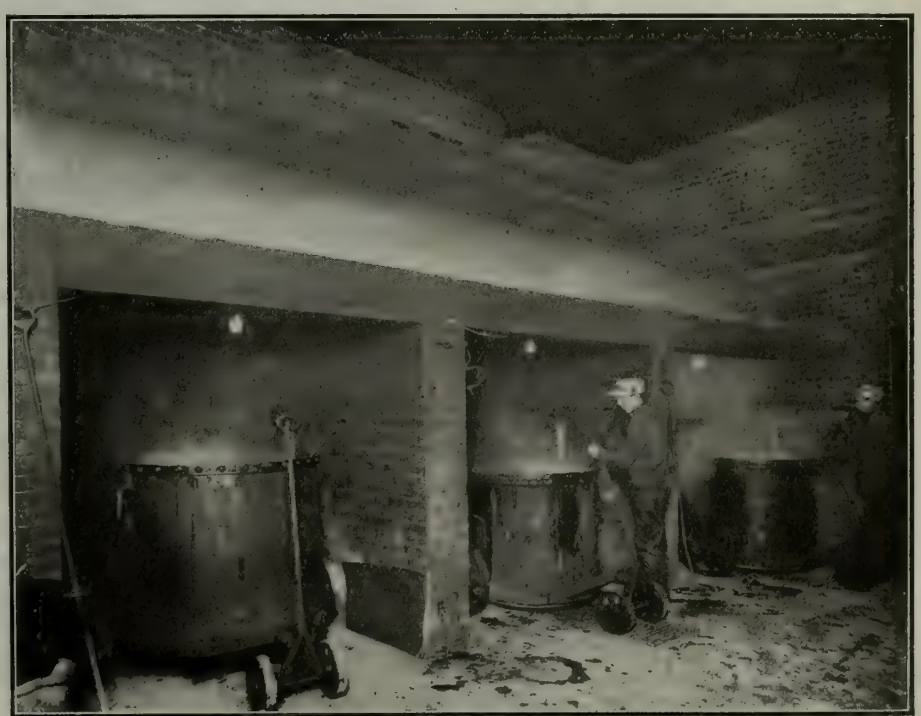


Illustration shows an interesting process. Some of the fires and kettles where varnish gums are cooked.

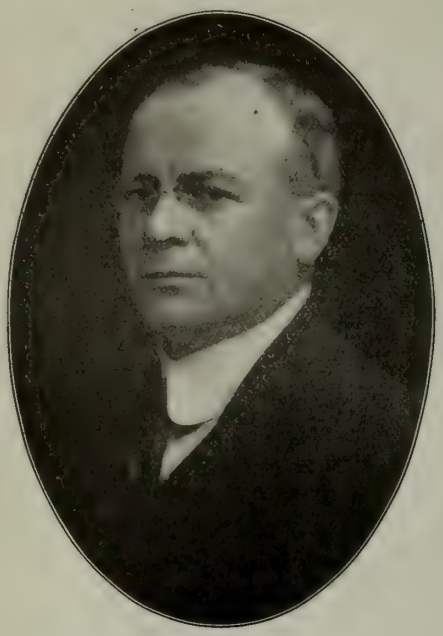

J. H. CONOVER
Toronto Branch Manager

Mr. J. H. Conover is one of the stalwarts of the Canadian Paint and Varnish trade. He is Canadian-born and is especially well known in Ontario, where a myriad of friends hold him in the highest esteem.

Before associating himself with the Martin-Senour Co. he was engaged in the hardware business at Leamington, Ont., being an active member of the successful firm of Greenhill & Conover. The lure of the Paint game appealed to him, and he was one of the first men to join the M.-S. ranks in Canada. To him must go the credit of blazing the trail and being a great factor in establishing the splendid connection which this firm has gained in the Province of Ontario.

His early experience and close connection with the trade fit him admirably for the important position he now occupies. His counsel and advice in matters relative to the paint and varnish business is always appreciated by customers, who place implicit faith and confidence in him. In supervising the Ontario business of the company, Mr. Conover has under him an energetic staff of salesmen who find in him a continuous source of inspiration.

He is a big man, with a big heart, who fully deserves the good-will shown him by friends and co-workers.

before. A message of quality and service was circulated through the largest list of newspapers, magazines, farm and religious journals ever used by a paint firm in Canada. Nearly every paint user read this message, and the Martin-Senour dealer-agent reaped the benefit.

Martin-Senour sales help and co-operation is the strongest, consisting of the most effective features of interior and exterior displays, mailing campaigns, follow-up systems, and direct help of salesmen. This policy will not be curtailed. It will be continued and strengthened.

Dealer-agents are urgently requested to take the fullest advantage of the help offered by the Sales Promotion Dept. by suplying the names of property owners, house holders, or prospective paint users resident in their community, and nothing is left undone to interest these parties in Martin-Senour products in such a way as to direct them to the store where the goods can be procured.

Martin-Senour Advertising is characterized by its absolute truthfulness, presented in such dignified and attractive form as to bring results.

To this policy which has, and is being so faithfully and persistently pursued of producing the highest quality goods and rendering the most efficient service, can be ascribed the enviable reputation which the firm enjoys.

The company maintains a complete and up-to-date printing plant, where all the labels, color cards, folders, booklets and other publicity materials are produced.

The whole organization is a credit to the paint and varnish trade in Canada, and one in which the management, the factory and sales staffs, and last, but not least, the army of dealer-agents, who have so largely contributed to the company's success, together with the larger army of consumers who have made 100% Pure their standard, may all feel proud.

W. P. WALSH
Halifax Branch Manager

Mr. W. P. Walsh, who has lately been promoted to the position of manager of the Halifax Branch of The Martin-Senour Co., Ltd., with supervision of the Maritime Provinces business, is one of the company's oldest Canadian employees in years of service. He is a Canadian of Irish descent, and his ready adaptability to perform well any task laid to his charge has made him a valuable member of the sales organization. At different times he has been engaged in Martin-Senour pioneer and special service work in every one of the Provinces in the Dominion, thus gaining a wide experience and splendid conception of the Canadian trade generally. For the past few years Mr. Walsh has represented the company in New Brunswick and P. E. I. territory, and he is well known and highly respected by a large coterie of friends who are glad to learn of his promotion to a position of greater responsibility. Years of faithful service have made Mr. Walsh deserving of this advancement, and there is no doubt that in his new capacity his energy and aggressiveness will result in further advancing The Martin-Senour cause. He will have a large family of dealer agents under his care who can count on his best co-operation at any and all times.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

The Markets at a Glance

The volume of business transacted by most hardware wholesalers during January was far in excess of that of the corresponding month of last year. Some wholesalers report increases ranging from 50 to 60%. February business during the first week of the month has been exceptionally brisk, despite the high prices which are being asked for many lines of hardware. Iron and steel products still continue to advance. Among the many lines which have advanced in price during the week are copper bars and sheets, tire bolts, chilled shot, wire nails, cut nails, brass machine screws, candle wick, smooth steel wire, shoe findings, hay wire, brass wire, Manila and sisal rope, sisal clothes line, cotton rope and clothes line, soldering irons, Jenkins' valves, screen doors and windows, cow bells, copper ware, white lead in oil, dry white and red lead, and cutlery. Linseed oil has declined sharply at Toronto. Many further advances on hardware lines are predicted for the near future. Retailers are booking freely on many lines for later delivery. The announcement last week that higher prices had been decided upon by paint manufacturers, to go into effect on March 1, has stimulated buying, and many retailers who had been holding back their spring paint orders have covered themselves against the higher prices which are expected.

MONTREAL

MONTREAL, Feb. 4.—That last month was one of the best Januarys in the hardware trade in years, and an emphatic improvement on 1915 is to be concluded from the reports of the different wholesale houses in this city. Some departments have found a strong activity and others have done little but the general results have been very satisfactory. Not only has there been a brisk movement of general staple lines, indicating a shortage on retailers shelves and more confidence in the future, but there has been very heavy booking of heavy goods under the incentive of activity increasing prices. The month end saw somewhat less activity in this connection but this was not considered an unfavorable indication as wholesalers are not generally encouraging buying beyond reasonable prospective requirements because prices, although continuing their upward movement, are already abnormally high.

The week has seen no improvement in the situation as regards products and manufactures of iron, steel, brass and copper goods have also been active. The outlook is for continued price adjustments to higher levels until there is assurance of future supplies but the buying movement has slowed up somewhat as was to be expected considering the prices and advances are not likely to be so rapid as during the recent period when the trade was protecting itself.

Many Price Changes.—Advances for the week include tank plates, copper bars and sheets, tire bolts, chilled shot, wire nails, cut nails, brass machine screws, smooth steel wire, shoe findings, hay wire, brass wire, Manila and sisal rope, sisal clothes line, cotton rope and clothes line, soldering irons, Jenkins valves, screen doors and window screens, candle wick, cow bells, copper ware, etc. A new pipe list covers special quotations for Montreal. Higher prices are being predicted for steel plates and sheets, boiler plates and boiler tubes.

Tin Steady and Firm.—Tin continues steady and firm on the local market. The tendency to raise quotations referred to in last report as the result of the action of the American market, has been offset to some extent by a decline of about half a cent in New York. The latter market at late reports was showing a stronger tendency again on London influences but while these have broughtout some small business the larger consumers showed a disposition to stay out until there was some other explanation for the strength than statistics which would seem to indicate lower levels. Montreal quotation: 46½c-47c—firm.

Spelter Continues Steady.—The spelter situation continues comparatively steady on the advance of 1c reported last week. The American markets at last report indicated a fractional decline, but this ended in a reaction to firmness on reports of business from England and France. New York reports that domestic consumers have recently shown very little interest. Both dealers and producers are inclined to be shy as sellers but this has not resulted in very much interest on the part of buyers. Montreal quotation: 23c-23½c—steady.

Copper is Still Strong.—Although the general quotation for copper is still maintained without change, the strength of last week has been emphasized locally following the advances in American markets. New York quotations indicate that these advances have been maintained although the future is unsettled. On one hand producers offer no tonnage this side of April and are asking as high as 26c while there are lots turning up on the market from time to time which are changing hands about ¾c under this price. Montreal quotation: 27c-27½c—strong.

Lead Strong on Advance.—Lead is very strong on the advance of last week, and the higher prices have been well maintained. The situation in the United States indicates some unusual developments. Whereas last week the Trust quotation of 6.10c was being followed by the outsiders for both spot and futures, there is now a price of 10c above this figure for immediate delivery and on the other hand a decline below it of 5c on February delivery. Montreal quotation: 8¼c-8½c—strong.

Antimony Firm.—The market for antimony continues firm at the former quotation. The local situation is very quiet and there are no indications of important changes; however, New York reports another advance, making 1c for the past fortnight. In the American market there has recently been heavy buying after a period of dullness. Supplies for immediate shipment are described as being very scarce. Montreal quotation: 45c—strong.

Zinc and Aluminum.—A price feature of the metals market this week is sheet zinc which has been advanced 1½c on the recent quotations. The present figures are 29c for casks and 29½c for part casks; supplies are short. Aluminum remains nominally at 68c with a very restricted movement.

Solder is Steady.—There is practically nothing new in the solder situation and the former quotations are being maintained on a steady basis with the usual broad spread in prices according to proportions of the ingredients. Montreal quotations: Commercial half-and-half 27c-28c; Strictly half-and-half 29c-30c.

The Steel Situation.—There is practically no change in the situation as regards steel and iron products. The outlook as regards supplies is not improved and the exhaustion of stocks promises

a continuation of the advancing prices. However, it has been noted that the heavy buying and the rising prices, together with prospects of curbed consumption of some lines, has worked the natural effect of checking the volume of the movement and at the same time the rapidity of the advances. Nails and wire have again gone up and higher prices for sheets, tubes and plates are predicted within the week, but for the most part the advances of the week have been confined to the higher manufacturers of steel, iron and other metals.

Black Sheets to Advance.—On good authority the prediction is made that that there will be another advance on black sheets and that it will come very shortly, possibly within the week. This will be the result of the general shortage of stocks of steel products. The quotations given are, therefore, very firm. The situation is somewhat unsettled so far as prices are concerned, owing to the fact that quotations as between different firms are inclined to vary somewhat on different gauges; this is the result of the shortage of stocks and efforts to conserve certain sizes.

Plates Going Up.—Canada plates are also likely to be again involved in the upward movement of steel prolucts and this would include both bright and galvanized and galvanized sheets as well. Canada plates are now quoted at $4.00 for ordinary and $5.00 for all bright and these prices are very firm with a general shortage of supplies.

The New Prices on Pipe.—The new quotations on black and galvanized wrought iron pipe have been finally adjusted to the Montreal basis. It should be emphasised in this connection that formerly the prices covered both Ontario centres and Montreal but there has now been a departure made and there are Eastern and Western lists. The Eastern list is as follows:

Buttweld Size	per 100 feet Black	Galv.
¼ in. and ⅜ in.	$ 2 46	$ 4 17
½ in.	3 06	4 80
¾ in.	3 57	5 92

10 in.x32 lbs. per ft.	121 60	193 60
10 in.r40 lbs. per ft.	156 60	249 30

Tubes and Plates.—From a reliable source the information is obtained that higher prices on boiler tubes and plates from stock are under consideration and that there will be advances in the near future, probably within the next week. The prices on these lines have already been increased several times since the upward movement of iron and steel products commenced and dealers state that

Montreal, Toronto, Hamilton, Galt, Morrisburg, Quebec, Berlin.

Freight Allowance:

Actual freight not exceeding 25c per 100 lbs. on shipments of 200 lbs. or over allowed from Montreal, Toronto, Hamilton and Galt.

the prospects are that there will be further increases as the stocks on hand become exhausted and deliveries of new supplies cannot be secured. Tank plates, 3-16 inch are this week advanced from $3.20 to $3.25.

Copper Products Higher.—Important advances have been made on the prices being charged for copper products—bars and sheets. These are following the general movement of the copper market. The new and old quotations are as follows:

	old	new
Bars, ½ to 2 in.	$35 00	$41 00
Plain sheets, 14 oz., 14x28 in., 14x60 in.	36 75	44 00
Copper sheet, tinned, 14x60, 14 oz.	43 50	46 00
Copper sheet, planished, 14x60 base	47 00	54 50
Braziers' in sheets, 6x4 base	35 00	43 00

Tire Bolts Higher.—An advance on tire bolts is covered by the announcement from the mills this week of a change in the discount; the allowance is now 65 per cent. as compared with 72½ per cent. formerly.

Chilled Shot Extra.—An advance on chilled shot is covered by the announcement that the extra price above the $10.90 Montreal quotation will be $1.50. The extra on chilled was formerly $1.25.

Wire Nails Up Again.—An increase in the price of wire products forecast last week following another advance on wire in the United States takes the Montreal quotation 10c higher—to $3.20.

Big Advance of Cut Nails.—An important change in connection with cut nails has also been made this week. The old quotation of $2.90 has been changed to $3.10, an increase of 20c.

Brass Machine Screws.—New discounts on brass machine screws have been announced to cover a considerable advance. This follows the general upward movement of raw material. The discount on flat and round head is now 12½ per cent. as compared with 30 per cent. and on Fillister head 5 per cent. instead of 25 per cent.

Wire Base Advances.—The increase in wire prices is noted in the advance of the base for smooth steel wire by 15c to $3.30 for No. 0-9 gauge. Principal extras are as follows:

No. 10 gauge, 6c extra, No. 11 gauge, 12c extra; No. 12 gauge, 30c extra; No. 13 gauge, 30c extra; No. 14 gauge, 40c extra; No. 15 gauge, 55c extra; No. 16 gauge, 70c extra.

New Shoefinders' List.—A new shoefinders' list has been issued by the mills and went into effect on the 1st of February. It covers shoe rivets, heel or shoe nails, hob and Hungarian nails, channel nails, tacks and shoe tacks. Reference to the changes will be found elsewhere.

Hay Wire Up Again.—Annealed hay wire is affected by the further advance on wire products. The increase is 10c and the new quotations are as follows: No. 13, $3.30; No. 14, $3.35; and No. 15, $3.45.

Brass Wire Goes Up.—Another material advance on the different sizes of brass wire has gone into effect, being a result of the general upward movement of brass manufactures. The new quotations are: Nos. 4-8, 55c; Nos. 9-11, 56c; Nos. 12-14, 57c; Nos. 15-16, 58c; Nos. 17-18, 59c; Nos. 19-20, 61½c; Nos. 21-22, 63c; No. 23, 65c; No. 24, 70c; No. 25, 73c; No. 26, 77c.

Rope at High Level.—With a third advance in a comparatively short time, rope prices have struck a high level. Difficulties in securing raw material are the cause. The new and last quotations are as follows:

	Last	New
Pure Manila basis	18½	20
British Manila basis	15½	16½
African hemp basis	15½	16½
Sisal basis	12½	13½
Single lath yarn basis	12	12½
Double lath yarn	12½	13

Sisal Clothes Line Up.—With the rising prices for sisal there have been advances on the quotations of sisal clothes lines. New figures are as follows:

	3-ply	6-ply
30	.48	
40	.63	
48	.75	1.75
60	.95	1.52
72	1.23	1.84

Cotton Rope.—Higher quotations are also in force on cotton rope, but whether these are the result of higher cost of raw material or in sympathy with other varieties of rope is not evident. Quotations as follows are 1c higher than last:

Cotton rope, 3-16 in. 26c
¼-in. and larger 25c

Cotton Clothes Line Also. — Cotton clothes line is also stronger following the general movement of cotton rope. Advances are not in general effect, but one firm quotes as follows:

30, 93c; 40, $1.15; 48, $1.35; 60, $1.70; 72, $2.05.

Soldering Irons.—With the advance in the copper market comes an advance on soldering coppers. The increase on the wholesale quotations in Montreal is 4c to 5c per pair.

Jenkins' Valves.—There is an advance on Jenkins globe valves which is due to the higher cost of raw materials. The discount is now 37½ per cent. as compered with 40 per cent. formerly.

Screen Doors.—With higher costs for metal screen materials there are advanced quotations being announced on screen doors. One wholesale house reports that prices have gone up about 40c per dozen on window screens and screen doors.

Candle Wick.—With the advances on cotton rope there has been an increase announced on candle wick. A quotation of 27½c per pound is given as compared with 26c formerly.

Cow Bells Higher.—Higher costs of raw materials is having a wide effect on manufactured products as illustrated in the advance on cow bells. The discount is now 52½ per cent. as compared with 55 per cent. formerly.

Copper Ware.—As the result of the strong upward movement of copper there have finally been advances on copper ware. It has been noted for several months that the cost of raw materials has warranted such a course, but manufacturers have evidently taken the course of encouraging demand by keeping prices down. However, there has recently been a revival and a call for goods which has forced the action taken. The discount on copper boilers and kettles, and tea and coffee pots is now 30 per cent. as compared with 40 per cent. Exceptions from the general list are boilers, which are 20 and 10 per cent. and side-opening kettles, which are 25 per cent.

Demand for Utensils.—Manufacturers of kitchen utensils report that there is a demand at the present time for enamel ware and tinware which they can fill with difficulty. The reason appears to be that for some months there was a very small consumption with the result that stocks were exhausted and now that there is a more normal call there is a rush for goods. This condition is emphasized by the fact that copper ware is high in price and galvanized ware so high that it is almost out of the market.

Old Materials.—Advances in quotations for old materials continue, scrap following a lap behind the metals in their recent activity. This week copper, brass, turnings and aluminum are marked up. New quotations follow: Brass, light, 10c lb. copper, heavy, 9c lb.; mach. compos., No. 1, 14½c lb.; compos. turnings, No. 1, 12½c lb.

TORONTO

TORONTO, Ont., Feb. 3.—The situation in the hardware market continues to improve, and the outlook is distinctly encouraging. The volume of business for the month of January was considerably greater than for the corresponding month of last year, some jobbers calculating that the increase was over 60 per cent. better. This is a very satisfactory showing, considering the unusual conditions prevailing in the trade, and is probably accounted for to some extent by a general tendency for many buyers to cover for their requirements earlier in the season than is usual in order to protect themselves against higher prices and the contemplated scarcity of many lines of hardware.

There is no sign of improvement in the raw material situation, and as a result the market is unsettled. There is no indication of any recession in the iron and steel market, prices being very firm, with a decided upward tendency. The ingot metal markets are also very strong, particularly copper, which is very firm at last week's level. The rope market is unusually active, due to the steady increase in cost of raw materials.

Many Price Changes.—The logical result of conditions in the raw material markets and higher values is the steady advance in many lines of hardware. Many important price changes have to be noted this week affecting the following lines: Wire nails, cut nails, tire bolts, cotton rope, pure Manila and British Manila rope, hemp rope, sisal, lath yarns, copper ware. The advance in the base price of smooth steel wire has affected a number of wire products, including cut hay wire, O and A fence wire, wire bale ties, wire cloth, etc. The advance in wire nails has been expected since the last advance went into effect, as wire rods have been steadily increasing in cost. Higher prices for wire products have also been predicted in these columns. Manufacturers are experiencing considerable difficulty in getting raw materials, and cost of same is much higher. A new and revised list of shoe findings has been issued.

Steel Market Strong.—The situation in the iron and steel trade is unchanged, and the market continues very strong. Prices of all steel and iron products have an upward tendency, and a number of hardware lines have been affected, as will have already been noted. There are no indications of any recession in prices, and the conditions prevailing at present will most likely exist during the entire year. The mills are working at capacity, and have enough business booked to keep them busy for months ahead. There has been no change in prices of domestic finished or semi-finished steel this week, but higher prices for some lines have been announced, due to conditions prevailing in outside markets. Chicago warehouse prices for steel bars, plates and shaves have advanced 10c, and bars are now quoted at $2.50, with plates and shapes at $2.60 per 100 lbs. There has been no change in cold-rolled steel shafting, but discounts are purely nominal, as makers say that they have no shafting to sell in the open market for the first half of the year. Quotations on wire rods are also nominal, as makers have their output sold up for some months ahead. Wire rods are being quoted at $45 per ton Pittsburgh.

The steel market in the States continues very strong, and still higher prices on all steel products are expected. The outlook in the trade is very bright, as it is apparent that the mills will operate at full capacity throughout the year; in addition, it is very probable that the present buying movement will continue well into 1917. Steel bars are now being quoted at 2.10c and iron bars at 2.00c f.o.b. Pittsburgh. Prices of billets are firm, but unchanged. A shortage in the supply of ferro-manganese has developed, and buyers are paying all kinds of fancy prices for prompt delivery. The nominal price for ferro-manganese is $125, with no guarantee as to deliveries, but prompt shipments would readily bring $150 per ton.

Pig Iron Quieter.—The market is quieter, but the demand for steel-making grades of pig iron is as strong as ever. There has been some improvement in the demand for foundry iron, but conditions in this regard are below normal. Prices of all brands of pig iron are unchanged.

Coal and Coke.—The situation in the coal and coke trade is unsettled, and prices are advancing. Supplies are very difficult to obtain on account of the congestion of traffic on the railroads and labor shortage at the mines. Prices of Solvay foundry coke have been withdrawn, it being impossible to quote firm prices owing to the conditions prevailing and difficulty of getting shipments. The higher prices have affected soft coal more than anthracite, although the latter has also advanced.

Machine Tools.—The machine tool market is practically normal again, the demand having fallen off considerably as compared with the boom of last year. Fair business is being done in lighter tools for making shell parts, and the demand should improve when the plants for making time fuses are being equipped. Makers of machine tools in the States are raising their prices, and on this account it is difficult to get firm quotations unless for prompt delivery. Owing, however, to the improved domestic demand in the States for machinery, deliveries are still backward, making it difficult to do business. Russian interests are buying heavily in the States, which is also helping to keep the makers busy. A local machinery house has met with considerable success in the States with a special line of machinery.

Old Materials.—Conditions in the market for old materials are unchanged. There is a good demand for scrap copper and lead, and quotations are very firm. Wrought iron and steel scrap are quieter and prices unchanged.

Metals.—The metal markets are steady and prices unchanged, except for antimony, which has advanced. The copper situation is the most interesting feature, as the question of supply and demand has become very important and a scarcity of copper is now likely. The tin situation in New York is easier, as abundant supplies of this metal are coming over, notwithstanding the so-called restrictions placed on the export of tin by the British Government. At one time it was thought that the trade would be inconvenienced, but apparently the expected has not happened. The spelter situation is unchanged, but the high prices are seriously affecting the galvanized sheet trade. The lead market is firm and unchanged. Antimony is higher and prices nominal, while the aluminum situation is unchanged.

Copper.—The market is very strong, but the position is extremely complicated, due to the recent regulations issued by the British Government to fix the price of copper. The position of copper, however, is a very strong one on account of the enormous demand for this metal for munitions. This demand will exist while the war lasts, and the end of the war will probably find the world's supplies of copper practically exhausted, and which will have to be replenished. The heavy demand, therefore, will no doubt continue for some time after the war stops; indications thus point to higher prices. Copper is unchanged and nominal at 27½c per pound.

Tin.—The market is active and prices unchanged. The situation is easier in New York, as considerable supplies of tin are being imported, it being at one time expected that the regulations issued by the British Government would inconvenience the trade. Quotations are unchanged at 46c per pound.

Spelter.—The market is dull and situation unchanged. There is a heavy demand for brass mill spelter, but the price is too high to interest the galvanizing trade. Spelter is quoted at 21c per pound.

Lead.—The market is firm and unchanged. The "Trust" price of 6.10c New York is being firmly held. The lead market in London is weak owing to the announcement that the British Government propose controlling prices to prevent speculation. Locally quotations are unchanged at 8c per pound.

Antimony.—The market is strong and higher. There is a good demand for prompt and early deliveries, but futures are neglected. Antimony has advanced 3c, and is now quoted at 43c per pound.

Aluminum.—The situation is unchanged and market firm. Aluminum is quoted at 68c per pound.

Solder.—Prices are firm and unchanged. Prevailing prices are given in the current market quotations.

Galvanized Sheets Firm.—The galvanized sheet market is very firm, and higher prices may be expected any time. There is no improvement in the situation as regards raw materials, which are steadily rising in price. Some makers of galvanized sheets in the States are practically out of the market owing to the high cost of raw materials.

Wire and Cut Nails Advance.—Wire

nails have advanced 10c and cut nails 20c per keg. Wire nails have been steadily advancing for some months, and even at the present price of $3.15 per keg there is no indication that the top of the market has been reached. The situation is peculiar because, notwithstanding the very light demand, the price keeps going up. The reason, of course, is the cost of wire rods, which have been advancing steadily for some months. It is claimed that stocks of nails made from cheap rods are light. If this is the case, a strong market is assured for some time to come, as wire rods are rising in price, and, furthermore, deliveries are very backward The market is strong at the advance, and higher prices are looked for. The new price for wire nails is $3.15 per keg base, and for cut nails $3.20 per keg base.

Wire, New Base Price.—The predicted advance in wire has been made, and smooth steel wire is now quoted at $3.30 base, being an advance of 15c. Increase in cost of raw materials is the reason for the higher price, which affects many wire products.

Hay Wire Up.—Hay wire in coils has advanced 10c. The following new prices are for Montreal, with freight to be added for Ontario points: No. 13, $3.30; No. 14, $3.35; No. 15, $3.45, and No. 16, $3.50.

Hay Baling Wire Up.—Prices of annealed cut hay baling wire have been reduced 10c, but the discount has also been reduced from 10 per cent. to 5 per cent. The new prices are as follows: No. 9, $3.90; No. 10, $3.95; No. 11, $4.05; Nos. 12 and 13, $4.15; No. 13½, $4.25; No. 14, $4.40, and No. 16, $4.65. Discount 5 per cent. Prices f.o.b. Hamilton and Montreal, freight equalized.

O and A Wire Advances.—Prices of oiled and annealed wire have been advanced 15c to correspond to the new base price for wire. The new prices are: No. 10, $3.46; No. 11, $3.52; and No. 12, $3.55 f.o.b. Montreal; freight charges for Ontario points to be added.

Wire Bale Ties Advance.—price of wire bale ties have been advanced 10c, and are now quoted as follows: No. 12, $3.60; No. 13, $3.70; No. 13½, $3.75; No. 14, $3.85, and No. 15, $4.05, f.o.b., Toronto, Hamilton and Montreal, with freight equalized.

Wire Cloth Advances.—Prices of wire cloth have advanced 5c. Painted screen in 100-ft. rolls, is now $1.75 per 100 sq. ft., and in 50-ft. rolls, $1.80 per 100 sq. ft.

Poultry Netting Staples.—Prices of poultry netting staples have been revised, and a new discount introduced. Galvanized staples per 100 lbs., in kegs, are quoted at $15.80 and bright staples at $12.25 per 100 lbs. The discount in both cases is 55 and 15 per cent. An extra charge for small lots of 10 lbs. and 25 lbs. will be made.

Rope Market Very Strong.—Another advance in prices of Manila and African hemp ropes, the third in as many weeks, indicates unusual conditions prevailing in the market. Prices were very steady for a long time, but during this period raw materials were rising in price, with the inevitable result that rope had also to advance. There is a shortage of raw materials in the hands of importers, while in addition ocean freight rates are abnormally high, and there is a shortage of tonnage. The market in the States is very strong, which is reflected in the local market. The advance affects Manila, African hemp, sisal, and lath yarns. The new prices range from ½c to 1½c higher, and are as follows: Pure Manila, 20c; British Manila, 16½c; African hemp, 16½c; sisal, 13c; single lath yarn, 12½c, and double lath yarn, 12c per pound. Basis prices for ⅝ in. and larger.

Poultry Netting.—Makers of poultry netting are having considerable trouble in getting raw materials, which are also getting more costly. As cost of production has risen, prices of netting will most probably be advanced in the near future. Deliveries are backward on account of the shortage of raw materials and good demand for netting.

Tire Bolts New Discount.—Tire bolts have advanced, the new discount being 65 per cent., as against 72½ per cent. formerly.

Shoe Findings, New List.—A new list, in effect February 1st. has been issued by makers of shoe findings. The new list is given in the panel, and is net. It will be noted that it differs materially, both as regards prices and arrangement, from the previous list.

Kitchen Utensils.—The advance in copper ware will be noted above. The other lines of ware have not changed, but new prices are expected for galvanized and pieced ware. A good sorting business is reported from the country trade, the returns for the month of January being quite satisfactory.

Copper Ware Higher.—The advance in copper ware predicted in Hardware and Metal has materialized. Higher prices for copper ware have been expected for some time owing to the steady increase in the price of copper. The new discounts are as follows: Copper boilers, 20 and 10 per cent.; kettles, 30 per cent.; tea and coffee pots, 30 per cent.

LONDON

LONDON, Ont., Feb. 3.—Business is good. On every side there appears to be satisfied merchants and prospects for even more business as month advances. Dealers are receiving their booked orders for spring trade. Shipments are also being received by the rural stores. Prices on most lines are firm and many lines still advancing.

Wire nails have advanced 10 cents per keg, and "O" and "A" wire 15 cents per 100 lbs. White lead in oil has again advanced 25 cents per 100 lbs. Rope and shoe thread have also taken an advance.

Linseed Oil.—Quotations on linseed oil are:

	Raw	Boiled
1 to 2 bbls., per gal....	$1.03	$1.06
3 to 5 bbls., per gal....	1.02	1.05
6 to 9 bbls., per gal....	1.00	1.03

Turpentine.—There has been no change in the price of turpentine, 1-bbl. lots selling at 87c per Imp. gallon, 2 to 4 bbls. at 86c, and 5-gal. lots at 94c per gallon.

White Lead Higher.—White lead has advanced 25c per 100 lbs., the new prices being $11.20 in ton lots and $11.50 in less than ton lots.

Putty Unchanged.—There has been no change in the price of putty, Standard in 100-lb. drums selling at $2.85 and 25-lb. drums at $2.95 per 100 lbs. Pure putty is $3.55 in 100-lb. drums and $3.65 per 100 lbs. in 25-lb. drums.

Rope Goes Higher.—There has been an advance in the price of rope, the new quotations being as follows: Pure Manila, 20c lb., base; British Manila, 16½c lb., base; African hemp, 16½c lb., base; sisal, 13c lb., base; deep-sea line, 27c lb., base; coton, 3-16 in., 25c lb., base; cotton, ¼-in. and larger, 24c lb., base.

Nails Advanced.—Wire nails have gone up 10c per keg, the new price being $3.15 base. Cut nails are also $3.15 base.

Fence Wire Higher.—Fence wire remains at former quotations, excepting in "O" and "A" which has advanced 15c per 100 lbs.

Quotations, per 100 lbs., are as follows: Barb wire, $3.75; No. 9 galvd., $3.40; No. 12 galvd., $3.55; No. 13 galvd., $3.65; No. 9 coil spring, $3.45; No. 10 O and A, $3.46; No. 10 O and A, $3.52; No. 12 O and A, $3.60; No. 14 hay baling remains at $3.55.

Fence Staples.—There has been no change in the price of fence staples, kegs selling at $4.20 and 25-lb. boxes at $4.45 per 100 lbs. Bright fence staples are the same price, $3.35 in kegs and $3.60 per 100 lbs. in 25-lb. boxes.

Roofing Higher.—There has been an advance of 10c per square on the cheap grades of roofing.

Iron Pipe Firm.—The price of iron pipe remains the same as shown in last week's panel, and the market is firm.

Other Price Changes.—Shoe thread is up 15c per lb., the advance prices being as follows: Star brand, No. 8, $1.19 per lb.; No. 10, $1.27 per lb.; No. 15, $1.31 per lb.; Barbour thread, No. 8, is $1.34 per lb.; No. 10, $1.42 per lb.; No. 12, $1.45 per lb.; No. 15, $1.52 per lb., and No. 20, $1.57 per lb.

Wrought staples, hasps , hook and staples have advanced from 20 per cent. to 25 per cent. since last issue.

Fittings Higher.—Malleable fittings are now subject to a discount of 30 per cent. and 5 per cent.; bushings 65 per cent., unions 65 per cent., and plugs 60 per cent. and 5 per cent.

Shot is now subject to 30 per cent. discount. Chilled shot has advanced to $1.50 per 100 lbs.

Solid sash weights are selling at $1.60 per 100 lbs. Sectional 1-lb. and ½ lb. are $2.25 per 100 lbs.

The new discount on tire bolts is 65 per cent.

Glass.—Glass remains firm, single and double diamond being subject to 30 per per cent. discount, and cut lights net list.

Screen Wire.—100-ft. painted rolls are $1.70, and 50-ft. rolls $1.75. Bronzed

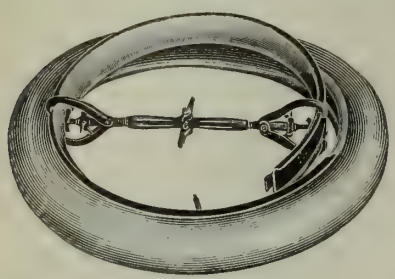
NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

O.B. TIRE TOOL

The O.B. Tire Tool Company, Eighteenth and Gratiot Streets, St. Louis, Mo., U.S.A., have placed on the



O. B. Tire Tool

market a tool for removing and replacing tires on split demountable rims.

The cut illustrates how the diameter of the rim is decreased to allow the tire to fall off the rim. To replace the tire the rim is shoved back into place, gripping the tire instead of the tire having to be forced over the rim. The operation of the tool is after the style of a jack, the screw being used to draw the rim from the tire and to replace it again.

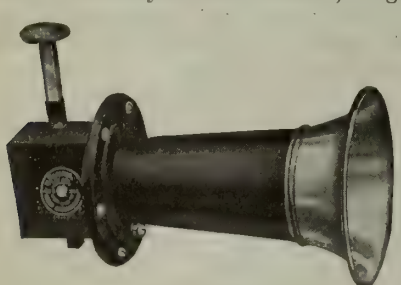
The makers claim that the O.B. tool is very easy to operate, and that it prevents pinching the inner tubes, and also saves the valves from danger.

They claim that the tool saves a great deal of time and labor.

This tool is made of malleable iron, and is oxidized. It is sold under a guarantee, and is applicable to any split demountable rim.

SAMPSON-LION HAND HORN

The American Electric Company, State and Sixty-Fourth Streets, Engle-



Sampson Hand Horn

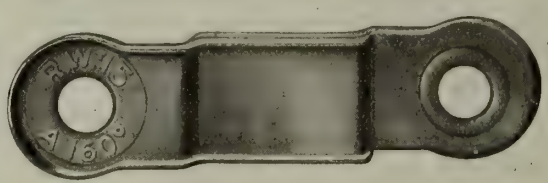
wood Station, Chicago, Ill., U.S.A., has recently placed a new auto horn on the market, called the Samson Lion.

The manufacturers state that the most important feature of this new horn is its simplicity, there being only one movable shaft in use, and it is supported between two bearings. It is claimed that no bushings are required, because the gears are made of steel, and because there are no soldered joints to work loose.

The company describes the pinion and strike wheels as being cut from one solid piece of steel, and every tooth of the strike wheel is said to be ground to produce a uniform tone. The square shape of the gear box is a new idea. The horn operates on the push-down principle. The length over all is eleven inches, and the horn is furnished in black with brass or nickel trimmings.

NEW FUSIBLE LINK

Richards-Wilcox Canadian Company, Ltd., London, Ont., offer to the trade a new fusible link, No. 96. The makers state that the link has been approved by



No. 96 Fusible Link

the Underwriters' Laboratories, and is for use where a labeled link is called for. The links are made, inspected and tested under the direct supervision of the Underwriters' Laboratories, and are packed one hundred in a box, with the underwriters' label as a seal.

THREE NEW DELTA FILES

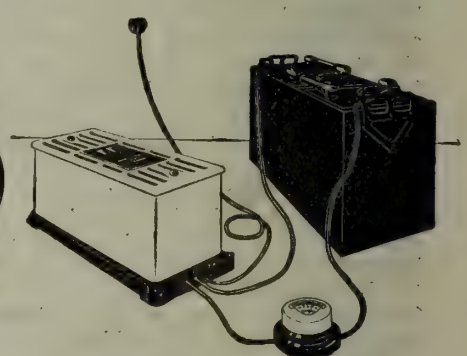
Delta File Works, Philadelphia, Pa., are directing the attention of the trade to three new hand saw files which have recently been placed on the market. The particular feature of the files is that they are very much longer than the usual shapes used in the same cross section or face of the file. The makers state that the files are made absolutely of crucible steel, with a deeper tooth and the correct angle that will insure the greatest efficiency. The three files are carpenter special, mechanic's favorite, and expert's choice. Each represents a special length, retailing at popular prices. The makers state that the retailer can practically take care of his hand saw file business with three files instead of his method heretofore of carrying eight or ten different sizes and widths.

The longer sweep of the files, it is claimed, economizes the time of the user so as to be able to do twice the work in half the time.

Attractive signs, featuring the new files, have been prepared for use in the retailers' stores. Complete descriptive matter will be mailed on request.

BATTERY CHARGER

An alternation current battery charger is now being sold by the France Manufacturing Company, 1434 West 75th Street, Cleveland, O., U.S.A. The charger is said to be made especially for



Battery Charger

charging batteries at home. All starting, lighting, and ignition batteries as used in automobiles require charging at certain periods. This, the France Company claim, can be done over night by use of their machine. In the case of motor cars, it is claimed, the batteries may be recharged without being removed from the car.

To operate the device, a plug is screwed into any standard electric light socket and the current turned on. The positive and negative wires from the charger are attached to their corresponding posts on the battery. There is an ammeter to indicate the charging rate. The machine is said to be auto-synchronous and furnished in multiple type for garages, capable of charging single cells, four 6-volt, two 12-volt, one 18-volt, or one 24-volt battery at a time.

THE JUNIOR CLERK'S PAGE

Why Do Customers Pay You More?

Clerks are Often Perplexed by Statements Made by Customers Regarding Prices Quoted Elsewhere—Very Often the Customers are in Error.

IT is not only uncomfortable, but often perplexing, to be confronted with opposition dealers' prices, especially when it happens that the customer can get things very much cheaper somewhere else. But what is even more perplexing is that the customer often comes back for the very articles which he has said he can buy "for half the money" nearer home, or from the big advertiser or the mail order house.

It is uncomfortable for the clerk. He knows that mistakes occur, and that he may be in the wrong. He does not like to dispute with the customer. It's bad policy. Yet he may feel that his price is right. It may be marked on the article. That even does not always satisfy the buyer, for he is positive of the exact value and to the best of his knowledge, he is right. The clerk is often placed in this quandary. He does not like to let the customer go elsewhere, nor does he feel, and perhaps he has not the authority, to alter the price. Often the customer becomes almost unbearable, and on two or three returns to the store is nicknamed "Bargain Hunter," "Know It All," or some other appropriate title is inflicted upon him.

Surely there are some ways and means which prove helpful in meeting these setbacks. Perhaps the clerk was mistaken, or perhaps the person who marked the goods was responsible, but most likely the clerk was right, and the customer was in the wrong. Though, of course, it often happens that the customer was most sincere in his belief that the price was too high.

It may be that the customer has been quoted an erroneous figure elsewhere. Perhaps it was a year or even years ago when the customer saw the goods at a lower price. It may have been a special price for one day or to clear the line out, and very possibly it was an inferior article, but with the same appearance. Sometimes it happens that a special price has been quoted on some line as a bait for further purchases, but most likely it is the price advertised by some competitor, or, to speak more correctly, the price the reader believes the advertisement stated.

Traveller Trips Up Customer

A Toronto traveller was sitting on one side of a counter and the merchant on the other side when a big, husky chap came in and asked what discounts the merchant would give him on five gross of screws. The merchant had quoted this same man on goods before, but seldom had the pleasure of making a sale. Thinking perhaps he could make a permanent customer, he quoted three discounts,—per cent.,—per cent.,and—per cent. The man carefully jotted down the figures and went out.

Five minutes afterwards the traveller also went out, crossed the road, and entered another hardware store. Here he did not sit on one side of the counter, but went behind a partition—away from the store proper.

It was not more than another five minutes before the big, husky man walked in and asked "What discounts will you give me on five gross of screws?"

The same three discounts were quoted.

"I can get those three and another fifteen per cent. off from the chap across the road," said the customer.

Merchant No. 2 hesitated a minute, and then said: "Well, if he can, I will."

Hearing the merchant's answer, the traveller called him to the back of the shop, saying:

"It is not my place to say what price you should ask for screws or any other commodity, nor is it my place to carry prices from one store to another, but because that man is lying, I am going to tell you exactly what your opposition dealer quoted."

The merchant went back and asked the customer if he was sure the extra fifteen per cent. had been mentioned.

"Positive. Just came from there."

The merchant called the traveller. The man backed down. The drummer delivered an extemporary lecture, and the customer excused himself by saying he thought an extra fifteen per cent. wouldn't make much difference. He bought the screws, and has been an uncomplaining customer since.

Some Lines Sold Close

It is a customary thing with hardware merchants in every direction to sell some lines on a very close margin. Nails, for instance, are often quoted exactly the cost to the merchant. Glass is in many cases another non-productive line, except when sold in small panes. Close prices are often quoted on these two lines purely and simply because they are expected to precede the order of more profitable wares.

Being accustomed to selling nails by the keg, a clerk quoted 3¼ cents over the 'phone for this line.

"Send me up a pound of two-inch and put in some larger ones to make up the even coppers," ordered the voice at the other end of the wire, totally ignorant of the value of nails, and never thinking of the trouble and expense she was asking the dealer to settle out of his trivial profit.

Trying to do a wholesale business in nails often makes the customer think he is paying too much when only buying a small quantity.

Some Houses Run Specials

There are certain houses that run "specials" once a week or twice a month. The merchant with one price day in and day out is often confronted with these quoted prices—prices which sometimes are only a cent or two below regular price, and on some occasions are higher than the merchant receives in a regular way.

There were a half-dozen compass saws laying on a dealer's counter one Friday. "How much are these?" the merchant was asked. "Thirty-five cents," he replied. The customer laid the saw down and went out. On the following Monday he returned. "Look at that for a quarter. Same thing you asked me thirty-five cents for," he exclaimed, holding up a compass saw.

The dealer looked at it, and then looked at the man.

"We have had twelve of this make in for twelve months. Our price was twenty-three cents until to-day. There they are on the counter marked nineteen

(Continued on page 58)

WEEKLY PAINT DEPARTMENT

Competing With Department Stores

Department Stores and Mail Order Houses Sell Paint During the Winter — How to Meet the Competition—Points in Favor of Retailer's Brands—Value of Co-operation

HARDWAREMEN who hold the opinion that ready-mixed paints cannot be sold in mid-winter would probably be surprised if they knew the extent of the business done by department stores and mail order houses during the winter months.

At the time of writing one large department store in Canada is using considerable newspaper space, window space, and show cards in the paint department, to feature a February sale of paints. While it must be admitted that a cheap paint is being offered for sale, the fact remains that many thousands of quarts will be sold before the end of the sale, thus demonstrating that the public will buy paint during the winter months.

Price alone does not sell the paint. Many people are rather skeptical when they are appealed to on a price basis only. The department store suggests that inside painting be done now, and that woodwork, floors, walls, etc., be brightened up.

The advertising of the department store has a far-reaching effect. Not only does it benefit the department store, but it indirectly benefits many retail hardware firms. When a department store puts on a big paint selling campaign, it drives many people to the hardware stores. Some ask for a cheap paint at a price that will compete with the department store price. Other customers do not seem very much interested in the department store's price. They have been stirred into action by the department store's advertisement, and have found out that they can do their inside painting and decorating now, instead of leaving it until spring.

Retailer vs. Department Store

It is up to the retailer to use the very best of care when handling these customers. The retailer is up against a low-priced paint. Very often the department store is selling the paint at a lower price per quart than the price the average retailer pays the manufacturer for the nationally known brands of paints.

How are the retailers going to meet the department store or mail order competition?

Some retailers report that they successfully fight the competition of the department store and mail order houses. Other retailers claim their sales have suffered.

In the first place, the department store has its paint put up under a private brand. The retailer can comment on this feature as he sees fit. The department store has only a limited range of colors to offer, when compared with the wide range of colors carried by the retail hardware merchant. This is a point that all retailers should emphasize strongly when talking to customers who refer to the department store's line of paint.

The department store puts on a sale of paint at a low price, but states that the paint will only be supplied at the cut price while the supply on hand lasts. After the supply runs out, the customer will have to pay a higher price; but he cannot tell how much higher it will be. Then there is the difficulty in matching colors. The retailer who carries a line of paint made by a good reliable manufacturer can always match up the colors for customers who may want additional supplies of paint of a certain color. There is very often considerable difficulty in matching up the colors when they are bought in department stores under private brands.

It also happens in many cases that department stores put on a sale of paint in one size only—say, for instance, the quart size. Quarts, however, are the only size you can purchase. The result is that many customers who run short and need only a pint more to finish the job cannot purchase the smaller quantity.

Paints for all Purposes

Still another point worthy of consideration is that some of the sales clerks in the department store will state that the paint offered is good for all purposes. It is first-class, they say, for finishing walls, woodwork, floors, farm implements, and for dozens of other purposes. It is a regular paint for all purposes, and, according to some of the sales clerks, is equally as good for one purpose as for another. The retailer, on the other hand, has a paint for every purpose, and if he knows his stock well, and is a good salesman, he can easily convince a customer that one kind of paint will not do for all purposes, and give the best results.

In order to make permanent customers, greater care is required in paint salesmanship than in selling any other hardware line. A misinformed customer, by improper application due to a lack of knowledge of how to use the goods, will often make a poor job with the best paint made. Department store paint salesmen, as a general rule, have a very limited knowledge of the proper use of painting materials. The hardwareman is generally well posted on paints and their uses. No firm can secure the best results unless they have salesmen behind the counter with the ability to recommend and sell the right product, the correct shade, and the one best adapted to the needs of each particular customer.

Co-operation Between Retailers

There is great need for co-operation between retail hardwaremen in educating the public regarding paint values.

A story is told of two located retailers in a fair-sized town, where many of the townspeople followed closely the advertising of the department stores and mail order houses. Many people in the town had grown into the habit of sending their money away to the large city store for supplies.

Both retailers handled high-grade paints made by nationally known manufacturers. There was in neither line any great talking point which was not pertinent to the other paint.

There was a great difference in the sales methods of the two retailers. The first merchant would say nothing good regarding his competitor's paint. Instead, he deliberately knocked the competitive brand. If he could not land an order from a customer, he tried his best to give the prospective customer the idea that the competitor's line of paint was very inferior.

The second merchant was different. He did not knock. When asked by a prospective customer regarding the

paint sold by the first merchant, he admitted that the two paints were made by two leading manufacturers, and that from a quality standpoint either was perfectly reliable.

The result was that the merchant who could see nothing good in his competitor's article sold comparatively little paint. The second merchant did a very nice business. But the department store or mail order house did more than the two merchants combined.

One merchant openly denounced the merit of his competitor's product, and the other admitted that the two paints were on a par so far as quality was concerned. The result was that many customers wondered if both paints should not be avoided. The doubting customers were easy marks for the mail order houses who were pushing their paints largely on a price basis. Both merchants suffered as a result.

It would have been much better for both merchants if they had co-operated together and conducted a campaign of education to show the consumer the advantage of buying the products of nationally known manufacturers from the local merchants. Many more sales would have been made at home, and in the long run the customers would have been better satisfied. Co-operation will assist in combating department store and mail order competition in the paint trade, even though the retailers of a town carry different brands of paints.

WEEKLY PAINT MARKETS

(Continued from page 60.)

been reached. The market is firm with advance and bookings for spring delivery are good.

Mixed Paints More Active.—The proposed advance on ready mixed paints has already had the effect of stimulating business and more nice spring orders have been booked. Consumers are evidently covering for their requirements before the new prices go into effect. The proposed higher prices given last week are purely tentative and there is a possibility these being increased as raw materials continue to advance and there are no indications of any recession.

Red Lead Higher.—The pig lead market has also affected red lead which has advanced. Red lead in 500 lb. casks is now quoted at $11.00 and in 100 lb. kegs at $11.50 per 100 pounds.

Dry White Lead Higher.—Prices of dry white lead have advanced in sympathy with the pig lead market. Dry white lead is now quoted at $11.50 per 100 lbs. in 500 lb. casks and $12.00 in 100 lb. kegs.

Gasoline Firm.—The market is very firm and although prices of gasoline and benzine have not advanced, there is a possibility of higher prices in the near future. Canadian crude oil has advanced 5c and Pennsylvania crude 10c. There is no improvement in the situation. gasoline is quoted at 28½c and benzine at 28c per gallon.

Putty is Firm.—Business is quiet but prices are holding very firm due to the cost of raw materials. There is practically no whiting coming in, and what little there is, is increasing in cost. The following prices are being quoted in Toronto for standard putty in less than ton lots.

	Per 100 lbs.
Bulk, in casks	$2.65
Bulk, in 100-lb. drums	2.85
Bulk, in 25-lb. drums	2.95
Bladders, in barrels	3.25

Pure putty, 70c per 100 lbs. advance.

WEEKLY HARDWARE MARKET REPORTS

(Continued from page 53.)

screen wire is 8 cents per square foot and cut is quoted at 9 cents per square foot.

WINNIPEG

WINNIPEG, Feb. 3.—Business for February has started with a rush, and jobbers are looking forward to a splendid report for the end of the month. There were a great many cars booked for February 1 shipment, and these are being taken care of as quickly as possible. The jobbers are all prepared to handle orders in good style, and, although there will be difficulty in securing some lines, they expect that the bigger percentage of the orders will be shipped complete. There is no doubt that the jobbers have had their own troubles in placing their orders with manufacturers who could supply the goods, but they have met the situation in a careful manner, and it is to be hoped that there will be no serious delays in the retailer receiving his goods.

Many Price Changes.—Another big list of price changes has gone through during the past week, and this is affecting nearly every line into which steel or iron enter the manufacture. As a matter of fact, it would seem as though nearly every line which the jobber carries will be affected to some extent.

Pocket Cutlery Advances.—One of the most notable advances which has gone through is that applying to English pocket cutlery, the advance in some instances ranging as high as 20 per cent.

Another line to be affected is Barbour's shoe thread, and prices to-day are very much higher than they have been in the past.

Butts and Hinges Higher.—All lines of steel hinges and butts have taken an advance in price of at least 5 per cent., and new prices on some of the items are given below.

HEAVY STRAP HINGES, IN BULK

4-inch, $1.52 doz. pairs; 5-inch, $1.85 doz. pairs; 6-inch, $2.00 doz. pairs; 8-inch, $2.75 doz. pairs; 10-inch, $4.90 doz. pairs; 12-inch, $6.00 doz. pairs.

HEAVY T HINGES, IN BULK

4-inch, $1.30 doz. pairs; 5-inch, $1.50 doz. pairs; 6-inch, $1.60 doz. pairs; 8-inch, $2.10 doz. pairs; 10-inch, $3.45 doz. pairs; 12-inch, $5.60 doz. pairs.

CORR. STRAP HINGES, BULK

4-inch, 90c. doz pairs; 5-inch, $1.25 doz. pairs; 6-inch, $1.70 doz. pairs; 8-inch, $2.80 doz. pairs; 10-inch, $4.20 doz. pairs; 12-inch, $6.15 doz. pairs

CORR. T HINGES, BULK

4-inch, $1.15 doz. pairs; 5-inch, $1.60 doz. pairs; 6-inch, $1.90 doz. pairs; 8-inch, $3.25 doz. pairs; 10-inch, $4.60 doz. pairs; 12-inch, $6.50 doz. pairs.

Pipe to Advance.—It is expected that another advance will go into effect this week on iron pipe following the advance noted in the Eastern market reports last week.

White Lead Advances.—White lead in oil has advanced further, and quotations for pure lead ground in oil are now $12.10 per 100 lbs., in ton lots, and $12.40 per 100 lbs., in less than ton lots.

Rope Advances.—Rope has also come in for two changes during the past week, and the revised prices will give an idea as to what extent this line has been affected. Quotations are now as follows: Pure Manila rope, 21½c lb. base; British Manila rope, 17½c lb. base; African hemp rope, 17½c lb. base; sisal rope, 14c lb. base; lath yarn, 13½c lb. base.

Shoe thread has also advanced, and the following prices are now in effect for Barbour's shoe thread:—No. 8, in 1 and 2 oz. balls, $1.45 per lb.; No. 10, in 1 and 2 oz. balls, $1.55 per lb.; No. 12, in 1 and 2 oz. balls, $1.60 per lb.; No. 15, in 1 and 2 oz. balls, $1.65 per lb.; No. 20, in 1 and 2 oz. balls, $1.70 per lb.

Sash cord, No. 8, is now quoted at 35c per pound. Caldwell sash balances are now quoted at 33 1-3 discount

WHY DO CUSTOMERS PAY YOU MORE?

(Continued from page 55)

cents. The saw you were looking at on Friday was worth three of them."

Sometimes it proves helpful to keep opposition dealers' advertisements on file and refer to them when their prices are quoted. It may save confusion and dispel doubt.

And there's many another thing to keep in mind when your prices are questioned—one of them is the peculiarity a lot of people have for returning, even though other dealers' prices are "away below yours."

ALLIES PURCHASING AGENTS

The Trade and Commerce Department, Ottawa, has published the following list of purchasing agents for military purposes for the allied Governments:

International Purchasing Commission, India House, Kingsway, London, Eng.

French.—Hudson Bay Co., 56 McGill Street, Montreal; Captain Lafoulloux, Hotel Brevort, New York; Direction de l'Intendance Ministere de la Guerre, Bordeaux, France; M. De la Chaume, 28 Broadway, Westminster, London.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Feb. 4.—There has been considerable activity in the paint trade following the announcement of the general advance on ready mixed lines to which reference was made last week. However, it is yet early to judge the full extent of the effect of the increase, as many of the travellers are just taking the road with the new quotations. It is expected that retailers who had not already placed their spring business will at once book with specifications to take advantage of the period of grace until March first when new prices go into effect— a concession made largely for their benefit. Although still further increases are warranted, and will undoubtedly be made unless there is some general reaction in the situation as regards the cost of raw materials, the abnormally high and uncertain position of the market will have a tendency to curb speculative buying to any great extent beyond requirements.

The advance announced—10c on colored lines and 15c on whites—did not by any means cover the increase in the cost of raw materials. Attention has previously been called to this phase of the situation in which the tenseness has been increased by a further advance on white lead and prospects of still higher prices. In other departments prices are being firmly maintained. Under these conditions manufacturers see no other course than to make further increases. However, it is not expected that quotations will be further disturbed until the end of the present selling season. In the meantime if there is any material reaction higher prices may not be found necessary—but indications of that reaction are not at present in evidence.

White Lead Up Again.—As indicated in last report still another advance on white lead has been announced. The quotation on the ton basis is now $11.05 as compared with $8.20 at the beginning of the war. And it would appear that the worst has not happened. The last advance of 25c compared with an increase in dry white of 50c, and, as the situation has become even stronger since. another rise of 25c may be looked for almost immediately while 50c would not be a matter for surprise.

Linseed Oil Easier. — Although the market has been somewhat easier recently for flax, this tendency has not been felt in the linseed oil situation locally, further than that advances appear to have been checked. As has been previously pointed out the movements of raw material cannot be connected too closely with the linseed oil market. Recently the movement of flax was such that it represented a higher cost of manufacture than the market would stand with the consumption comparatively small. The result was that demand was filled from the floating supply and, even with the reduction in raw material referred to, crushers report that they could not produce at the market quotations. The market basis may now be regarded as comparatively firm at $1.06 and $1.09 for raw and boiled respectively; some business is being still done on a basis of $1.03 and $1.06 but these prices are to be advanced.

Gasoline and Benzine Firm. — The market for gasoline and benzine is steady and strong. The outlook is for still higher prices in sympathy with the American situation which indicates a coming shortage of supplies. Refiners repeat their prediction of an early advance. Local quotations follow:

Gasoline, in barrels	29c
Gasoline, in drums	26½c
Gasoline, tank wagon	26c
Benzine 1c lower.	

Turpentine Unchanged.— The turpentine situation shows practically no change since last report. In the local market the quotations continue at 82c to 84c on the single barrel basis with the usual allowances for larger orders; the bulk of the business passing appears to be at the top of the range.

Castor Oil.—The situation as regards castor oil continues to become acute. The shortage of supplies are such that prices are purely nominal and quotations will depend upon the source of the inquiry to a considerable extent. The market is nominally placed at 30c.

Other Oils.—In the miscellaneous oils there has been a strong upward movement for some time, fish neatsfoot, and lard being particularly affected. Fish oils is quoted from 60c to 80c; neatsfoot oil is quoted $1.10 and higher and lard oil also $1.10 and above.

Red Lead Higher.—With the upward movement of pig lead, dry white and red lead have been affected. A recent advance of 50c was made on white and red is now on the following basis:

Casks 560 lbs.	$10.50
Casks 100 lbs.	10.87½

TORONTO

TORONTO, Ont., Feb. 3. — The sharp break in the linseed oil market and another advance in white lead in oil are the outstanding features in the paint market this week. The drop in prices of oil was not unexpected as the market was not heavy and the high prices practically shut off what little business was offering. The advance in white lead is the third within three weeks and a further advance is not unlikely as the pig lead market is very strong. The proposed higher prices for ready mixed paints has had a stimulating effect on business, spring bookings are reported as being very satisfactory. Dry white lead and dry red lead have also advanced. The glass situation is unchanged and prices are firm although business is quiet. The turpentine market is very steady but quiet and the demand is light. Castor oil is very scarce and prices are nominal.

Big Drop in Oil.—A sharp break in the linseed oil market has brought prices down from $1.09-$1.12 to $1.02-$1.05. There is no doubt that prices were forced up too quickly notwithstanding the fact that flax seed was very high at the time. The high price of oil cut off what little business was offering and the present level is far more in line with the situation. In these columns last week it was suggested that a decline was very probable, if only temporary. Flax seed has quite recently dropped to around $2.14 at Winnipeg which looks as if speculators had been operating. Although seed is cheaper the freight situation has not improved and seed is coming last. Some Argentine seed has been imported at New York but there is none coming to Canada. The demand for oil is very light and prices are practically nominal. It is reported that there has been some price cutting and $1.00-$1.03 has been heard but the prices given below are more generally being quoted in Toronto.

	Raw.	Boiled.
1 to 2 barrels	$1.02	$1.05 per gal.
3 to 5 barrels	1.01	1.04 per gal.
6 to 9 barrels	0.99	1.02 per gal.

Turpentine Steady.— The market is steady and there is nothing of interest to note. Prices at Savannah are stationary and the situation there unchanged Locally the demand is light and prices unchanged as follows: 1 barrel lots 87c; 2 to 4 barrel lots 86c; 5 gal. lots, 95c per Imperial gallon.

White Lead Again Advances. — The extraordinary upward movement in white lead continues and prices have advanced 25c since last week. This was not altogether unexpected as since the last advance was made pig lead advanced from 5.90c to 6.10c at New York. White lead is now quoted at $11.20 per 100 lbs. in ton lots, which represents an advance of 90c since the movement started. There is nothing to indicate that the top has

THE CANADA METAL COMPANY, LIMITED

TORONTO MONTREAL WINNIPEG

MOORE'S

House Colors

A paint quality that pleases the best of painters and a price that appeals to the pocket book.

Our manufacturing and selling methods enable us to put an A1 quality on the market at a comparatively low price.

Once Known—Always Used

A user of Moores' House Colors is pleased with his purchase—he becomes a good, steady customer for paints and incidentally you sell him other goods as well.

Better send your request for details of our proposition—it's a sure money-maker.

STANDARD GRINDERS after FIFTY YEARS

Fifty years make half a century, and it takes a mighty good article to hold supremacy in its class all that time. Cleveland Grindstones have done it! That's because they are made of genuine Berea Grit, the finest all-round abrasive known, which has a fine, even texture all through. Furthermore, every Cleveland Grindstone is specially selected by our expert graders, and we ship to a dealer only the grit best suited to his customers. You'll be "playing safe" and will make sales without a come-back if you handle

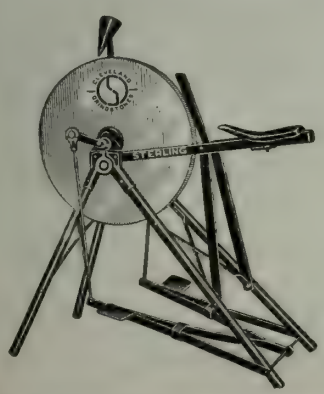
CLEVELAND Grindstones

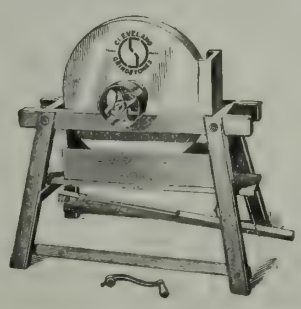
Sold only to Hardware and Implement Dealers

If you handle grindstones stamped with the quality mark shown above, you will be sure you're getting the **only** Berea Grit. You'll be backed by an unlimited supply, best factory equipment, expert workmen and a FAIR DEAL. Cleveland Grindstones will help you get the business that now goes out of town.

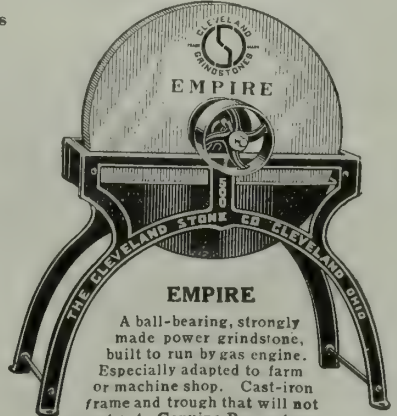
To start the ball rolling, write for illustrated Trade Price List. Tell us your jobber's name. Ask also for our famousbook, "How to Keep Mail Orders at Home."

The Cleveland Stone Co.
Leader-News Bldg., CLEVELAND, O.





Farmer's Special Model (Hand or Engine Power)



EMPIRE

A ball-bearing, strongly made power grindstone, built to run by gas engine. Especially adapted to farm or machine shop. Cast-iron frame and trough that will not rust out. Genuine Berea stone. One of the many fine models of CLEVELAND GRINDSTONES

UNIVERNISH

The Universal Varnish

A Splendid Varnish for Every Purpose

For Floors

Hot Water won't hurt it.
Furniture won't mark it.
A dent in the wood won't break it.

For Furniture

Hot dishes won't hurt it.
Alcohol or Ammonia won't stain it.
Boiling water won't mark it.

For Boats

Fresh or salt water won't affect it.
Wind and rain will not harm it.
It will never turn white.

Put up in attractive boxes of twelve quarter pints to retail at 25c. each. Also put up in all the regular larger sizes.

Your Sales Will Increase If You Feature This Line

Stephens'

SILKSTONE

(REGISTERED TRADE MARK)

FLAT WALL COLOURS

"Silkstone" is a business-builder—a producer of substantial profits — giver of universal satisfaction.

"Silkstone" can be washed with soap, without losing any of its beauty.

It is *sanitary* and *durable.* Is more economical than distemper colours and can be used where distemper cannot.

Dries smooth as silk, hard as stone.

Send us a trial order and test its selling qualities.

Have we an agent in your town?

If not, write us for agency proposition.

Make Your Local Advertising Pull More Business

Hundreds of Canadian hardwaremen are making their local advertising, their circulars and booklets pull more business for them, by using small electros to brighten up the reading matter.

We can supply you, just the same as we have these other hardwaremen, with these electros, at the small cost of 15c each. Every cut is mounted on wood ready for use when it leaves our office.

A few of the many electros we have in our assortment are shown on this page and if you wish sheets showing our complete list, drop us a card and sheets will be sent at once.

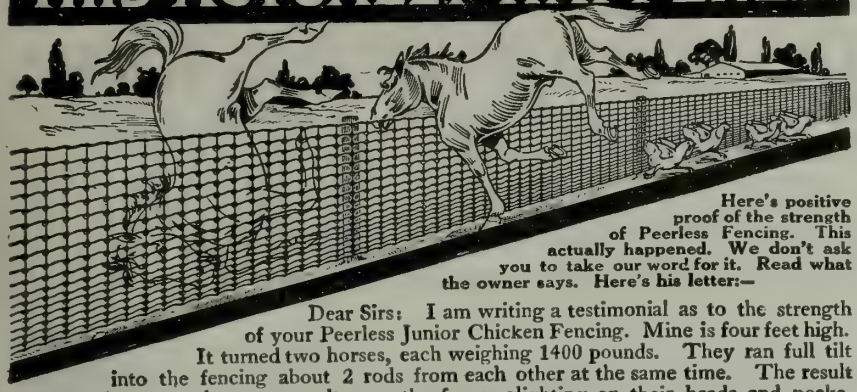
HARDWARE & METAL

ELECTRO SERVICE DEPARTMENT

143-153 University Avenue - TORONTO

MONTREAL WINNIPEG

THIS ACTUALLY HAPPENED



Here's positive proof of the strength of Peerless Fencing. This actually happened. We don't ask you to take our word for it. Read what the owner says. Here's his letter:—

Dear Sirs: I am writing a testimonial as to the strength of your Peerless Junior Chicken Fencing. Mine is four feet high. It turned two horses, each weighing 1400 pounds. They ran full tilt into the fencing about 2 rods from each other at the same time. The result was that they turned a somersault over the fence, alighting on their heads and necks, scratching them up some, but the fence remained intact. Yours truly,

Joe Boothroyd, Surrey Center, B. C.

Think of it! A dead weight of nearly a ton and a half coming with violent force against our poultry fencing—not field fencing—and yet

Our PEERLESS Junior Poultry Fencing Held

What greater test can you ask? We build it stronger than is necessary under ordinary circumstances. We build it of Open Hearth steel wire with all the impurities burned out and all the strength and toughness left in. Well galvanized. Every intersection is locked together with a Peerless Lock. Top and bottom wires of Peerless Poultry Fencing are heavy—extra strong. Consequently, fewer posts are required. Peerless fencing can't sag—can't get out of shape—can't help giving absolute satisfaction.

Catalog giving details on request. Describes our poultry, farm and ornamental fencing, also Peerless farm gates.

Agencies almost everywhere. Agents wanted in all unassigned territory.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and a clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for machine. Packed singly—packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

BROOMS BROOMS BROOMS

NICKEL

SHOT—High and Low Carbon
INGOTS—Two Sizes
25 lb., 50 lb.

Electrolytic Nickel 99.80%

Prime Metals for the manufacture of Nickel Steel, German Silver, Anodes, and all remelting purposes. Our Nickel is produced as rods, sheets, strip stock, wire and tubes.

MONEL METAL

We are Sole Producers of this natural, stronger than steel, non-corrodible alloy. Manufactured forms are rods, flats, castings, tubes, sheets, strip stock and wire. Ask for descriptive booklet.

Send inquiries direct to us.

THE INTERNATIONAL NICKEL COMPANY

43 Exchange Place, New York.

LONDON BAR IRON

High Grade

Our iron bars are tough, fibrous and corrosion-resisting, just such bars as your blacksmith friends want to use. Why not carry them in stock for your customers, or if you prefer, have them direct shipped from the mill?

London Rolling Mill Co.,
Limited
LONDON, - ONTARIO

SALES AGENTS
Manitoba — Bissett & Webb, Ltd., Winnipeg.
British Columbia — McPherson & Teetzel, Vancouver.

SEPARATE SEALED TENDERS, addressed to the undersigned, will be received at this office until 4.00 P.M., on Tuesday, February 15, 1916, for the supply of: "Brooms and Brushes," "Chain," "Coal," "Hardware," "Hose," "Oils and Greases," "Packing," "Paint and Paint Oils," "Manilla Rope," "Wire Rope," and "Steam Pipe, Valves and Fittings," for the requirements of the Departmental Dredging Plant in Ontario and Quebec during the fiscal year 1916-17.

Each tender must be sent in a separate envelope and endorsed: "Tender for Hardware, Ontario and Quebec," "Tender for Chain, Ontario and Quebec," etc., etc., as the case may be.

Persons tendering are notified that tenders will not be considered unless made on the printed forms supplied, and signed with their actual signatures. These forms can be obtained at the Department of Public Works, Ottawa.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honourable the Minister of Public Works, for amount stated in form of tender, which will be forfeited if the person tendering decline to enter into a contract when called upon to do so, or fail to complete the contract. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,

R. C. DESROCHERS,
Secretary.

Department of Public Works.
Ottawa, January 21, 1916.

Newspapers will not be paid for this advertisement if they insert it without authority from the Department.—90556.

TORONTO

"NORCROSS" Cultivator-Hoes and Weeders
A class of garden tool that's rapidly replacing ordinary hoes and weeders. Users recommend them to their neighbors because more work and better work can be done in less time.
They are imitated (as all good things are) but far from being equalled in quality and service.
BOOSTING THEM MEANS BOOSTING YOUR SALES AND PROFIT.
A postal will get you our 16-page interesting cultivation booklet, with address of nearest Canadian jobber.

C. S. NORCROSS & SONS
Manufacturers
Bushnell Ill., U.S.A.

You Can Never Tell a good battery by appearance
You've got to put them to the test to detect their real value.
"North Star" Dry Cells
have become the favorites of all who know—they have demonstrated their superior merits by their services.
THE WESTERN BATTERY FOR THE WESTERN NEED.
First sales invariably result in repeat orders.
Boost them now. Your jobber will supply you quickly.

What Your Inventory Will Show

Cut Courtesy of System—The Magazine of Business

Having finished your January stock-taking you are probably working on your inventory in an effort to find out exactly where you stand.

You will expect your inventory to show you the value of your stock **to-day.** If you depended upon your invoices for prices you would be cheating yourself for nearly every article in your store is worth more to-day than it was when you bought it.

With prices jumping as they have been for months, what a hopeless task it would be to take off your inventory if it were not for Hardware and Metal's Current Market Quotations. You may depend upon their accuracy. They are invariably accepted by insurance adjusters and valuators.

Your inventory will show that your stock in some lines is running very low. Here again, let Hardware and Metal come to your rescue, with its advertising pages full of information supplied by the most reputable manufacturers and jobbers serving the Canadian trade. You are safe in dealing with our advertisers, because no questionable firm can buy advertising space in Hardware and Metal.

J. G. L.

MR. J. MOOREHOUSE, OF WINNIPEG, SECURED THIS FINE BLACK-TAILED DEER WITH HIS ROSS .280.

Like many other experienced hunters and guides, Mr. Moorehouse is loud in his praise of the accuracy and tremendous anchoring power of the 'Ross .280' and its sporting ammunition with copper tube Expanding Bullet (pat'd.)

While the Ross .280 is the most powerful of the Ross Models, any of the .303 Sporting Models give excellent results and the trajectory is as low as that of almost any of the high power rifles sold. The popular prices of these models—they retail $25.00 and up—make them general favourites.

Sportsmen are guided in their choice of a rifle by the judgment of the men who know, and the best guides vote for the "Ross." Be prepared and remember that your stock of Sporting Rifles is incomplete without a showing of the Ross Sporting Rifles and Ammunition.

For catalogue, discounts etc., write

ROSS RIFLE COMPANY - Quebec

P.S.—Of course no stock of rifles is complete without the Ross Cadet Rifle, the .22 calibre arm which is achieving such prominence just now.

HELLER-ALLER TANK HEATER

the only thing on earth that will keep a stock tank from freezing

Heater is Made of High-Grade Charcoal Iron, and Will Remain on Bottom of Tank Without Being Fastened Down.
